Solid solution and carbide strengthened arc melted alloys of hafnium with tungsten and ternary alloys of tantalum, columbium, rhenium and carbon 06 p0894 A66-16078

Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 07 p1049 A66-17905

Oxidation kinetics of pure tungsten and tungsten alloys with various niobium content, at high test temperatures 07 p1050 A66-18065

Solid solubility of Be in W and properties of tungsten-richest beryllide 08 p1235 A66-18623

Tungsten diboride preparation and structure 08 p1235 A66-18636

Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18902

Radioactive isotopes of Mo99 and W185 used to study diffusion of two components of Mo-W alloy at intervals of 100 degrees over temperature range 1500 to 2400 degrees C 09 p1389 A66-20540

Oxidation resistance enhancement in tungsten base alloys by addition of refractory metal oxide particles 10 p1547 A66-21783

Porous structures for ion engine application, discussing ionizer materials preparation, based on powder metallurgy and two-phase tungsten base alloy [AIAA PAPER 66-221] 12 p1896 A66-24528

Depressing effect of hafnium and zirconium on work function of tungsten, tantalum, niobium and rhenium 14 p2314 A66-27369

Ductility enhancement of tungsten by rhenium addition due to modification of grain boundary precipitate morphology 16 p2722 A66-30222

Structure, bending strength, impact toughness and hardness of W-TaC-Co alloys with various proportions of components 16 p2724 A66-31234

Kinetics of alloy formation in sintered tungsten-rhenium powder compacts 16 p2725 A66-31455

Work function of solid solutions of tungsten with molybdenum and tantalum explained by surface adsorption effects 16 p2728 A66-31772

Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393

Element distribution in cermet alloys of W-Ni-Fe system determined by X-ray spectral analysis 17 p2940 A66-32848

Infiltrated tungsten materials in subsonic air and nitrogen plasma arcs with changes evaluated metallurgically 19 p3377 A66-35610

Fabrication process for turning cast Cb-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111

High-temperature brazing materials for niobium and tungsten with tensile-shear strengths in excess of 7000 psi at 2500 degrees F 19 p3367 A66-36114

Laboratory turning tests of machinability of high density unalloyed tungsten and silver-infiltrated tungsten, discussing machining effect on tool life, tool forces, surface finish, producibility, etc 19 p3369 A66-36132

Chemical vapor deposited thermoprotective coatings for tungsten-and molybdenum-based refractory alloys, discussing diffusion barrier selection, interfacial microhardness, high

temperature diffusion-annealing tests, etc 19 p3383 A66-36142

X-ray and metallographic examination of tungsten alloys, noting decrease of work function during thermal emission upon addition of lanthanum hexaboride 20 p3584 A66-37414

Chemical diffusion as affected by tungsten concentration in columbium-tungsten system measured, using couples prepared from polycrystalline pure metal 20 p3585 A66-37785

Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 21 p3752 A66-39405

Alloy additions of Zr, Ta, Nb, Re, Mo and Hf tend to interact with thorium oxide particles in tungsten base alloys during exposure to greater than 2000 degrees C 23 p4079 A66-41067

Superconductivity degradation in beta-tungsten structure compounds, niobium selenide and niobium aluminide, noting tin loss and transition temperature for high temperature annealing 24 p4257 A66-42614

TUNGSTEN CARBIDE

Residual stress-strain state of WC-Co alloys by changing sample size during process 09 p1389 A66-20806

Plastic deformation preceding fracture in tungsten carbide-cobalt alloys 11 p1717 A66-22994

Structural, physical and mechanical properties of hard alloys formed by sintering powdered VK 15 tungsten cobalt alloy with nonuniformly distributed carbide phase 15 p2520 A66-28753

Quenching, annealing and high temperature treatment effect on transverse rupture strength of sintered tungsten carbide [ASME PAPER 66-MD-17] 21 p3750 A66-38478

Solid solutions of titanium, tungsten, chromium prepared by carburization of mixtures in hydrogen medium and obtained as fine-grained carbide 22 p3934 A66-39865

Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063

TUNGSTEN CHLORIDE

Chloride alkoxide of pentavalent tungsten, obtaining UV, IR, NMR and EPR spectra, molecular weight, etc 16 p2646 A66-30620

TUNGSTEN COMPOUND

Tungsten disilicide oxidative destruction, discussing porosity induced disintegration upon exposure to air 05 p0704 A66-15818

Cathode development noting increased lifetime, high emission capability and application 06 p0855 A66-16806

Extruded tungsten composites containing fibered or reacted additives examined, noting stress rupture life, temperature effect, creep properties, density, hardness, etc 16 p2723 A66-30639

Elevated temperature tensile properties of copper alloy-tungsten fiber-reinforced composites 18 p3120 A66-33724

Crystal growth of rare earth tungsten bronzes using electrolytic reduction of fused mixture of rare earth tungstate and tungsten trioxide 19 p3381 A66-36037

Tungsten disilicide oxidative destruction, discussing porosity induced disintegration upon exposure to air 23 p4083 A66-41384

TUNGSTEN INERT GAS /TIG/ WELDING

Metal inert gas and tungsten inert gas welding of 2014-T6 aluminum noting advantages, structures, weld strengths, etc 05 p0688 A66-15186

Fabrication of 260-inch diameter rocket cases by automatic gas tungsten arc welding techniques, using 18 percent nickel maraging steel 10 p1540 A66-21767

Orbit arc automatic tungsten inert gas fusion welding and application to joining tubular systems in aerospace industry [ASTME PREPRINT AD66-719] 12 p1886 A66-24410

TUNGUSK METEORITE

C 14 content in tree rings, Tungusk meteor and supernova explosions 05 p0765 A66-15334

Shock wave induced thermal ionospheric ionization from Tungusk explosion of 1908, with recalculation of shock magnitude 08 p1290 A66-19053

Tungus meteorite explosion simulation by detonation cord inclined at angle to forest mock-up 14 p2379 A66-27181

Pressure waves recorded in India associated with Tunguska and Sikhote-Alin meteor explosions 15 p2485 A66-29064

Cometary origin of Tungusk meteorite of 1908 supported by analysis of space trajectory and observed nightglow at time of fall 15 p2595 A66-29129

C 14 content in tree rings, Tungusk meteor and supernova explosions 15 p2603 A66-29981

Carbon 14 content in growth rings of tree 60 km from epicenter of 1908 explosion of Tungus meteorite, considering antimatter as possible explosion cause 18 p3233 A66-34553

Book on glant Tanguska and Sikhote-Alin meteorites 20 p3552 A66-37832

Tungus meteorite explosion simulation by detonation cord inclined at angle to forest mock-up 24 p4279 A66-42721

TUNING

SA SCHULER TUNING

Control systems to avoid detuning effects caused by plasma in resonant cavity experiments on plasma acceleration and confinement in HF electromagnetic fields 01 p0040 A66-10546

Synchronous tuning of microwave filters involving small changes in rejection bandwidth and being consistent with Chebyshev response 01 p0044 A66-10936

Varactor-tuned circuit design, noting curves for graded junctions, power in tuned circuit, etc 04 p0491 A66-13384

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 06 p0859 A66-17193

YIG resonator tuning for low noise parametric amplifier 07 p1006 A66-17504

Two-frequency volume resonator with independent tuning within wide frequency band 08 p1191 A66-18918

Electronic tuning effects through DC avalanche current variation in negative-resistance diode 10 p1515 A66-22088

Radio instrument tuning using Gauss-Seidel method, formulating properties of tunable surfaces 11 p1667 A66-22793

Electronically tunable circuits for integrated circuits 14 p2263 A66-27047

Tunnel diode coupling to Q resonator of hybrid type, ensuring wide tuning range and oscillation frequency insensitive to temperature change, supply voltage variations, etc 15 p2466 A66-29676

Tuning of ammonia beam maser resonator based on frequency shift method, noting hysteresis appearance and elimination 16 p2720 A66-31696

Wide tuning range solid state microwave source consisting of transistor oscillator and varactor diode harmonic generator 17 p2893 A66-32926

Tuning of power amplifiers without standard servoloop and electromechanical variable RF element, for application to transceiver 19 p3324 A66-35515

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 19 p3314 A66-35551

Small and low cost voltage-tunable audio filter using field effect transistors as tuning element in place of inductors for space communications 24 p4180 A66-42334

TUNNEL

S HOTSHOT TUNNEL

S HYDRODYNAMIC TUNNEL

S SHOCK TUNNEL

S WATER TUNNEL

S WIND TUNNEL

TUNNEL DIODE

Luminous phenomena and electron emission discontinuity in aluminum thin film tunnel diodes 01 p0119 A66-10392

Advantages of tunnel diode/transistor switching circuits as medium speed building blocks for exploring detailed behavior of tunnel diode staircase 01 p0043 A66-10915

Current-voltage characteristics of tunnel diode measured by bridge circuit and ammeter 01 p0045 A66-10995

Transistorized decade scaler, tunnel diode binary scaler and transistorized tunnel diode hybrid circuit 01 p0045 A66-11039

Cathode ray curve tracer for differentiated current-voltage characteristics of tunnel

diode 01 p0046 A66-11043

Circuit with tunnel-diode-based active element for dynamic memory used to store regenerated information 01 p0046 A66-11048

Push-pull saturated square-hysteresis-loop tunnel diode inverter for achieving high efficiency and power output with good power-to-weight ratio 02 p0195 A66-11361

Measuring equivalent circuit parameters of tunnel diode by method which forward-biased junction to valley voltage point 02 p0195 A66-11368

Oscillator circuits with several series-connected tunnel diodes to increase voltage amplitude and full utilization of power of bias batteries 02 p0196 A66-11412

Parameters of tunnel diode mixer with RF amplifier measured, using tunnel diode as calibrated shot noise generator 02 p0196 A66-11423

Fourier coefficients of tunnel diode conductivity and noise current determined along with conversion factor and amplitude of mixer 02 p0196 A66-11424

Germanium Esaki diode characteristics with aging, noting change in excess current after forward bias application 02 p0198 A66-11522

Tunnel diode and transistor circuit controlled by trigger pulses operating as oscillator, univibrator and flip-flop 02 p0199 A66-11819

Above resistive cut-off frequency operation of tunnel diode in microwave oscillator for series and parallel 02 p0199 A66-11874

Waveguide X-band tunnel diode mount design 03 p0339 A66-12446

Broadband tunable tunnel diode oscillator in waveguide mounting, noting role of variable capacitor 03 p0339 A66-12450

Tunnel diode monostable multivibrator studied by single trajectory on I-V characteristics of tunnel diode 03 p0343 A66-13013

Decimal scaler including pulse shaper accepting sharp pulses and any form signals 03 p0344 A66-13096

Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 03 p0346 A66-13317

Memory units in tunnel diodes noting signal to noise ratio, component tolerance, switching power, reliability, etc 04 p0489 A66-13492

Equivalence of stress and electron-irradiation induced defects in degenerate p-n germanium junctions as indicated in similar voltage-anneal characteristics 04 p0562 A66-13751

Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 04 p0497 A66-13918

Practical stability criterion for tunnel-diode circuits based on plots of modulus of reflection coefficient vs real frequency 04 p0500 A66-14104

Tunnel diode in superregenerative amplifier, using phase-plane method to investigate volt-ampere characteristics of diode and effect on oscillation 04 p0501 A66-14410

Instability of tunnel diode frequency converter, discussing effects of temperature and instability 04 p0501 A66-14411

Octave-broadband tunnel-diode amplifier design with added shunt capacitance and stabilizing circuit 05 p0643 A66-14573

Electron spectrum in highly alloyed gallium arsenide 05 p0730 A66-14650

Thermal diffusion of impurity atoms suggested as possible cause of GaAs Esaki diode deterioration by Weisberg and Gold 05 p0733 A66-14672

Recombination emission process in direct semiconductor devices for realization of high speed nondestructive readout from tunnel diodes without direct measurement or perturbation 05 p0647 A66-14828

Reception mixer treated as active admittance characterized by admittance-modulation factors 05 p0648 A66-15030

Tunnel diode mixer operation expressed as bias and local oscillator voltages available gain, minimum noise figure and output

conductance, carrying out numerical analysis 06 p0846 A66-16095

Single tunnel diode multivibrator producing stable frequency division by factors to ten 06 p0852 A66-16511

Performance of tunnel diode self-excited oscillator in various operating regimes 06 p0852 A66-16513

Gallium arsenide tunnel diode oscillator tuned with 5-10 GHz YIG 06 p0853 A66-16648

Exponential band-edge tails observed experimentally in degenerate n-type germanium tunnel diode 06 p0925 A66-16654

Effect of nonsinusoidal pump voltage waveform on performance of tunnel diode mixer 06 p0854 A66-16677

Practical stability criterion for tunnel-diode circuit including bias and stabilizing circuits and requiring only plots of modulus of reflection coefficient vs frequency 06 p0858 A66-16986

Automatic biasing effect on mean conductivity and constant current component of germanium tunnel-diode autooscillator 06 p0860 A66-17198

Stability and gain prediction of microwave tunnel diode reflection amplifier, using Smith chart 07 p1007 A66-17508

Tunnel diode series inductance and stray capacitance effect on gain and bandwidth of broadband reflection type amplifiers 07 p1007 A66-17509

C-band weather radar AVQ-10 incorporating tunnel diode amplifier and p-i-n solid state protector switch 07 p1008 A66-17711

Active network synthesis, reviewing methods of analysis for linear lumped constant parameter networks 07 p1015 A66-17755

Tunnel diodes for low noise amplifiers at microwave frequencies 07 p1009 A66-17848

Tunnel diode voltage-controlled oscillator to expand FM system channel capacity 07 p1010 A66-18246

Alloying technique through doped diffused layer for production of high speed silicon tunnel diodes for logic circuits and memory functions 08 p1188 A66-18653

Tunnel diode I-V characteristics, RF detector suitability, input-output characteristics, sensitivity and noise 08 p1191 A66-18943

Photomultiplier voltage pulse shaping and transmission network using germanium tunnel diode 08 p1193 A66-19278

Pulse amplifier with tunnel diode, achieving maximum gain for parallel-connected load and diode 08 p1194 A66-19284

Near IR detection system using phototube with type S1 phosphor photocathode, noting tunnel diode discriminator S/N ratio 08 p1227 A66-19696

Anomalous densities of states in normal tantalum and niobium 09 p1417 A66-20029

Tunnel junction RF modes driven by AC Josephson current 09 p1417 A66-20030

Second derivatives of tunnel junction obtained as function of applied bias by observing intermodulation frequency signal 09 p1417 A66-20033

Effect of thickness nonuniformity on capacitance of Al-Al₂O₃-Al tunnel junction structure compared with device with uniform thickness 09 p1426 A66-20198

Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 09 p1428 A66-20593

Fluctuation noise factor of UHF tunnel-diode mixer for various loads in image frequency range 09 p1357 A66-20785

Tunnel effect measurements of superimposed aluminum and lead films used to determine effect of normal metal on superconductor 10 p1573 A66-21179

Current-voltage characteristics of tunnel diode measured by bridge circuit and ammeter 10 p1510 A66-21675

Microwave circuit design using strip transmission line, noting single-sideband suppressed carrier modulator, tunnel diodes in low-noise amplifiers, etc 10 p1512 A66-21757

Graphical analysis of tunnel diode monostable circuits described by high order nonlinear differential equations 11 p1677 A66-22766

Transistor-tunnel diode flip-flop with built-in gating 11 p1669 A66-23159

High-ratio multipliers and tunnel diode generators as solid state microwave sources considered in analysis of varactor circuits 11 p1670 A66-23196

Transistorized decade scaler, tunnel diode binary scaler and transistorized tunnel diode hybrid circuit 11 p1671 A66-23285

Cathode ray curve tracer for differentiated current-voltage characteristics of tunnel diode 11 p1671 A66-23290

Circuit with tunnel-diode-based active element for dynamic memory used to store regenerated information 11 p1671 A66-23295

Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 12 p1830 A66-23734

Tunnel diode used as negative conductance, frequency converter, pumped element or rectifier in microwave antenna system 12 p1831 A66-23788

Silicon monolithic Semiconductor Memory Integrated Device /SMID/ memory system and memory storage element 12 p1827 A66-23834

Basic structure of cylindrical diode package mounted with axis normal to parallel metal surfaces extending beyond diode package 12 p1831 A66-23905

Differential equation for prediction of output spectra of unlocked driven bulk-GaAs and tunnel diode oscillators 12 p1836 A66-24147

Tunnel diode amplifier for broadband radio communication using integrated circuits, noting noise figure, stability and saturation effect 12 p1840 A66-24623

Statistical model of switching time jitter for tunnel diode threshold-crossing detector 12 p1842 A66-24655

Analog computer analysis of current readout tunnel diode memory cell 12 p1846 A66-24856

High sensitivity apparatus for measuring current voltage characteristics or any selected derivative in tunnel diodes 12 p1847 A66-24983

Electron spectrum in highly alloyed gallium arsenide 13 p2167 A66-25925

Single tunnel diode multivibrator producing stable frequency division by factors to ten 13 p2041 A66-25951

Performance of tunnel diode self-excited oscillator in various operating regimes 13 p2041 A66-25953

Static composite characteristics of series-connected tunnel diode chains 13 p2042 A66-26098

Voltage dependence of barrier heights in aluminum-aluminum oxide-aluminum tunnel diodes at room and liquid-nitrogen temperatures 13 p2170 A66-26595

Integrated circuit as exclusive-OR gate or as linear amplifier, using transistor or tunnel diode shunted by resistor 14 p2263 A66-27051

Solid state tuned RF radiometric receiver using low-noise broadband tunnel diode amplifier 14 p2290 A66-27063

Tunnel effect in gallium arsenide diodes at low temperatures 14 p2248 A66-27081

Modified slave multivibrator based on tunnel diode operating in voltage switching regime with reduced current removal from trigger circuit, achieving multivibrator monostability 14 p2251 A66-27176

Microwave L-band tunnel diode amplifier 14 p2254 A66-27733

V-I characteristics of tunnel diode by approximation method of polynomials of degree no higher than sixth 14 p2254 A66-27739

Instabilities occurring in tunnel diode amplifiers resulting from changes in input resistance of load circuit and method for reducing them 14 p2255 A66-27749

Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 14 p2260 A66-28290

Josephson tunnel effect in semiconductors 14 p2370 A66-28357

Theoretical calculation of effective load impedance of tunnel diode mounted in microwave structure 15 p2462 A66-29016

Current-voltage characteristic for tunnel diode millimeter wave harmonic generator in 24 to 72 gc region 15 p2462 A66-29024

Relationships involving power and efficiency of self-excited tunnel diode oscillator, calculating effect of parasitic TD parameters and circuit 15 p2464 A66-29122

General broadband matching for passive and active 1-port load impedance and application to tunnel diode amplifier 15 p2464 A66-29321

Tunnel diode coupling to Q resonator of hybrid type, ensuring wide tuning range and oscillation frequency insensitive to temperature change, supply voltage variations, etc 15 p2466 A66-29676

Synthesis for driving point and transfer functions using standard components /RLC/ and single negative resistor or replacing it with tunnel diode 15 p2475 A66-29861

Comparison of frequency-modulated tunnel diode oscillators 15 p2468 A66-29924

Static regime of trigger using two tunnel diodes with inductive memory 15 p2468 A66-29925

Energy spacing of geometrical resonance structure in very thick indium films, noting interference between electron-like states which propagate with different velocities 16 p2769 A66-30159

Electronic band structure of BiSb alloy tunnel junction for various Sb concentrations 16 p2770 A66-30178

Tunnel diode detectors superior to point-contact diodes because of broader linear characteristic, greater sensitivity and less temperature dependence 16 p2860 A66-30614

Magnetic field effect on direct band-to-band tunnel current in doped germanium, noting decreases in reverse current and current-voltage characteristics 16 p2776 A66-30735

Sinusoidal UHF tunnel diode oscillator, showing selection of particular oscillation mode by power matching load to oscillator 16 p2862 A66-30959

X-band strip transmission line tunnel diode amplifier 16 p2867 A66-31648

Tunnel diode circuit stability, equivalent circuit and conductivity hodograph 17 p2880 A66-31867

Tunnel diode application to tunable microwave oscillators, noting coupling to high Q factor resonator for frequency stability 17 p2885 A66-32287

Plotting of first and second derivatives of tunnel junction V-I characteristics, noting application to thin films prepared by vacuum evaporation 17 p2886 A66-32496

Transistor-tunnel diode RC emitter circuit for binary numeration 17 p2888 A66-32841

Microwave tunnel-diode mixer operating at S-band frequencies, computing gain and noise figures 17 p2890 A66-32906

Parametric and tunnel diode amplifiers for radio astronomy, noting diode quality, operating frequency range, noise, temperatures, etc 17 p2892 A66-32918

Structure and batch fabrication of beam lead planar Ge Esaki diode 17 p2895 A66-33119

Pulse front shaping with monostable tunnel-diode generator by successive triggering through storage inductance 17 p2898 A66-33520

Tunnel effect current in esaki diodes calculated for operation at low temperatures, examining WKB wave functions for steady state 18 p3086 A66-34390

Zero bias anomalies in normal metal tunnel junctions, noting dependence of dynamic resistance of junction on voltage and temperature 18 p3156 A66-34469

Wyatt anomalies in tunneling conductance centered at zero bias, noting magnetic effect 18 p3159 A66-35035

Tunnel diode capacitance relation to displacement interpreted in terms of impurity drift in nonuniform field of p-n junction in highly doped germanium diodes 19 p3433 A66-35302

Conventional equivalent circuit of tunnel diode with inverse frequency stability characteristics 19 p3312 A66-35348

Automatic biasing effect on mean conductivity and constant current component of germanium tunnel-diode auto-

- oscillator 19 p3315 A66-35556
- Solid structure tunnel diode, discussing design and manufacture, noting use of thin film photolithographic process for improved reliability 19 p3319 A66-36164
- Transistorized electron counter using tunnel diodes, noting trigger 20 p3559 A66-37517
- Input admittance, gain and noise performance in dipole antennas with Esaki diodes 20 p3531 A66-37731
- Superconducting point contact diodes for observation of microwave radiation generated by bridge with and without constant voltage steps 20 p3620 A66-37776
- Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 20 p3532 A66-37876
- Noise factor dependence on frequency in tunnel-diode frequency mixers 20 p3533 A66-38008
- Possibility of realization of multistage tunnel diode frequency doublers without interstage amplification 20 p3533 A66-38009
- Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 20 p3622 A66-38126
- I-V characteristics of p-gallium antimonide based tunnel junction at various temperatures analyzed, finding secondary peaks exhibited by inverted diodes 21 p3799 A66-38925
- Esaki diode oscillator, investigating oscillation waveform, conductance characteristics, constants, hysteresis and parasitic oscillation 21 p3712 A66-39221
- Dynamic resistance and derivative of superconducting tunnel junction measured by combined harmonic detection and bridge techniques 21 p3793 A66-39384
- Barrier height determination in thin film sandwich tunnel diodes, using value of internal electric field and electric tunnel method 22 p3959 A66-39720
- Separation method for two components of excess and thermal currents in gallium arsenide tunnel diodes 22 p3873 A66-39748
- Fluctuation noise factor of UHF tunnel-diode mixer for various loads in image frequency range 22 p3874 A66-39844
- Negative resistance devices using multiple number of tunnel diodes or varactors, examining stability and sideband frequency 22 p3875 A66-40064
- Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 22 p3875 A66-40077
- Tunnel diode monostable oscillator with triggering threshold when load resistance, inductance and bias provide three states of dynamic equilibrium 22 p3876 A66-40167
- Tunnel effect in gallium arsenide diodes at low temperatures 22 p3882 A66-40837
- Tunnel diodes operating above resistive cut-off frequency and mounted in tapered waveguide, noting oscillating frequency 24 p4182 A66-42619
- Analytic model for describing operation of Marzoff tunnel diode inverter 24 p4187 A66-43181

- Secondary flows in turbine cascades,

obtaining correlations between velocity distributions and circulations along span by expanding Fourier series 11 p1632 A66-22664

Heat resistant nickel-based alloys for gas turbine blades and disks 11 p1716 A66-22752

Mistuning effect on vibration of turbomachine blades induced by wakes 12 p1959 A66-23796

Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in cascades 12 p1796 A66-23800

Stress concentration in T tails of turbine blades by photoelasticity and photocreep 12 p1966 A66-24064

Turbine blade vibration damping, expressing mechanical forces via method of concentrated masses 12 p1938 A66-24982

Stress analysis of rim-straddling fastenings for axial compressor and turbine blades 13 p2171 A66-25081

Blade noise generation in gas turbine engines [ASME PAPER 66-GT/N-43] 14 p2372 A66-26988

Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 14 p2217 A66-27001

Turbine blades suitable for supersonic relative inlet velocities and performance in cascade 17 p2841 A66-32889

Gas turbine theory operating principle analyzed by Teodorescu-Coanda networks, including definition of depressive blade and fluid flow analysis 17 p2992 A66-33488

Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 19 p3278 A66-36757

Discharge of cooling air from blades into flow-through part of gas turbine, examining mixing of gas behind blade array with air from blade edges and effect of injected air on turbine efficiency 20 p3627 A66-36913

Cooled blades in gas turbines allowing use of higher gas temperatures and necessitating calculation of heat transfer and skin friction coefficients 22 p3999 A66-40492

Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 23 p4079 A66-40973

Gas turbine blades fabricated from various alloys tested in stationary turbine burning diesel fuel 23 p4121 A66-41401

Laval turbine type device for starting rotors of turbojet engines, noting jet energy conversion on wheel blades and geometrical structure 23 p4122 A66-41791

Electron microprobe for studying thermoelectric materials and heat-resistant steel for gas-turbine blading 24 p4211 A66-42507

TURBINE ENGINE

Refractory metals for gas turbine and ramjet aircraft engines, noting niobium and tantalum alloys 02 p0245 A66-11746

Effects of improved refractory blade materials and internal cooling on inlet temperatures, design and performance of air breathing engines at supersonic speeds [AIAA PAPER 65-743] 03 p0415 A66-12549

Testing and application of hard facing methods used on turbine engine components to provide wear resistance at high temperature 03 p0373 A66-13085

Flight operating techniques influence upon engine maintenance costs and new engine design, specifically Pratt and Whitney JT3C-12 on Boeing 720 aircraft [SAE PAPER 650212] 03 p0322 A66-13220

Propulsion systems for helicopters, stressing variable area turbine for turboshaft engines 04 p0573 A66-14134

Flow visualization in turbomachinery, using hydrogen bubbles generated by electrolysis of working water 08 p1209 A66-19553

Aircraft turbine lubricant technology for high Mach number engines especially SST, noting stability, autoignition, coking, toxicity, etc [SAE PAPER 660071] 09 p1434 A66-20156

Aircraft and missiles operating at Mach 2

to 5 using air breathing propulsion systems, noting roles of ramjet and turbine engines 09 p1435 A66-20667

Pneumatic fluid elements used in automatic control systems, noting viscous fluid properties and application to turbine rpm control 10 p1486 A66-21753

Text on fundamentals of aircraft gas turbine engine design, including component design and calculation 11 p1762 A66-23310

Simulation of lubricating oil circulation in aviation turbine engines by constructed model, noting change of viscosity, acid number and electrical conductivity at high temperatures 12 p1803 A66-23751

Book on strength and dynamics of aircraft engines including deformation of shells of revolution, oscillation frequencies of various shells, turbine rotor dynamics, etc 12 p1963 A66-24042

Compressible metal for turbine seal, discussing Nicoseal coating used in sealing clearance between rotor and adjacent stationary parts 13 p2109 A66-25777

Intermittent propellant flow gas turbine for spacecraft power supply [AIAA PAPER 64-754] 13 p2008 A66-26655

Compact Ackeret-Keller closed cycle thermodynamic nuclear turbine power plant [ASME PAPER 66-GT/CLC-6] 14 p2329 A66-26980

Optimal working fluid for Rankine cycle engine [ASME PAPER 66-GT-84] 14 p2411 A66-26990

Shaft-power turbine design, including rotor vibration problems, computer high speed testing, application as auxiliary power supply in turbojets, etc [ASME PAPER 66-GT-87] 14 p2225 A66-26992

Adjustable stator blades in axial compressors, noting advantages of system for constant-speed electric or variable-speed turbine drives 14 p2373 A66-27017

McCulloch TSIR-5190 highly compounded two-stroke cycle, turbocharged, direct fuel injection, liquid cooled, radial light plane engine [SAE PAPER 660173] 14 p2373 A66-27283

Operating stability of turbojet engines improved by use of double-rotor compressor 17 p2992 A66-33487

USAF Aero Propulsion Laboratory research in weapon systems and turbine engines, ramjets, etc 18 p3269 A66-34956

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices 20 p3555 A66-36923

Electron beam welding of aircraft turbine gears 21 p3744 A66-39233

Flow mechanics and flow machinery 21 p3730 A66-39498

Flow transition from propeller in free stream to axial pump in cylindrical shroud for impeller clearance between zero and infinity 21 p3695 A66-39499

Turbine engines and ramjet for SST and space boosters 22 p3971 A66-40123

Motorized vertical rotating table used in inspection of small numbers of large turbine engine casings for avoidance of expensive receiver gauges 23 p4072 A66-41200

Materials and cooling of aircraft gas turbine engines, noting nickel and tantalum alloys, turbine-inlet temperatures, coatings, etc 23 p4122 A66-41662

Wake motion through moving blade row, demonstrating chopping phenomenon via hot-wire anemometer traces taken downstream of rotor 24 p4157 A66-42583

Sea level and high altitude ignition of fuel-rich gas generator/turbine manifold assembly 24 p4294 A66-42640

TURBINE INSTRUMENT

Time constant of turbine-flow meter sensor 14 p2295 A66-27712

Optimal centripetal turbine impellers with radial blade inlet and semiaxial discharge 21 p3807 A66-38931

Book on strength of turbine disks, analyzing material properties, design and operating conditions 21 p3743 A66-38948

TURBINE NOZZLE

Supersonic flow at exit of radial-inflow turbine flat-vane nozzle ring [ASME PAPER 65-WA/GTP-5] 05 p0608 A66-15720

Single stage bootstrap air conditioning with

two-position turbine nozzle for improved high altitude descent conditions for Concorde SST 09 p1331 A66-20133

Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 14 p2217 A66-27001

Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 19 p3278 A66-36757

TURBINE PUMP

Two-stage radial-flow turbomolecular vacuum pump noting design, measured and predicted performance, application, etc 16 p2710 A66-30382

TURBINE WHEEL

SA COMPRESSOR ROTOR

SA IMPELLER

Rotor imbalance concentration on turbine vibration by comparison of oscillation amplitudes 23 p4072 A66-41402

TURBOALTERNATOR

Design of brushless alternator systems with output converted by static devices to standard AC frequencies and/or DC power 20 p3498 A66-37167

Pulsed energy turboalternator power generation system, discussing operation principles and performance characteristics 23 p4022 A66-41761

TURBOCHARGER

S CENTRIFUGAL COMPRESSOR

TURBOELECTRIC CONVERSION

Spacecraft turboelectric generation system using superconducting field as stator and rotor as armature to deliver 5000 vdc 23 p4023 A66-41764

TURBOFAN ENGINE

SA BRISTOL-SIDDELEY BS-53

TURBOFAN ENGINE

Turbofan cycle variables affecting subsonic turbofan-powered transport range predicted by graphic method [AIAA PAPER 65-796] 03 p0415 A66-12562

V/STOL transport aircraft noting productivity, flexibility, simplicity, economy of numbers, low fleet cost, high speed and turbofan propulsion 03 p0322 A66-13269

Recent developments in vectored-thrust Pegasus turbofan engine used in V/STOL subsonic strike fighters 04 p0573 A66-13931

Engine technology including higher turbine operating temperatures, high speed fan and nacelle design, increased by-pass ratio and improved power plant efficiency 06 p0943 A66-16924

Intake requirements and cold efflux of high-bypass turbofan engines can be turned to advantage by integrated installation arrangements which reduce long-haul operating costs 09 p1434 A66-20392

High by-pass turbofan for business aircraft, comparing jet propulsion system efficiency with fan engines, cost factors and market potentials [SAE PAPER 660221] 13 p2173 A66-26400

Turbofan engine fuel consumption, noting high cycle pressure ratio compressor, regenerator, etc [SAE PAPER 660322] 15 p2573 A66-29842

New high by-pass ratio turbofan engine for C-5A subsonic transport aircraft [SAE PAPER 660323] 15 p2428 A66-29843

Maintainability program for aircraft power plant particularly turbofan engine, noting inspection, failure detection, replacements, etc 20 p3574 A66-37963

Turbofan cycle variables affecting subsonic turbofan powered transport range predicted by graphic method [AIAA PAPER 65-796] 23 p4015 A66-40972

TURBOGENERATOR

Superconductors application to large turbogenerators for power generation and medium-capacity machines for aviation and other transport 23 p4114 A66-41742

TURBOJET

Correlation study of turbojet afterburner combustion efficiency and fuel/air ratio setting for maximization of efficiency [WSCI 66-1] 18 p3164 A66-34423

TURBOJET ENGINE

BRISTOL-SIDDELEY OLYMPUS 593

TURBOJET ENGINE

Acoustic analyzer combined with modulation and pulse shape analysis for effective diagnosis of turbojet engine condition without electrical or mechanical connections 01 p0066 A66-10114

High temperature nickel and cobalt superalloys for turbojet engines

[AIAA PAPER 65-741] 03 p0382 A66-13052

Installation of small turbojet engines on sailplanes for towing elimination in starting procedure 07 p1110 A66-18056

Supercharging turbojet engine for light aircraft compared to piston and turbojet engines 10 p1591 A66-21393

Shaft-power turbine design, including rotor vibration problems, computer high speed testing, application as auxiliary power supply in turbojets, etc

[ASME PAPER 66-GT-87] 14 p2225 A66-26992

GE-4 turbojet engine for SST design and program development, maintenance, safety, economics, performance, noise, etc

[SAE PAPER 660298] 15 p2572 A66-29833

Turbojet engine analyzer system theory and implementation for assessing current engine condition and malfunction and for predicting next mission confidence and time 19 p3355 A66-35523

Spectrometric oil analysis for assessing failure probability of turbojet-engine oil-lubricated parts 19 p3355 A66-35524

Turbojet propulsion system performance analysis methods 19 p3355 A66-35525

Simultaneous passage of two unmixed gases through joint two-circuit turbojet nozzle into ambient 20 p3627 A66-36917

Aerodynamic design and development of Seagle B.206 S aircraft, examining corrections for inadequate stability margins at aft CG limit 22 p3848 A66-39689

Manufacturing techniques for turbojets, considering metals difficult to machine and components of shapes difficult to form 23 p4074 A66-41656

Laval turbine type device for starting rotors of turbojet engines, noting jet energy conversion on wheel blades and geometrical structure 23 p4122 A66-41791

TURBOJET ENGINE CONTROL

Attitude control system/engine control system for hover control of turbojet VTOL aircraft 21 p3697 A66-38902

TURBOMACHINE

Reduction gears, mechanical systems and automation of modern propellers, rotors and blowers 01 p0014 A66-11061

Self-excited rotor whirl resulting from static pressure and rotor eccentricity, noting remedies

[ASME PAPER 64-WA/GTP-4] 02 p0279 A66-11762

Gas bearing analysis and design, presenting specifications of European and American turbomachinery 10 p1539 A66-21170

Gas lubricated bearings used in Brayton cycle closed-loop system turbomachinery in design of two-shaft power plant

[ASME PAPER 66-GT/CLC-9] 14 p2300 A66-26982

Graphical matching solution for gas turbine power plant closed cycle systems

[ASME PAPER 66-GT/CLC-14] 14 p2224 A66-26984

Design of 500-kwe closed Brayton cycle power conversion system, analyzing various turbomachinery configurations hermetically sealed and operating on gas bearings

[ASME PAPER 66-GT/CLC-15] 14 p2225 A66-26985

New cycle concepts in development of gas turbine and turbomachinery

[ASME PAPER 66-GT-85] 14 p2372 A66-26991

Graduate level textbook on axial flow turbine design, examining useful thermodynamic/fluid mechanic concepts, cascade potential flow, turbine efficiency, etc 17 p2991 A66-32991

TURBOMACHINE BLADE

Unsteady forces in turbomachines are due to circulation effect, blade thickness effect, wake effect and wake distortion effect

[ASME PAPER 64-WA/GTP-3] 02 p0176 A66-11763

Three-dimensional theory of incompressible

and inviscid flow through mixed flow turbomachines

[ASME PAPER 64-WA/GTP-1] 02 p0176 A66-11765

Radial variation of circumferential-average flow properties inside turbomachine blade row

[ASME PAPER 65-WA/GTP-1] 05 p0608 A66-15717

Radial variation of circumferential-average flow properties inside turbomachine blade row

[ASME PAPER 65-WA/GTP-1] 10 p1480 A66-21501

Text on cascade flow through airfoils and application to turbomachine and blade design 14 p2220 A66-27699

TURBOPROP AIRCRAFT

Flight recorder utilization in British civilian jet and turboprop aircraft 21 p3696 A66-38603

TURBOPROP ENGINE

Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing

[AIAA PAPER 65-709] 01 p0013 A66-10946

Kinematic systems and reduction gears used in turboprop engines, outlining design features 01 p0079 A66-11060

Elimination of turbine erosion in T56 turboprop engine

[ASME PAPER 65-WA/GTP-9] 05 p0745 A66-15724

Thrust vector control using thrust jet deflection for VTOL aircraft

06 p0943 A66-17022

Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing

[AIAA PAPER 65-709] 09 p1329 A66-20242

First phase of thermodynamic development of compressor for 490 hp turboprop engine, test procedures and data

evaluation 13 p2171 A66-25077

Fixed shaft turboprop flight control system for business and utility aircraft

[SAE PAPER 660218] 14 p2225 A66-27119

Synthesis method for automatic control systems, examining controller design for turboprop engine

17 p2901 A66-32311

Additives effect on antioxidant stability and antiabrasion characteristics of lubricating oils used in jet and turboprop engines

20 p3575 A66-38445

VTOL aircraft for commercial short-haul transports, considering turboprops, fan-wing and propulsion wings 24 p4159 A66-42891

TURBOPUMP

Shaft deflections in turbopumps from cavitation-induced unbalanced hydrodynamic forces in inducer 07 p1038 A66-18174

Optimization of high energy turbopump unit engine for Eldo-B carrier rocket, employing system specific impulse 10 p1591 A66-21396

Rotating speed effect on design of dynamic seals for rocket engine turbopumps, presenting aspects of design of hydrostatic seal

[ASME PAPER 66-FE-18] 17 p2932 A66-33271

Working process of axial-inflow turbomolecular pump for ultrahigh vacuum, noting pressures reached during tests 19 p3371 A66-36617

TURBORAMJET ENGINE

Griffon 02 delta-winged aircraft with composite air breathing turboramjet engine, noting achievements and prospects 11 p1761 A66-23248

Cost of turbojet engine development plans estimated in computer simulation and Monte Carlo techniques 20 p3523 A66-37935

TURBOROCKET ENGINE

Turborocket application to air breathing satellite launcher program describing engine design, performance and weight characteristics 04 p0572 A66-13539

TURBULENCE

SA ATMOSPHERIC TURBULENCE

SA BOUNDARY LAYER CONTROL

SA BOUNDARY LAYER TRANSITION

SA CLEAR AIR TURBULENCE

SA GUST

SA HOMOGENEOUS TURBULENCE

SA ISOTROPIC TURBULENCE

SA LOW LEVEL TURBULENCE

SA MAGNETOHYDRODYNAMIC

TURBULENCE

SA PLASMA TURBULENCE

Space-time correlation tensor of turbulent fields by phase space functional Lebesgue-Stieltjes integration, statistical hydromechanics and probability measure theory 15 p2479 A66-29398

Random turbulence in wall shear layer, discussing practical application of theory 17 p2916 A66-33481

Acoustic sensitivity and logic circuitry of fluidic turbulence amplifiers for application to laminar jet streams 18 p3056 A66-35012

Approximate expression derived for loose coupling in turbulence theory, suggesting possible explanation for inadmissibility of Kralchman conclusion 20 p3544 A66-36909

Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381

TURBULENCE EFFECT

Thermal counterflow of He 2 in wide channels of rectangular cross section investigated in terms of damping of small-amplitude transverse vibration of fine wire 04 p0510 A66-13712

Effect of turbulence intermittency on scattering of electromagnetic waves by underdense plasma 08 p1263 A66-19148

Turbulent effects in liquid He 2 stationary flow 09 p1365 A66-20015

Fluctuations effect in energy dissipation on shape of turbulence characteristics in inertial interval, using successive division of cubes 10 p1522 A66-21237

Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 10 p1525 A66-21965

Functioning of pitch angle stabilizing channel of ideal autopilot for aircraft flying in turbulent conditions 11 p1734 A66-23347

Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc 12 p1799 A66-24553

Secondary flow in entrance section of straight rectangular duct, measuring primary and secondary velocities, turbulence, axial component, Reynolds stress gradients, etc 13 p2070 A66-26714

Errors in wind speed measurements under conditions of turbulence, noting quantitative aspects of lateral, vertical and data processing errors 15 p2533 A66-28940

Free stream turbulence effects on heat transfer rates evaluated by boundary layer approximation 16 p2824 A66-30302

Winds caused by synoptic situations and strong local turbulence effect on evaporation measurements at Adriatic seaboard of Central Italy 18 p3130 A66-34720

Scattering of ultrasonic waves from turbulence produced by flow through grid in 6 x 6-inch nozzle 18 p3136 A66-35024

Fluctuations effect in energy dissipation on shape of turbulence characteristics in inertial interval, using successive division of cubes 19 p3341 A66-35859

Aerodynamics of propulsion plants, discussing cascade flow parameters, sub and supersonic flows, rocket gas cooling, acceleration of electrically conducting gases, etc 19 p3343 A66-36749

Wind velocity profile for nonstationary atmospheric boundary layer, noting effect of time-dependent variations on turbulence and pressure gradient coefficient 20 p3594 A66-38368

Turbulent viscosity forces in nonlinear three-dimensional nonstationary problem of thermal convection 21 p3760 A66-39359

Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 21 p3731 A66-39544

Pulse and harmonic techniques used in flight flutter testing, emphasizing natural turbulent excitation and limitations [ICAS PAPER 66-10] 23 p4015 A66-41256

Inhomogeneity of axial velocity component in or near blades forming impeller intake of radial compressor attributed to flow deflection 24 p4158 A66-43067

TURBULENCE MEASURING APPARATUS

SA HOT-WIRE TURBULENCE MEASURING APPARATUS

Design and components of homogeneously turbulent wind tunnel whose turbulence varies within limit of 25 percent 02 p0215 A66-11800

Turbulence amplifier system noting principles and application 02 p0180 A66-11963

Local heat transfer during turbulent gas flow in pipe for large temperature differences, describing test apparatus and results 03 p0443 A66-12517

Clear air turbulence detection and prediction by laser, radiometer, radar and other devices

[AIAA PAPER 65-800] 03 p0370 A66-13072

Direct measurements of turbulent thermal flux using airborne pulse type system 04 p0513 A66-13418

Laminar to turbulent transition along aluminum plate in free convection measured, using hot-wire probes 04 p0596 A66-13515

Electrokinetic transducers to measure potential fluctuations of turbulent flow of tap water in open channel 04 p0509 A66-13664

Random process theory analysis of equipment performance for measuring time spectra of turbulent fluctuations in lower atmosphere 09 p1398 A66-19886

Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846

Hot-wire anemometer applications to turbulence measurements in conducting liquids and vacuum deposition of quartz film on coated hot-film probe 12 p1880 A66-23848

Universal turbulence measuring system giving quantitative measure of turbulent intensity independent of type or speed of aircraft, using all-weather sensor

[AIAA PAPER 66-364] 12 p1906 A66-24476

Clear air turbulence types at high altitude identified and intensity and wavelength measured by FM instrument, using vane gust probe installed in U-2 aircraft [AIAA PAPER 66-362] 12 p1907 A66-24494

Effective early warning system to enable pilot to cope with clear air turbulence /CAT/ 14 p2326 A66-27819

National Air Meeting on Clear Air Turbulence, Washington, D.C., February 1966 15 p2531 A66-28911

Clear air turbulence, examining detection, forecasting and piloting techniques when passing through CAT 17 p2948 A66-32201

Frequency distortions correction for pulsation amplifier of thermoanemometer 21 p3739 A66-39331

Clear air turbulence detection and prediction by laser, radiometer, radar and other devices

[AIAA PAPER 65-800] 23 p4066 A66-40981

Microwave airflow simulator measurements of hot-film and hot-wire turbulence transducer 24 p4211 A66-42576

TURBULENT AIR CURRENT

Temperature and wind velocity fields of stationary atmospheric boundary layer derived from semiempirical turbulence theory 01 p0062 A66-10859

Atmospheric density variations due to turbulence incorporated in analysis of nonsymmetrical tensor of turbulent momentum transfer 02 p0220 A66-11257

Radar reflectivity of developing convective clouds statistically related to state of turbulence and thunderstorm hazard 02 p0252 A66-11270

Gas mean and solid mean velocity profiles of small particles suspended in turbulent air, noting effect of solid motion on laminar structure and shear stress at wall [ASME PAPER 65-WA/FE-24] 05 p0665 A66-15713

Severely turbulent airflow at low levels over United Kingdom 11 p1730 A66-23015

Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846

Atomic-to-molecular oxygen concentrations ratio values in upper atmosphere used to determine strength of turbulent mixing in atmosphere, noting definition of turbopause

height 16 p2694 A66-30704

Dissipation of sheet of heated air in turbulent air flow in pipe 21 p3836 A66-39445

TURBULENCE BOUNDARY LAYER

Nature and magnitude of turbulent boundary layer pressure fluctuations over two-dimensional surfaces and narrow delta wings 01 p0005 A66-10124

Fluctuating pressures at surface of Saturn vehicle studied by use of 2.75 percent models in wind tunnel 01 p0005 A66-10125

Spectral energy distribution modified by finite Mach number effects and structural response to boundary layer turbulence and susceptibility to changes in mean flow Mach number 01 p0005 A66-10129

Response of simple structure to boundary layer noise examined together with response of supported panel to sound field 01 p0055 A66-10132

Vibration response of steel panels to fluctuating pressures in turbulent boundary layer of wind tunnel compared to random excitation caused by jet noise and siren 01 p0148 A66-10138

Calculation of rotationally symmetrical turbulent boundary layer flow through straight diffusers 01 p0006 A66-10214

Velocity defect law for transpired turbulent boundary layers 02 p0217 A66-11553

Surface modifications of recovered small-scale plastic models after high speed flight used to estimate extent of laminar and turbulent flow over surface related to ablation studies 02 p0303 A66-11560

Effect of various factors in film-cooling phenomena obtained by vertically injecting air into turbulent boundary layer on flat plate 02 p0303 A66-11586

Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift

[AIAA PAPER 65-750] 03 p0319 A66-12586

Turbulent boundary layer interaction with graphite heat shield noting boundary layer velocity, temperature and chemical composition profiles

[AIAA PAPER 65-824] 03 p0446 A66-13232

Intermittency profiles of turbulent boundary layers for various pressure gradients to determine relationship between descriptive quantities and form factor of velocity profile 04 p0508 A66-13516

Turbulent boundary layer pressure fluctuations in subsonic wind tunnel flow and relation to panel vibration response 04 p0509 A66-13535

Boundary layer control by blowing, analyzing turbulent boundary layer for flow about flat plate of incompressible fluid with intense cross flows 04 p0509 A66-13573

Injection on surface friction and on parameters of turbulent boundary layer, noting semiempirical Prandtl theory 04 p0509 A66-13655

Turbulent velocity fluctuation field in isothermal boundary layer with homogeneous injection and combustion [AIAA PAPER 65-820] 04 p0510 A66-13689

Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer

[ASME PAPER 65-WA/FE-1] 05 p0664 A66-15708

Turbulent velocity profile produced by controlling boundary layer thickness, using wires placed parallel to plate and normal to flow direction

[ASME PAPER 65-WA/FE-29] 05 p0664 A66-15711

Air cooled gas turbine rotor and stator airfoils, presenting problem definition, analysis techniques, material application and cascade and engine testing

[ASME PAPER 65-WA/GTP-10] 05 p0691 A66-15725

Boundary layer influence on performance of centrifugal-compressor impellers, measuring discharge velocity profile

[ASME PAPER 65-WA/FE-7] 05 p0609 A66-15728

Upstream length of turbulent boundary layer separation ahead of compression corner or flare 05 p0666 A66-15801

Heat transfer in base flow region, determining parameter of correlation for hydrogen injection and combustion, adiabatic

flame temperature, heating rates and recovery temperature

[AIAA PAPER 66-108] 06 p0970 A66-16400

Self-preserving development in turbulent boundary layer in strong adverse pressure gradient described by two-layer model 06 p0874 A66-17000

Local heat transfer to immersed cylinder in transonic cross flow for gaseous stream 07 p1150 A66-17580

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 07 p1020 A66-17880

Wall pressure fluctuations in subsonic and supersonic turbulent boundary layer flow related to mean shear and turbulence interactions 07 p1023 A66-18111

Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream

[AIAA PAPER 66-130] 08 p1162 A66-18950

Compressible turbulent boundary layer at momentum integral and moment-of-momentum integral equations for arbitrary pressure gradient, noting surface heat transfer effects 08 p1207 A66-19120

Coolant injection in turbulent boundary layer for protection of surfaces from effects of high temperature and high energy gas flows 08 p1320 A66-19428

Momentum, heat and mass transfer in turbulent boundary layer flow of power law fluids over smooth flat plate 08 p1210 A66-19670

Heat transfer through turbulent incompressible boundary layer in presence of moderate pressure gradient 09 p1366 A66-20170

Turbulent boundary layer in subsonic or supersonic flow past pinched-waist bodies of revolution at various Mach numbers and pressure gradients 10 p1480 A66-21387

Friction factors and mean electrical conductivity for argon arc plasma flow, examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21436

Simulation of noise transmission through structures under turbulent boundary layer flow shown to be of doubtful value 10 p1520 A66-21744

Velocity profiles in point-to-point mapping of compressible turbulent boundary layers into constant density flows 10 p1523 A66-21769

Monin-Obukhov similarity theory for turbulent structure of thermally stratified surface layer of atmosphere 11 p1725 A66-22266

Velocity defect profiles in equilibrium turbulent boundary layers and eddy viscosity hypotheses 11 p1693 A66-23005

Effective viscosity in defect portion of turbulent boundary layer when flow is under pressure gradients, showing overlapping of wall velocity profiles and defect velocity profiles 11 p1693 A66-23006

Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013

Calculating thickness and velocity profile of turbulent boundary layer with pressure gradient 12 p1862 A66-23850

Turbulent auxiliary functions for symmetric three-dimensional boundary layer 12 p1862 A66-23952

Turbulent boundary layer separation in supersonic flow 12 p1797 A66-24112

Hypersonic flow of inviscid gas past cone, obtaining solution for entire flow including turbulent boundary layer and velocity field, using zero approximation method 12 p1798 A66-24440

Boundary layer influence on performance of centrifugal-compressor impellers, measuring discharge velocity profile [ASME PAPER 65-WA/FE-7] 12 p1799 A66-24538

Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer [ASME PAPER 65-WA/FE-1] 12 p1864 A66-24541

Velocity defect law for turbulent incompressible boundary layer with wall injection or suction 13 p2063 A66-25430

Distribution, as function of azimuth, of

static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose in hypersonic flow and turbulent boundary layer along wall 13 p1991 A66-25464

Thermal profiles in turbulent boundary layers with obstacles at wall temperature 13 p1991 A66-26338

Constant current hot-wire anemometer determination of experimental time-amplitude distribution function of velocity in turbulent boundary layer 13 p2072 A66-26753

Turbulence and separation in boundary layer and relation to wing design 14 p2217 A66-26925

Analytical methods for studying turbulent boundary layers at high Mach numbers, comparing theory and experiments for flat plate flow, predicting boundary layer properties around hypersonic configurations 14 p2217 A66-27098

Hybrid rocket combustion regression rate and turbulent boundary layer mass transfer 14 p2412 A66-27449

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 14 p2375 A66-27692

Displacement and heat transfer effects of laminar and turbulent boundary layers far downstream in slowly expanding hypersonic nozzle, determining inviscid core flow 15 p2424 A66-29273

Empirical relationships between momentum, kinetic energy and displacement thicknesses for uniform-density turbulent boundary layer and wall jet flows 15 p2479 A66-29301

Book on heat transfer covering new instrumentation and analytical techniques for definitive solution to classical and complex problems 16 p2824 A66-30301

Mass transfer, friction and heat transfer analyzed and calculated for turbulent boundary layers in compressible flow 16 p2824 A66-30303

Critical injection parameter on porous plate with turbulent boundary layer, noting conditions of neutralization reaction 16 p2684 A66-30324

Velocity profile in incompressible turbulent boundary layer determined by two methods, noting coincidence of velocity distributions in external portion of layer with velocity defect law 16 p2684 A66-30326

Experimental data analysis of turbulence of atmospheric boundary layer 16 p2696 A66-30770

Nitrogen tetroxide dissociation effect on surface friction in turbulent boundary layer 16 p2686 A66-31064

Skin friction methods compared for problem of turbulent compressible boundary layer on flat plate at hypersonic Mach numbers 16 p2686 A66-31118

Mixing zone of two wakes, studying cooling effect of gas stream directed tangentially or at small angle to container wall 16 p2689 A66-31607

Velocity profiles in outer region of turbulent boundary layer in porous part of floor of wind tunnel for various mass transfer rates 17 p2905 A66-31841

Shear and frictional distribution in turbulent incompressible boundary layer of plane flow 17 p2907 A66-32281

Supersonic flow over downstream-facing step on circumference of ducted axisymmetric body used in flow reattachment, measuring surface pressure distributions 17 p2839 A66-32440

Hypersonic wind-tunnel test program giving data on turbulent boundary layer with mass addition including Mach number effect on heat transfer and skin friction reduction and massive blowing 17 p2839 A66-32477

Wind tunnel analysis of separated flow in region of several two-dimensional flow perturbations, presenting fluctuating pressure levels as function of Mach number for undisturbed flow [AIAA PAPER 66-456] 17 p2910 A66-32762

Series solution to parabolic PDE for heat transfer from smooth wall to turbulent boundary layer 17 p3037 A66-33041

Velocity measurements in turbulent

incompressible boundary layer of porous wall with suction 17 p2913 A66-33167

Turbulent boundary layers in compressible and incompressible flow, examining pressure gradients, temperature distribution and heat transfer effects 18 p3097 A66-33595

Laminar, transitional and turbulent boundary layer flows with adverse pressure gradient on axisymmetric blunted conical flared body at Mach 10 [AIAA PAPER 66-493] 18 p3047 A66-33658

Directional heat meter for wall shear stress measurements in turbulent boundary layers 18 p3112 A66-34242

Tangential fluid injection for control of shock-boundary layer interaction [AIAA PAPER 66-656] 18 p3048 A66-34439

Velocity and temperature profile for turbulent boundary layers in adverse pressure gradients, including Prandtl number and surface roughness effects in analysis 18 p3101 A66-34667

Entrainment function in turbulent boundary layer and wall-jet calculations 18 p3102 A66-34668

Turbulent boundary layer in gas flow past curvilinear permeable surface with gas injection into flow kernel 19 p3342 A66-36464

Protective cooling of insulated plane surface by multislot and network type gas injection into turbulent boundary layer of incident flow 20 p3681 A66-38123

Meteorological characteristics for atmospheric boundary layer under stationary conditions, considering thermal stability and turbulent energy diffusion 20 p3593 A66-38367

Miniature transducer assembly for wall-pressure measurements in turbulent boundary layer flows 21 p3736 A66-38651

Supersonic turbulent flow in low temperature plasma accelerator with rapid boundary layer growth 21 p3693 A66-38684

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 21 p3723 A66-38686

Prediction characteristics of separated turbulent boundary layers in compression corners used to determine aerodynamic heating distributions and dynamic loading of supersonic vehicles 21 p3724 A66-38730

Wall flow analysis of logarithmic velocity profile of turbulent boundary layer with zero skin friction throughout region of pressure rise 21 p3729 A66-39449

Intermittency in favorable and adverse pressure gradients in turbulent boundary layer measured by modified Corrsin and Kistler method 22 p3900 A66-40384

Multichannel computer controlled Mobile Micrometeorological Observation System, automatic data acquisition, processing and recording system for observational analyses of turbulence of atmospheric boundary layer 22 p3943 A66-40427

Approximate solution of PDE for heat transfer in uniform-property universal turbulent boundary layer 22 p4001 A66-40923

Heat transfer through turbulent boundary layer, using velocity and temperature profiles as phenomenological relations 23 p4147 A66-41120

Local skin friction coefficients in turbulent boundary layers determined by technique based on wall turbulence theory 23 p4054 A66-41207

Reaction of three-dimensional shock wave with turbulent boundary layer in supersonic flow around plate 23 p4010 A66-41735

Hydrodynamic stability of incompressible fluid based on Navier-Stokes equations including numerical calculations of boundary layer disturbances and temperature-dependent material constants 23 p4060 A66-42021

Spectral distribution of space-time velocity correlations as function of velocity fluctuation scale in turbulent boundary layer 23 p4014 A66-42026

Pressure fluctuations under turbulent boundary layer or in pipe flow, noting surface deflection effect and pressure representation 23 p4061 A66-42027

Turbulent boundary layer at flat plate in extremely turbulent flow, noting effect on shearing stress and velocity distribution 23 p4061 A66-42028

Turbulent momentum transfer mechanism

in separated flow region of rectangular cavity facing oncoming turbulent boundary layer 24 p4193 A66-42154

Diffusion thermo effect on temperature field in combined heat and mass transfer processes, noting experiments with stagnation flow, turbulent boundary layer, etc 24 p4293 A66-42282

Instantaneous shear stress at liquid flow boundary, measuring turbulence and velocity fluctuation in close proximity of pipe wall 24 p4194 A66-42415

Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859

Energy equation of boundary layer in heat-insulating part of flat wall used to derive equations for gas heat shield efficiency, demonstrating effect of nonisothermicity and compressibility 24 p4196 A66-42881

Vibration excitation of plane panel by idealized model of turbulent boundary layer, comparing infinite panel/running wave with finite panel/ modal density approaches 24 p4293 A66-43048

TURBULENT DIFFUSION

Combined effect of turbulent gravitational and electrostatic coagulation on growth rate of cloud droplets estimated by two-layer model of process 01 p0096 A66-10658

Observed differences between lateral transport rates of heat and chemical species and of momentum in turbulent free shear flows accounted for by model [AIAA PAPER 65-810] 03 p0359 A66-13181

Vertical and horizontal turbulent diffusion in lower atmospheric layer as two-layer problem 04 p0513 A66-13442

Mass and momentum transfer between droplets and turbulent medium in which they move 06 p0972 A66-16896

Lagrangian similarity hypothesis to determine structure of turbulence that arises during fluid flow over rough rigid wall 07 p1022 A66-18103

Homogeneous isotropic turbulence in atmosphere model showing accretion qualities for small droplets during diffusion dissociation 08 p1212 A66-18673

Diffusion of toxic fumes driven by winds of variable velocity from given site over irregular terrain 10 p1553 A66-21580

Formula determining tubing length in heat exchanger required for steady state heat-transfer coefficient, noting role of Prandtl number 12 p1973 A66-23525

Maxwellian theory, within classical mechanics of fluids, adapted to material and thermal conductivity in turbulent flows, calculating mass and heat transfer 12 p1973 A66-23529

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 12 p1875 A66-24871

Horizontal slot jet mixing effect on sedimentation removal, neglecting boundary shear 13 p2071 A66-26732

Thermal stratification and thermostability effects on turbulent diffusion approximated by Swinbank exponential wind profile 15 p2530 A66-28603

Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068

Diffusion of viscous vortex ring in rotating fluid, noting effect of inertial waves 15 p2480 A66-29690

Plasma turbulence in terms of nonlinear wave interactions, discussing heating, diffusion in magnetic field and drift instability 16 p2767 A66-31741

Anomalous electron diffusion and ion acceleration measured in steady state low-density weakly-turbulent plasma subjected to crossed E and B fields 18 p3149 A66-34913

Growth of unstable collisionless plasma waves to turbulent state, decay of turbulent state and concomitant anomalous diffusion 19 p3415 A66-36519

Energy balance equation obtained from turbulent winds from chemical release studies and turbulent diffusion analysis of globule expansion 20 p3554 A66-38205

Structural constant of temperature fluctuations in atmosphere determined by

methods involving turbulent energy dissipation velocity and velocity distribution probability 22 p3912 A66-40332
 Quasi-linear theory to study turbulent diffusion of plasma caused by instabilities in oscillating discharge 23 p4100 A66-41140
 Turbulent diffusion coefficient determined from vertical profiles of concentration of daughter products of radon 23 p4124 A66-41839
 Upward heat flux with vanishing counter potential temperature gradient in lower atmosphere and in laboratory experiments 24 p4202 A66-42983

TURBULENT FLOW

Homogeneous turbulent flow merging with turbulent or laminar flow of equal velocity 01 p0058 A66-10475
 Diffusion from elevated point source into turbulent atmosphere flow over horizontal ground 01 p0061 A66-10483
 Pressure spectrum of turbulent flow assuming flow is generated by random intermittent function 01 p0059 A66-10759
 Turbulence characteristics measurements of wall jet 01 p0059 A66-11081
 Turbulent motion of elastoviscous fluid degeneration when highest velocity and stress field correlation moments are neglected in comparison with second moments 02 p0217 A66-11394
 Turbulent shear flow of elastico-viscous fluid in pipe or channel [AIAA PAPER 64-36] 02 p0217 A66-11526
 Statistics of locally-isotropic turbulent field for gas with density sensitive heating mechanism [AIAA PAPER 65-38] 02 p0302 A66-11532
 Nonlinear equation for distribution function of particles in plasma in electromagnetic field 02 p0267 A66-11729
 Equation of velocity distribution of fluid in duct, evaluating effect of eddy activity on second derivative 02 p0218 A66-11759
 Two-dimensionality effect on suppression of thermal turbulence in air between two horizontal plates 02 p0218 A66-11954
 Laminar boundary layer transition on highly cooled 10 degree cone in hypersonic flow, using heat gauges to study turbulent burst propagation 03 p0315 A66-12788
 Temperature fluctuation intensity measurement in turbulent flow of mercury 03 p0356 A66-12827
 Stability of parallel flows with frequency-dependent viscosity 03 p0357 A66-12960
 Spectrum of homogeneous turbulence in final stage of decay 03 p0357 A66-12961
 Turbulence in free shear layer in mixing region of circular jet, comparing statistical characteristics of mathematical and physical models [AIAA PAPER 65-805] 03 p0357 A66-13081
 Tensorial character of eddy viscosity coefficient in incompressible turbulent flow 03 p0358 A66-13099
 Observed differences between lateral transport rates of heat and chemical species and of momentum in turbulent free shear flows accounted for by model [AIAA PAPER 65-810] 03 p0359 A66-13181
 Hypersonic wakes, effects of turbulent fluctuations on air ionization reaction rates measured by averaging and regrouping perturbed source terms of chemical rate equations [AIAA PAPER 65-819] 03 p0359 A66-13230
 Electrokinetic transducers to measure potential fluctuations of turbulent flow of tap water in open channel 04 p0509 A66-13664
 Laminar and turbulent flow in eccentric annular ducts compared 04 p0511 A66-13938
 Hydrodynamic behavior of mercury in laminar and turbulent flow in tube, discussing effect of vacuum and protective gas 04 p0511 A66-14185
 Prandtl mixing-length theory used to predict performance of journal bearings operating in turbulent regime [ASME PAPER 65-LUB-17] 04 p0528 A66-14249
 Potential distribution over arc in vortex-type plasmatron determined from voltage data and direct measurement by electrostatic voltmeters 04 p0557 A66-14435
 Presence of suspended particles leads to more rapid attenuation of pulsations in final

stage of degeneration of isotropic turbulence 04 p0512 A66-14436
 Dynamic equations and Reynolds number approximations for moderately weak turbulence 05 p0662 A66-14718
 Convection heat transfer for turbulent flow in subsonic diffusers [ASME PAPER 65-HT-64] 05 p0605 A66-14765
 Perturbation factors in turbulent reattachment, with theory based on Korst [ONERA TP 275] 05 p0663 A66-15322
 Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542
 Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 05 p0790 A66-15648
 Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 05 p0664 A66-15656
 Relationship between local growth mean secondary vorticity and Reynolds stresses and gradients of anisotropic turbulence for steady mean flow [ASME PAPER 65-WA/FE-28] 05 p0665 A66-15712
 Ratio base pressure of spherical cone in turbulent flow at zero angle of attack 05 p0609 A66-15804
 Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 06 p0870 A66-16199
 Effect of initial flow turbulence on optimum suction of fluid from boundary layer of porous plate 06 p0872 A66-16468
 Friction-drag and heat-transfer coefficients of plate in turbulent gas flow, estimating effect of turbulent Prandtl number 06 p0872 A66-16469
 Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 06 p0802 A66-16537
 Secondary flow in fully-developed turbulent flow in straight channels, noting Reynolds number effect, directional characteristics of local wall shear stress, etc 06 p0873 A66-16997
 Heat transfer coefficients in liquid metal concurrent flow double pipe heat exchangers 07 p1150 A66-17582
 Liquid metal condensation, noting two-phase turbulent condensation mechanism and determining heat transfer coefficients 07 p1152 A66-17592
 Laminar profile characteristics affected by wind tunnel flow turbulence 07 p1018 A66-17857
 Quasi-normality and similarity in high order correlations in turbulent flow 07 p1020 A66-17919
 Decay of scalar quantity fluctuations in stationary isotropic turbulent velocity field studied by direct interaction approximation 07 p1020 A66-17944
 Quasi-one-dimensional unsteady hydromagnetic wave flow of ideal inviscid compressible conducting fluid in nonuniform ducts 07 p1089 A66-17962
 Quantitative estimation of effect on hydrodynamic resistance of adding surface-active additives to turbulent fluid flow 07 p1023 A66-18158
 Two-dimensional probability distribution for simultaneous turbulent velocities at two points in plane perpendicular to mean velocity of wind tunnel 08 p1205 A66-18542
 Performance of air Tesla turbine for various flows investigated by differential equation of motion 08 p1161 A66-18824
 Convective heat transfer and artificially turbulent flow through roughened corrugated channels 08 p1317 A66-18864
 Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases 08 p1206 A66-18933
 IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body

[AIAA PAPER 66-107] 08 p1206 A66-18951
 Charge density distribution, electric field strength and flow rate of turbulent flow of incompressible fluid in flat nonconducting channel 08 p1263 A66-19172
 Theory of homogeneous-heterogeneous radical reactions in turbulent flow in one dimensional elongated reactor with high Peclet number 08 p1179 A66-19377
 Time-space spectral analysis of meteorological fields based on time dependent spectra of wind velocity, temperature, pressure and turbulent pulse and heat fluxes 09 p1397 A66-19888
 Macroturbulent transfer and meridional circulation in northward drift of atmospheric ozone 09 p1370 A66-19899
 Damping of small amplitude vibrations of fine wire as probe of onset and development of critical flow phenomena in He 2 at moderate Reynolds numbers 09 p1365 A66-20011
 Similarity hypothesis applied to turbulent flow in annulus 09 p1366 A66-20177
 Onset of turbulence in detached lamina shear layer 09 p1368 A66-20800
 Transverse magnetic field effect of velocity profile of turbulent mercury flow most pronounced in suddenly expanding flow 09 p1409 A66-20833
 Variations of turbulent plasma electrical conductivity with input oscillation intensity and with square of RF input voltage 09 p1409 A66-20855
 Mathematical model of flame propagation in laminar and turbulent flow 10 p1619 A66-21077
 Free convection heat transfer to carbon dioxide near critical point, noting free turbulent and oscillating flow 10 p1619 A66-21277
 Taylor relation between velocity partial time and space derivatives in high Reynolds number turbulent shear flow 10 p1522 A66-21467
 Approximate method for analyzing chemically reacting turbulent flow fields having initial homogeneities [AIAA PAPER 65-37] 10 p1523 A66-21777
 Pressure coefficient criterion for transition between two- and three-dimensional turbulent cavity flow 10 p1523 A66-21797
 Turbulent fluctuation effect on dielectric properties of weakly turbulent plasma at LF and electron plasma frequency 10 p1567 A66-21816
 Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-22337
 Friction resistance of compressible turbulent gas flow through initial section of cooled pipe with large gas-wall temperature gradients 11 p1888 A66-22597
 Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23132
 Turbulent channel flow, discussing friction flow anisotropy and homogeneity, vortex flow, channel viscosity, etc 12 p1860 A66-23532
 Feasibility of using Langmuir probe for measuring statistical properties of unsteady or turbulent electron-rich plasmas [AIAA PAPER 65-544] 12 p1919 A66-23580
 Surface pressure fluctuations produced by boundary layer turbulence developed above rigid plane surface 12 p1862 A66-23820
 Quasi-normality and similarity in high order correlations in turbulent flow 12 p1862 A66-23880
 Turbulent flow process in transpiration cooling through study of uniform fluid injection along porous tube [ASME PAPER 65-APM-29] 12 p1862 A66-23969
 Turbulent radial channel flow without swirl between parallel disks having both supersonic and subsonic regions, determining pressure distribution and normal shock [ASME PAPER 65-FE-11] 12 p1799 A66-24547
 Anisotropic grid-generated turbulence passed through axisymmetric nozzle of small contraction ratio followed by straight section 12 p1866 A66-24947

- True static pressure and shear stress of
all turbulent flow obtained, using two
static holes of different
diameters 12 p1867 A66-24981
- Hydraulic servocontrol system performance
improvement by eliminating turbulent flow
and regulating servoactuator pressure
drop 13 p1997 A66-25130
- Effective diffusion cross section of
ultrasonic and laser beam while acting on
turbulent flow 13 p2062 A66-25404
- Constant section mixture of flows with
different enthalpies, noting sonic blocking
or terminal temperature
differences 13 p1991 A66-25470
- Turbulent flow intensity measured in
turbulent wake of small fence along flat
plate covered with flabby skin, for analysis
of drag reduction in
aerodynamics 13 p2063 A66-25598
- Goldberg method for determining Doppler
widths in calculations of depth dependence
of solar turbulence 13 p2183 A66-25615
- Size distribution law for dimensions of gas
bubbles formed during cavitation in
turbulent flow of liquid 13 p2064 A66-25915
- Lateral covariance, longitudinal eddy
length-scale and vorticity-transfer-adaptation
hypothesis of two-dimensional jet turbulence
theory 13 p2064 A66-26123
- Analog computer solution of simplified
turbulent viscous layer boundary value
problem 13 p2064 A66-26370
- Surface roughness effect on laminar-
turbulent transition, noting plane flow past
isolated cylindrical element in laminar
boundary layer 13 p2068 A66-26542
- Fluid mechanics - Midwestern Mechanics
Conference, Case Institute of Technology,
Cleveland, April 1963 13 p2068 A66-26701
- Transition from laminar to turbulent flow,
establishing critical Reynolds number of
223 for steady pipeflow 13 p2069 A66-26702
- Mean velocity, rms velocity fluctuations
and Reynolds shear stress for air flow at
high Reynolds number in rectangular
channel partially roughened, measuring
turbulence intensity 13 p2070 A66-26703
- Forced turbulent convective incompressible
flow along rough plates, measuring velocity
and temperature profiles 14 p2410 A66-26934
- Pipe flow turbulent temperature
fluctuation measurements in mercury and
ethylene glycol with fast response
thermocouple 14 p2410 A66-26936
- Velocity field in turbulent flow based on
momentum transfer, determining velocity
distribution for flow near solid
surface 14 p2276 A66-27681
- Flame expansion rate in turbulent flow of
homogeneous inflammable mixture at
ignition temperatures from 423 to 823
degrees K 14 p2374 A66-27691
- Hydraulic resistance and heat transfer in
laminar-turbulent transition region in tube
with heating and cooling of
water 14 p2414 A66-27830
- Pressure spectrum of turbulent flow
assuming flow is generated by random
intermittent function 14 p2277 A66-27858
- Schlieren photographs of spark ignition in
turbulent gas mixture flows and analysis of
ignition delay and burning
velocity 15 p2616 A66-29069
- Turbulent fluid flow with consideration of
structure and statistical and functional
formulations 15 p2478 A66-29176
- Approximation of electrical conductivity
change in ideally conducting gas in
turbulent MGD flow 15 p2551 A66-29220
- Three-dimensional viscous free mixing,
describing numerical and experimental
solutions for wake and jet flows
[AIAA PAPER 65-49] 15 p2424 A66-29272
- Mellor solutions for linearized wakes and
jets in laminar and turbulent flow for class
of pressure gradients 15 p2424 A66-29293
- Stabilization of lifted diffusion flame in
turbulent methane jet flow field and
measurements of gas flow velocity,
turbulence and gas
composition 15 p2479 A66-29608
- Equations of motion of turbulent gas and
formulation of simple model of turbulence
from classical Liouville equation and
aerodynamics of rarefied
gas 15 p2482 A66-29973
- Oscillation spectra of plasma in quasi-
steady state characterized by self-consistent
distribution of plasma particles and
turbulent pulsation 16 p2755 A66-30090
- Isotropic turbulence theory for
incompressible fluid 16 p2683 A66-30165
- Spectrum of plasma fluctuations in ionized
turbulent gas explained by statistical
turbulence theory, noting that electron
temperature is larger than gas
temperature 16 p2757 A66-30173
- Mixing of free jet boundary which includes
laminar and turbulent flow region in
tandem 16 p2685 A66-30805
- Pneumatic control systems, discussing
turbulence amplification method and system
with miniaturized elements with moving
parts 16 p2636 A66-31063
- Annular diaphragms to produce turbulent
flow in tubes 16 p2828 A66-31065
- Flow of turbulent incompressible fluid
downstream from step-shaped wall,
determining velocity fields in isobaric
region, considering existence of boundary
layer thickness at separation
point 16 p2687 A66-31205
- Mean Lorentz force field of electrically
conducting medium in turbulent motion
affected by Coriolis force 16 p2763 A66-31349
- Effect of single or periodic disturbances
on intermittency in pipe flow at various
Reynolds numbers, noting relation of
disturbance input frequency to output
frequency of turbulent
slugs 16 p2688 A66-31394
- Laminar steady motion transition to
turbulent flow in systems described by
hydrodynamic equations, including small
amplitude steady periodic motion
analysis 16 p2689 A66-31512
- Malkus theory in weakly-conducting
turbulent liquid flow between parallel plates
in transverse magnetic field, noting velocity
profile and transition
region 16 p2766 A66-31652
- Flow field, pressure drop and friction
factor characteristics of turbulent flow in
eccentric annular ducts 16 p2690 A66-31656
- Homogeneous turbulent shear flow
generation in open-return wind tunnel test-
section by plane parallel-rod
grid 16 p2691 A66-31658
- Acoustic pressures on vibrating walls for
turbulent airflow through rectangular hard-
walled duct exposed to traveling sound
waves 17 p2905 A66-31944
- Resistance coefficient calculation
procedure for turbulent flow in circular
pipes extended to case of annular
conduits 17 p2906 A66-32034
- Pitot tube readings in viscoelastic
turbulent stream, noting stress and kinetic
contribution, momentum average factor,
etc 17 p2906 A66-32035
- Turbulent flow of dilute viscoelastic non-
Newtonian fluids in pipes, noting frictional
characteristics, elastic fluid parameters,
etc 17 p2906 A66-32036
- Turbulent flow field in straight circular
tubes of sodium carboxymethylcellulose
solutions, measuring pressure drop velocity
profile over wide range of Reynolds
numbers 17 p2906 A66-32037
- Turbulent supersonic base pressure for
Chapman-Korst flow model of separated
flows 17 p2906 A66-32077
- Velocity and temperature profiles,
hydrodynamic elements, heat transfer and
friction coefficients of turbulent
incompressible flow through circular and
flat tube 17 p2909 A66-32583
- Burning velocity in turbulent stream of
homogeneous mixture 17 p3036 A66-32826
- Diffusion combustion in turbulent
compressible gas flow 17 p3036 A66-32827
- Turbulent velocity pulsations in mercury
flow in transverse magnetic
field 17 p2971 A66-32864
- Turbulent flow near boundary and
equations for mass-or heat-transfer
coefficient in terms of turbulent diffusion
coefficient and thermal
diffusivity 17 p3037 A66-33042
- Steady-state and dynamic characteristics of
full circular bearing and centrally loaded arc
bearing presented in design charts for
turbulent lubrication analysis
[ASME PAPER 66-LUBS-4] 17 p2931 A66-33178
- Eddy kinematic viscosity in transition
region between laminar sublayer and
turbulent core 17 p2916 A66-33417
- Frictional drag and convective heat
transfer of rotating cones of arbitrary
vertex angles in mixed and turbulent
flow 17 p3038 A66-33469
- Intake flow maldistribution excitation of
rotor blade vibration in V-STOL predicted
by blade velocity triangles
method 18 p3050 A66-33680
- Transverse magnetic field effects on heat
transfer in turbulent flow of mercury in
circular iron tube 18 p3145 A66-34109
- Skin friction coefficient predictions in
turbulent compressible flow, using design
nomograph based on Spalding-Chi
method 18 p3100 A66-34603
- Optimum averaging periods in
measurements of wind velocity profile,
temperature gradient, vertical thermal
turbulent flow and atmospheric
drag 18 p3130 A66-34609
- Internal waves of finite amplitude and
permanent form propagating on horizontal
stream of incompressible
fluid 18 p3101 A66-34664
- Velocity profile downstream from stepped
wall having incompressible turbulent fluid
flows 19 p3340 A66-35580
- Drag coefficient of turbulent flow of
electrically conducting liquid metal in MHD
channels of round cross
section 19 p3407 A66-36098
- Temperature fluctuation intensity
measurement in turbulent flow of
mercury 19 p3343 A66-36769
- Diffusion parameters for fluid stream
flowing from round hole with given radius
and velocity into wake
flow 20 p3544 A66-36914
- Spatial correlation coefficients and
transverse temperature perturbation scales
during turbulent nonisothermal flow of
mercury in circular pipe 20 p3607 A66-36982
- Heat transfer in turbulent carbon dioxide
pipeflow at supercritical
region 20 p3674 A66-36983
- Skin friction drag of power law fluids in
turbulent flow over flat plate shown as
function of non-Newtonian Reynolds number
and shear rate exponent 20 p3545 A66-37507
- Stability of liquid Newtonian jets ejected
from circular capillary tubing into stagnant
air, noting influencing factors such as nozzle
turbulence, velocity profile development and
ambient medium
properties 20 p3545 A66-37509
- Logical element geometry effect on fluid
flow in turbulent reattachment
device 20 p3501 A66-37645
- Turbulence amplifier developed as pure
fluid amplifier and logic element in which
laminar jet is directed at mouth of collector
tube and pressure at any input causes
turbulence, reducing output to
zero 20 p3501 A66-37653
- Operation principles of turbulence
amplifiers, considering application to low
cost automation, using conventional
pneumatic valves and
cylinders 20 p3502 A66-37655
- Interface propagation in mixed laminar-
turbulent flow between counter-rotating
concentric cylinders, noting spiral
turbulence as dominant feature of Couette
flow transition 20 p3547 A66-37979
- Integral-diffusion analysis of turbulent flow
of incompressible liquid 20 p3548 A66-38111
- Heat transfer between turbulent flow of
air and isothermal wall plate and constant
thermal flux at surface 21 p3835 A66-38907
- Mathematical flow-intermittance model for
turbulent patterns, noting viscosity
effects 21 p3725 A66-38954
- Frequency distribution of wind speed and
direction derived by applying random walk
to turbulent flow 21 p3759 A66-39204
- Reynolds equations for two-dimensional
uniform turbulent shear flow of Reiner-
Rivlin fluid suggest drag
reduction 22 p3896 A66-39671
- Heat transfer and flow in turbulent
separated airflow over downward step in
plate surface with suction and injection
[ASME PAPER 65-WA/HT-2] 22 p3898 A66-40025
- Heat losses from turbulent gas flowing

through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation
[ASME PAPER 65-WA/HT-16] 22 p3997 A66-40027

IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body
[AIAA PAPER 66-107] 22 p3899 A66-40351

Stochastic form of decaying isothermal second-order reactions, comparing exact solution with various closure approximations 23 p4055 A66-41498

Flame propagation velocity parameters in turbulent flow as function of flow pulsation velocity, normal burning velocity and relative heating 23 p4149 A66-41792

Turbulent viscous-interaction parameter in connection with boundary layer growth in presence of mass transfer, examining comparison of effects of strong and weak interactions 23 p4058 A66-41902

Shear flow transition to turbulence and instability phenomena, discussing parallel and laminar flows 23 p4060 A66-42019

Two-dimensional roughness element effect on boundary layer transition, noting free stream turbulence level influence on amplification rate of disturbance 23 p4060 A66-42020

Nonlinearity of governing equations of fluid mechanics, assuming fluid fluctuations are nearly normally distributed 24 p4193 A66-42283

Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408

Compliant surface effects on skin friction reduction in turbulent flow in open-circuit wind tunnel 24 p4195 A66-42796

Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880

Degree of similarity of turbulent flow characteristics in geometrically similar flows 24 p4197 A66-42949

Channel flow deriving equation for /proper/ turbulence spectrum and expression for spectrum of dynamic and turbulent quantities 24 p4197 A66-43061

Generalization of experimental data on hydraulic resistance in tubes with ribbon turbulizers for laminar flow with macrovortices and turbulent flow 24 p4198 A66-43223

TURBULENT HEAT TRANSFER

Variation of local heat-transfer coefficients produced by impinging jets reexamined in light of velocity and turbulence distributions effects 02 p0304 A66-12197

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 03 p0354 A66-12390

Injection method for coolant has no substantial effect on efficiency of gas curtain used to shield machine parts 04 p0598 A66-14438

Effect of asymmetrical heating on turbulent heat transfer in rectangular duct [ASME PAPER 65-HT-11] 05 p0782 A66-14735

Heat transfer to in-line turbulent flow of NaK through unbaffled bundle of circular rods 05 p0783 A66-14737

Integral approximations for skin friction and heat transfer in MHD channel flow [ASME PAPER 65-HT-15] 05 p0783 A66-14739

Heat transfer of internal heat generating fluid in turbulent regime, using electrical dissipation and measuring wall to bulk temperature differences [ASME PAPER 65-WA/HT-15] 05 p0790 A66-15649

Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 05 p0790 A66-15651

Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 08 p1247 A66-19306

Laminar fully-developed flow of water between parallel flat plates examined, using

motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179

Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 09 p1367 A66-20702

Nucleate boiling heat transfer considered as heat transfer into liquid near front of flow past blunt nosed body 09 p1471 A66-20824

Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 11 p1785 A66-22192

Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 11 p1688 A66-22592

Heat and humidity transfer effects and turbulent exchange influence on cloud formation 11 p1730 A66-22941

Turbulent heat transfer effect on gas stratification in field of Archimedes forces 12 p1979 A66-24429

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 13 p2062 A66-25396

Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275

Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 14 p2325 A66-27535

Heat transfer between turbulent supersonic air stream and circular water-cooled tube at Mach 1 to 4, using two-dimensional flow model 16 p2829 A66-31161

Statistical analysis of solar atmospheric motion, noting three dimensional geometry of subjacent turbulent convection 16 p2803 A66-31257

Reynolds analogy computation of heat transfer coefficient of turbulent electroconducting liquids in transverse magnetic field 16 p2765 A66-31401

Turbulent heat transfer measurements on transpiring flat plate in Mach 8 tunnel using nitrogen, helium and argon as injection gases 17 p2838 A66-32439

Laminar argon arcjet mixing with coaxial flow of cool helium, considering turbulent characteristics and heat transfer [AIAA PAPER 65-587] 17 p3033 A66-32442

Heat transfer resulting from normal impingement of turbulent high temperature jet on infinitely large flat plate 17 p3039 A66-33470

Hypersonic tunnel measurements of turbulent heat transfer for thin walled slender cone 17 p3039 A66-33474

Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 19 p3393 A66-36042

Heat and humidity transfer effects and turbulent exchange influence on cloud formation 20 p3593 A66-37854

Heat transfer of internal heat generating fluid in turbulent regime, using electrical dissipation and measuring wall to bulk temperature differences [ASME PAPER 65-WA/HT-15] 22 p3997 A66-40028

Compressible turbulent boundary layer on flat plate, noting correspondence between compressible and incompressible flow, numerical results on skin friction and heat transfer, etc 22 p3899 A66-40344

Atmospheric turbulence statistical characteristics dependence on stratification and elevation from heat flux and wind friction stress characteristics 23 p4087 A66-41800

Turbulent heat transfer coefficient in smooth pipes at high Prandtl numbers has higher value than when turbulence is not assumed 23 p4151 A66-42054

Friction and turbulent heat transfer as function of Reynolds number applied to missile rounded-off forebody, delta wings, etc, using boundary layer equations 23 p4151 A66-42056

Disturbance propagation in baroclinic

atmosphere in presence of radiation and turbulent heat conduction 24 p4233 A66-42335

Closed form relationship for estimation of flat plate turbulent heating rates hypervelocities 24 p4158 A66-42761

TURBULENT JET

Hydraulic jump as plane turbulent wall jet under adverse pressure gradient and finite depth of flow 01 p0056 A66-10335

Turbulent jet axis under crossflow different density assuming static pressure excess heat content and projection of mean jet velocity 04 p0509 A66-13661

Laminar and turbulent MHD free jet, using Peskin analysis 05 p0721 A66-14725

Mixed flow of five plane turbulent air jets discharged into atmosphere through slot nozzles 06 p0872 A66-16461

Book on motions of viscous incompressible fluids, covering laminar and turbulent jets and solutions, based on exact Navier-Stokes equations 06 p0872 A66-16561

Velocity profile of main section of axisymmetric turbulent jet of incompressible fluid flowing into homogeneous companion flow of same fluid 08 p1206 A66-18835

Axial temperature variation in turbulent buoyancy-controlled diffusion flame 08 p1319 A66-19261

Hot-wire measurements in plane turbulent jet of air 10 p1480 A66-21641

Crosswind effect on turbulent jet parameters for submerged jet propagation angle to unrestricted flow 12 p1864 A66-24435

Axisymmetric liquid nitrogen turbulent jet propagating under supercritical pressure in gaseous nitrogen medium 12 p1864 A66-24441

Velocity profiles of jets and wakes with longitudinal pressure gradient obtained using polynomial for turbulent shear stress 14 p2217 A66-27271

Plane parallel submerged two-dimensional turbulent jet with nonuniform initial velocity 14 p2275 A66-27661

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers 14 p2413 A66-27661

Spread and decay of turbulent free jet and shear-stress analysis of turbulent mixing zones 15 p2424 A66-29231

Laminar to turbulent transition in free jets 15 p2424 A66-29331

Turbulent swirling jets issuing from round orifice studied experimentally and theoretically, based on continuity equation and Reynolds equations of motion 17 p2913 A66-33061

Heat transfer resulting from normal impingement of turbulent high temperature jet on infinitely large flat plate 17 p3039 A66-33471

Hot wire measurements in radial turbulent incompressible air jet 18 p3045 A66-33541

Fluid mechanical analysis of tektite origin based on hypothesis of material ejection from Earth surface in liquid jet form upon meteoritic impact 18 p3227 A66-33661

Flow in two-dimensional plane wall jet in still air with various initial gaps between nozzle exit and leading edge of wall 18 p3097 A66-33951

Navier-Stokes equations, differences for laminar jets and turbulent jets, submerged jets and transition layer stability 18 p3099 A66-34121

Incompressible turbulent two-dimensional wall jet flow, discussing viscous interaction with surrounding fluid attachment streamline, momentum-flux equations, etc 18 p3099 A66-34121

Velocity profile measurements in turbulent liquid jets via photography, noting calculation of flow turbulence characteristics 18 p3114 A66-34891

Velocity and temperature fields in flow of five turbulent jets injected by means of separate nozzles into chamber 18 p3103 A66-35051

Nonisothermal axisymmetrical turbulent jet curved by gravity and inertial forces 19 p3342 A66-36461

Approximation method for transition section calculation of turbulent jet obtaining velocity profiles for initial and basic sections 19 p3276 A66-36461

Expansion of axisymmetrical heated gas jet

homogeneous slipstream experimentally studied and compared with equivalent problem in theory of heat conduction 19 p3342 A66-36479
Aerodynamic effect of free transverse gas flow on propagation of turbulent gas jet, analyzing jet mixing process and jet axis curvature 21 p3727 A66-39255
Internal turbulence scale for convection jets determined, using measurements of light intensity 21 p3760 A66-39357
Self-preserving flow in outer part of two-dimensional curved turbulent wall jet for constant ratio of jet thickness to wall radius of curvature 22 p3844 A66-40489
Solution of motion and energy equations in boundary layer of main portion of vortex 22 p3902 A66-40817
Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses 23 p4056 A66-41726
Propagation of turbulent jet colliding with flat surface at certain incidence angle analyzed for applications to V/STOL aircraft, ventilation equipment, etc 23 p4056 A66-41737
Round turbulent low speed airjet impingement on flat surface and application of theoretical analysis of inviscid rotational flow 23 p4012 A66-42002

TURBULENCE MIXING
Curved turbulent mixing layer in measurement of mean velocity, turbulence intensity and shear 03 p0356 A66-12945
Scalar quantity spectrum in statistically stationary turbulent velocity field, using closure approximations to provide unified comparison, noting eddy diffusivity, transfer function, etc [AIAA PAPER 65-814] 03 p0357 A66-13082
Warren momentum integral method for predicting compressible free mixing of two dissimilar gases [AIAA PAPER 65-822] 03 p0357 A66-13083
Statistical behavior of reacting mixture in incompressible isotropic turbulence when reaction rate is quadratic function of local concentration of reactant, using Kraichnan direct interaction hypothesis [AIAA PAPER 65-812] 03 p0358 A66-13180
Turbulent mixing of axisymmetric jet of partially dissociated nitrogen with ambient air, establishing mixing and decay characteristics [AIAA PAPER 65-823] 03 p0359 A66-13231
Two sets of Tollmein and Goertler equations derived for two-dimensional incompressible free jet mixing layer, using similarity assumption [AIAA PAPER 65-821] 04 p0510 A66-13692
Supersonic combustion, examining turbulent mixing zone between supersonic streams of carbon dioxide and hydrogen 05 p0662 A66-15062
Preventing turbulent contamination of laminar flow on highly swept wings by attaching bump on leading edge 06 p0801 A66-15998
Plasma fluctuations in presence of turbulent gas flow in laboratory discharge 06 p0916 A66-16389
Axial deviation of gas flow resulting from mixing turbulent gas jets 07 p1019 A66-17395
Spectral distribution of kinetic and magnetic energies from stationary homogeneous MHD turbulence 07 p1087 A66-17945
Decaying second-order isothermal reaction in limit of homogeneous turbulence in final period of decay 10 p1496 A66-21828
Turbulent friction tensor derived for anisotropic molecular velocity distribution, considering application to stellar rotation physics 11 p1737 A66-22363
Two-dimensional isoenergetic compressible mixing of jet with fluid at rest for laminar and turbulent mixing 12 p1795 A66-23572
Evolution of scalar quantity spectrum in statistically stationary isotropic turbulent velocity field determined by closure approximation theory 12 p1865 A66-24583
Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and

temperature variations, flow pattern, etc 13 p2070 A66-28721
Turbulent mixing of rotationally symmetric jet in flow of equal velocity and equal density, including similarity models 15 p2423 A66-28522
Spread and decay of turbulent free jets and shear-stress analysis of turbulent mixing zones 15 p2424 A66-29295
Static pressure in strong noise field near turbulent mixing shear flow 17 p2905 A66-31952
Laminar, transitional and turbulent flow regions in laminar plasma jets, noting variation of noise level and mixing length with Reynolds number at 400 amp 17 p2968 A66-32460
Subsonic-supersonic speed jet turbulent mixing 17 p2840 A66-32489
Composition in far field of rocket jet mixing with air 18 p3260 A66-33808
Conservation equations for two-dimensional axisymmetric simultaneous turbulent mixing and supersonic combustion of hydrogen-oxygen-nitrogen-water streams solved by finite difference methods [AIAA PAPER 66-617] 18 p3099 A66-34219
Kinetic factors in diffusion flames, noting fuel/oxygenizer ratios, equilibrium in terms of flame geometry, burning of metallic elements, etc [WSCI 66-10] 18 p3263 A66-34419
Base pressure behind ridge in separated supersonic flow of compressible gas determined for case of turbulent mixing 18 p3103 A66-35053
Self-simulating solutions of nonstationary turbulent mixing in some aerodynamic problems, considering shock interaction with boundary layer 19 p3276 A66-36462
Turbulent gas jet mixing in chamber with four inlet nozzles 20 p3627 A66-36925
Molecular mixing of cold air jet containing sodium nitrite vapor and slipstream of gasoline-air mixture combustion products 23 p4149 A66-41793
Mixing and reattachment of two-dimensional supersonic flow, noting parasitic factors 23 p4014 A66-42023
Decay of small temperature perturbations by thermal radiation in atmosphere, noting gray and line absorption, relaxation time constants and numerical computations 24 p4203 A66-42986

TURBULENCE WAKE
Electron density decay in wakes of hypervelocity aluminum and copper spheres in air and nitrogen as function of time, using transmission resonant cavity 02 p0267 A66-11529
Autocorrelation functions and gas density spectra from microdensitometer tracings of schlieren photographs of turbulent wakes behind hypervelocity spheres 03 p0317 A66-12947
Statistical characteristics of high speed turbulent wake boundaries [AIAA PAPER 65-808] 03 p0359 A66-13229
Turbulence wake suppression in Karman vortex street of circular cylinders by controlling transverse oscillations of vortex generating cylinder in transition range 04 p0453 A66-13514
Mach-Zehnder interferometer study of fluctuations in turbulent wakes of slender cones and spheres in ballistic flight [AIAA PAPER 65-809] 04 p0455 A66-13691
Rapid irreversible second-order chemical reactions in turbulent wake of cylinder 04 p0455 A66-13937
Electron density fluctuations in turbulent wake, using stochastic analysis and statistical averaging [AIAA PAPER 65-818] 05 p0606 A66-15187
Radar backscatter cross section from turbulent wakes 05 p0635 A66-15797
Flow induced structural vibrations, noting interdependence between deformation and fluid dynamic loading 06 p0872 A66-16615
Flow properties in turbulent near wake of circular and elliptic cones at zero angle of attack in Mach 6 flow [AIAA PAPER 66-54] 07 p0980 A66-17897
Aerodynamic characteristics of wakes behind hypervelocity bodies [AIAA PAPER 66-53] 08 p1162 A66-18952
Increased mass transfer from flat plate caused by wake from cylinders located near

boundary layer edge 08 p1211 A66-19682
Asymptotic structure of remote parts of wake of bodies moving in rarefied plasma, using linearized perturbation theory 09 p1465 A66-21017
Electromagnetic scattering model of turbulent plasma wake behind reentry vehicle 10 p1502 A66-21634
Bimodal formulation applied to chemical reactions in turbulent wake flow behind hypersonic spheres, using quasi-one-dimensional model 10 p1480 A66-21771
Correlations of distance to downstream stagnation point and axial static pressure along axis of symmetry of near wake of cone at Mach 6 12 p1795 A66-23571
Wake dimensions growth and turbulent energy decay in incompressible axisymmetric wakes surveyed, using hot-wire anemometer in low speed wind tunnel [ASME PAPER 65-FE-8] 12 p1799 A66-24556
Turbulent flow intensity measured in turbulent wake of small fence along flat plate covered with flabby skin, for analysis of drag reduction in aerodynamics 13 p2063 A66-25598
Schlieren photographs of turbulent hypersonic wakes behind cones and spheres at various Mach numbers and pressures, analyzing laminar wake core, wake diameter and distance to transition 13 p1992 A66-26664
Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704
Velocity profiles of jets and wakes with longitudinal pressure gradient obtained, using polynomial for turbulent shear stress 14 p2217 A66-27276
Enthalpy and density fluctuations in high speed wakes, noting typical reentry and ballistic range cases 14 p2219 A66-27431
Turbulent gas flow in wake of flow separation from solid surface 17 p2909 A66-32563
Pressure and temperature profiles in turbulent wake behind cone at Mach 5 17 p2842 A66-33472
Supersonic wind tunnel measurements in turbulent wake of axisymmetric slender body [AIAA PAPER 66-453] 18 p3046 A66-33649
Turbulent wakes formed by elliptic disks in low speed wind tunnel, presenting similarity velocity defect profiles, drag coefficients and turbulence 22 p3844 A66-40347
Propagation of weak shock waves with Mach number less than 1.25 around obstacles placed in indefinite medium, examining turbulent wake formation and wave diffraction [ICAS PAPER 66-21] 22 p3901 A66-40667
Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses 23 p4056 A66-41726
Distance of transition to turbulence of wake measured behind spherical and blunted-cone models at hypersonic speeds in ballistic range 23 p4011 A66-41883
Double Langmuir probe measurement of turbulent structure and ionization intensity of hypervelocity projectile and spectral characteristics of probe signal fluctuation 24 p4192 A66-42198

TURING MACHINE
Machine dependence of degree-of-difficulty relation for recursive functions, considering Turing machine as programmed computer 04 p0489 A66-13366
One-tape off-line Turing machines covering crossing sequences, recognition problems and computation times 05 p0637 A66-14929
One-tape off-line Turing machine, analyzing characteristics and computation time minimization 10 p1506 A66-21075
Lower bounds on computation times of certain input-output transformations and tradeoff relation between computation time and dimensionality of Turing machine tapes 13 p2027 A66-25802

TURNSTILE ANTENNA
Field intensity and polarization characteristics of turnstile antenna with arbitrary phase and amplitude relationship

between two exciting elements 12 p1838 A66-24610
 Turnstile multiple-probe microwave polarimeter for anisotropic plasma diagnostics 20 p3609 A66-37630

TVC
S THRUST VECTOR CONTROL /TVC/
TWENTY-FOUR HOUR ORBIT
S STATIONARY ORBIT
TWENTY-FOUR HOUR SATELLITE
SA SYNCHRONOUS SATELLITE
 Faraday rotation from 24-hr satellite at high frequencies provides means of studying electron content of ionosphere and fluctuations 18 p3106 A66-34200

TWENTY-SEVEN DAY VARIATION
 Changes in nature of 27-day variations in cosmic ray intensity 02 p0281 A66-11334
 27-day changes in solar diurnal variation from 1957 to 1958 based on neutron component data, noting modulation of cosmic ray anisotropy 05 p0754 A66-15402
 Periodic temperature fluctuations in mesosphere based on underground measurements of cosmic ray intensity at Yakutsk, Siberia 06 p0950 A66-16595
 Changes in rigidity spectra of primary cosmic radiation during Forbush decreases and 27-day variations 07 p1125 A66-18003
 Spectrum analysis of nondiurnal E layer variation at Washington, D.C., show relationship of 27-day variations of sunspot number and E layer critical frequency 12 p1874 A66-24845
 Data from satellite 1963 38C, showing existence of 27-day periodicity in intensities of trapped electrons undergoing two increases and linked to interplanetary magnetic field 13 p2175 A66-26353
 Measuring devices and observational methodology used in determining time variant and cyclic variations in cosmic ray occurrence 15 p2573 A66-28518
 27-day cycle in diurnal variation of amplitude of meson component of cosmic radiation based on 20 years observation 16 p2795 A66-31692
 27-day modulation of solar diurnal variation of cosmic ray neutron component 18 p3183 A66-34790
 27-day variations of cosmic ray intensity in stratosphere from 1957 to 1963 18 p3184 A66-34794
 Rigidity dependence of Forbush decreases, using underground meson intensity measurement 18 p3184 A66-34797
 Average values for relative sunspot numbers for /27-day geophysical/ rotation periods zero to 1797 /January 1832 to December 1964/ tabulated by individual rotation 19 p3453 A66-36300
 Interferometric observation of flux densities of solar radio emission at 4000 mc/sec and relationship to 27-day recurrence tendency of summation of planetary 3-hour indices 20 p3634 A66-38214
 High energy trapped electrons in outer zone for 27-day, diurnal and storm time variations 20 p3639 A66-38317
 Variation of geomagnetic activity with phase of Moon tested for statistical significance, noting fluctuations at lunar period 22 p3982 A66-40555
 Equinoxes, having highest solar corpuscular radiation hitting probability, as observation periods for geomagnetic activity, aurora, etc 24 p4274 A66-42433
 Subsidiary peaks in power spectra of C1 and Kp /magnetic indices/ attributed to amplitude modulation of 27-day components 24 p4201 A66-42607

TWILIGHT
 Photoelectric measurements of twilight sky brightness and polarization and correction of measured values 01 p0138 A66-11103
 D-region atmospheric processes such as electron attachment, photo and other detachment processes, recombination and neutralization as studied in laboratory 03 p0362 A66-12640
 Light polarization of twilight and daytime sky at various wavelengths, using telescope-polarimeter system with various color filters 08 p1217 A66-19335
 Relation between optical and electrical properties of interplanetary dust in upper atmosphere and comparison with twilight-optical and ionospheric

parameters 18 p3105 A66-33961
 Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36350
 Book on atmospheric optics of twilight phenomena 19 p3394 A66-36732
 Tropospheric component of twilight brightness determined from observations of intensity and polarization of sky at two symmetrical points of solar vertical 20 p3549 A66-37024
 Zodiacal-light photometric measurements, analyzing effect of twilight radiation on observable brightness 20 p3549 A66-37036
 Multiple air scattering in mesosphere as function of zenith distance of Sun and brightness of twilight sky 23 p4087 A66-41803

TWIN JET
 Boeing 737 twin-jet short haul airliner, featuring wing-mounted engines and advanced technology 10 p1481 A66-21074

TWINNING
SA MECHANICAL TWINNING
 Cyclic twinning deformation in fatigued close-packed cadmium, zinc, magnesium and titanium 04 p0537 A66-14309
 Pile-up of dislocations in front of twin bands formed in crystal as result of elastic twinning 09 p1391 A66-20866
 Growth and properties of n and p type beta-silicon carbide crystals grown from pure or doped carbon-saturated silicon melts 10 p1577 A66-21563
 Annealing twins and twin-boundary intersections in niobium, noting invalidity of cause-and-effect relationship between twins and crack formation in bcc structures 11 p1717 A66-22998
 Surface orientation effect on twin accommodation in hcp metal magnesium and relation to twin boundary movement 13 p2107 A66-25585
 Annealing of lightly deformed columbium single crystals with parallel twins or parallel and intersecting twins 16 p2726 A66-31461
 Tension and compression tests on single and polycrystalline niobium, examining twinning, slip and catastrophic flow 19 p3387 A66-36727
 Existence of twins in single crystalline films of barium titanate, obtaining electron diffraction patterns 21 p3805 A66-39581

TWIST
S TORQUE
TWO-BODY ORBIT
 Conventional two-body orbit equations for eccentricity near unity 18 p3227 A66-33829

TWO-BODY PROBLEM
SA MANY-BODY PROBLEM
 Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 03 p0427 A66-12920
 Intermolecular forces for two-, three- and four-bodies and those in liquid or condensed medium 06 p0911 A66-16169
 Perturbation theory for two-body problem, using regularized Levi-Civita variables [AIAA PAPER 66-8] 07 p1137 A66-17882
 Generalization of Whittaker formula for periodic orbits to fields with arbitrary attraction law 07 p1139 A66-18189
 Two-body problem applied to elliptic orbit, comparing three-impulse with single-impulse plane change applied at node 08 p1289 A66-18837
 Infinite frequency elastic moduli of monatomic fluids related to pressure and internal energy of fluid 08 p1206 A66-18941
 Two-body problem with elliptical formulas for orbit changes of predetermined points caused by small drive thrusts, considering effect of tangential velocity change 08 p1298 A66-19752
 Numerical analysis of stability of periodic orbits for restricted problem of two equal masses 09 p1456 A66-20464
 Forced vibrations of two-degree-of-freedom system with combined Coulomb and viscous damping 09 p1469 A66-20950
 Equations for variation of orbital elements in two-body problem with variable mass solved analytically for various laws of mass loss, noting periodic function of eccentric anomaly 10 p1605 A66-21205
 Two-body problem of two-impulse transfer to or from given circular orbit and given nonplanar hyperbolic

asymptote 10 p1608 A66-21708
 Recursive generation of expansion coefficients of time-dependent f and series in two-body problem, using algebraic recurrence formulas 11 p1769 A66-22508
 Equations for perturbative derivatives of two sets of elements in terms of universal formulation, discussing low thrust orbits 12 p1946 A66-23508
 Variation of Earth-Moon distance as a function of inclination angle of orbital planes during period of tidal evolution 14 p2380 A66-27208
 Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar problem, spherical harmonics, etc 17 p2997 A66-32008
 Two-body problem in Maxwell-Einstein theory 23 p4090 A66-41108
 Perturbed motion of mass point in centrifugal force field, noting integrability of equations 24 p4238 A66-42808
 Uniqueness of solution to motion of heavy rigid body about fixed point in Newtonian force field 24 p4238 A66-42808

TWO-DIMENSIONAL BODY
 Two-dimensional problem of disturbance propagation in elastic plate under concentrated load moving along boundary at constant speed, pressure and stress-strain pattern 08 p1305 A66-18508
 Newtonian flow model minimization of pressure drag of slender axisymmetric two-dimensional body subjected to isoperimetric constraints 11 p1631 A66-22508
 Two-dimensional purely elastic Earth model used to study elastic equilibrium configuration between density and topographic surface 23 p4063 A66-41308

TWO-DIMENSIONAL FLOW
 Tandem interference effects of supercavitating struts within framework of two-dimensional inviscid irrotational and linearized hydrodynamic theory 01 p0057 A66-10408
 Law of plane cross section applicability to hypersonic motion of deformable bodies in inhomogeneous nonstationary media with time dependent parameters 01 p0006 A66-10408
 Combination of spontaneous nucleation theory equations with steady one-dimensional diabatic flow equations for computer analysis of vapor expansion in two-dimensional nozzle 02 p0302 A66-11508
 Similarity of two-dimensional and axisymmetric boundary-layer flows for purely viscous non-Newtonian fluids 02 p0218 A66-11908
 Two-dimensionality effect on suppression of thermal turbulence in air between two horizontal plates 02 p0218 A66-11908
 Aeroelastic instabilities of simply supported two-dimensional panels in subsonic flow at Mach numbers up to 0.8 [AIAA PAPER 65-772] 03 p0434 A66-12508
 Lift coefficient in two-dimensional smoke wind tunnel noting symmetrical, camber and leading double-edge slot wing section 03 p0317 A66-13208
 Non-one-dimensional solutions of MHD equations for axisymmetric motion of electrically conducting gas in magnetic field 04 p0552 A66-14108
 Two-dimensional flow of inviscid nonheat conducting gas with variable conductivity in crossed constant electric and arbitrary magnetic fields 04 p0557 A66-14408
 Laminar flow in two-dimensional channels with uniformly porous walls through which fluid is uniformly injected 05 p0662 A66-15008
 Geometric electrical analog for two-dimensional transient heat conduction [ASME PAPER 65-WA/HT-42] 05 p0792 A66-15668
 Turbulent velocity profile produced by controlling boundary layer thickness, using wires placed parallel to plate and normal to flow direction [ASME PAPER 65-WA/FE-29] 05 p0664 A66-15718
 Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6] 05 p0665 A66-15718
 Mesoscale eddies in wake of island, describing properties, characteristic

- parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365
- Two-dimensional viscous incompressible wedge flow treated by Navier-Stokes equation with Prandtl boundary layer approximation 07 p0982 A66-18138
- Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges [AIAA PAPER 66-128] 07 p0984 A66-18462
- Hall effect in two-dimensional flow of conducting gas interacting with external inhomogeneous magnetic field along insulating plane 08 p1205 A66-18533
- Two-dimensional probability distribution for simultaneous turbulent velocities at two points in plane perpendicular to mean velocity of wind tunnel 08 p1205 A66-18542
- Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832
- Two-dimensional flow of electrically conducting medium in presence of body forces and plane magnetic field 08 p1290 A66-19024
- Newtonian flow over fixed two-dimensional body in unsteady flow, emphasizing shock layer 08 p1164 A66-19129
- Acceleration of two-dimensional MGD source flow through sonic velocity, simplifying flow equations 08 p1263 A66-19151
- Unsteady flow of second order fluid near stagnation point on harmonically oscillating flat plate 08 p1212 A66-19814
- Fluid flow and design of fluidic amplifiers, considering flow as two-dimensional and using mathematical solutions 09 p1367 A66-20323
- Asymptotic behavior of solutions of steady state Navier-Stokes equations for viscous incompressible fluid flow in two dimensions 09 p1367 A66-20630
- Initial velocity and density conditions for three-dimensional boundary layer equations, noting wakes and jets 10 p1522 A66-21303
- Two-dimensional steady potential subsonic flow of compressible fluid past circular cylinder between two parallel walls 10 p1522 A66-21323
- Multidimensional radiation transport equations for nonscattering quasi-equilibrium gray gas obtained by spherical harmonic approximation [AIAA PAPER 65-81] 10 p1621 A66-21774
- Integral equation formulation of Oseen flow past obstacles and approximate solution of integral equations for low Reynolds numbers 10 p1525 A66-21848
- Minimization of total drag/pressure and friction/ of two-dimensional wing with unspecified chord, finding extremal solutions which include one, two or three subarcs 11 p1630 A66-22504
- Numerical calculations of axially symmetric two-dimensional steady expansions of monatomic gas, using approximate Boltzmann equation with Krook collision term 11 p1690 A66-22908
- Comparison of theoretical and experimental results for cylinder and flat strip models in near free molecular flow 11 p1692 A66-22926
- Unsteady two-dimensional axisymmetric plasma flows, classifying isentropic or incompressible flows according to magnetic field configurations 11 p1746 A66-23234
- Mechanical flow processes and variational methods based on fluctuation theory, noting relations on minimum entropy production, two-dimensional laminar flow of incompressible fluid, etc 12 p1975 A66-23543
- Polynomials used to solve theoretical cascade problems exemplified by two-dimensional incompressible flow through nonstreamlined blades 12 p1796 A66-23786
- Stability of two-dimensional parallel flows, using Orr-Sommerfeld equation and adjoint equation with asymptotic solution 12 p1861 A66-23809
- Two-dimensional stagnation point flow of elastico-viscous liquid 12 p1862 A66-23956
- Eigensolutions for laminar flow in porous two-dimensional channel subject to certain boundary conditions 12 p1862 A66-23994
- Two-dimensional potential flow of polytropic gas with stationary streamlines 12 p1862 A66-24007
- Nonlinear two-dimensional cavity theory for choked unsymmetric flow over flat plate at arbitrary attack angle, noting variation of lift and drag coefficients [ASME PAPER 65-FE-13] 12 p1864 A66-24544
- Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6] 12 p1864 A66-24545
- Stability of two-dimensional Couette-Poiseuille flow 12 p1866 A66-24951
- Two-dimensional Stokes flows for functions time-periodic with common frequency, noting analogy to oscillations of long cylinder in viscous fluid 12 p1867 A66-24963
- Asymptotic behavior of two-dimensional inviscid flow at infinite Mach number past power-law body, considering flow over flat plate and blunt body followed by cylindrical afterbody 13 p2060 A66-25156
- Interferometric determination of temperature field in two-dimensional finite space in conditions of free convection with internal heat sources 13 p2209 A66-25317
- Nonstationary two-dimensional channel flow of compressible electrically conducting fluid subject to traveling magnetic field 13 p2140 A66-25422
- Binary-collision expansion for viscosity of two-dimensional gas of hard disks, showing dynamical origin of divergence appearing in first correction of Boltzmann equation 13 p2136 A66-26276
- Text on cascade flow through airfoils and application to turbomachine and blade design 14 p2220 A66-27699
- Exact solutions for unsteady two-dimensional gas dynamics equations for self-similar flow behind shocks and expansion waves 14 p2278 A66-28143
- Two-dimensional steady viscous flow in differential equations akin to Stokes problem of sphere in viscous fluid 15 p2477 A66-28515
- Two-dimensional thermoelastic problem for infinite medium with cylindrical inclusion 15 p2608 A66-28778
- Two-dimensional isothermal liquid flow electrically conducting in channel under electromagnetic fields, finding self-modeling solutions, using Jacobi functions 15 p2551 A66-29221
- Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605
- Two-dimensional flow of incompressible conducting viscous liquid in inlet region of straight channel under magnetic field, obtaining flow characteristics 15 p2553 A66-29742
- Two-dimensional flow in fluids related to system of vortex coordinates, using Hamiltonian operator for characterization of motion studies 16 p2683 A66-30213
- Heat transfer between turbulent supersonic air stream and circular water-cooled tube at Mach 1 to 4, using two-dimensional flow model 16 p2829 A66-31161
- Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two-dimensional flow 16 p2688 A66-31299
- Numerical analysis of stabilization of one-component conducting plasma in two-dimensional coaxial duct 16 p2763 A66-31307
- General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas 16 p2764 A66-31369
- Two-dimensional MHD jet flow of conducting fluid in coplanar magnetic field and nonstationary flow past body with magnetic field perpendicular to surface 16 p2765 A66-31402
- Supersonic section of nondissipative sectional low density plasma accelerator, calculating two-dimensional cold plasma flow 17 p2964 A66-31894
- Two-dimensional MHD flow of inviscid incompressible conducting neutral fluid about an insulating cylinder with uniform applied magnetic field 17 p2968 A66-32469
- Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866
- Iteration scheme based on Newton approximation method applied to two-dimensional and rotationally symmetric flows past obstacles 17 p2913 A66-33066
- Wall shape effects on flow regimes and performance in straight two-dimensional diffusers [ASME PAPER 66-FE-13] 17 p2915 A66-33267
- Hypersonic low-density free-stream viscous-inviscid interaction along intersection of two planes 17 p2916 A66-33480
- Length of two-dimensional contractions in terms of flow uniformity 18 p3098 A66-33952
- Incompressible turbulent two-dimensional wall jet flow, discussing viscous interactions with surrounding fluid attachment streamline, momentum-flux equations, etc 18 p3099 A66-34125
- Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations 18 p3100 A66-34599
- Two-dimensional solution of Laplace equation for vortex formations in incompressible fluid 18 p3100 A66-34634
- Variational principle applied to boundary value problems in kinetic theory, specifically examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919
- Velocity profile downstream from stepped wall having incompressible turbulent fluid flows 19 p3340 A66-35580
- Two-dimensional problems in which heat flow is predominantly in one direction solved by approximate methods, noting constant profile of temperature role 19 p3478 A66-35854
- Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36475
- Base pressure approximation for two-dimensional isentropic supersonic flow and separation supersonic flow 19 p3277 A66-36476
- Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751
- Behavior of solution of system of equations for unsteady boundary layer of two-dimensional liquid as time approaches infinity 19 p3343 A66-36826
- Biasius series for heat and mass transfer in two-dimensional boundary layers, discussing velocity and concentration profiles 20 p3678 A66-37122
- Nonisentropic two-dimensional MHD flow 21 p3777 A66-38725
- Approximate solution of two-dimensional boundary layer problem using Rayleigh-Ritz method, coordinate functions and interpolation 21 p3831 A66-39351
- Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, doubly laminar flow and plane flow 21 p3728 A66-39435
- Two-dimensional unsteady flow of second-order incompressible fluids, noting analogies to Newtonian case 21 p3728 A66-39437
- Reynolds equations for two-dimensional uniform turbulent shear flow of Reiner-Rivlin fluid suggest drag reduction 22 p3896 A66-39671
- Von Karman integral concept for incompressible laminar boundary layers extended to second-order for two-dimensional or axisymmetric flow by generalizing definition of displacement and momentum thickness 22 p3898 A66-40137
- Pseudoviscosity method using finite difference equations for calculating two-dimensional flow fields for supersonic motion of inviscid gas 22 p3901 A66-40494
- Chapman-Ferraro hollows for system of parallel line currents enveloped by stratified corpuscular flux 22 p3975 A66-40806
- Two-dimensional problem for layer with mixed boundary conditions, obtaining solutions for Fredholm integral equations and relations for temperature distribution 22 p4001 A66-40930
- Airfoil pitching motion and flap rotational motion in two-dimensional low supersonic flow in wind tunnels 23 p4053 A66-40975

Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation
[ICAS PAPER 66-26] 23 p4007 A66-41008

Isentropic two-dimensional nonstationary flow of polytropic gas adjoining region with quiescent gas, constructing approximate picture of motion near arbitrary discontinuities 24 p4195 A66-42723

Invariant solution classification for equations of two-dimensional steady state motion of gas 24 p4196 A66-42867

Acceleration of gas during compression in conditions of acute angled geometry, using collapsing chamber rather than shaped charge 24 p4196 A66-42877

TWO-DIMENSIONAL JET

Iterative solution of Navier-Stokes equations for class of flows generated within rectangular cavity by surface passing over open end 03 p0356 A66-12888

Two sets of Tollmein and Goertler equations derived for two-dimensional compressible free jet mixing layer, using similarity assumption
[AIAA PAPER 65-821] 04 p0510 A66-13692

Heat transfer coefficient by impingement of two-dimensional air jets
[ASME PAPER 65-HT-20] 05 p0605 A66-14742

Heat transfer coefficient by impingement of two-dimensional air jets
[ASME PAPER 65-HT-20] 11 p1629 A66-22190

Two-dimensional isoeenergetic compressible mixing of jet with fluid at rest for laminar and turbulent mixing 12 p1795 A66-23572

Lateral covariance, longitudinal eddy length-scale and vorticity-transfer-adaptation hypothesis of two-dimensional jet turbulence theory 13 p2064 A66-26123

Flow model analysis of shape of curved two-dimensional jet reattaching to offset inclined wall with ventilated cavity beneath jet 20 p3501 A66-37647

Free and confined turbulent and free laminar plane jets in highly diffused magnetic fluid 23 p4107 A66-42005

TWO-FLUID MODEL

Two-fluid anisotropic warm plasma, characterizing macroscopic electromagnetic properties via compressivity and permittivity tensor and permeability 06 p0920 A66-16975

Two-fluid shock wave model involving Boltzmann equation and inelastic collision theory for rarefied gas 08 p1204 A66-18524

Two-fluid approach for solutions to hydromagnetic waves including pressure, viscosity, heat conduction, etc, using partial differential equations 13 p2146 A66-25741

Compressivity tensors as parameters to characterize two-fluid compressible plasma in external magnetic field 13 p2149 A66-26273

Rotation and subsequent instability of plasma based on two-fluid equations, including finite radius of gyration effects for ions in pressure tensor 19 p3419 A66-36538

Toroidal plasma equilibrium prevailing in Q device with curved magnetic lines analyzed from two-fluid equations 23 p4106 A66-41711

TWO-PHASE FLOW

Two-phase flow over flat plate analyzing velocity profile, shear coefficient and heat transfer of laminar boundary layer formed over plate 01 p0006 A66-10423

Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 01 p0058 A66-10487

Physical mechanisms of instabilities altering two-phase flow pattern of liquid film 01 p0165 A66-10907

Two-phase flow and heat transfer for boiling liquid nitrogen in horizontal tubes 01 p0165 A66-10909

Liquid-phase viscosity effect on disruption of hydrodynamic stability of bubble boiling in large liquid volume 04 p0599 A66-14441

Hydrodynamic stability of parallel dusty gas flows, discussing energy balance and viscous sublayer structure 05 p0662 A66-14703

Book on boiling heat transfer and two-phase flow 06 p0971 A66-16610

Metallized propellant and gas-solid suspension flow through nozzle in high

energy systems 06 p0803 A66-16912

Shock phenomena with mixtures of water and nitrogen in two-phase supersonic tunnel
[AIAA PAPER 66-87] 07 p0984 A66-18453

Two-phase flow of evaporating cryogen in condensing binary mixture related to Gibbs potentials
[AIAA PAPER 65-7] 08 p1318 A66-19153

Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19157

Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 09 p1367 A66-20701

Condensing characteristics of mercury vapor flowing in horizontal single tubes examined in crossflow-nitrogen-cooled and NaK-cooled condensers 10 p1621 A66-21463

Expansion parameters of liquids expelled into vacuum as related to orbital perturbations arising from liquid venting and impingement on adjacent hardware 10 p1481 A66-21947

Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-24907

Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24908

Dispersed material concentration at various cross sections of ascending two-phase gas flow 13 p2065 A66-26484

Laminar fluid flow of two-phase ideally viscous medium between two parallel surfaces 13 p2072 A66-26766

Two-phase flow and material attrition problems for Rankine cycle liquid metal power plants
[ASME PAPER 66-GT/CLC-4] 14 p2224 A66-26979

Jet boundary determination of underexpanded two-phase carbon dioxide supersonic nozzle flow 14 p2219 A66-27445

Laminar boundary layer separated flow of particulate suspension, including Brownian diffusion, jet flow, etc 14 p2275 A66-27561

Gas-particle flow, particle velocity distributions and lag loss reduction for rocket nozzles 14 p2375 A66-27893

Stimulated interphase heat transfer in nonuniform gas flow with suspended particles and periodic motion variations 14 p2415 A66-28322

Expansion of supersonic flow of air with suspended solid particles during passage through Laval nozzle 14 p2279 A66-28325

Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion
[AIAA PAPER 66-522] 16 p2708 A66-31500

Relaxation and evaporation zones behind normal shock in mixture of air, water vapor and water droplets 17 p2908 A66-32445

Critical lengths in subsonic and supersonic gas-particle flow in vertical constant area tube, considering effect of governing variables and inlet conditions of system
[ASME PAPER 66-FE-19] 17 p2915 A66-33272

Accelerating particulate flow studied, using blowdown system for component velocities and friction 17 p2916 A66-33471

Radiant heat transfer from hot solid combustion products to combustion chamber walls
[AIAA PAPER 65-559] 18 p3260 A66-33811

High speed photographic investigation of propagation and disintegration of interaction of two-phase gas-liquid flow in venturi scrubber 18 p3114 A66-35059

Heat transfer coefficients over range of Reynolds numbers for solid-vapor mixture of parahydrogen discharge below triple point pressure 20 p3679 A66-37511

Quantities and relations for describing two-phase flows, kinematics and kinetics of both phases of laminar pipeflow 21 p3724 A66-38933

Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape
[AICE PREPRINT 44F] 22 p3971 A66-39881

Oscillating two-phase flow through rigid circular pipe investigated to understand blood cells effects on changes in shape of pressure pulse wave 23 p4058 A66-41916

Motion of continuous medium with solid or liquid particles treated by two-velocity model 24 p4195 A66-42839

TWO-PHASE SYSTEM

Phase change across interface of suddenly pressurized binary liquid-vapor system
[ASME PAPER 64-WA/AV-1] 04 p0597 A66-14026

Oscillations in two-circuit parametric oscillator operating on fixed-bias p-n junction 06 p0860 A66-17194

Liquid metal condensation, noting two-phase turbulent condensation mechanism and determining heat transfer coefficients 07 p1152 A66-17592

Hydrodynamic processes in combustion chamber and production of two-phase combustion mixture 14 p2276 A66-27713

Welded joints in sheets of two-phase titanium alloys in study of heat treatment effects on structure and mechanical properties 15 p2523 A66-29195

Liquid solid film lubrication of hydrodynamic bearings, including effects of solid particles in liquid base lubricant
[ASLE PAPER 66AM 5DE] 16 p2711 A66-30412

Diffusion of nickel in solid solution and two-phase alloys of nickel-titanium system 18 p3123 A66-34402

Oscillations in two-circuit parametric oscillation operating on fixed-bias p-n junction 19 p3315 A66-35552

TWO-REFLECTOR ANTENNA

Soviet RT-15 radio telescope control system, noting two-reflector system telescope antennas, parabolic mainreflector and automatic and visual tracking possibilities 20 p3540 A66-37026

TWO-STAGE PLASMA ENGINE

Efficiency of two-stage repetitively pulsed coaxial plasma engine calculated from engine thrust and total mass flow
[AIAA PAPER 66-342] 17 p2990 A66-32448

T3J AIRCRAFT

S T-39 AIRCRAFT

T56 JET ENGINE

Elimination of turbine erosion in T56 turboprop engine
[ASME PAPER 65-WA/GTP-9] 05 p0745 A66-15724

U

U.S.S.R.

Soviet high altitude pressure-suit development, testing and use, 1934-1955 07 p0999 A66-17666

Standards, quality and reliability of Soviet production 12 p1884 A66-23741

Soviet high-temperature plasma physics and controlled nuclear fusion 13 p2145 A66-25736

Heat transfer bibliography of Russian works including conductive, convective and radiant heat transfer, phase and chemical conversions, mass transfer, etc 14 p2410 A66-26938

U.S.S.R. accelerator experiments in high energy nuclear interaction cross section and inelasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29549

Heat transfer bibliography of Russian works, including listing of works on thermodynamics, heat conduction, radiant and convective heat transfer processes, phase change, mass transfer, drying processes, etc 17 p3037 A66-33044

Objections of Soviet bloc to COMSATCO 19 p3485 A66-36229

Flight safety in Soviet civil aviation including takeoff and landing, cruising in airport vicinity, meteorology and medicine 20 p3494 A66-36991

U.S.S.R. SPACE PROGRAM

U.S.S.R. space-travel program and establishment of manned space station by 1966 01 p0136 A66-10441

Soviet space station Proton I placed in orbit July 16, 1965 for solar and cosmic

radiation studies 01 p0144 A66-10870
Soviet biological and physiological investigations in rockets and satellites, particularly nonpathological character of physiological reactions to stress factors 04 p0466 A66-14076
Space biology and medicine research, stressing flight experiments performed with Russian satellites and spacecraft 04 p0468 A66-14089
Soviet space program, development of proton booster and proton and electron satellites and likelihood of Russia winning Moon race 06 p0955 A66-16802
Upper atmosphere and outer space research carried out by U.S.S.R. in 1964, including cosmonaut responses and launching tables 09 p1458 A66-20691
Mars exploration by U.S. and U.S.S.R. 11 p1768 A66-22302
Soviet space research in 1965 including Moon and planets, magnetosphere, radiation belt, upper atmosphere, space vehicle dynamics, etc 15 p2599 A66-29897
Soviet program for military applications in space including artificial satellites, deep space probes and man-in-space program 17 p3040 A66-32352
Soviet and international space exploration, examining past, present and future developments 18 p3267 A66-33698
Flight activities of Russian cosmonauts in assessment of medical preparedness for orbital flight 19 p3283 A66-35291
Main stages of development of space biology and medicine in U.S.S.R., discussing biological effects in dogs in suborbital flight vehicles and satellites 24 p4169 A66-43135
Professional training of Soviet astronauts, instilling high resistance to weightlessness, isolation, radiation, acceleration and other space flight stimuli 24 p4169 A66-43148

UH-2 HELICOPTER
Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [ASME PAPER 66-GT-92] 14 p2300 A66-26996
Twin engine UH-2 Seasprite helicopter, noting increased power availability, advantages and performance characteristics 20 p3495 A66-37046

UK-A
S ARIEL I SATELLITE

UK-C
S ARIEL II SATELLITE

UK-E
Joint Anglo-American UK-3 satellite structure and dynamics 01 p0142 A66-10363
Design, manufacture and testing procedures for satellites in UK-3 program 06 p0959 A66-16307
Thermal vacuum simulation in satellite design of UK-3 07 p1018 A66-18052
Procession of UK-3 satellite perturbed by geomagnetic torque 09 p1464 A66-20474
Aerodynamic torque effect on UK-3 satellite precession rate 11 p1777 A66-22966
Thermal vacuum simulation in satellite design of UK-3 16 p2682 A66-31198

ULM
S ULTRASONIC LIGHT MODULATOR /ULM/

ULTRA-SHORT-WAVE RADIO EQUIPMENT
Circuitry of system for simultaneously obtaining several independent radiation patterns from one ultra-short-wave receiving antenna 07 p1005 A66-17344
Gain loss ratio between one antenna and two antennas used to analyze antenna gain loss for long-range tropospheric propagation of ultrashort waves 20 p3525 A66-37124
Varactor frequency multipliers, discussing application in low-power ultra-short-wave devices in moving objects for communication purposes 21 p3709 A66-38623

ULTRAHIGH FREQUENCY
Disk and parasitic resonance of broadband and small circulators for UHF and VHF 01 p0040 A66-10551
Phase shifters for UHF waves using plasmas 01 p0042 A66-10593
Metropolitan area man-made VHF/UHF noise in 200 to 500-mc frequency range 03 p0333 A66-12568
UHF voice communications system for 412L Air Weapons Control System discussing

transmitter, receiver and compliance testing 04 p0497 A66-13964
Comparison of VOR systems and compatible precision Doppler VOR system 07 p1075 A66-17782
Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 09 p1358 A66-20795
UHF transistor with transverse field produced in base layer by short-circuiting emitter region and second base electrode by metallic bridge 11 p1688 A66-23025
VHF power modulation receivers using germanium injection modulators produce no additional noise at frequencies around 25 cps 11 p1870 A66-23228
UHF ferrites as magnetically anisotropic media in which electromagnetic wave propagation rate assumes two values and magnetic permeability is of tensor nature 11 p1658 A66-23233
Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 12 p1812 A66-23732
Silicon UHF power transistor performance, showing parameters of amplifier gain, power output and impedance 13 p2036 A66-25512
UHF transistor design and performance, noting power gain, stability, low noise figure and correlation between circuit invariants and transistor parameters 13 p2038 A66-25560
Hot-electron transistors, discussing application of Schottky-emitter transistor to VHF operation 13 p2038 A66-25561
Noise figure of microwave transistors, noting effect of parasitics associated with wafer and package 13 p2038 A66-25562
High gain low-noise electronic amplifier with field effect transistor at UHF range, noting design parameters and performance 13 p2040 A66-25832
Packaging VHF/UHF circuits involved in design of RF equipment used in air and spaceborne vehicles 13 p2041 A66-25844
Cut-off frequency in UHF transistors at high collector currents due to transition region boundary displacement 14 p2248 A66-27048
Effect of transition of telemetry frequencies from VHF /215-260 mc/ to 2200-2300 mc range on aerospace vehicle telemetry antennas of general purpose omnidirectional type 14 p2253 A66-27533
Broadband slotted cone antenna exhibiting multioctave bandwidth properties in UHF-VHF range 14 p2256 A66-27912
UHF amplifier design, linear active and coupling networks, loading, admittance-impedance characteristics, etc 14 p2261 A66-28373
UHF telemetry system to withstand high shock of gun launched vertical sounding probes 16 p2650 A66-30557
Ultrahigh frequency plasma oscillations, noting Maxwellian equilibrium between plasma electrons and primary, monoenergetic electrons 16 p2766 A66-31651
Medium frequency, FM, VHF and UHF TV broadcasting and receiving antennas 20 p3530 A66-37717
Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 22 p3874 A66-39854
Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 22 p3865 A66-40075
Bridge circuit measurement of phase at UHF and microwave frequencies, examining amplitude modulation and mixer types 24 p4171 A66-42101

ULTRAHIGH VACUUM
Residual gases in oil-diffusion-pump ultrahigh vacuum determined as function of various trapping conditions 04 p0528 A66-14464
Interaction mechanism between laser beam and surface in ultrahigh vacuum 05 p0697 A66-15484
Ultrahigh vacuum chamber with liquid-helium-cooled liner for space environment simulation 08 p1202 A66-18926
High temperature and vacuum effects on sliding friction and surface film formation between dry lubricated and nonlubricated pair combinations of metals, carbon and ceramics, noting SNAP reactor data

[ASLE PREPRINT 65AM 6A1]
10 p1540 A66-22040
Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754
Reflectance measurements of metals described under ultrahigh vacuum conditions 15 p2499 A66-28846
Ultrahigh-vacuum mercury-vapor unit design, noting performance characteristics 15 p2429 A66-29700
Design and construction of 10 ft diameter bakeable UHV all metal seal, taking into account thermal stresses and effect on flanges 16 p2712 A66-30455
Epitaxial growth of single crystal, impurity free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534
Space molecular sink design to create vacuum environment, emphasizing pumping and test chamber instrumentation 18 p3093 A66-33797
Residual gas analyzer determining qualitative distribution of gases in ultrahigh vacuums by using mass spectrometer for spatial simulation applications 19 p3360 A66-36614
Ultrahigh vacuum optical measurements on mirrorlike surfaces of Na, K, Rb and Cs prepared in ultrahigh vacuum in wavelength region from 3000 to 25,000 angstroms 20 p3613 A66-37272
Response characteristics of strain gauges as affected by ultrahigh-vacuum environments 20 p3558 A66-37442
Pumpdown characteristics and incident flux rates of ultrahigh vacuum research facility 22 p3890 A66-40224
Adhesion force of silicates in ultrahigh vacuum as function of load force, temperature, surface roughness and crystal orientation 23 p4131 A66-41848

ULTRALOW FREQUENCY
ELF emission from electron and proton beams injected into magnetospheric plasma 05 p0748 A66-15043
ULF radiation of polar lights, detailing apparatus for receiving and recording signals 06 p0876 A66-16592
ULF radio emission of upper atmosphere and other related geophysical phenomena, analyzing hisses, choruses and contribution to Earth radiation belt 20 p3551 A66-37487

ULTRASONIC AGITATION
Ultrasonic activation effect on sintering and hot extrusion processes and compaction products made from metallic powders 23 p4075 A66-41827

ULTRASONIC LIGHT MODULATOR /ULM/
Measurement of elasto-optic performance of solids in Bragg diffraction devices 04 p0531 A66-13958
Single-sideband optical correlator using ultrasonic transducer for variable reference function 06 p0881 A66-16641
Light output from helium-neon gas maser photographed with and without intracavity modulation at locking frequency, using high speed rotating mirror 07 p1040 A66-17205

ULTRASONIC MACHINING
Ultrasonic cutting tools abrasive supply system modification for efficiency increase 01 p0078 A66-10653
Ultrasonic soldering and welding, noting contribution of vibrations to metal joining [SAE PAPER 650761] 01 p0078 A66-10837
Plastic deformation of metals by high intensity ultrasonic waves, with application to industrial forming processes [SAE PAPER 650760] 05 p0773 A66-15003
Ultrasonic metal forming and metal and plastic assembly processes [SAE PAPER 650762] 05 p0687 A66-15004
Hybrid circuit rejects avoided by using ceramic channels and ultrasonic bonders during assembly of active semiconductor devices and integrated circuits to thin film network 10 p1512 A66-21759
Ultrasonic cutting tools abrasive supply system modification for efficiency increase 12 p1885 A66-24013

ULTRASONIC RADIATION
Face-down ultrasonic bonding, assembly technique to bond integrated circuit chips to thin films 01 p0037 A66-10501
Second sound in semiconductors,

- interpreting signal following amplification in CdS crystal as diffraction caused by anisotropy of amplification coefficient 06 p0930 A66-17055
- Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056
- Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404
- Ultrasonic light diffraction, deriving line intensity in form of quadratures with parametric dependence 20 p3601 A66-37147
- Ultrasonic field intensity in liquid measured with microradiometer, discussing instrument design concepts, advantages and operation 21 p3735 A66-38518
- Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112
- ### ULTRASONIC SPEED
- Traveling wave ultrasonic nonlinear parametric amplification 03 p0338 A66-12419
- Ultrasonic velocity of compressed fluid hydrogen between 15 and 100 degrees K and in normal and parahydrogen of saturated liquid between 14.5 and 32.2 degrees K 09 p1392 A66-20081
- Interferometric measurement of ultrasonic velocity in gases at frequencies around 100 kc/s to determine vibrational relaxation 12 p1913 A66-23821
- ### ULTRASONIC TESTING
- Acoustic analyzer combined with modulation and pulse shape analysis for effective diagnosis of turbojet engine condition without electrical or mechanical connections 01 p0066 A66-10114
- Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 01 p0077 A66-10419
- In situ ultrasonic testing of brazed hydraulic pipe joints in aircraft, noting superiority over radiography 01 p0079 A66-10973
- Multiple echoes in ultrasonic inspection of material defects reduces errors in signal reading for better reproducibility 02 p0235 A66-11686
- Piezoelectric probe permits ultrasonic testing of spot welds automatically and simultaneously with welding 02 p0235 A66-11687
- Contact pressure evaluation, using ultrasonic wave transmission through two surfaces in contact 02 p0235 A66-11688
- Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 2 03 p0383 A66-13156
- Butt-weld joint control discussing ultrasonic testing method, conditions for applicability, quality criteria, equipment calibration, defect detection and Q factor standardization 03 p0375 A66-13160
- Ultrasonic detection of fatigue crack formation in center-notched sheets of steel and alloys of aluminum and nickel 06 p0884 A66-15938
- Microscopic fatigue crack production in compressor blades, describing methods and application to ultrasonic nondestructive testing 06 p0966 A66-16799
- Nuclear spin relaxation in superconducting gallium measured by nuclear quadrupole resonance in zero magnetic field, using pulsed nuclear induction spectrometer 09 p1420 A66-20047
- Ultrasonic testing of solid propellant rocket motors, describing technique for separation of propellant from steel combustion chamber 09 p1385 A66-20965
- Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 11 p1705 A66-22604
- Formation of fatigue cracks in center notched sheet specimens of various metals ultrasonically tested for axial tensile fatigue 12 p1957 A66-23630
- HF elastic-wave propagation and detection in study of structural properties of condensed matter 12 p1925 A66-23658
- Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure 13 p2159 A66-25071
- Ultrasonic measurements in studying molecular interactions in fluids, noting variation relative to pressure, volume and sound velocity variation 13 p2016 A66-25093
- Nondestructive testing specifications noting equipment, personnel and acceptance criterias, radiographic ultrasonic penetrant and magnetic particle specifications, etc 15 p2508 A66-28814
- Refractory metal tubing inspection using ultrasonic and pulsed-eddy-current methods in conjunction with X radiography 15 p2509 A66-29317
- Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29601
- Ultrasonic attenuation changes due to dislocation formation during yielding of magnesium, molybdenum and LiF 16 p2726 A66-31458
- Powder iron compact properties evaluated by sonic tests, noting elastic modulus dependence on porosity 19 p3376 A66-35328
- Nondestructive testing of adhesive bonded structures using ultrasonic-resonant instrument, noting detection of voids and cohesive strength determination 19 p3362 A66-35329
- Superconducting properties of Nb-Zr alloy, discussing resistive transition, ultrasonic attenuation, flux jump magnetic instabilities, etc 21 p3796 A66-38550
- Ultrasonic attenuation coefficient of transverse wave in gapless superconductor, noting effect on critical field and parameter amplitude 21 p3797 A66-38558
- Nondestructive ultrasonic testing in machine and boiler construction engineering, noting material properties and behavior of parts, flaw detection, etc 21 p3743 A66-38939
- Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192
- Dual path ultrasonic measurement of fluid flow and speed of sound, using two sound-speed meters in opposition to produce sum and difference frequencies 22 p3921 A66-40896
- ### ULTRASONIC WAVE
- Ultrasonic maser amplification by stimulated phonon-photon double quantum emission in magnesium oxide 01 p0080 A66-10247
- Model measurement of radar cross section of target with complex outline by use of ultrasonic waves 02 p0189 A66-11366
- Ultrasonic waves and electrons in piezoelectric semiconductors, noting role of acoustoelectric fields and propagating collective sound waves 03 p0408 A66-12414
- Ultrasonic traveling wave amplification in piezoelectric crystals 03 p0332 A66-12415
- Amplitude distribution of ultrasonic vibrations of excited disk of barium titanate ceramic polarized perpendicularly to faces 04 p0559 A66-13471
- Acoustic propagation at microwave frequencies discussing generation, propagation, detection and reflection experiments with quartz crystals and ZnO transducers 04 p0480 A66-13680
- Ultrasonic wave effects on mass transfer rates of fluids [AICE PREPRINT 6B] 05 p0789 A66-15461
- Powerful pulse of ruby laser emission generated by ultrasonic traveling wave diffraction modulator 05 p0698 A66-15861
- Yttrium iron garnet /YIG/ delay line application to radar range and amplitude calibrator, altitude simulator, microwave memory and electronically steerable antenna array 06 p0842 A66-15983
- Ultrasonic attenuation and velocity changes in doped p-type silicon in frequency range from 608 to 960 mc 06 p0851 A66-16460
- Hypersonic wave properties, examining nature of interaction with phonons, photons, electrons and spin waves 07 p1098 A66-17823
- Piezoelectric and acoustoelectric effects observable in tellurium crystals at temperature of liquid nitrogen 07 p1098 A66-17826
- Velocity and attenuation of ultrasonic waves in thallium when product of sound wave vector and electron mean free path is less than unity 07 p1109 A66-18445
- Spin-phonon interaction induced by ultrasonic wave in yttrium ferrite single crystals 08 p1278 A66-19629
- Ultrasonic wave effect on mass transfer rate of selected fluid liquid phase in capillary 08 p1210 A66-19680
- Ultrasonic absorption in superconducting lanthanum explained by two models for loss of energy from low-energy phonon field in London superconductor 09 p1415 A66-20021
- Ultrasonic attenuation in superconductors containing magnetic impurities analyzed, using weak coupling electron gas as model 09 p1416 A66-20022
- Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401
- Ultrasonic stress waves effect on physical properties of metal, particularly acoustic softening and hardening, plastic deformation, photoelasticity, dislocations, etc 12 p1894 A66-24105
- Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 12 p1929 A66-24453
- Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 13 p2159 A66-25085
- Dispersion and absorption of hypersonic waves analyzed by examining Brillouin scattering as function of scattering angle 13 p2133 A66-26167
- Magnetostrictively generated microwave acoustic pulse in thin films of Dy, Ho, Gd and Er 14 p2350 A66-26876
- Ultrasonic flux effect on electrons in semiconductor with charged impurity centers 14 p2358 A66-27086
- Reflections effect on accuracy of measuring ultrasonic group delay time during amplitude and FM by sinusoidal voltage 14 p2236 A66-27249
- Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763
- Omnidirectional scattering of ultrasonic waves from rough surfaces satisfying Kirchhoff theory with respect to electromagnetism scattering 15 p2536 A66-28571
- Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field, determining Fermi levels 15 p2559 A66-28621
- Measurement of ultrasonic attenuation vs temperature for longitudinal and transverse phonons in seminsulating gallium arsenide 15 p2563 A66-28729
- Ultrasonic attenuation dependence on frequency in Pb crystals at low temperatures 16 p2770 A66-30179
- Scattered light spectrum of thermal sound waves used to provide velocity and absorption data about hypersonic waves in several liquids 16 p2745 A66-30300
- Ultrasonic wave splitting of individual fragments and isolated polypeptide chains of human gamma globulin molecule 16 p2639 A66-30793
- Attenuation of longitudinal sound in pure crystals of superconducting lead 17 p2978 A66-32506
- Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 17 p2938 A66-33516
- Ultrasonic cell which modulates intensity of He-Ne laser beam for communication of intelligence 18 p3118 A66-34059
- Spectral study of ultrasonic shock waves emitted by cavitation on square-section bends, applications include erosion fatigue problem and cavitation detection 18 p3101 A66-34644
- Damped oscillations and velocity of sound waves in semiconductors and metals in presence of strong magnetic field 18 p3158 A66-34684
- Scattering of ultrasonic waves from turbulence produced by flow through grid in 6 x 6-inch nozzle 18 p3136 A66-35024

Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of 20 p3619 A66-37685

Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 21 p3795 A66-38510

Longitudinal sound waves attenuation in superconductor with spatially dependent energy gap by Green function method applied to ultrasonic attenuation in type II superconductor 21 p3795 A66-38548

Electron attenuation of ultrasonic waves of arbitrary polarization and propagation direction for superconductors computed on BCS model, noting role of Fermi surface 22 p3960 A66-39802

Optical deflection of light beams via Kerr effect, ultrasonic waves, piezoelectric crystals and mirror 22 p3877 A66-40293

Ultrasonic flux effect on electrons in semiconductor with charged impurity centers 22 p3967 A66-40842

Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022

Low accuracy of interferometric measurement of coefficient of ultrasound absorption in gas 23 p4068 A66-41414

Ultrasonic wave absorption in GaAs and GaSb compounds at temperatures from 95 to 300 degrees K 23 p4113 A66-41417

Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 24 p4219 A66-42129

Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-42514

Horizontal deflection in TV display produced by Bragg reflection of laser light by ultrasonic waves in water 24 p4212 A66-42816

Irregular diffraction analysis with ultrasonic waves, measuring air stream temperature fluctuations and velocity 24 p4176 A66-43020

ULTRASONIC WAVE TRANSDUCER

P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 01 p0036 A66-10422

Limited distance of transmission of ultrasonics in air has limited application to remote control systems, proximity indicators, automatic counting and burglar and fire protection 03 p0368 A66-12407

Vacuum deposition of cadmium sulphide ultrasonic transducers for generating longitudinal or linearly polarized shear waves 03 p0368 A66-12410

Ultrasonic delay lines, operational principles, characteristics and basic structure of traveling wave devices for communication 06 p0831 A66-16365

GaAs diffusion-layer transducer for VHF acoustic delay line 06 p0852 A66-16639

Single-sideband optical correlator using ultrasonic transducer for variable reference function 06 p0881 A66-16641

Depletion layer 1000 mc transducers for producing or detecting hypersonic waves in solids, using CaS or GaAs for high acoustoelectrical conversion efficiency 07 p1009 A66-17827

Ultrasonic echo method of level measuring and monitoring in which acoustic pulse is emitted by vertical transducer and reflected from surface of liquid or gas 10 p1535 A66-21337

P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 11 p1664 A66-22608

Piezoelectric plate transducer for ultrasonic wave generation and detection and analysis of responses to partly periodic and partly periodic-transient inputs 15 p2497 A66-28526

Fatigue crack initiation and propagation, using ultrasonic test instruments 15 p2610 A66-29316

Acoustic amplification in piezoelectric

semiconductors, examining present state of the art 17 p2892 A66-32919

Cadmium sulfide thin films as ultrasonic transducers, obtaining mixed or pure vibration modes via crystalline axis orientation 18 p3111 A66-34085

Electronic test method for determining ultrasonic transducer frequency response involving actual signal transmission and reception 21 p3738 A66-39151

Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017

Pulse compression filter synthesis using ultrasonic delay lines 23 p4034 A66-41019

ULTRASONIC WELDING

Welding units using ultrasonic vibrations to improve crystalline structure of welds produced by automatic submerged-arc welding process 03 p0375 A66-13122

Ultrasonic welding uses electric power of electronic generator applied to piezomagnetic transducer for converting AC electric power into mechanical vibration 19 p3372 A66-36819

Microbonding techniques such as thermocompression bonding, soldering, electrical resistance and ultrasonic welding, noting applicability in transistor manufacture 23 p4043 A66-41190

ULTRASONICS

Mechanisms of attenuation and amplification of ultrasonic waves in semiconductors 03 p0408 A66-12413

Current voltage characteristics of cadmium sulfide semiconductors showing departures from Ohm law associated with ultrasonic amplification, crystal length and increasing conductivity 06 p0923 A66-16183

Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field 09 p1428 A66-20592

Formation of ultrasonically gated laser pulses by Q-spilling, noting photographs of ruby and role of cavitation in gating mechanism 13 p2089 A66-25057

Ultrasonic measurement of elastic moduli of high temperature metal 13 p2194 A66-25092

Ultrasonic modulation of laser oscillation from neodymium glass rod 14 p2309 A66-28044

Ultrasonic attenuation in superconductors, extending BCS theory to include electron scattering effects, effect of anisotropy of Fermi surface, etc 17 p2981 A66-32960

Cavitation phenomena induced by ultrasonic waves experimentally studied, using ultrasonic erosion tests and high speed photography 18 p3101 A66-34645

Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field 20 p3622 A66-38125

Ultrasonic measurement of elastic moduli of high temperature metal 21 p3823 A66-38517

ULTRAVIOLET

S FAR ULTRAVIOLET

S VACUUM ULTRAVIOLET

ULTRAVIOLET LIGHT

Intense UV pumping effect on ruby laser output 09 p1387 A66-20519

Satellite protective coatings using vacuum UV radiation absorbers for temperature control 11 p1720 A66-23125

Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216

Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824

Direct current conduction of thin evaporated silicon oxide films, noting functional dependence on degree of oxidation, composition, temperature and adherence to Schottky emission law 13 p2157 A66-25034

Corpuscular radiation from UV Ceti stars assumed to be mainly protons, noting role of interstellar matter 20 p3652 A66-37611

Kinetics and spectral characteristics of photoinhibition of spinach chloroplast reactions 24 p4163 A66-42316

ULTRAVIOLET PHOTOMETRY

Scattering particles for visual polarimetric and UV photometric estimates of surface pressure of Mars 04 p0578 A66-13896

Fluorescent screens provide suitable substrates for vapor-depositing metallic film for use as vacuum UV detectors 05 p0715 A66-14925

Photolysis of water at 1470 angstroms in absence and presence of ethylene 09 p1338 A66-20679

UV photography and spectroscopy using spectrally selective image converter and photodetection 14 p2293 A66-27330

Rapid drift in longitude of small dark spot on south edge of Jupiter North Temperate Belt, noting sinusoidal displacement characteristics and measurement with blue and UV photography 17 p3005 A66-33009

Nocturnal high altitude ozone distribution determined, using small geophysical sounding rockets with Moon as light source to measure atmospheric absorption of UV radiation 22 p3914 A66-40559

UV photography quantitative analysis of stellar spectra from Gemini X spacecraft 24 p4273 A66-42209

ULTRAVIOLET RADIATION

Bidirectional reflectance measurements to determine optical degradation induced by UV radiation [AIAA PAPER 65-672] 01 p0066 A66-10233

Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 01 p0133 A66-10756

Book on UV radiation covering arcs, incandescent radiation sources, solar radiation, transmission, reflection, detectors and application 01 p0107 A66-10979

Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 01 p0071 A66-11049

UV radiation effect on viscosity and optical density of DNA solutions from calf thymus and rat spleen 01 p0018 A66-11193

High pressure argon arc with intense continuum as possible source in UV radiometry 02 p0212 A66-11225

Solar simulation in vacuum and extreme UV using RF gaseous-type discharge light sources and photomultiplier detector 02 p0212 A66-11226

Solar UV radiation measurements in stratosphere for calculating ozone production 02 p0283 A66-11573

Mesospheres radiative and photochemical response to fluctuations in UV and visible radiation 02 p0222 A66-11821

Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397

Precursor effects in T-tubes predominantly air-filled, using microwaves and photomultipliers, noting role of UV and plasma radiations 05 p0719 A66-14503

Solar radiation attenuation in UV region provides data on production of atomic oxygen by photodissociation of oxygen and ion and electron formation by photolization of nitrogen and oxygen 05 p0748 A66-15022

Space astronomy, considering UV spectra of Jupiter and Venus, stellar energy distributions, interstellar scattering and X-ray observations 05 p0768 A66-15761

Electron paramagnetic resonance spectrum of carbon dioxide when absorbed on UV irradiated magnesium oxide 05 p0630 A66-15766

UV irradiation effect on electrical conductivity of zinc oxide single crystals 07 p1097 A66-17469

Interstellar extinction in UV by measurement of stellar energy distributions between 3000 and 1200 angstroms 08 p1288 A66-18787

Flame as source of emission of visible UV and IR radiation and ionization source for certain combinations of fuels and oxidants 08 p1317 A66-18856

Solar X-ray and UV radiation measurements by monitoring satellite, including instrumentation 10 p1598 A66-21085

EUV radiations compared with radio intensities of quiet Sun at sunspot minimum 10 p1602 A66-21091

Discrepancy between theoretical calculation and measurement of far UV radiation from

hot stars 10 p1598 A66-21094
 UV radiation from galaxies, radio sources, quasi-stellar objects and Seyfert galaxies, examining Lyman alpha fluxes 10 p1598 A66-21098
 Galactic X-rays, discussing soft X-rays, UV radiation, isotropic X-rays, electromagnetic radiation from X-ray sources, etc 10 p1600 A66-21854
 Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 11 p1709 A66-23297
 Astronomical instruments and observation procedures for soft X-rays and extreme UV radiation 12 p1880 A66-23944
 UV absorption and excitation spectrum of ruby and sapphire, noting structure and polarization effects, quantum efficiency, etc 13 p2162 A66-25378
 Solar limb darkening measured at various wavelengths by Veronique rocket, obtaining data on continuous absorption coefficient 13 p2180 A66-25421
 Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642
 Atmospheric distribution profiles of ozone noting formation, elimination, effect on terrestrial heat losses, UV absorption, etc 13 p2073 A66-26318
 Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 14 p2285 A66-27855
 Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 15 p2542 A66-29351
 Mars upper atmosphere and single-layer ionosphere UV photolization, temperature profile and chemical composition 15 p2598 A66-29417
 Space phytophysiology and UV irradiation effect on photosynthesis of plants 15 p2439 A66-29488
 Ozone number densities in 30 to 75 km altitude determined at night by rocket measurements of lunar UV radiation absorption in various bands 15 p2492 A66-30030
 UV solar radiation absorption in upper atmosphere determined from measurement of photoelectron currents emitted by planar metallic orthogonal photocathodes onboard Cosmos II satellite 15 p2592 A66-30051
 Maecker-Boldt cascade arc in argon as radiance standard, noting superiority over carbon arc, especially in UV 16 p2767 A66-31698
 Feasibility of doping techniques for eliminating extraterrestrial solar degradation of ZnO used as pigment for spacecraft thermal control surfaces 17 p2938 A66-31961
 Solar UV synthesis of nucleoside phosphates from terrestrial atmosphere, discussing irradiation of adenine-ribose-phosphoric acid solution 17 p2851 A66-32090
 UV emissions in 1000-1350 angstrom range measured from rocket launched into aurora from Fort Churchill 17 p2917 A66-32523
 Transmission characteristics of Fabry-Perot aluminum-magnesium fluoride-aluminum interference filters in far UV region, noting preparation methods, optical properties, etc 17 p2958 A66-32617
 Thermal and UV radiation effect on thermionic emission from tungsten cathode 17 p2980 A66-32644
 Near UV effects on thermal control surfaces at cryogenic temperature 17 p3035 A66-32749
 UV radiation from shock-heated nitrogen measured by ballistic flight through nitrogen-neon mixture [AIAA PAPER 66-422] 17 p3035 A66-32751
 UV radiation effect on decomposition of ammonia ejected in upper atmosphere 17 p3013 A66-33402
 DNA synthesis in cultured mammalian cells stimulated by UV light, using radioautography and density gradient centrifugation 19 p3287 A66-36436
 Temperature dependence of UV radiation absorption coefficient in quartz undergoing phase transition for several spectral lines 19 p3447 A66-36722
 Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 20 p3602 A66-37356
 Pulsed operation of electron-beam pumped

zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-37768
 Continuous wave UV ionized gas laser emission over four transitions in neon, krypton and argon 20 p3579 A66-37771
 Pulsed nitrogen laser delivering high average power without complications of conventional Q-switching 20 p3581 A66-38266
 Transistorized portable UV dosimeter for use in medicine, climatology, physiotherapy, meteorology and stimulated plant growth study 20 p3562 A66-38436
 Vacuum UV radiation in equilibrium air measured by photoelectric gauge 21 p3835 A66-38732
 Higher-plant leaves survival under UV along and under simulated solar UV radiation corresponding to radiation incident on Mars, Earth and Venus 21 p3700 A66-39211
 UV radiation effect on polyethylene-terephthalate film tensile strength in vacuum and air 22 p3937 A66-39818
 Ionization and constitution of neutral atmosphere, including solar EUV, X-ray and corpuscular sources 22 p3905 A66-39944
 Tidal circulation system induced by stratospheric wind field perturbations via diurnal ozonospheric heating 24 p4203 A66-42985
 Spectroscopic, chemical and laser properties of piperidinium salt of europium tetrakis 24 p4226 A66-43034
 Maser amplifier based on UV continuum pumping from nearby stars, explaining 18-cm OH emission from anomalous H-2 regions 24 p4280 A66-43042
ULTRAVIOLET REFLECTION
 Geometrical UV reflectivity of Jupiter in terms of Rayleigh scattering determined from objective-grating rocket spectrometer 05 p0762 A66-15281
 Absorption effect on Rayleigh atmosphere, calculating reflected and transmitted intensities and polarizations for C wavelength pair used for Umkehr measurements 07 p1028 A66-17364
 Night sky luminosity and solar UV reflection from Earth measured by Cosmos XLV 09 p1376 A66-20996
 Magnesium fluoride overcoated aluminum mirrors, discussing thickness monitoring techniques by vacuum UV reflectance measurements 11 p1737 A66-23430
 Reflection measurements of RbI film in UV to observe optical property differences between films and single crystals 12 p1931 A66-24813
 Solar UV reflection and scattering from Earth atmosphere, use in determining total concentration and vertical distribution of ozone 15 p2486 A66-29090
 Rocketborne spectrograph measurement of UV reflectivity of Venus and Jupiter, noting atmospheric Rayleigh scattering effects 15 p2603 A66-29963
 UV transmittance of LiF and BaF under various storage conditions 18 p3134 A66-34001
 Optical constants in far UV, using reflectometer permitting measurement at various incidence angles 19 p3361 A66-36618
ULTRAVIOLET SPECTROGRAPH
 Film calibration for rocket UV spectrographs discussing SWR film exposure and density characteristics, photometric parameters and experimental techniques 05 p0677 A66-14915
ULTRAVIOLET SPECTROMETER
 UV rocket spectrometer to measure stellar spectra in 1100 to 4000 angstrom range 14 p2293 A66-27327
 Electronic scanning spectrometer for use as in-vacuum UV radiation monitor 22 p3918 A66-40230
ULTRAVIOLET SPECTROPHOTOMETRY
 Mathematical design and development of balloon-borne UV Ebert-Fastie spectrometer with Sekera-type polarimeter 02 p0233 A66-12212
 UV spectrum sensor system developed for satellite use 04 p0518 A66-13551
 Stellar brightness measurements in far UV using rocket-mounted mirror telescopes and ion chambers, indicating stellar brightness lower than predicted by theory 10 p1602 A66-21097
 Astronomical UV spectrophotometer for

second U.S. Orbiting Solar Observatory 14 p2293 A66-27328
ULTRAVIOLET SPECTROSCOPY
 Optical and UV instruments and calibration methods for spectral intensities and line broadening in plasma diagnostics 04 p0522 A66-14194
 Solar chemical composition by analysis of UV resonance lines 10 p1602 A66-21090
 Techniques for rocket solar UV and for UV spectroscopy 13 p2081 A66-26013
 UV photography and spectroscopy using spectrally selective image converter and photodetection 14 p2293 A66-27330
 Thin films as possible transmitting and reflecting polarizers in vacuum UV region 14 p2361 A66-27331
 Vacuum UV instrumentation for optical studies of solids 14 p2293 A66-27333
 Stellar spectroscopy in UV region using f/2 Schmidt camera onboard Aerobee rockets 14 p2385 A66-28114
 Cometary tail phenomena interpreted, using plasma dynamics theory coupled with observed solar wind activity 17 p3011 A66-33390
 High temperature light source with substantially continuous spectral emission for UV absorption spectroscopy approximating black body in visible and near UV region 19 p3353 A66-35314
 Solrad VIII observation of May 20, 1966 solar eclipse penumbral zone in X-ray and UV bands 21 p3810 A66-38468
 Fabry-Perot interferometer in spectroscopy using satellites and rockets 22 p3920 A66-40793
ULTRAVIOLET SPECTRUM
 Extreme UV solar spectrum analysis between Lyman alpha lines of H-I and C-VI, using rocket spectrography 02 p0286 A66-11356
 Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 02 p0286 A66-11359
 IR and UV absorption spectra of free radical NCN observed following photolysis of matrix isolated cyanogen nitride 04 p0473 A66-13644
 Extreme UV solar spectrum analysis between Lyman alpha lines of H-I and C-VI, using rocket spectrography 10 p1597 A66-21079
 OSO observations of EUV radiation applied to identification of emission lines in spectral region 170-1400 angstroms 10 p1597 A66-21080
 UV color and flux at 2200 and 2600 angstroms measured for A and B stars, using rocketborne photometers 10 p1602 A66-21096
 Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 10 p1603 A66-21099
 UV night airglow spectrometry 10 p1528 A66-21142
 Classification of iron VIII to XII and XIV lines in solar extreme UV spectrum and isoelectronic sequences from Ar to Ni 12 p1947 A66-23730
 Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24069
 Fabry-Perot interferometer adjustment for reflectance of narrow-band dielectric reflection coating peaked in UV spectral region 13 p2081 A66-26002
 Excited-singlet even parity states of anthracene in near UV, noting role of absorption spectroscopy 13 p2132 A66-26143
 Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 14 p2356 A66-27067
 Polarization characteristics of materials in XUV and development of transmitting and reflecting polarizers, using multilayer metal films 14 p2361 A66-27332
 Multiplier phototubes for UV and visible spectra, noting dark current, equivalent noise input, etc, for space application 15 p2498 A66-28839
 Cosmos-65 spectrophotometric measurements of atmosphere-reflected UV radiation spectra 15 p2485 A66-29076

- Rocketborne spectrograph measurement of UV reflectivity of Venus and Jupiter, noting atmospheric Rayleigh scattering effects 15 p2603 A66-29963
- Early morning ionospheric characteristics measured by geophysical rocket, noting electron concentration, solar UV emission intensity changes, electron temperature, absorption profile, etc 15 p2494 A66-30052
- Chloride alkoxide of pentavalent tungsten, obtaining UV, IR, NMR and EPR spectra, molecular weight, etc 16 p2646 A66-30620
- Temperature effect on UV absorption continuum of oxygen, using photoelectric techniques, obtaining absolute absorption cross sections 16 p2695 A66-30711
- Crystal spectra and broadband measurements of solar and galactic UV, X-rays, gamma rays, etc, outside Earth atmosphere 17 p2998 A66-32030
- Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615
- Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050
- Lowest of UV absorption bands attributed to 4f-5d transition of trivalent rare earth ions in calcium fluoride crystals 19 p3443 A66-36004
- Laplace integral application to inversion of three solar limb-darkening curves obtained in UV 19 p3464 A66-36258
- Vacuum UV spectrum of neutral silicon, presenting wavelength measurements, relative intensities of Ge lines and Ritz standards 20 p3612 A66-36940
- Upper atmospheric nitric oxide determined from Aerobee measurement of UV dayglow spectra 20 p3550 A66-37299
- Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS crystals 21 p3747 A66-39114
- Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 22 p3966 A66-40826
- Correction method for instrumental astigmatism to determine center-to-limb variation of solar UV continuum 22 p3984 A66-40891
- Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809
- UMBRA**
- SA LUNAR SHADOW
- Color and light intensity gradient of residual light scattered and refracted into umbra of Earth shadow measured during lunar eclipse 17 p2999 A66-32068
- Pinhole photometric observation of umbra intensity profiles of large sunspot 21 p3808 A66-38469
- UNCERTAINTY**
- Text on radar observations using compound signals, comparing Woodward ambiguity function with uncertainty principle for accuracy and resolution of range and velocity measurements 12 p1815 A66-24055
- UNDERGROUND NUCLEAR EXPLOSION**
- Permanent angular displacement about vertical axis and ejecta-induced impulse associated with Sedan crater formation 08 p1292 A66-19260
- Gauge, using spherical Lucite shell as active element for measuring peak pressures in strong shock waves, designed for underground nuclear explosion 13 p2083 A66-26557
- UNDERWATER EXPLOSION**
- Steady state regime of channel expansion and shock wave motion for underwater spark discharges 04 p0557 A66-14424
- Measurement of plasma density generated by underwater explosions, noting modes of electrical discharge and shock front role 15 p2549 A66-28693
- Underwater explosive stretch forming of clamped circular mild-steel blanks as affected by clamping ring and reflecting plate 16 p2709 A66-30268
- UNDERWATER PROPULSION**
- Energy relationships for efficiency of propulsors which induct boundary layer fluid on submerged body of revolution [AIAA PAPER 65-234] 16 p2688 A66-31330
- Underwater thermal propulsion system powered by closed-cycle steam power plant fed by high-temperature variable gas flow from oxygen-hydrocarbon combustion apparatus [AIAA PAPER 65-481] 19 p3479 A66-36492
- UNDERWATER TEST**
- Work output characteristics and capabilities of undersea work crews during extended missions 16 p2642 A66-30507
- Electronic equipment to withstand cannon firing and extreme underwater depths 19 p3357 A66-35710
- UNIAXIAL STRAIN**
- Mechanisms and relative magnitudes of internal damping in structural metals subjected to multiaxial state of stress 01 p0150 A66-10153
- Approximate stress intensity factor for embedded elliptical crack in plate subjected to uniaxial tension perpendicular to crack surface 01 p0152 A66-10377
- Uniaxial tensile data for elastomers including stress-strain curve characteristics 02 p0248 A66-11428
- Uniaxial stress effect on minority carrier concentration, mobility and lifetime in germanium p-n junction 03 p0409 A66-12726
- Uniaxial stress effect on germanium-silicon alloyed heterojunction 03 p0410 A66-12729
- Plastic conditions arising near circular hole in plate during uniaxial stretching, with equations describing zones of plasticity 03 p0441 A66-13299
- Poisson ratio for viscoelastic materials undergoing large strains measured, using compression test [ASME PAPER 65-WA/RP-8] 05 p0706 A66-15629
- Uniaxial and hydrostatic pressure effect on absorption edge spectrum and edge excitation spectrum for visible luminescence diamond 07 p1095 A66-17320
- Uniaxial strain effects in /100/ junction orientation GaAs laser diodes, discussing photon polarization 07 p1042 A66-17335
- Wave propagation in quartz to determine third order elastic coefficients 10 p1577 A66-21557
- Dependence of threshold field for Gunn oscillations on energy minima separation, noting decrease under uniaxial stress 10 p1584 A66-22073
- Splitting in indirect absorption edge spectrum dependent on direction and magnitude of applied stress and light polarization with respect to stress axis 12 p1927 A66-23721
- Time-dependent variation of cross sectional area used to generalize classical theory of elastic-plastic loading waves in thin rods 12 p1960 A66-23949
- Uniaxial tensile test data on stress-strain properties of polymers and elastomers as function of strain rate and temperature 13 p2115 A66-26118
- Critical load under uniaxial tension for thin infinite plates with holes weakened by cracks 13 p2202 A66-26415
- Approximate solution for stress-strain concentration in plate with central circular orifice during uniaxial tension by distributed load calculated, using Timoshenko method 13 p2207 A66-26495
- Uniaxial permalloy film anisotropy at cryogenic temperatures and magnetization characteristics 14 p2355 A66-26914
- Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758
- Uniaxial compression and hydrostatic pressure effect on piezoresistance and piezo-Hall effects in n-and p-type AlSb 17 p2984 A66-33153
- Uniaxial stress effect on two-phonon lattice absorption bands of silicon 18 p3154 A66-33920
- Theoretical determination of elastic constants, Youngs moduli and Poisson ratios of filament-wound cylinders, using strain measurements in longitudinal uniaxial loading and internal pressure loading 19 p3472 A66-35355
- Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949**
- Damping mechanisms and phenomenology in materials 23 p4145 A66-41985**
- UNIFIED FIELD THEORY**
- Hypothesis of two intermediate bosons to explain K-2 meson anomalous decay, exploring relation to gravitational and cosmological theories 05 p0718 A66-15348
- Matter and gravitation role in unified gravitational field theory, including Einstein general theory of relativity 14 p2332 A66-27210
- General cosmological problem /GCP/ based on unified field theory involving cosmological expansion, oscillation and organic evolution, discussing quadrant mechanics, entropy, ether, minimum time problem, etc 14 p2389 A66-28408
- Unified field theory applied to relaxation of ion velocity distribution in plasma 15 p2552 A66-29396
- Unified field theory equation for energy loss rate of charged particle moving in plasma, considering screened Coulomb potential and dielectric permeability 18 p3150 A66-34937
- UNIFORM FLOW**
- Ellipsoid of revolution of large aspect ratio with axis of revolution perpendicular to uniform flow at infinity analyzed for small Reynolds number 06 p0873 A66-16995
- Laminar boundary layer on cone with uniform mass transfer, discussing velocity and energy fields 08 p1161 A66-18530
- First-order perturbation analysis of free convection of liquid metal from isothermal vertical finite plate extended to uniform heat flux 10 p1619 A66-21054
- Similar solutions of partial differential flow equations for cylindrical blast uniform flow shock wave and determination of blast wave velocity 14 p2344 A66-27633
- Direct measurement of tangential stresses for uniform flow over rough wall, using wall balance 14 p2277 A66-27935
- Length of two-dimensional contractions in terms of flow uniformity 18 p3098 A66-33952
- First-and second-order theory for uniform shear flow past airfoil, obtaining expressions for pressure, lift and moment coefficients 23 p4011 A66-41879
- UNIPOLAR TRANSISTOR**
- Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unitrons 04 p0490 A66-13917
- Fabrication of active thin film elements, considering bipolar and unipolar transistor, hot electron devices, field effect transistors and single crystal semiconductor films 08 p1192 A66-18964
- Unitron, junction-type unipolar field transistor, design, operation, parameter, production technology and uses in electronic circuitry 08 p1193 A66-19277
- Unipolar FET converter, based on dependence of transconductance and drain current on gate bias voltage 15 p2464 A66-29124
- Graph-analytical method of calculating channel transistors of arbitrary geometrical shape 15 p2469 A66-29928
- Frequency dependence of transconductance of unitrons 15 p2469 A66-29929
- DC theory of unijunction transistor, calculating idealized one-dimensional model, neglecting diffusion currents but taking into account bulk recombination effects 18 p3076 A66-33934
- Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unitrons 20 p3522 A66-37875
- Amplifiers using field effect device in first stage and bipolar transistor in second with limited drain-source voltage 24 p4185 A66-43031
- UNIQUENESS**
- Linear homogeneous third-order differential equations, examining existence, uniqueness and asymptotic behavior of

nontrivial nonoscillatory solutions and
existence criteria for oscillatory
solutions 20 p3591 A66-37608

UNIQUENESS THEOREM

Extension of Calderon paper on global
existence and uniqueness theorems for
solutions of system of partial differential
equations to same double
characteristics 02 p0251 A66-12230

Comparison lemma for determining
uniqueness of solution to Cauchy problem
for ordinary differential

equations 02 p0251 A66-12243

Existence and uniqueness of solutions of
certain boundary value problems for
degenerate elliptic equations of second
kind 07 p1056 A66-17596

Classes of uniqueness for solutions of
Cauchy problem and representation of
positively defined kernels 07 p1056 A66-17598

Approximation theorem and uniqueness
theorem for abstract equations with almost
periodic coefficients 07 p1056 A66-17603

Existence and uniqueness theorems for
invariant-embedding nonlinear ODE systems
for absorption loss rate satisfying Lipschitz
condition 07 p1059 A66-17972

Existence and uniqueness of piecewise-
continuous solution to two-dimensional
linear first order hyperbolic system with
discontinuous coefficients 07 p1060 A66-18100

Two uniqueness theorems for periodic
solutions of second order nonlinear
differential equation describing oscillatory
systems 08 p1246 A66-19709

Uniqueness theorem for problems of
reinforcing rib on plane sound wave
reflected from thin plate 08 p1257 A66-19758

Invariant imbedding in transport process
and theorems of uniqueness and existence
for derived hyperbolic

equation 09 p1393 A66-19906

Second-order linear equations with
nonnegative characteristic form in analysis
of first boundary value

problem 09 p1397 A66-20734

Uniqueness theorems for second-order
linear elliptic and parabolic equations with
discontinuous boundary

values 11 p1724 A66-23362

Uniqueness theorem for dynamically loaded
rigid-plastic and rigid-viscoplastic
idealizations of deformable

bodies 12 p1962 A66-23999

Uniqueness theorem of axisymmetric
exterior traction boundary value problem in
linear elastostatics theory 12 p1971 A66-24818

Uniqueness of mean square approximate
systems proved by expressing weighted
mean square error in quadratic form in
normal coordinates 13 p2116 A66-25139

Uniqueness theorems of Cauchy problem
for parabolic equations of heat

conduction 14 p2322 A66-27630

Uniqueness and existence theorems for
parabolic partial differential equations for
case of free boundary 15 p2528 A66-29334

Uniqueness and solution estimates to
boundary value problems, noting solvability
correlation with existence of Green
function 16 p2733 A66-30739

Uniqueness of solution to second and third
boundary value problems for second-order
elliptic equation in presence of boundary
singular points 16 p2734 A66-30783

Uniqueness of solutions of equations
derived from Pontryagin maximum
principled for optimal control problem with
free right end of trajectory and fixed
terminal time 16 p2672 A66-31339

Exactness of majorants of Dirichlet
problem solution and uniqueness conditions
for linear elliptic

equations 17 p2947 A66-32581

Displacement boundary value problem in
classical linear elastostatics, deriving
ellipticity condition for uniqueness
theorem 19 p3474 A66-35852

Uniqueness theorems concerning lossless
birefringent networks and effects on
transmittance of changing sign of crystal
angles and output

polarizer 20 p3599 A66-36943

Existence of unique periodic solution to
first-order differential equation and
nonautonomous system of two first-order
differential equations 20 p3591 A66-37752

Existence and uniqueness theorems for

Dirichlet problem of second-order linear
elliptic equation, Neumann BVP, mixed BVP
and oblique derivative

problem 21 p3754 A66-38462

Linear elastostatic BVPs for
inhomogeneous anisotropic elastic body
including existence-uniqueness theorem,
based on Korn inequality 21 p3755 A66-38463

Uniqueness of solution to second and third
boundary value problems for second-order
elliptic equation in presence of boundary
singular points 22 p3940 A66-40445

Uniqueness theorem for particular inverse
problem of plane wave perpendicularly
incident on long cylinder of complex
refractive index 22 p3866 A66-40455

Linear theory of micropolar elasticity,
noting all components of asymmetric stress
tensor are determined and motion of media
is fully described when deformation and
microrotation vectors are

known 22 p3995 A66-40566

Variational techniques in solving BVPs for
nonlinear plastic, elastoplastic and viscous
media and in predicting existence,
uniqueness and equilibrium

conditions 23 p4136 A66-40996

Existence and uniqueness theorems in
Poincare-Liapunov theory for multipoint
control boundary value

problems 23 p4085 A66-41539

Axisymmetric bending problem of idealized
elastic rigidly-plastic two-layer circular
plates, deriving exact mathematically strict
solutions and uniqueness

conditions 24 p4290 A66-42443

Uniqueness of solution to motion of heavy
rigid body about fixed point in Newtonian
force field 24 p4238 A66-42849

UNIT

S ASTRONOMICAL UNIT

S INERTIAL MEASURING UNIT

S STORAGE UNIT

UNITARITY

Unitarity conditions for photon echo
detectors of coherent

radiation 13 p2128 A66-26219

UNITED STATES

Development, organization and legal bases
of satellite communication system developed
by U.S., noting details on

COMSAT 02 p0306 A66-11888

Aerospace industry contribution to science
and technology, noting relationship with U.S.
Government 08 p1321 A66-18552

Strain gauge technology in U.S.A.,
emphasizing organization, education and
performance 20 p3559 A66-37506

Stratigraphic distribution of carbohydrate
residues in middle Devonian Onondaga beds
of Pennsylvania and western New York and
application to paleontology and

paleoecology 22 p3912 A66-40133

U.S. space program evaluated for
Europeans, noting effects on international
economics, technology and

politics 24 p4297 A66-43072

UNIVAC 1824 COMPUTER

Packaging monolithic integrated circuits in
UNIVAC 1824 Aerospace Computer Central
Processor 22 p3878 A66-40714

UNIVERSAL TIME

SA EPHEMERIS TIME

Ionograms made at Australian ionosonde
stations during magnetically quiet world day
interval, obtaining information on F region
ionization, noting existence of universal
time control of ionization 12 p1873 A66-24835

UNIVERSE

Propagation of light in universe with
inhomogeneously distributed matter,
considering presence of component
uniformly spread in space /intergalactic

gas/ 01 p0135 A66-10281

Dimensions, form and structure of entire
known universe, examining discontinuous
emission of energy from stars as they
cool 01 p0135 A66-10299

Goedel universe analyzed, noting
generalized Poisson equation, angular
velocity in perturbed metric, equations of
motion in inertial frame of reference,
etc 13 p2183 A66-25609

Perturbations of spatially isotropic
expanding universe in terms of small
curvature variations 21 p3817 A66-39559

Closed universe models with two values of
Hubble expansion

parameter 21 p3817 A66-39560

Book on natural evolution including origins
of universe, stellar and planetary evolution,
beginnings of life on Earth and development
of intelligence and technical civilizations

among galactic communities 24 p4163 A66-42347

Evidence against steady state model of
universe provided by cosmological origin of
quasar red shifts 24 p4273 A66-42418

UNIVERSITY PROGRAM

Pisa University research program since
1958 on AM waves which have undergone
linear distortions in ionospheric

propagation 01 p0022 A66-10332

Astronautics education for RAF and USAF
officers 06 p0972 A66-15920

Postgraduate aviation and space medicine
course at University of

Rome 06 p0972 A66-16054

Canadian aerospace research including
study of high latitude atmospheric
phenomena by universities and

government 09 p1458 A66-20710

Electrophotocopy technician training at
Foothill College 15 p2618 A66-28828

Reliability engineering education at
colleges and universities 20 p3686 A66-37969

Reliability engineering education in U.S.
and overseas, giving geographic distribution
of activities, trends, magnitude, government
support, etc 20 p3686 A66-37970

Reliability education, discussing general
questions, problems, levels of education,
personnel distribution,

etc 20 p3686 A66-37971

UNLOADING WAVE

Shock wave, plane loading and unloading
wave propagation in prismatic rod with
variable cross section and curvilinear stress-
strain relation 17 p3031 A66-33329

Elastic wave radiation possible in collision
of unloading wave with shock

wave 23 p4054 A66-41354

Ceylon and artificial graphite behavior
under very high pressure, examining
problem of metallic phase of

carbon 24 p4229 A66-42751

UNMANNED SPACECRAFT

SA MANNED SPACECRAFT

History of Mariner space program and
discussion of future unmanned vehicles for
exploration of interplanetary

space 02 p0296 A66-11677

Comparison of manned and unmanned
spacecraft 04 p0472 A66-14092

Present status of U.S. aerospace

investigation projects with description of
individual mission goals, launch schedules
and financial

requirements 09 p1453 A66-20167

Unmanned space missions with regard to
dynamical requirements, propulsion systems,
tracking methods, guidance and

control 12 p1953 A66-23636

Ground system design, data processing,
digital command and digital-human interface
in flight operations problems for unmanned
spacecraft on planetary exploration

mission 13 p2190 A66-25257

Unmanned Mars surface roving vehicle
design, system and subsystem development,
telecommunication and guidance modes,
etc 13 p2057 A66-25265

Payloads and characteristic velocities for
unmanned planetary and solar missions
using nuclear electric propulsion spacecraft
[AIAA PAPER 64-714] 13 p2193 A66-26608

Conceptual unmanned spacecraft designs
for Jupiter exploration including flyby and
orbiter missions

[AIAA PAPER 65-388] 14 p2394 A66-28176

Structural design of various unmanned
space vehicles as function of developmental
and technical problems 16 p2807 A66-30298

Voyager program of unmanned scientific
exploration of planets, discussing Flyby,
Orbiter, Capsule and Lander

missions 16 p2798 A66-30360

Unmanned interplanetary long-duration
Mariner space flights and instrumentation,
guidance, control, stabilization and
communications of Mariner II and

IV 16 p2807 A66-30362

Future spacecraft projects, emphasizing
roles of space scientist and industrial
manager as illustrated by using Jupiter
flyby mission spacecraft

- design 16 p2808 A66-30364
- Unmanned planetary probe and lander capsule design, emphasizing Mars lander capsules 16 p2808 A66-30366
- Unmanned spacecraft trajectory and guidance considerations for close flyby of planet Mercury [AIAA PAPER 65-90] 16 p2801 A66-30885
- Remote maneuvering unit, discussing principle, functions, feasibility, composition and application 19 p3469 A66-35959
- Unmanned space vehicle on board measurements and data transmission to ground station, examining temperature and propellant measuring techniques 21 p3741 A66-39631
- Unmanned exploration of solar system - AAS Symposium, Denver, February 1965 24 p4274 A66-42653
- Deep space payloads, booster probes, sensors and communication systems for missions from Jupiter to Pluto 24 p4281 A66-42673
- Data compression feasibility for data transmission from unmanned spacecraft in deep space 24 p4282 A66-42682
- UNSTEADY FLOW
- SA OSCILLATING FLOW
- SA PULSATING FLOW
- Unsteady motion of rotating fluid in cavity neglecting viscous dissipation 01 p0058 A66-10485
- Three-dimensional unsteady flow in uniformly expanding layer and dispersion of gas in vacuum 02 p0220 A66-12177
- Aerodynamic blast simulation in hypersonic tunnels, noting unsteady tunnel flow behind blast wave 03 p0316 A66-12794
- Transient heat transfer between thin circular tube and incompressible fluid, considering radial conduction and heat loss [ASME PAPER 65-HT-2] 04 p0595 A66-13393
- Step wave and pulse wave transmission and reflection at area changes and junctions in pipes 04 p0508 A66-13410
- One-dimensional unsteady flow of ideal compressible finite conductivity medium in presence of mass forces and plane magnetic field 04 p0516 A66-13856
- Bergeron and first approximation method for solving problems of unsteady fluid flow in pipeline 04 p0511 A66-14157
- Real flow and interference effects of body of revolution and stabilizing surfaces when at small angle of attack [ASME PAPER 65-FE-5] 06 p0801 A66-16212
- Two-dimensional cavity flow of ideal fluid with small unsteady disturbances in gravity free field [ASME PAPER 65-FE-18] 06 p0870 A66-16216
- Transonic airfoil problem solved via differentiation of airfoil thickness ratio by infinitesimal perturbation method [AIAA PAPER 66-90] 06 p0802 A66-16410
- Quasi-steady flow relations to study wave action in duct with gauze 06 p0873 A66-16932
- Simple waves in one-dimensional nonsteady nonmagnetic relaxation hydrodynamic flows of chemically reacting compressible gases 07 p1020 A66-17965
- Unsteady oscillations of boundary layer interaction with shock waves in lower transonic region 07 p1022 A66-18106
- Pressure distribution on oscillating two-dimensional symmetric airfoil in incompressible flow, examining trailing edge angle influence 07 p0982 A66-18133
- Wave action in duct with gauze calculated, using steady flow relations including pressure loss coefficients 07 p1026 A66-18281
- Nonsteady flow through square-edged orifice in pipe 07 p1026 A66-18283
- Transient behavior of heated stellar atmosphere, examining unsteady flow caused by sudden application of heat to static adiabatic atmosphere 08 p1286 A66-18541
- Newtonian flow over fixed two-dimensional body in unsteady flow, emphasizing shock layer 08 p1164 A66-19129
- One-dimensional CJ detonation existence as self-sustaining phenomenon 08 p1208 A66-19203
- Unsteady motion of viscous incompressible liquid flow between two concentric cylinders 09 p1368 A66-20828
- Stability and dissipation in second and third-order fluid approximations of boundary value problems for unsteady simple shear flow
- [AICE PREPRINT 21F] 10 p1521 A66-21188
- Unsteady airfoil functions evaluated approximately 10 p1479 A66-21345
- Unsteady two-dimensional axisymmetric plasma flows, classifying isentropic or incompressible flows according to magnetic field configurations 11 p1746 A66-23234
- Inviscid unsteady flow field disturbances caused by blast-generated normal shock wave sweeping past slender wedge moving at hypersonic speed 12 p1795 A66-23577
- Numerical method of calculating unsteady flow past arbitrary thin wing moving in ideal incompressible fluid 12 p1797 A66-24430
- Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432
- Cavitating and noncavitating flows past plano-convex hydrofoil, noting oscillation frequency dependence on attack angle, tunnel velocity and cavitation number [ASME PAPER 65-FE-3] 12 p1865 A66-24557
- Potential double waves at interface between two-dimensional nonsteady barotropic gas flow and region of undisturbed gas 13 p2063 A66-25633
- Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704
- Lift, drag and inertial forces due to uniform unsteady flow with constant acceleration past fixed circular cylinder, determining vorticity flux 13 p1993 A66-26705
- Finite-difference method for computing transient velocity profiles in laminar boundary layer around two-dimensional cylinder, noting Blasius flow oscillations 14 p2274 A66-27434
- Linearized unsteady supersonic potential flow theory formulation of boundary value problem of aerodynamic forces on oscillating cylinder and comparison with two-dimensional quasi-steady and slender body approximations 16 p2628 A66-30259
- Theory of unsteady one-dimensional motion of ideal incompressible fluid, discussing equation of state 16 p2688 A66-31300
- Aerodynamic lift and moment during unsteady flow of ideal incompressible fluid around lattice of thin bent profile 16 p2690 A66-31620
- Nonlinear theory for flow past slender wings with leading edge vortices in sudden plunging motion 17 p2837 A66-32082
- Two-dimensional wake in incompressible unsteady vortex flow downstream of cylindrical body 17 p2907 A66-32279
- Unsteady slip flow of electrically conducting viscous fluid over porous flat plate under transverse magnetic field 17 p2973 A66-32980
- Buoyancy in convecting ideal dissociating gas analyzed, obtaining solution for one-dimensional unsteady free mixing 18 p3103 A66-34931
- Rarefied gas motion instability, constructing general solution for effect of various force fields 19 p3343 A66-36846
- Tangential velocity and radial flow of unsteady viscous vortex with annular region and flow toward center 21 p3728 A66-39345
- Two-dimensional unsteady flow of second-order incompressible fluids, noting analogies to Newtonian case 21 p3728 A66-39437
- Unsteady flow of two immiscible Maxwell fluids between two parallel plates when upper plate is given transient velocity and lower plate is fixed 21 p3731 A66-39605
- Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697
- Flow of unsteady compressible boundary layer over semiinfinite flat plate whose temperature exceeds free stream temperature 22 p3902 A66-40707
- Particle-in-cell (PIC) method for approximate solution of propagation and reflection of plane shock waves in dusty gases 23 p4054 A66-41158
- Shallow water theory of formation and decay of hydraulic shock waves in nonsteady homentropic gas flow 23 p4055 A66-41541
- Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700
- Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 23 p4009 A66-41719
- Unsteady supersonic gas flow around lattice of thinly curved plates for calculation of aerodynamic forces and moments acting on oscillating profile 23 p4009 A66-41722
- Volterra equation and Green function to solve MHD problem of unsteady flow of viscous incompressible conducting fluid with time dependency 23 p4106 A66-41837
- Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925
- UPCONVERTER
- Wide band solar radiospectrograph employing untuned parametric upconverter 11 p1704 A66-22552
- UPPER AIR
- Stability of expanded circumpolar vortex, using available record of 700-mb subtropical westerly index values for five-day means from 1943 through 1965 07 p1062 A66-17372
- Upper air sounding analysis using electronic computer 17 p2921 A66-33340
- Upper wind data as observed compared with data derived from serially completed upper wind records 17 p2922 A66-33341
- UPPER ATMOSPHERE
- SA IONOSPHERE
- SA MAGNETOSPHERE
- SA MESOSPHERE
- Establishing absolute value for total wavelength integration of solar irradiance at Earth upper atmospheric limit and spectral distribution of this radiation flux 02 p0279 A66-11220
- Upper atmospheric observation using normal-pulse ruby laser techniques, presenting height distribution curves of scattered light 04 p0528 A66-13376
- Mass spectrometer application to measurement of chemical and ionic composition of upper atmosphere 05 p0676 A66-14683
- Charge transfer between helium ions and molecules of nitrogen and oxygen in crossed-beam experiment within energy range 3 to 600 ev 05 p0671 A66-14954
- Spectrographic and interferometric techniques used in temperature determinations of auroral and airglow emissions in upper atmosphere 05 p0671 A66-15020
- Photometric measurements of twilight brightness for upper atmospheric temperature determination 05 p0674 A66-15528
- Visible and invisible aurora discussing morphology, occurrence, magnetic activity, absorption, geophysical and energy particle 05 p0675 A66-15746
- Rockets and spacecraft as tools for meteorological observations in upper atmosphere, discussing temperature variations, wind pressure patterns and demarcated zone 05 p0712 A66-15747
- Probe for measuring energy transfer between satellite and upper atmosphere 06 p0878 A66-15922
- Upper atmospheric research using spectroscopic study of absorption bands and night-sky radiation, celestial bodies as UV and X-ray sources and atmospheric light scattering 06 p0876 A66-16310
- Periodic temperature fluctuations in mesosphere based on underground measurements of cosmic ray intensity at Yakutsk, Siberia 06 p0950 A66-16595
- Monte Carlo method to reveal properties of hydrogen transport near critical level of escape of Earth upper atmosphere 07 p1028 A66-17362
- LF anisotropic electric conductivity in upper atmosphere, noting Hall current 08 p1214 A66-19050
- Mesospheric sounding rocket launches and aims pursued 08 p1247 A66-19197
- Static diffusion models of upper atmosphere with density and composition determined for wide exospheric temperature ranges 09 p1370 A66-19901
- Altitude and zenith angle dependences of secondary cosmic ray components in upper

atmosphere 09 p1441 A66-20378
 Space research in West Germany including upper atmosphere time-dependent structure, geomagnetism, space radiation, artificial ion cloud, etc 09 p1458 A66-20713
 Upper atmosphere physics including heating, circulation, ionization, composition, emissions, geomagnetic variations, polar auroras, etc 09 p1375 A66-20987
 Upper atmosphere temperature and pressure measured with manometers mounted on rockets, using method of successive approximations 09 p1375 A66-20988
 Atmospheric density distribution at altitude from 200 to 300 km, based on Soviet satellite observations during minimum solar activity 09 p1375 A66-20990
 IR radiation in upper atm layers investigated by rocket and balloon, noting solar radiation effect 09 p1377 A66-21000
 Soft electron fluxes in upper atmosphere measured, using open type secondary electron multiplier ejected in container from rocket 09 p1443 A66-21012
 Upper atmosphere model for calculating neutral properties from 100 to 10,000 km as function of local time and solar activity 10 p1531 A66-21280
 Rocket grenade measurement of temperature, pressure, density and wind velocity in upper atmosphere 10 p1533 A66-21832
 Height dependence of albedo in Earth upper atmosphere, calculating total quantity of neutral hydrogen in ionosphere 11 p1699 A66-23044
 Upper atmospheric diurnal tide determined via sodium vapor trail measurements 11 p1701 A66-23146
 Winds in upper atmosphere as revealed by sodium vapor trails explained on basis of prevailing and tidal components critically analyzed 11 p1701 A66-23147
 Upper atmospheric helium ion chemical loss process, distribution of nitrogen ion and rate coefficient of helium ion-molecular nitrogen reaction 11 p1701 A66-23153
 Data on satellite orbits used for Earth figure, upper atmosphere density, solar radiation, etc, 12 p1868 A66-23637
 Magnetospheric and upper atmospheric meteorological effects on cosmic ray intensity variation and solar corpuscular streams 12 p1940 A66-24163
 Radio wave propagation in artificial ionized cloud in upper atmosphere determined, using geometrical optics 12 p1817 A66-24274
 Upper atmosphere temperature, pressure and density determined by photographic observations of meteors, based on calculating height of homogeneous atmosphere 12 p1870 A66-24291
 Atmospheric density models for solar radiation cycle variation in upper atmosphere 12 p1951 A66-24490
 [AIAA PAPER 66-355] 12 p1951 A66-24490
 Loki Dart meteorological rocket system for temperature and wind measurement in 75,000 to 200,000 ft altitude region [AIAA PAPER 66-383] 12 p1908 A66-24507
 Upper atmospheric wind measurement with gun launched projectiles, computing wind component contour parameters [AIAA PAPER 66-403] 12 p1908 A66-24515
 Rayleigh scattering intensities in upper atmosphere 13 p2075 A66-26737
 Penetration and absorption of solar optical, UV and EUV radiation in upper atmosphere /ionosphere, exosphere and ozone layer upper boundary/ 15 p2573 A66-28683
 Measuring techniques of winds and temperatures in upper atmosphere with Judi-Dart and other small meteorological rockets 15 p2485 A66-29066
 Sounding rocket-released artificial strontium and barium ion cloud motion in upper atmosphere, based on equations of ambipolar diffusion 15 p2491 A66-29950
 Free sodium atom distribution in upper atmosphere related to diurnal and nocturnal variation 15 p2491 A66-30018
 Statistical properties of dispersive waves in upper atmosphere analyzed, using correlation technique 15 p2493 A66-30040
 Mass spectrometric measurements of upper atmosphere temperature 15 p2495 A66-30062
 Rocket measurements of electron fluxes in upper atmosphere of middle latitude at

altitudes of 200-500 km 15 p2592 A66-30063
 Average rotational speed of upper atmosphere above 200 km evaluated from changes in orbital inclinations of 13 satellites 15 p2496 A66-30082
 Atmospheric diffusion coefficients including measuring radial growth of chemiluminous trails deposited in upper atmosphere 16 p2695 A66-30712
 Dust flux in upper atmosphere and on polar ice sheets 16 p2696 A66-30931
 Upper atmosphere physics with relation to solar activity, noting molecular distribution 16 p2697 A66-30996
 Chemical release at high altitudes in order to obtain information about atmosphere by ground observation 16 p2697 A66-31012
 Lidar detection of backscatter from upper atmosphere 17 p2875 A66-32929
 Methane content of upper atmosphere determined by Fabry-Perot interferometer measurement of radiation transmission in methane absorption band 17 p2926 A66-32948
 Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993
 Anderson hypothesis on semiannual variation in upper atmosphere density and relation to geomagnetic latitude effects, analyzing Samos II 17 p2920 A66-33087
 UV radiation effect on decomposition of ammonia ejected in upper atmosphere 17 p3013 A66-33402
 Omegatron mass spectrometer for measuring density and temperature of nitrogen in 100 to 350 km region of upper atmosphere 18 p3112 A66-34241
 Balloon experiment for measurement of secondary gamma spectrum in 100-2000 mev range, using lead scintillator sandwich spectrometer 18 p3171 A66-34708
 Seventy-channel scintillation spectrometer high atmospheric measurement of cosmic gamma radiation of extraterrestrial origin 18 p3192 A66-34845
 RF mass spectrometer with small dimensions and power requirements and high sensitivity designed for analysis of upper atmosphere ion and neutral composition 19 p3353 A66-35289
 Upper atmosphere radiative and heat flux balance and dynamics from balloon-borne measurements 19 p3347 A66-35641
 Falling sphere experiment instrumentation for aerospace density determination including sensor, transit-time accelerometer and telemetry system 19 p3356 A66-35672
 High altitude research project using 16-inch gun for measurement of upper atmospheric wind shear patterns 19 p3340 A66-36644
 Book on atmospheric optics of twilight phenomena 19 p3394 A66-36732
 CIRA 1965, COSPAR International Reference Atmosphere covering mean atmospheric structure variations from 30 to 100 km and from 120 to 800 km 19 p3352 A66-36796
 Simulation of upper atmosphere NO release in low density wind tunnel indicating light output of NO-O chemiluminescent reaction depends on O concentration 19 p3405 A66-36804
 Solid propellant rocket engine space probe for telemetric study of upper atmosphere 20 p3659 A66-37048
 Coverage of satellite passes from ground station for combined satellite-ground base studies of upper atmosphere 20 p3515 A66-37298
 Limitations imposed on upper atmospheric sonic thermometry by lowering of density with increasing altitude 21 p3741 A66-39428
 Satellite and rocket measurement of upper atmosphere characteristics, deriving standard atmosphere CIRA 1965 21 p3735 A66-39615
 Initial energy spectrum and flux of low energy protons responsible for luminescence of hydrogen in auroras 22 p3974 A66-40753
 Molecular nitrogen ions in nocturnal upper atmosphere at middle latitudes, noting space radiation bombardment 23 p4064 A66-41681
 Detecting concentration of nitric oxide in metastable state in upper atmosphere, using

glant-pulse Raman laser sources 24 p4203 A66-43022
UPPER IONOSPHERE
 Effective ion mass in upper ionosphere from electron-density profiles obtained from Alouette satellite, compared with theory 04 p0517 A66-14177
 Ion distribution and temperature in topside ionosphere from plasma scale height profiles from Alouette electron density data 05 p0667 A66-14788
 Relation between height-time distribution of electron concentration and inhomogeneous formations of outer ionosphere 09 p1377 A66-21001
 Far region of ionosphere of Earth /from 2000 to 200,000 km/ 09 p1378 A66-21006
URANIUM
 Pressure dependence of superconducting transition of uranium to maximum pressure of 10 kbar, examining transition temperature increase with isotopic mass 04 p0560 A66-13718
 Fission method to study uranium distribution in natural minerals 09 p1460 A66-20963
 Simplified method of evaluating thermal and ionizing energies from fission of uranium atoms 16 p2744 A66-30436
URANIUM CARBIDE
 Performance of thermionic converters using clad and unclad UC-ZrC emitters operated at high temperatures, noting cesium pressure effect 05 p0619 A66-15566
 Fabrication methods for production of uranium-zirconium monocarbide spherical particles for thermionic emitters 05 p0714 A66-15587
URANIUM COMPOUND
 Nuclear fuel-cladding diffusion and interactions in uranium-tungsten and uranium-molybdenum systems, covering compatibility, transport rate, thermal cycling effects and cladding surface contamination 05 p0714 A66-15588
 Uranium-containing materials, refractory metals and alloys, discussing interface interaction, thermionic properties and parameters of vacuum electron emission stability 05 p0714 A66-15589
URANIUM OXIDE
 Uranium dioxide fueled molybdenum emitter of nuclear heater thermionic converter for use in construction of cylindrical thermionic diode 05 p0620 A66-15569
 Refractory material cermet fabrication, discussing techniques of preparation, fuel-metal compatibility and fuel canning 05 p0713 A66-15585
 Uranium oxide as nuclear fuel when in contact with tungsten, molybdenum and tungsten-25 percent rhenium thermionic emitter 05 p0713 A66-15586
 Spectroscopy of lithium fluoride crystals activated with uranium trioxide for laser action, showing anomalous fluorescent decay under high intensity pumping 13 p2092 A66-25997
URANIUM 235
 MHD species separation of U 235 from hydrogen in gaseous nuclear rocket using time varying traveling wave electromagnetic field [AIAA PAPER 66-499] 16 p2745 A66-30606
URANUS
 Period of revolution of Uranus satellite Miranda from plates obtained at Cassegrain focus of McDonald reflector 02 p0287 A66-11494
 Anomalous rotation of Uranus explained by deriving expressions relating random rotation component with masses of largest bodies falling on planet 08 p1297 A66-19455
 Anomalous rotation of Uranus explained by deriving expressions relating random rotation component with masses of largest bodies falling on planet 18 p3232 A66-34484
UREA
 Urea effective ice nucleant in supercooled clouds due to endothermic heat of solution and high solubility 13 p2122 A66-26125
URETHANE
 SA POLYURETHANE
 SA POLYURETHANE FOAM
 Physical characteristics pointing differences between solid state urethanes and conventional rubbers, noting fabrication

Information and tooling application
[ASME PAPER 65-WA/RP-7]

ERINATION
Indolylacroyl glycine excretion in man 16 p2638 A66-30634
Tracer dilution technique for measuring quantity of urine voided by crew members in manned spacecraft environment 17 p2870 A66-32192

URINE
Urinary excretion of 3-methoxy-4-hydroxymandelic acid during dreaming sleep in man 16 p2638 A66-30635
Urinary excretion of steroids and catecholamines as measure of emotional stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33773
Ascorbic acid concentration in urine and organs of guinea pigs exposed to high oxygen concentrations 18 p3060 A66-34410
Human dreaming sleep and correlated changes in urine volume and osmolality 19 p3285 A66-36065
Metabolic correlates of glucocorticoid induction of enzymes in man studied in terms of ACTH induced changes in tryptophan turnover along inducible pathways 24 p4166 A66-43168

UTILITY AIRCRAFT

Handling stability and control research in development of STOL utility transport aircraft
[AIAA PAPER 65-713] 01 p0013 A66-10950
Productivity and cost comparison of water-bomb forest fire fighting aircraft 07 p0989 A66-18051
Handling stability and control research in development of STOL utility transport aircraft
[AIAA PAPER 65-713] 12 p1801 A66-24094
Clear air turbulence types at high altitude identified and intensity and wavelength measured by FM instrument, using vane gust probe installed in U-2 aircraft [AIAA PAPER 66-362] 12 p1907 A66-24494
Aerospace Rescue and Recovery Service /ARRS/ 14 p2395 A66-28455
Military vertical replenishment and utility helicopter operational requirements and load carrying capacity 17 p2845 A66-32740

V/STOL AIRCRAFT

SA STOL AIRCRAFT
SA VTOL AIRCRAFT
Weight and load factor modification of V/STOL aircraft design when aircraft is used as weapon system 01 p0011 A66-10186
Aircraft control power requirements provided by lift fan propulsion system for V/STOL flight, noting gas power transfer [SAE PAPER 650831] 01 p0130 A66-10830
Landing gear design challenges for V/STOL service XC-142A and relative success or failure [SAE PAPER 650843] 01 p0012 A66-10848
Airborne V/STOL simulators used for handling qualities research at National Aeronautical Establishment, Ottawa, Canada [AIAA PAPER 65-705] 01 p0054 A66-10943
Gas Dynamics Laboratory program for study of V/STOL propulsion, using NRC VTOL propulsion tunnel 01 p0008 A66-10964
JR 100 lightweight lift jet engine outline for National Aerospace Laboratory 02 p0278 A66-11306
Controls, systems and equipment of five different configurations of FIAT G 222 V/STOL transport aircraft for Italian Air Force 02 p0177 A66-11868
Nonreturn circuit V/STOL wind tunnel to reduce external wind effects 02 p0216 A66-11964
Performance of blade rows in transonic axial-flow compressor for V/STOL aircraft 03 p0313 A66-12393
Autoland, stalling and jet V/STOL systems for flight testing of aircraft [AIAA PAPER 65-783] 03 p0318 A66-12557
Propulsion-control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 03 p0319 A66-12564
V/STOL aircraft economic and operational

characteristics for commercial service over routes of 150 miles or less [SAE PAPER 650243] 03 p0446 A66-12632
Thrust-control system on XC-142A tilt-wing aircraft considered in connection with structural design of aircraft hover, transition and acceleration [AIAA PAPER 65-769] 03 p0321 A66-13063
V/STOL transport aircraft noting productivity, flexibility, simplicity, economy of numbers, low fleet cost, high speed and turbofan propulsion 03 p0322 A66-13269
Hatfield V/STOL wind tunnel facility of Hawker Siddeley Aviation 05 p0660 A66-14999
Reaction control system for V/STOL aircraft including power source, working fluid, delivery system, thrust producing devices and control point [SAE PAPER 650830] 05 p0610 A66-15014
Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 05 p0606 A66-15076
Tip turbine lift-fan system with single rotor for thrust augmentation of gas generator for advanced V/STOL aircraft [AIAA PAPER 65-708] 05 p0611 A66-15163
Rolls-Royce RB 108 lift-jet engine design, characteristics and V/STOL research 05 p0745 A66-15298
V/STOL Aircraft Symposium, Wright-Patterson AFB, Ohio, November 1965 06 p0805 A66-16808
VTOL influence factors for V/STOL systems in propulsion 06 p0943 A66-16809
Flight simulation developments for V/STOL visual device requirements including mirrors focusing images at infinity, transparency image storage techniques, optical probes, etc 06 p0869 A66-16814
Trailing rotor system conversion of unpowered three-bladed rotor system and applicability to high speed V/STOL aircraft as low-disk loading vertical lift system 06 p0806 A66-16817
LW-2 Escape System for high V/STOL aircraft and outstanding recovery capabilities 06 p0806 A66-16819
Lift fans for advanced V/STOL aircraft, describing performance improvement parameters 06 p0807 A66-17020
Rolls-Royce RB 108 jet engine, discussing project history, test results and current application 06 p0943 A66-17021
V/STOL aircraft engine technology, discussing engine configuration, lift augmentation, thrust deflection, efficiency parameters, etc 06 p0943 A66-17023
Kestrel P-1127 V/STOL strike/reconnaissance aircraft evaluation trials with reference to background, aircraft description, organization, pilot training and major tasks 07 p0985 A66-17268
XC-142A V/STOL four-engine aircraft in first twelve months of flight, discussing effect of stabilization failure in hover, conversion and STOL areas of operation 07 p0986 A66-17269
Aircraft design parameter development, discussing supersonic air transport, helicopter and V/STOL design problems, metal fatigue, etc 08 p1167 A66-18707
Terminal facilities, support equipment and operational characteristics of V/STOL aircraft 09 p1330 A66-20696
XC-142A V/STOL transport aircraft with four-ton payload and 200 nautical mile range radius [AIAA PAPER 64-775] 09 p1330 A66-20735
Gimballed jet engine development, noting application to V/STOL aircraft and design of plenum chamber burning engine 10 p1591 A66-21366
V/STOL transport aircraft design and application, noting performance with varying number of propulsion units 10 p1482 A66-21369
New lift and propulsion techniques in development of V/STOL aircraft, helicopters and ground effect 11 p1636 A66-22695
Working section size and shape for V/STOL wind tunnels, emphasizing wall effect magnitude limitation, aircraft aerodynamic and propulsion system characteristics 12 p1857 A66-23657

Wind tunnel for testing V/STOL aircraft 13 p2059 A66-26545
Design of V/STOL aircraft including propulsion systems, control and lift configurations 14 p2222 A66-26924
NASA mission, discussing V/STOL transports, SST and hypersonic cruise vehicles [SAE PAPER 660169] 14 p2416 A66-27282
V/STOL aircraft for intercity travel, discussing cost, advantages, technological advances, etc [SAE PAPER 660318] 14 p2223 A66-27298
Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 14 p2274 A66-27415
Stability and control test program for Canadair CL-84 tilt-wing V/STOL aircraft prototype [SAE PAPER 660315] 15 p2427 A66-29839
V/STOL aircraft use in California corridor in next decade, considering time savings, costs analysis, etc [SAE PAPER 660317] 15 p2428 A66-29841
Jet engine transient thrust response for V/STOL aircraft 16 p2791 A66-30598
Time shared general-purpose digital computer with hybrid linkage to analog consoles used for determination of static and dynamic performance characteristics of rocket engines, jet engines, V/STOL aircraft, etc 16 p2658 A66-31249
Commercial V/STOL aircraft and systems development, discussing government /FAA/ interest and assistance 16 p2633 A66-31281
Aircraft design requirements concerning V/STOL technology emphasizing cost, size and propulsion system 16 p2634 A66-31323
Airframe structure and power plant configuration effects on transport V/STOL performance 17 p2846 A66-32885
Military V/STOL transport aircraft design, capabilities and cost effectiveness 17 p2846 A66-32887
Model study of thrust loss due to recirculation of gases from jets of V/STOL aircraft to engine intakes 18 p3162 A66-33693
Acoustic isolator-membrane structure for soundproofing V/STOL aircraft exposed to high noise levels with radical saving in space 18 p3051 A66-33688
V/STOL aerodynamics, discussing jet-lift, fan-lift, high-lift boundary layer control, jet-flaps, ground simulation and wind-tunnel techniques 19 p3275 A66-35364
Low speed wind tunnel design and testing including V/STOL aircraft, helicopters, reentry vehicles, etc 20 p3540 A66-37009
V/STOL aircraft human reliability factors and requirements for displays and controls in various operational modes under low altitude, high speed and all-weather conditions 20 p3509 A66-37895
Transmission systems selection for high-speed lightweight applications, including cushion vehicles and Bell X-22A V/STOL aircraft [ASME PAPER 66-MD-71] 21 p3743 A66-38499
Digital computer program for V/STOL aircraft static propeller characteristics and optimization, based on initial wake hypothesis and trailing vortex sheet properties 22 p3843 A66-40294
Rotor downwash angle and tunnel geometry effect on maximum size rotor that can be tested in closed throat wind tunnel [AIAA PAPER 66-736] 22 p3893 A66-40626
Jet V/STOL aircraft inlet temperature rise caused by recirculation of hot exhaust gases in ground proximity [AIAA PAPER 66-740] 22 p3851 A66-40629
Propulsion control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 23 p4015 A66-40985
Total system compatibility in V/STOL propulsion system development and testing [AIAA PAPER 66-738] 23 p4121 A66-41325
Wind tunnel simulation of transient state of takeoff and landing of V/STOL aircraft, noting application of electric circuit analogy to measure flow dynamic response to control valve movement 23 p4053 A66-41388
Propagation of turbulent jet colliding with flat surface at certain incidence angle

analyzed for applications to V/STOL aircraft, ventilation equipment, etc 23 p4056 A66-41737

V/STOL aircraft using stowable rigid rotor and fixed wing 24 p4159 A66-42346

CL-84 V/STOL flight simulation at Canadair through design, development and flight testing of flapped tilt-wing prototype [ICAS PAPER 66-18] 24 p4159 A66-42493

V/STOL aircraft design noting very high lift generation at very low flight speeds and payload role 24 p4159 A66-42890

V/STOL aircraft for commercial short-haul transports, considering turboprops, fan-in-wing and propulsion wings 24 p4159 A66-42891

V-5 AIRCRAFT

S XV-5 AIRCRAFT

VACILLATION

S PERIODICITY

VACUUM

SA HIGH VACUUM

SA ULTRAHIGH VACUUM

Negative double derivative in vacuum magnetic field in terms of flux surfaces about magnetic axis of arbitrary shape 08 p1280 A66-18543

Steady state expansion of gas into vacuum, considering continuum inviscid analysis, collision-free analysis, supersonic flow and hypersonic limits, etc, for spherical and cylindrical symmetry 12 p1860 A66-23607

Electric breakdown and insulation properties of vacuum and design of vacuum devices 14 p2249 A66-27105

Text on vacuum science and technology including kinetic theory of gases, gas flow, pumps, vacuum measurements and equipment, etc 14 p2335 A66-27721

Nonlinear coefficients of refraction for self-trapping of optical beams in all media including vacuum 15 p2514 A66-29031

Electron beam welding in partial vacuum 19 p3362 A66-35325

VACUUM CHAMBER

Rotating arm apparatus at National Aerospace Laboratory in Japan for pressure-distribution and heat-transfer flow measurement 01 p0053 A66-10636

Space environment simulation vacuum chamber design and operation in terms of manned testing 03 p0352 A66-12757

Spherical cryopumped chamber with test object analyzed for pumping speeds determined with gauges located in various positions, with equations relating these speeds to chamber geometry and cryopump efficiency 04 p0528 A66-14465

Electron beam acceleration by means of toroidal systems in which equilibrium of beam in annular orbit is achieved by image currents in metallic coating of vacuum chamber 07 p1085 A66-17648

Thermal vacuum simulation in satellite design of UK-3 07 p1018 A66-18052

Space Simulation Institute at Porz-Wahn, West Germany has simulation chambers for vacuum only, vacuum and cold and solar radiation 08 p1202 A66-18868

Ultrahigh vacuum chamber with liquid-helium-cooled liner for space environment simulation 08 p1202 A66-18926

Vacuum simulation facility near Munich for testing third stage of ELDO rocket 10 p1519 A66-21374

Steam generating technique for vacuum ejector system of high-altitude-simulating rocket test facility in West Germany 10 p1519 A66-21403

Residual gas effect on work function vs critical temperature for surface ionization of cesium on porous tungsten [AIAA PAPER 64-693] 10 p1594 A66-21778

Gas capture coefficient prediction for cryopumping based on critical velocity model in space chamber simulator 10 p1520 A66-21937

Simulated space vacuum environment by cryosorption pumping system 12 p1858 A66-24709

Simulated space environment testing, discussing limitations due to cost, outgassing, temperature and radiation simulation 13 p2015 A66-25688

Beam power increase and radiation damage effect on high power accelerator components, determining permeability change 13 p2058 A66-25743

Equilibrium temperature measurements of thermal scale model used for spacecraft testing in cold wall vacuum chamber 14 p2270 A66-27886

Gears evaluation testing under vacuum chamber space simulation [ASLE PAPER 66AM 7A4] 16 p2712 A66-30417

Cryopumping, titanium-sublimation and ion-pumping mechanisms studied for exhausting vacuum chambers to simulate outer space 16 p2877 A66-30456

Solar simulation vacuum test chamber intended primarily for thermal vacuum testing 16 p2880 A66-30498

Optimizing performance of ultra high thermal vacuum system 16 p2881 A66-30499

Vacuum thermal environmental testing of Nimbus I control system 16 p2809 A66-30504

Thermal vacuum simulation in satellite design of UK-3 16 p2882 A66-31198

Dielectric-walled vacuum vessel for space simulation testing of plasma propulsion devices 17 p2903 A66-32487

Requirements for thermal and vacuum space environment simulation for component and system testing [AIAA PAPER 64-201] 19 p3339 A66-35596

Liquid nitrogen-cooled shield against oil vapor contamination of proton accelerator in vacuum chamber 19 p3281 A66-35814

Man-rating criteria in Boeing space environmental simulation chamber, discussing structural design, vacuum chambers, repressurization, manlock pumping systems, aerospace medical training, etc 19 p3289 A66-35841

HF heating of plasma in metallic vacuum chamber, noting generation and absorption of ion cyclotron waves, estimating plasma density 19 p3431 A66-36593

Data reduction techniques for vacuum measurements by mass spectrometry, emphasizing matrix algebra techniques 22 p3918 A66-40234

Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation tests 22 p3891 A66-40236

VACUUM DEPOSITION

Vacuum deposition of cadmium sulphide ultrasonic transducers for generating longitudinal or linearly polarized shear waves 03 p0368 A66-12410

Nonohmic behavior of silicon monoxide under various conditions and proposed model for current-voltage and current-temperature relations 03 p0409 A66-12727

NaCl substrate surface temperature and structure effect on orientation, structure and characteristics of vacuum-deposited PbTe film 04 p0564 A66-14255

Hall effect in thin polycrystalline evaporated bismuth films obtained by sublimation under very hard vacuum 04 p0567 A66-14324

Germanium films deposited on heated crystal calcium fluoride substrates in vacuum system 05 p0732 A66-14667

Equipment and processes of thin film evaporators, noting cermet circuits produced in nonvacuum environments and thin film circuits produced by vacuum deposition 05 p0689 A66-15473

Gold thin films of 1800 angstroms to be used as lubricants were vapor-deposited on Ni, Ni-Cr and Ni-Re substrates in vacuum 06 p0884 A66-15937

Resistive properties of vacuum-deposited chromium films determined by grain size and impurity content 07 p1098 A66-17741

Vacuum deposition apparatus and techniques used for producing thin solid films in microelectron assemblies on nonactive substrates, emphasizing evaporation and cathodic sputtering 08 p1231 A66-18966

Heterojunction preparation by vacuum evaporation, describing epitaxial deposition of germanium on gallium arsenide substrate 08 p1270 A66-19058

Postdeposition vacuum heat treatments of cadmium sulfide films, examining effect on photocurrent and photocurrent to dark current ratio 08 p1273 A66-19258

Transistor fabrication method ensuring minimization of variation in properties of semiconducting film by vacuum

deposition 09 p1359 A66-20976

Thin-film triode devices to investigate hot-electron penetration of oxide films 10 p1509 A66-21540

Vacuum deposited amorphous boron films, presenting structure, optical measurements and electrical properties 10 p1580 A66-21726

Indium antimonide thin film preparation via vacuum deposition, noting evaporation rate effects on electrical properties of film 11 p1756 A66-23022

Hot-wire anemometer applications to turbulence measurements in conducting liquids and vacuum deposition of quartz film on coated hot-film probe 12 p1880 A66-23848

Low energy electron diffraction study of epitaxial deposition of copper on single crystal /110/ face of tungsten under ultrahigh vacuum 12 p1894 A66-23911

Low energy electron diffraction observation of calibrated epitaxial nickel film on /111/ copper 12 p1894 A66-23912

Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 12 p1930 A66-24458

Interaction between layers of ferromagnetic films of different composition and coercivity separated by insulating quartz layer, obtaining films by vacuum deposition 12 p1933 A66-25028

Metal film resistor preparation via vacuum evaporation, discussing structure of device, with emphasis on substrate materials, surfaces and properties 13 p2041 A66-25880

Argon arc and resistance diffusion /vacuum/ welding of Ti and Ti alloys and protective metallic coating deposition on welded parts 13 p2110 A66-26027

Magnetic properties of vacuum deposited iron nickel films 14 p2354 A66-26908

Static magnetic properties of zero-magnetostrictive permalloy films during vacuum deposition and substrate heating and cooling period 14 p2355 A66-26910

Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 14 p2358 A66-27087

Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27133

Electric characteristics of epitaxial Ge films vacuum deposited on seminsulating GaAs substrates with thicknesses near one million angstroms 15 p2566 A66-29386

Static properties of vacuum deposited thin permalloy films 16 p2773 A66-30687

Temperature dependence of domain structure of thin ferromagnetic films prepared by thermal evaporation in vacuum 16 p2774 A66-30696

Apparatus for analysis and preparation of magnetic properties of thin ferromagnetic films in vacuo, noting hysteresis loop, thermal evaporation, etc 16 p2861 A66-30697

Device for controlling thickness of thin films prepared by sputtering in vacuum 16 p2708 A66-31362

Physical properties of thin films of CdS and CdSe formed by vacuum deposition analyzed as function of deposition and processing conditions 16 p2782 A66-31422

Sputtering of aluminum thin films prepared by bell-jar vacuum systems /getter sputtering and standard diode/ for electronic application 16 p2783 A66-31423

Fabrication of interconnections for integrated circuits operating at microwave frequencies 16 p2665 A66-31433

Epitaxial growth of single crystal, impurity free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534

Temperature dependence of electrical resistance of thin nichrome films investigated by vacuum deposition on mica base 17 p2939 A66-31969

Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259

Plotting of first and second derivatives of tunnel junction V-I characteristics, noting application to thin films prepared by

vacuum evaporation 17 p2886 A66-32496
 Negative temperature coefficient of electrical resistance, anomalous Hall constant and magnetoresistance constant for thin films of Be and Pb 18 p3157 A66-34627
 Vacuum evaporation of metallic films on substrate 19 p3437 A66-35457
 Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 20 p3620 A66-37690
 International Union for Vacuum Science, Technique and Applications - International Congress, Stuttgart, June-July 1965 20 p3621 A66-38083
 Thin film research in Great Britain, discussing vacuum deposition techniques, electrical properties, nucleation and growth, stress, applications, etc 20 p3621 A66-38086
 Model estimate of oxygen concentration captured from residual gases by epitaxial germanium and silicon films prepared by vacuum deposition 21 p3795 A66-38521
 Miniature assembly for obtaining thin metal and semiconductor cell films by vacuum-evaporation techniques 21 p3737 A66-38919
 Resistance decrease in vacuum-evaporated gold films from 150 to 250 degrees C when environment is cycled from inert to oxidizing 21 p3802 A66-39161
 Epitaxial germanium films on gallium arsenide substrate by vacuum evaporation, considering surface preparation 22 p3963 A66-40106
 Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 22 p3967 A66-40843
VACUUM EFFECT
 Laboratory simulation of UV and vacuum effects on solar absorptance of spacecraft thermal control materials 02 p0213 A66-11227
 High vacuum purification and effect on mechanical properties of niobium single crystals 02 p0246 A66-12196
 Materials under high vacuum discussing degassing of metals, thin film deposition, food dehydration, vacuum melting and vacuum welding 04 p0534 A66-13373
 Plastic strain fatigue in air and vacuum, discussing strain-life relation for ductile materials and cold reweldment of fractures in vacuum [ASME PAPER 65-MET-5] 06 p0895 A66-16203
 Fourier analysis, used to determine particle size, strains and faulting, applied to silver films evaporated onto glass substrates at different residual gas pressures 09 p1383 A66-20255
 Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22995
 Vacuum effects on lubricants and bearing materials due to reduced ambient pressure and low concentration of oxidizing gases 12 p1885 A66-24383
 Structural metal adhesion in space environment as affected by time, pressure and temperature 13 p2108 A66-25646
 Time, pressure and temperature effects on adhesion of structural metals in vacuum and space environment 14 p2316 A66-28005
 Shear strength of idealized granular media in vacuum, in conditions simulating environmental pressure of lunar surface layer 14 p2288 A66-28180
 Ball bearing life operating in vacuum with molybdenum disulfide and oils as lubricant [ASLE PAPER 66AM 7A3] 16 p2712 A66-30416
 Vacuum thermionic work functions of polycrystalline Be, Ti, Cr, Fe, Ni, Cu, Pt and type 304 stainless steel 17 p2979 A66-32633
 Response characteristics of strain gauges as affected by ultrahigh-vacuum environments 20 p3558 A66-37442
 Behavior of postulated lunar surface materials due to environmental high vacuum, examining micrometeoroid impact and solar radiation effect 21 p3810 A66-38506
 Metal plasma jet injection into vacuum, determining mean time-dependent parameters of motion 21 p3791 A66-39083
 Vacuum pressure effect on separation distance for arcing of DC current between

spacecraft material 21 p3771 A66-39214
 Contact interaction of titanium nitride with Ti, Zr and V at high temperatures in vacuum 22 p3937 A66-40926
 Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41040
 Polymeric materials, metals and lubricant compatibility with vacuum environment, considering radiation damage and thermal control effects 24 p4226 A66-42096
 Rotating body in vacuum, examining motion dependency on body configuration and kinetic energy distribution, noting effect of change in energy on motion 24 p4281 A66-42337
VACUUM EQUIPMENT
 Hydrodynamic behavior of mercury in laminar and turbulent flow in tube, discussing effect of vacuum and protective gas 04 p0511 A66-14185
 Thin film microelectronics including passive and active circuit element, electric properties, vacuum apparatus and instruments 08 p1192 A66-18962
 Horizontal plate Mach-Zehnder interferometer for hypervelocity range vacuum use, high speed photography problems and electron density measurement 10 p1537 A66-21871
 Leak detection methods and equipment for testing propellant actuated cartridges, missile fuses and timers 11 p1708 A66-23257
 Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 12 p1922 A66-24218
 Vacuum equipment selection for thin film processing line, comparing diffusion and ion-pumped evaporation systems 13 p2040 A66-25843
 Ultrahigh-vacuum mercury-vapor unit design, noting performance characteristics 15 p2429 A66-29700
 Devices and operating principles for transmitting motion into vacuum 19 p3362 A66-35317
 Rapid repressurization of space simulation chamber reliably affected by use of commercially available muffler 19 p3340 A66-35844
 Spectral analyses of residual gases using mass spectrometer, noting vacuum equipment and effects of backing and cold-trapping 19 p3361 A66-36615
 Design and performance of vacuum-insulated pipe used to transfer cryogenic fluids in space program 20 p3541 A66-37069
 Vacuum optical bench /VOB/ spacecraft testing facility for calibration of telescopes, radiometers, spectrographs and monochromators and measurement of intensity distribution, radiation source and contamination 22 p3891 A66-40232
 Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 22 p3957 A66-40582
 Prebreakdown currents, conditioning rates and ultimate voltage capability of vacuum gaps and solid insulation, analyzing data on large-gap concentric cylinder configuration 23 p4042 A66-41041
 Measurement of partial pressures in ultrahighvacuum, using omegatron and quadrupole mass filter 23 p4071 A66-41872
VACUUM FURNACE
 High temperature vacuum furnace for noncontact measurements of electrical conductivity of semiconductor materials in liquid and solid states 01 p0071 A66-11047
 High temperature vacuum furnace for noncontact measurements of electrical conductivity of semiconductor materials in liquid and solid states 11 p1709 A66-23294
 Vacuum arc cast molybdenum ingots prepared using powder treated in palladium diffused hydrogen and transferred to furnace without air exposure, noting test results 19 p3386 A66-36282
 Vacuum furnace for studying high temperature fracture of ceramic materials, noting tests on polycrystalline aluminum oxide 24 p4192 A66-43220
VACUUM GAUGE
 Vacuum gauge calibration at lower pressures necessitates transfer to secondary

standard and extrapolation of this calibration to range of interest 01 p0067 A66-10491
 Parametric analogies used to obtain design characteristics of thermal and viscosity vacuum meters and hot-wire anemometers 07 p1031 A66-17412
 Electrode geometry, optimum configuration of hot-filament vacuum ionization gauges, and ion-collector burying technique 17 p2923 A66-31981
 Gauges and systems applicable to measurement of extremely high vacuums, considering ion gauges with modulators, suppressor gauges, extractor gauges and cold cathode type gauges 24 p4215 A66-43066
VACUUM MELTING
 Mechanical properties of commercial heats of air and vacuum melted steel, deriving data from impact and tensile tests, noting ways of increasing toughness 01 p0086 A66-10413
 Heat-and fatigue-resistant metal alloys for construction of jet aircraft combustion chambers, including 18 NiCoMo alloy suitable for temperatures up to 650 degrees C 05 p0704 A66-15806
 Relationships between purity, structure, and mechanical properties of 18/8 stainless steels prepared in laboratory by fusion and casting under vacuum 07 p1048 A66-17454
 Melting and casting techniques in purification and production of beryllium, discussing vacuum induction and ingots 08 p1230 A66-18841
 Effect of vacuum arc remelting of alrmelt electrodes on structure and elevated temperature properties of nickel base gas turbine superalloy [ASME PAPER 66-GT-113] 14 p2313 A66-27007
 Extremely high thermal shock resistance in group IVA carbides of carbide-graphite composites fabricated, using vacuum arc melting and casting techniques 15 p2524 A66-29287
 Plasma electron beam gun at rough vacuum pressures for welding ferrous and aluminum alloys 22 p3925 A66-40270
 Nonvacuum electron beam welding compared with vacuum process, noting effect of voltage, distance, speed, etc. in aerospace applications 22 p3925 A66-40271
VACUUM PUMP
 Residual gases in oil-diffusion-pump ultrahigh vacuum determined as function of various trapping conditions 04 p0528 A66-14464
 Superhigh vacuum obtained with oil vapor diffusion vacuum pumps, including oil vapor traps in pump design 11 p1710 A66-22804
 Two-stage radial-flow turbomolecular vacuum pump noting design, measured and predicted performance, application, etc 16 p2710 A66-30382
 New type of vacuum pump is multistage axial compressor known as /turbomolecular/ pump 16 p2715 A66-31308
 Pressure measurement for determination of speed of high vacuum pumps based on laws of molecular flow 17 p2929 A66-31976
 Cryosorption panels consisting of molecular sieve adsorbents bonded to refrigerated aluminum plates for pumping hydrogen at 20 degrees K 17 p2957 A66-31978
 Diffusion, getter-ion and cryogenic high vacuum pumping methods, showing relationship of pressure vs gas load, operating efficiency and cost as function of system size 17 p2930 A66-32945
 Space molecular sink design to create vacuum environment, emphasizing pumping and test chamber instrumentation 18 p3093 A66-33797
 Man-rating Douglas space simulator, 39-ft-diam sphere with pumping speed adequate for manned operation while maintaining simulated space vacuum 19 p3340 A66-35843
 Working process of axial-inflow turbomolecular pump for ultrahigh vacuum, noting pressures reached during tests 19 p3371 A66-36617
 High vacuum pumping system techniques to meet requirements for space simulation chambers 19 p3371 A66-36649
 Gas sorption and desorption processes at low pressures, discussing molecular adherence to cold solid surfaces, adsorption

- mechanism of isotherms, vacuum generation via cryotrapping effect, etc 20 p3605 A66-38088
- Small liquid propulsion systems testing in space environment simulator with high vacuum and low pumping capacity 22 p3890 A66-40226
- ### VACUUM SPECTROSCOPY
- Uranium-containing materials, refractory metals and alloys, discussing interface interaction, thermionic properties and parameters of vacuum electron emission stability 05 p0714 A66-15589
- Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 08 p1282 A66-19001
- High resolution vacuum spectrograph region between 1000 and 2000 angstroms 14 p2292 A66-27324
- Vacuum UV spectrum of neutral silicon, presenting wavelength measurements, relative intensities of Ge lines and Ritz standards 20 p3612 A66-36940
- Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 21 p3777 A66-38716
- ### VACUUM SYSTEM
- Book on vacuum science and engineering covering properties of gases at low pressure, vacuum measurements and vacuum pump and system design 04 p0545 A66-13934
- Microwave frequency feedthrough for vacuum systems suitable for use up to X-band, using Teflon-filled rigid type coaxial line 08 p1197 A66-19700
- Contaminants, outgassing and sublimation in vacua, noting cleaning procedures to reduce contamination and surface reactions 16 p2635 A66-30452
- Test program for thermal-vacuum testing of Centaur vehicle components 16 p2808 A66-30485
- Vacuum technique application to space research, discussing partial pressure measurements, space simulation procedures and rarefied gas flow 20 p3544 A66-38089
- Vacuum system of ion microprobe mass spectrometer noting design criteria, operation and results 24 p4215 A66-43162
- Backstreamed fluid analysis via gas chromatography, using polyphenyl ether as diffusion pump fluid 24 p4239 A66-43164
- Substrate temperature measurement and control showing desirability of large-area low temperature radiation source for glass substrate heating 24 p4218 A66-43165
- ### VACUUM TUBE
- Logarithmic region of planar triode with Maxwellian distribution of initial velocities of electrons 02 p0205 A66-11974
- Complex zeros of exponential polynomial in study of stability criteria for collisionless plane vacuum diode of infinitely heavy ions in interelectrode space 15 p2464 A66-29244
- High-performance small planar triode 17 p2887 A66-32701
- Current source for vacuum tube circuits delivering constant and fairly large current from cathode of pentode 18 p3079 A66-34246
- Woven and knitted electron emitters noting reliability, mechanical stability, transparency and efficiency 24 p4180 A66-42369
- Radiation response of low power nvlusters, noting cause of grid current and relation between grid structure and induced current 24 p4258 A66-42961
- ### VACUUM TUBE OSCILLATOR
- Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 09 p1357 A66-20775
- Stable oscillations in vacuum tube oscillators analyzed by approximate method 19 p3315 A66-35565
- Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834
- ### VACUUM ULTRAVIOLET
- Photoionization and absorption coefficients of carbon oxide measured below 1000 angstroms, using Seya-Namioka scanning vacuum UV monochromator with helium continuum as background 02 p0263 A66-11834
- Fluorescent screens provide suitable substrates for vapor-depositing metallic film for use as vacuum UV detectors 05 p0715 A66-14925
- Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423
- Equilibrium air total radiation mechanism, vacuum UV radiation and relation to hypervelocity entry studied, using shock tube blunt model test flow [AIAA PAPER 66-103] 09 p1469 A66-20087
- Photoelectric yield data on n- and p-type silicon carbide crystals in vacuum UV 10 p1578 A66-21578
- Satellite protective coatings using vacuum UV radiation absorbers for temperature control 11 p1720 A66-23125
- Magnesium fluoride overcoated aluminum mirrors, discussing thickness monitoring techniques by vacuum UV reflectance measurements 11 p1737 A66-23430
- Well shielded ceramic capillary spark source, thermocouple radiation detector and silicon p-n junction diode testing 14 p2293 A66-27329
- Thin films as possible transmitting and reflecting polarizers in vacuum UV region 14 p2361 A66-27331
- Vacuum UV instrumentation for optical studies of solids 14 p2293 A66-27333
- Energy level transitions in vacuum UV absorption spectrum of calcium vapor 14 p2337 A66-27704
- Impurity absorption of LiF crystals in vacuum UV 15 p2568 A66-29729
- Vacuum UV spectrum of neutral silicon, presenting wavelength measurements, relative intensities of Ge lines and Ritz standards 20 p3612 A66-36940
- Chemiluminescence in atomic-oxygen-acetylene and atomic-oxygen-carbon suboxide flames attributed to formation of CO in excited and electronic states 22 p3997 A66-39928
- Vacuum UV radiation measurement from high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182
- ### VALENCE
- X-ray L band absorption spectra of rare earth atoms in hexaborides, collecting evidence on valence state 01 p0126 A66-10980
- Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112
- ### VALERIC ACID
- Flight fatigue treatment by acetyl-aspartic acid and citrulline, noting improved reaction to acoustic and visual stimuli 17 p2859 A66-32232
- ### VALKYRIE AIRCRAFT
- S XB-70 AIRCRAFT
- ### VALSALVA MANEUVER
- Heart rate response to Valsalva maneuver performed regularly during space flight suggests application to development of astronaut orthostatic intolerance 19 p3286 A66-36376
- ### VALUE
- S BOUNDARY VALUE
- S EXTREMUM VALUE
- ### VALVE
- SA CONTROL VALVE
- SA FUEL VALVE
- SA GAS VALVE
- SA HYDRAULIC VALVE
- Rapid opening mechanical gate valve consisting of blade assembly, blade catcher and primer holder used in conjunction with hypervelocity free flight range experiments 24 p4162 A66-43219
- ### VAN ALLEN BELT
- SA INNER RADIATION BELT
- SA OUTER RADIATION BELT
- Extension of measurements in Van Allen belt concerning particle equator crossing at given pitch angle between magnetic mirrors, suggesting repulsing force from equator 01 p0132 A66-10495
- Particle precipitation measurements with Injun satellites, discussing space and time variations of electron precipitation, trapped Van Allen particles and auroral light emission latitude 03 p0363 A66-12648
- Aurora production via magnetic field induction during geomagnetic storms by ring current growth in Van Allen belt region 07 p1029 A66-18088
- Approximation error on interchange stability of Van Allen belt corrected 08 p1284 A66-19421
- Jupiter microwave emission, noting brightness distribution, Van Allen belt flux density and polarization 09 p1450 A66-20105
- Relation of Jupiter decimeter radiation intensity and polarization to distribution of synchrotron radiating electrons in Van Allen belt 09 p1450 A66-20107
- Van Allen radiation belt noting composition, charged particle motion in dipolar magnetic field, particle origins, etc 11 p1763 A66-22769
- Ionization enhancement from Van Allen electrons in South Atlantic magnetic anomaly, noting longitudinal variation of trapped electrons, electron-ion recombination, etc 13 p2176 A66-26362
- Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solar wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-27124
- Measurements of location of centroid of Jovian radio emission relative to nearby radio source 15 p2597 A66-29259
- Charged particle motion in Van Allen belts, examining effect of nondipole terms on mirror point distributions 15 p2489 A66-29314
- Charged particle effect in Van Allen zone on short circuit currents of photovoltaic cells on D-1A satellite 18 p3053 A66-33980
- Van Allen radiation belt particle motion in spherically confined magnetosphere 20 p3630 A66-37301
- Temporal variations of outer radiation zone electron intensities at 1000 km as affected by geomagnetic storms observed by Alouette I satellite 20 p3631 A66-37623
- Diffusion of protons in outer radiation belt due to violation of third adiabatic invariant for trapped particles 20 p3640 A66-38323
- Ionospheric ionization produced by precipitation of particles from Van Allen belts, examining influence of magnetic anomalies, longitudinal drift and local effects during magnetically quiet periods 20 p3641 A66-38325
- Pitch angle diffusion perturbing relativistic electrons in Van Allen zones and violating adiabatic invariants of electron motion, using Fokker-Planck equation 20 p3641 A66-38328
- Van Allen belt study using equatorially orbiting satellite, examining trapped particle origin and energies 23 p4123 A66-41038
- Dense particle population of Van Allen belts formed by interaction of high energy corpuscular radiation with interplanetary magnetic field and geomagnetic field 23 p4123 A66-41186
- Adiabatic theory and lowest order invariants applied to Van Allen radiation indicate that without collisions particles would remain in geomagnetic field 24 p4240 A66-43110
- ### VAN DE GRAAFF ACCELERATOR
- Metastable defect annealing in germanium by bombardment with short pulse of high-energy electrons from Van de Graaff generator 06 p0932 A66-17115
- Ionization charge stage for spectral lines determined by sending particle beam through field which separates components of different net charge 11 p1739 A66-22949
- Production of He I and He II spectral lines excited by helium ions from van de Graaff accelerator 20 p3604 A66-37628
- Collisional excitation in Van de Graaff accelerator of beams of light elements producing light emission in 2700-6600 angstrom range 21 p3776 A66-39396
- ### VAN DER WAALS FORCE
- Calculation of approximate expression for van der Waals energy with aid of variationally determined polarizabilities 08 p1178 A66-18937
- Macroscopic statistical mechanical derivation of stress tensor for classical fluid surface layer and surface tension of Van der Waals gas 14 p2273 A66-26827
- Lattice distortions and field gradients in alkali halide solutions, noting discrepancy in

- calculation of electric field gradients 16 p2775 A66-30731
- VANADIUM**
- Nuclear spin-lattice relaxation times of V 51 and Nb 93 and nuclear magnetic resonance line profiles V 51 in Type II superconductors 02 p0276 A66-12026
- Atomic heat of titanium, vanadium and chromium in high temperature range, discussing parameters and experimental techniques 05 p0698 A66-14511
- Effects of nitrogen and carbon on low temperature embrittlement of vanadium, noting transition temperature increases 05 p0702 A66-15468
- K beta 5 emission band and fundamental K-edge absorption of vanadium analyzed and results compared with vanadium spectra from other series 12 p1898 A66-25024
- Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355
- Vanadium addition effect on critical current and transition temperature of niobium-zirconium alloy 19 p3386 A66-36449
- Low temperature thermodynamic properties of vanadium, discussing specific heats and transition temperatures in superconducting and normal states 23 p4080 A66-41371
- Vanadium and molybdenum effect on properties and phase transformations of titanium chromide 23 p4082 A66-41824
- X-ray K-absorption spectra of titanium, vanadium and germanium in germanides 23 p4082 A66-41826
- Carbon solubility in Ta, Nb and V at temperatures from 1500 degrees C to eutectic temperatures 24 p4228 A66-43062
- VANADIUM ALLOY**
- Isothermal section and phase equilibria of Ti-V-C system 02 p0246 A66-12273
- Variation of interdiffusion coefficient with composition for niobium-vanadium alloys determined for various diffusion temperatures 05 p0702 A66-15467
- Solubility range of 75 atomic percent vanadium-gallium system to determine phases in equilibrium and ascertain presence or absence of superconductivity 07 p1052 A66-18352
- Transitions to superconductivity for niobium-tin, niobium-aluminum, vanadium-silicon and vanadium-gallium systems 09 p1422 A66-20065
- Upper critical field for Ti-V alloys estimated, using combined Goodman model and Clogston concept 09 p1430 A66-20852
- Chromium-vanadium alloys for brazing tungsten to molybdenum in engine application 13 p2087 A66-26020
- Estimation of creep in Ti-Al-V alloys by high temperature bending method 16 p2724 A66-31237
- Thermal neutron irradiation effect on superconducting properties of niobium aluminide and vanadium silicide doped with fissionable impurities 17 p2979 A66-32630
- Niobium addition effect on solid state transformations in vanadium-tantalum alloys 19 p3387 A66-36452
- VANADIUM CARBIDE**
- Melting point and microhardness of carbon-saturated TiC-VC solid solutions, noting temperature of eutectic of TiC-VC with graphite 22 p3934 A66-39866
- VANADIUM COMPOUND**
- Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 01 p0091 A66-10771
- Interaction of vanadium, niobium and tantalum diborides with carbon 07 p1049 A66-17904
- Positron annihilation of single oriented crystals of vanadium silicide, measuring angular correlation between gamma rays for calculation of Fermi surface 09 p1419 A66-20046
- Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 11 p1720 A66-22282
- Polarized-neutron scattering by tri-vanadium silicide, identifying electronic susceptibility and modification in passing through superconducting transition 16 p2770 A66-30174
- Interaction of vanadium, niobium and tantalum diborides with carbon 21 p3752 A66-39404
- VANADIUM OXIDE**
- Vanadium pentoxide-boron oxide-lead oxide system IR absorption spectra and electroconductivity 10 p1582 A66-21917
- Vanadium oxide single crystal growth by flame solution and fusion, noting burner construction, crystal structure and techniques 12 p1899 A66-23565
- Vanadium oxide bands in near-IR spectra of three Mira stars 13 p2182 A66-25578
- Yttrium vanadate crystals grown and processed for optical purposes 19 p3373 A66-35434
- VANE**
- SA GUIDE VANE
- SA WIND VANE
- Gas temperature effect on thermal condition of vanes during acceleration of gas turbine engine 08 p1281 A66-18866
- Turbine blade and vane cooling in Rolls-Royce nonmilitary aircraft engines, noting side effects on design and development [SAE PAPER 660053] 09 p1433 A66-20151
- Turbine vanes of aircraft engines and experimental plants, determining structural angle of outlet, maximum thickness and area of profile, setting angle, etc 09 p1328 A66-20761
- Pressure losses in vane elbows of circular cross section and possibility of gain in efficiency by splitting 24 p4195 A66-42582
- VANELESS DIFFUSER**
- Losses in vaneless diffusers of centrifugal compressors and pumps due to wall friction and sudden expansion mixing at entrance [ASME PAPER 65-FE-1] 10 p1540 A66-21504
- VAPOR**
- S CESIUM VAPOR
- S FILM BOILING
- S GAS
- S LIQUID-VAPOR EQUILIBRIUM
- S LIQUID-VAPOR INTERFACE
- S MERCURY VAPOR
- S METAL VAPOR
- S SODIUM VAPOR
- S WATER VAPOR
- VAPOR DEPOSITION**
- N-type conductive cadmium selenide single crystals investigated for heat treatment and Hall effects in selenium vapor 01 p0127 A66-11194
- Fluorescent screens provide suitable substrates for vapor-depositing metallic film for use as vacuum UV detectors 05 p0715 A66-14925
- Tungsten as thermionic emitter prepared by hydrogen reduction of tungsten fluoride, noting resistance to grain growth and properties 05 p0714 A66-15593
- Fabrication, structure and properties of pyrolytic materials, particularly pyrolytic graphite, noting thermal and mechanical properties, oxidation, vaporization, etc 07 p1055 A66-18503
- Vapor etching of gallium arsenide crystals with hydrogen chloride, noting usefulness in pretreatment for epitaxial substrates 10 p1575 A66-21358
- Hall generator constructed by vapor deposition of thin films of indium arsenide from 4 to 500 degrees K 12 p1838 A66-24407
- Residual gas influence on orientation of vapor deposited NaCl crystals 13 p2159 A66-25068
- Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185
- Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin film field effect transistor 13 p2164 A66-25487
- Morphology and structure of gallium arsenide crystals containing germanium core grown by iodine transport process in closed tube 13 p2170 A66-26587
- Surface blistering of metals due to low energy hydrogen ion bombardment, determining solar absorptance change in gold-plated specimens 14 p2316 A66-28007
- Hydrogen essential in deposition from methyltrichlorosilane of silicon carbide 16 p2729 A66-30247
- Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686
- Vapor deposited gold thin films to obtain adhesion and durability between film and substrate essential as lubricants in high vacuum 17 p2929 A66-31979
- Laminar film condensation of vapor flow along flat plate and cylindrical surface 18 p3261 A66-34362
- Chemical vapor deposition technique for materials for electron devices including preferred orientation, high purity material, special layer structures, etc 18 p3125 A66-34619
- Cryodeposits effects on spacecraft thermal control systems with respect to surface radiative properties and to shadow shield surfaces 19 p3468 A66-35955
- Joining of 0.020-inch tungsten sheet by chemical vapor deposition, examining parameters of deposit thickness, time and absolute temperature 19 p3369 A66-36126
- Chemical vapor deposition of thermoprotective coatings on refractory metal structures 19 p3370 A66-36141
- Chemical vapor deposited thermoprotective coatings for tungsten- and molybdenum-based refractory alloys, discussing diffusion barrier selection, interfacial microhardness, high temperature diffusion-annealing tests, etc 19 p3383 A66-36142
- Continuous silicon carbide filaments prepared using chemical vapor-deposition techniques, analyzing cross sections, x-ray diffraction and tensile strength 20 p3588 A66-37772
- Structure and properties of thin films in terms of deposition conditions, noting conditions for continuity, surface roughness, grain size, lattice defect density, crystalline orientation, purity, etc 20 p3621 A66-38087
- Gas sorption and desorption processes at low pressures, discussing molecular adherence to cold solid surfaces, adsorption mechanism of isotherms, vacuum generation via cryotrapping effect, etc 20 p3605 A66-38088
- Pyrolytic graphite production by thermal decomposition of hydrocarbon gas on heated surface, noting annealing, alloying and residual stresses [ASME PAPER 66-MD-54] 21 p3753 A66-38493
- Heteroepitaxial deposition of films of germanium in single-crystal form on sapphire by vapor growth techniques 21 p3802 A66-39163
- Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589
- Neutron irradiation-induced defects in vapor deposited niobium stannide and effects on current-carrying capacity 22 p3962 A66-40083
- Temperature coefficient of resistance in thin metal films, using Sondermayer analysis for vapor deposited Au, Ag and Cu films 22 p3963 A66-40105
- Fired circuitry application to ceramic substrates by thick film process and use of thin films on ceramic and glass substrates by vapor deposition 23 p4043 A66-41126
- Potassium tantalum niobate crystal growth noting methods applied, potassium oxide evaporation and tantalum absorption rate 23 p4115 A66-41773
- Inorganic thin film surface finish for boron filaments, noting improved adhesion to organic resins and high temperature oxidation resistance 23 p4082 A66-41895
- Cut-off frequency of high voltage GaAs varactors, comparing theoretical and experimental values 24 p4183 A66-42632
- VAPOR GENERATOR**
- Perfect thermodynamic vapor, deriving analytic relation for efficiency of two Rankine cycles 13 p2001 A66-26254
- VAPOR JET**
- Vapor jet pressure and velocity in heavy-current arc between two graphite electrodes, comparing results from universal 09 p1368 A66-20826
- Ionospheric wind patterns studied by

distortion of chemiluminous vapor trails from rockets 14 p2280 A66-26838

Ionospheric winds characteristics from observation of motions and growth of sunlit trails of alkali vapor compared to rocket probing of electron concentration 14 p2280 A66-26839

VAPOR PHASE

Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 05 p0784 A66-14748

Minimum heat transfer levels and vapor formation in boiling liquid metals 06 p0972 A66-16843

Economic process for vapor phase formation of refractory fibers and whiskers using hydrogen, carbon dioxide, carbon monoxide and chlorine source gases [AICE PREPRINT 18A] 10 p1548 A66-21183

Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 11 p1784 A66-22182

Vapor phase process to form aluminum oxide whiskers on nuclei suspended in reacting gas stream 12 p1896 A66-24468

Chromium doped ruby whiskers grown by vapor phase reaction, determining chromium concentrations, noting whisker growth morphologies 15 p2561 A66-28706

Design and laboratory tests of vapor-phase heat exchanger coupled to power generating bismuth telluride thermopile for waste heat dissipation 16 p2637 A66-31101

VAPOR PRESSURE

Static moisture removal system developed for space power application from tests determining vapor-pressure characteristics of capillary fuel cell 01 p0012 A66-10912

Vapor pressure and heat of sublimation of tungsten determined by Langmuir method 04 p0536 A66-13831

Supersonic aircraft artificial atmosphere, discussing linear relationship between imperceptible perspiration and ambient water vapor pressure 06 p0815 A66-16048

Acoustic impedance of liquid He 3 under vapor pressure 09 p1391 A66-20012

Titanium vapor pressure determined from evaporation rate of titanium from titanium-niobium wire electrically heated in vacuum 09 p1391 A66-20865

Stable aerosol formation from vapor pressure of hot lava of volcanic eruptions, causing evaporation and condensation from gas phase 10 p1607 A66-21288

Static capsule measurement of sodium vapor pressure from 0.5 to 120 atm 11 p1786 A66-22668

Load capacity of condensing vapor-lubricated long self-acting journal bearing, examining two-phase and single-phase regions [ASME PAPER 65-LUBS-5] 12 p1888 A66-24554

Aerodynamic analysis of vapor pressure of tektite glass and bearing on atmosphere entry trajectories of tektites 12 p1952 A66-24895

Vapor-cycle air conditioning for business aircraft, considering weight vs power consumption, compatibility with integrated system and test results [SAE PAPER 660208] 13 p2002 A66-26386

Vapor composition, evaporation rate and vapor pressure above chromium carbides determined by effusion method combined with mass spectrometry 14 p2310 A66-26791

Vapor pressures of solid samarium and liquid gadolinium at high temperatures using Knudsen effusion method, noting sublimation heats for samarium 14 p2314 A66-27462

Sublimation of rhenium and Langmuir method vapor pressure measurements using vacuum microbalance 17 p2938 A66-31882

Thermodynamic analysis of Hg-Cd and Hg-Bi alloys, noting enthalpies and entropies of mixing, boiling point and phase diagrams, vapor pressure measurements, etc 17 p3037 A66-33289

Carbon dioxide supersaturation and condensation in supersonic nozzles in terms of stagnation pressures, temperatures, and expansion rates 17 p3039 A66-33476

Chemical activities of cadmium and magnesium in binary Mg-Cd alloys based on

vapor pressure measurement by Knudsen effusion method 18 p3121 A66-33729

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

VAPOR PRESSURE APPARATUS

Thermodynamic analysis of MHD generator with vapor liquid injector 03 p0323 A66-12831

Thermodynamic analysis of MHD generator with vapor liquid injector 19 p3282 A66-36773

VAPOR TRAP

Superhigh vacuum obtained with oil vapor diffusion vacuum pumps, including oil vapor traps in pump design 11 p1710 A66-22804

VAPORIZATION

SA ABLATION

SA BOILING

Flow stability in multitube forced convection vaporizers, using Freon 113 in closed test loop with five-tube boiler [ASME PAPER 65-HT-61] 05 p0786 A66-14762

Electron work function analysis using cesium compounds vapor combinations in thermionic energy converter, noting role of vapor pressure 05 p0619 A66-15562

Thermionic power systems using mixed vapor, noting conversion efficiency, sensitivity of emitter temperature to input power and dynamic response to power input variation 05 p0619 A66-15563

Properties of chromium particles obtained by vaporization of metal in argon at low pressure, noting cubic shape, electron diffraction pattern, etc 06 p0894 A66-16185

Cavitation induced between rotating and stationary cylinder in vaporizing liquid within gap of simulated electric motor configuration 07 p1039 A66-18176

Regularities in solid substance vaporization from probe surface in plasma arc allowing quantitative control without change in atomic excitation characteristics 08 p1266 A66-19770

Two propellant injector designs for plasma accelerators that minimize or avoid bearing seal difficulty, using piezoelectric element and pulsed vaporization of filament of liquid conductor [AIAA PAPER 66-241] 12 p1936 A66-24519

Langmuir and Knudsen techniques used to determine sublimation and vaporization rates of strontium chloride 13 p2017 A66-25794

Adiabatic exponents in equations for gas cooling by vaporization 21 p3835 A66-38905

VAPORIZATION HEAT

Forced convection vaporization of Freon 113 flowing in horizontal Pyrex tube examined, using motion pictures 01 p0165 A66-10910

Interaction of light pulse from ruby laser with mercury surface, observing mechanical impact believed to be rapid vaporization process 04 p0533 A66-14373

Heat pipe characteristics covering performance analysis and experimental results such as heat transfer rate, life tests, working liquid selection, etc 05 p0616 A66-15544

Superconductivity of tin diffused niobium wires, comparing obtained transition temperature changes with De Sorbo data 08 p1267 A66-18633

Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 08 p1247 A66-19306

Sublimation rate of iron fluoride and identification of vapor species by Knudsen technique, using mass spectrometer 11 p1651 A66-23413

Vaporization cooling of inner wall surface of externally heated cylinder by vortex flow 16 p2829 A66-31162

Vaporization of liquid fuel injected in heated horizontal circular pipe for straight and swirl air flow, noting increased rate of vaporization in swirl airflow for increased heat supply 18 p3265 A66-34490

Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 19 p3393 A66-36042

Vaporization and atomization theoretically calculated to be controlling parts of combustion process in determining rocket combustion instability [AICE PREPRINT 28D] 22 p3971 A66-39879

VARACTOR

Varactors for frequency multiplication 05 p0649 A66-15363

Varactor evaluation using series resonance and determination of impedance locus of coaxially mounted varactors 07 p1008 A66-17513

Circuits for variable impedance control at centimeter-wave frequencies, using varactor semiconductors and dephasing ferrites in waveguide 07 p1002 A66-17828

High cut-off frequency epitaxial gallium arsenide varactors generating continuous wave power when biased in avalanche region, showing dimensions, resistivities, etc 10 p1516 A66-22103

Effect of amplitude noise or spurious signals in varactor frequency multiplier 11 p1661 A66-22383

Broadband X to K band varactor frequency doubler, noting efficiency increase by replacing variable resistance element with varactor 12 p1832 A66-23908

Figure of merit for reflection type varactor phase shifter 13 p2037 A66-25545

Silicon diffused p-n junctions with boron acceptor for varactor diodes 13 p2040 A66-25816

Series resistance of silicon microwave varactors 14 p2254 A66-27731

Developments in varactor technology, noting large-area step-recovery varactor with nearly twice power-handling capacity of step junction devices 15 p2457 A66-28654

Minimum noise temperature of parametric amplifier depends on varactor junction capacitance, spreading resistance and temperature 15 p2465 A66-29673

Results derived from dissipative four-terminal networks applied to varactor converter, leading to capacitance variations determination as function of polarizing potential 16 p2662 A66-30961

Behavior of incremental and fundamental capacitances appearing in varactor analyzed as function of voltage 16 p2662 A66-30962

Varactor and p-n diode switch and limiter design, detailing basic concepts of switching and limiting 17 p2891 A66-32911

Negative resistance devices using multiple number of tunnel diodes or varactors, examining stability and sideband frequency 22 p3875 A66-40064

High power microwave frequency multiplier matching very low varactor impedances 22 p3879 A66-40723

VARACTOR DIODE

SA PARAMETRIC DIODE

Series resistance of epitaxial silicon diodes as function of bias, using transmission loss method 01 p0036 A66-10396

Stable local oscillator signals from varactor diode sideband generator, calculating output voltage 01 p0044 A66-10931

Increased efficiency and power-handling capability of high order idlerless frequency multipliers by using hyperabrupt varactors 02 p0195 A66-11363

Microwave power generation from avalanching diffused and epitaxial silicon and gallium arsenide varactor diodes 06 p0851 A66-16462

Measurement results on frequency doublers in millimeter wave region, using unencapsulated silicon varactor diodes and gallium arsenide/phosphor bronze point-contact varactor 08 p1198 A66-19745

Balanced parametric amplifier with varactor diodes simultaneously self-resonant at both 16 and 35 gc 10 p1510 A66-21662

High-efficiency microwave frequency doublers using varactor diode design by technique based on Manley and Rowe energy relations 10 p1512 A66-21763

Frequency multiplication circuits, examining effects of short-term stability on oscillator system 10 p1514 A66-22044

Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 11 p1667 A66-22742

Relative impedance and transmission techniques for measuring small-signal parameters of varactor diodes at UHF and X-band 12 p1831 A66-23787

Additive phase noise measurement in step-recovery-diode in frequency multiplier

compared to ideal
multiplier 12 p1835 A66-24141
Polarized varactor diodes used in avalanche
zone as intense white noise
source 13 p2031 A66-25408
Microwave varactor diode efficiency as
waveguide frequency modulator and
multiplier 13 p2039 A66-25641
Varactor diode as frequency multiplication
element, discussing design parameters and
noise characteristics 13 p2039 A66-25699
Variable efficiency harmonic with shunted
varactor diode for microwave power level
control 14 p2247 A66-27042
Circuits incorporating varactor diodes,
pumped at IF, as mixers, analyzing circuit
characteristics 14 p2236 A66-27352
Modified series model for abrupt-junction
varactor diode used as harmonic frequency
doubler 14 p2257 A66-27952
Solid state communications devices,
discussing HF small signal amplifiers,
transistor circuits, varactor diodes for
frequency multiplier chains,
etc 14 p2261 A66-28368
Bandwidth of nonoverdriven abrupt-
junction varactor-frequency doubler,
deriving upper bounds for minimum
constant T for lossless
case 15 p2465 A66-29323
Power dissipation in input and output
matching networks of varactor doubler for
calculating true input and output powers
from semiconductor bulk material, noting
charge storage
occurrence 15 p2466 A66-29674
Gallium arsenide varactor diode design for
parametric amplifiers and multipliers, noting
efficient harmonic generation at higher
microwave frequency 15 p2466 A66-29677
Frequency dependence of parameters of
surface varactor with metal titanium
dioxide/silicon structure 15 p2468 A66-29922
Pump modulation factor of various GaAs
and Si varactor diodes under operating
conditions, noting experimental bandwidth
gain via increased shot
noise 16 p2663 A66-31017
Varactor frequency doubler response to
amplitude and phase modulated
signals 17 p2878 A66-31811
Tunnel diode application to tunable
microwave oscillators, noting coupling to
high Q factor resonator for frequency
stability 17 p2885 A66-32287
Low temperature silicon variable
capacitance diodes for use in low noise S-
band parametric amplifier 17 p2890 A66-32903
Multiport linear networks in which pumped
variable capacitances shunt and interconnect
several ports, exemplifying with varactor
parametric amplifier, impedance
transformer, coupler, etc 17 p2890 A66-32907
Varactor diode parametric amplifiers
compared for various applications in
satellite communication ground stations
including FM reception, tracking and radio
noise reception 17 p2890 A66-32908
Bridge, transmission and microwave coaxial
line measurement methods for evaluating
high cut-off frequency varactor diode
equivalent circuit 17 p2892 A66-32915
Varactor diode harmonic generators for S-
band with VHF input and microwave
output 17 p2892 A66-32916
Signal analysis of abrupt and graded
junction varactor harmonic generators with
loaders, showing how load and source
resistances may be
optimized 17 p2893 A66-32922
Signal to noise ratio in frequency
multipliers with varactor diodes, noting
relaxation oscillation type instability and
techniques for minimizing noise effect on
signal 17 p2894 A66-32988
Bridge, transmission and microwave coaxial
line measurement methods for evaluating
high cut-off frequency varactor diode
equivalent circuit 18 p3074 A66-33563
Measurement of varactor diode
characteristics for subsequent application in
microwave low-noise parametric
amplifiers 19 p3313 A66-35471
Varactor characteristics, applications,
equivalent circuits, measurement problems,
etc 19 p3319 A66-36165
Nonlinear differentiating circuits using
varactor diode for pulse

shaping 20 p3527 A66-37446
Electrical properties, design and
construction of microwave varactor diodes
with diffused p-n
junctions 20 p3529 A66-37589
Signal analysis of abrupt and graded
junction varactor harmonic generators with
loaders, showing how load and source
resistances may be
optimized 20 p3531 A66-37831
J-band multiplier design noting extension
of frequency coverage, components, noise
performance, frequency stability, tuning
range, etc 21 p3711 A66-38837
Varactor-diode frequency converter
properties and operation at
L-band 21 p3713 A66-39379
Performance characteristics of avalanche-
breakdown transit-time GaAs varactor diodes
for miniaturized microwave
circuits 22 p3874 A66-39991
Second-order subharmonic oscillations in
circuit containing varactor diode and
consisting of series-connected R and L and
closed abrupt p-n
junction 23 p4045 A66-41480
Cut-off frequency of high voltage GaAs
varactors, comparing theoretical and
experimental values 24 p4183 A66-42632
Power level of varactor diodes, noting
problems of standing wave ratio
measurement and application of reciprocity
and mixing principle 24 p4185 A66-42893
VARACTOR DIODE CIRCUIT
Spurious signals in wideband S-to X-band
varactor tripler suggesting they were caused
by pumped-up LF resonances in input
circuit 03 p0339 A66-12451
Varactor-tuned circuit design, noting
curves for graded junctions, power in tuned
circuit, etc 04 p0491 A66-13384
Varactor circuits as source of solid state
microwave power discussing basic theory,
varactor-multiplier chains and
upconverters 04 p0503 A66-13728
Cross modulation in varactor-tuned
limiters 08 p1191 A66-18944
Strip transmission line for microwave
circuit design such as varactor multiplier
frequency sources, filters, multiple pole
diode switches, etc 09 p1356 A66-20672
Transient behavior of varactor bridge
doubler examined, using direct digital
integration of circuit
equations 10 p1513 A66-21859
High-ratio multipliers and tunnel diode
generators as solid state microwave sources
considered in analysis of varactor
circuits 11 p1670 A66-23196
Output signal of harmonic generator with
noise sources in circuit, using perturbation
analysis and assuming noise effect on signal
in transducer is
band-limited 12 p1835 A66-24137
Wideband solid state intermediate
frequency repeater for communications
satellites, using waveguide-cavity diode
down converter transistor amplifier and
varactor up converter
[AIAA PAPER 66-300] 12 p1823 A66-24767
Multiplier with varactor diode circuit
examined, noting maximum obtainable
conversion output power and
efficiency 13 p2041 A66-25879
Exact circuit analysis of abrupt-junction
varactor diode frequency
doubler 14 p2268 A66-27957
Dimensioning varactor diode frequency
multipliers used in HF
transmitters 14 p2259 A66-28113
Series connection of varactor wafers for
higher breakdown voltages without loss of
cut-off frequency, noting power
output 17 p2887 A66-32698
Wide tuning range solid state microwave
source consisting of transistor oscillator and
varactor diode harmonic
generator 17 p2893 A66-32926
Iterative solution of large signal abrupt
junction varactor doubler as input frequency
is varied, given power of source and load
impedance 17 p2895 A66-33276
Varactor frequency multipliers, discussing
application in low-power ultra-short-wave
devices in moving objects for
communication purposes 21 p3709 A66-38623
VARIABLE
S COMPLEX VARIABLE

S DEPENDENT VARIABLE
S INDEPENDENT VARIABLE
S RANDOM VARIABLE
VARIABLE AREA WING
Flight test report of F-111 aircraft,
considering variable wing sweep, stability
augmentation in automatic gains, high
performance with slow speed takeoff and
landing 07 p0986 A66-17273
Deformable wing and control surfaces in
nonsteady state subsonic regime, noting two
methods for determining certain
parameters 14 p2221 A66-28109
Flutter of variable geometry aircraft
models as affected by airfoil sweep, pivot
and wing-empennage coupling
[ICAS PAPER 66-12] 22 p3996 A66-40674
VARIABLE GEOMETRY STRUCTURE
Time lapse in variable-structure automatic
control systems 03 p0350 A66-13045
Variable geometry aircraft structural
problems including fail-safe criteria, flutter
configurations, dynamic loads, etc
[AIAA PAPER 65-774] 03 p0438 A66-13064
Structural problems associated with
variable-sweep winged
aircraft 13 p2199 A66-26329
Variable geometry structural design
problem for aircraft wings and tail
surfaces 17 p2846 A66-32888
Time lapse in variable-structure automatic
control systems 18 p3092 A66-35008
Accuracy analysis of variable-direction
diagrams for numerical solutions to heat
conductivity equations 19 p3478 A66-35937
Variable geometry jet engine control using
advanced hydromechanical, microelectronic
and fluidic techniques 19 p3450 A66-36364
Multiloop control interaction using
linearized technique, noting variable
geometry intake loop 20 p3627 A66-36881
Optimal control of variable structure
system in presence of perturbation,
discussing quality control and preservation
of sliding plane 21 p3719 A66-39285
Aerodynamic analysis of complex shapes in
hypersonic flow, using digital computer
[ICAS PAPER 66-25] 22 p3847 A66-40665
British-French cooperation in aeronautics,
discussing Concorde SST, variable geometry
aircraft, Olympus 593 turbojet,
etc 23 p4016 A66-42069
VARIABLE MASS SYSTEM
Low thrust spiral trajectory of satellite of
variable mass 02 p0288 A66-11551
Uniqueness of optimum approximation
sums of single variable functions for
multivariable functions in Lebesgue
space 04 p0538 A66-13485
Meshcherskii equation used to derive
equations of motion and basic theorems of
dynamics of system of points of variable
mass 04 p0545 A66-14151
Motion equations and Hamilton-
Ostrogradskii principle in mechanics of
variable mass system dependent on time,
coordinates and velocity 08 p1256 A66-19706
Equations for variation of orbital elements
in two-body problem with variable mass
solved analytically for various laws of mass
loss, noting periodic function of eccentric
anomaly 10 p1605 A66-21205
Kinetic moment variation theorem for
deformable system of material points of
variable composition 11 p1735 A66-22239
Pontryagin maximum principle applied to
Mayer variation problem in dynamics of
point of variable mass
/rocket/ 11 p1732 A66-22353
Variable mass plasma blob acceleration due
to eroding electrodes, taking into account
motion resistance of unperturbed
gas 11 p1745 A66-22850
Plane optimum transfer of point of
variable mass between two elliptical orbits
in centrally directed Newtonian force
field 11 p1774 A66-23036
Motion equations and moment of
momentum of variable mass
system 14 p2381 A66-27453
Lapunov method and dynamic
programming of stability of motion of
variable mass point in Oxyz coordinate
reference system, allowing for Earth
rotation effects 15 p2538 A66-29046
Motion equation of variable mass point
solved, using coordinate
transformation 15 p2538 A66-29048

- Differential equation of motion of two variable-mass points in central force field 15 p2538 A66-29049
Necessary and sufficient conditions of kinetic processes involving two systems of point masses 20 p3598 A66-36910
Motion of variable mass body in resisting medium 20 p3602 A66-37676

VARIABLE STAR

- Nonlinear calculations of intermediate amplitude to analyze stability of pulsating stars of varying composition, mass, luminosity, etc, using numerical integration of motion equations 14 p2385 A66-28116
Position of variable stars in Hertzsprung-Russell diagram - International Astronomical Union Colloquium, Bamberg, West Germany, August 1965 20 p3652 A66-37609
Pulsation in cepheid instability strip in H-R diagram, giving equations for spherically symmetric motion 21 p3816 A66-39489

VARIABLE SWEEP

- Variable sweepback wing determination of pivot position influence on aerodynamic characteristics while wing is turning, deducing lift and thrust center laws [ONERA TP 272] 02 p0175 A66-11680
Variable-sweep aircraft design, with application to trainer, strike fighter and supersonic transport 04 p0458 A66-13928
Aerodynamics, performance and operational considerations effect on Boeing design of variable sweep supersonic transport aircraft [SAE PAPER 858C] 04 p0458 A66-13929
General Dynamics/Grumman multimission variable-sweep fighter for Navy and Air Force 04 p0458 A66-13930
Variable sweep wing effect on supersonic transport stability and control characteristics [AIAA PAPER 64-603] 05 p0610 A66-15068
Variable sweepback wing noting design problems, adaptability, controllability and comfort 10 p1482 A66-21370
F-111 swing-wing /variable-sweep/ aircraft program 11 p1637 A66-23101
Hypersonic or supersonic flow of gas past yawing delta wing with stall fence 12 p1799 A66-24443
Structural problems associated with variable-sweep winged aircraft 13 p2199 A66-26329

VARIABLE THRUST

- Streak test excellent acceptance technique for assurance of reproducibility of service life for ablative thrust chamber of Mira 150A variable thrust rocket engine [AIAA PAPER 65-608] 19 p3449 A66-35607
HR-4 research engine development and hybrid engine in terms of construction and variable thrust, noting polymerized amino acid compound fuel 23 p4121 A66-41170

VARIANCE

SA COVARIANCE

SA REGRESSION ANALYSIS

- Statistical determination of error variance and application to variance analysis of electrical or mechanical components 01 p0095 A66-10872
Circuit design and sensitivity comparison method, based on mean square error and simple linear approximation of variance 17 p2899 A66-32052
Computer simulation experiments design for industrial systems, considering variance techniques, multiple ranking procedures, sequential sampling and spectral analysis 22 p3870 A66-40132

VARIATION

- S ANNUAL VARIATION
S DIURNAL VARIATION
S MAGNETIC VARIATION
S SEASONAL VARIATION
S TWENTY-SEVEN DAY VARIATION
S VOLTAGE VARIATION INDICATOR
S WIND VARIATION

VARIATION METHOD

- Local variations method for numerical solution of variational problems 01 p0050 A66-10171
Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 04 p0496 A66-13905
Distributed parameter oscillatory system, deriving optimum control formulas via variational method 06 p0862 A66-16523

- Variational method for dispersion curve of electromagnetic slow wave propagation in nonuniform plasma 06 p0836 A66-16988
Variational principle generalization for elimination of simplifying assumptions in convective heat transfer model in forced incompressible flows 07 p1155 A66-18127
Variational analysis of stability of infinitely long cylindrical panel under constant evenly distributed lateral loading 08 p1308 A66-18890
Source function of inhomogeneous optically dense plasma layer determined, using Ritz method 08 p1265 A66-19309
Real-time command and control of Gemini and other entry vehicles by variational techniques 08 p1254 A66-19544
Approximate solution for elasticity problems, noting mathematical determination of stress distribution in any homogeneous isotropic body 09 p1468 A66-20642
Variational method of computing radar scattering cross sections to bistatic scattering cross section for chaff dipoles 10 p1503 A66-21643
Lifting body with controllable radial force, examining acceleration and deceleration, equation of motion, target hitting accuracy improvement via force variation, etc 11 p1733 A66-23338
Mechanical flow processes and variational methods based on fluctuation theory, noting relations on minimum entropy production, two-dimensional laminar flow of incompressible fluid, etc 12 p1975 A66-23543
Variational method for determining frequencies and modes of oscillation of pinned variable incidence blade 12 p1965 A66-24052
Principle of stationary complementary energy applied to buckling of column, noting Rayleigh-Ritz method 12 p1969 A66-24362
Constrained variation method in molecular quantum mechanics, presenting wave function, degree of constraint and energy loss values for lithium hydride molecule 13 p2130 A66-25372
Boundary value problems for minimal surface equation 14 p2320 A66-26943
Variational problem solved, giving lower stability bounds for finite disturbances of viscous incompressible flow 15 p2478 A66-29245
Distributed parameter oscillatory system, deriving optimum control formulas via variational method 16 p2670 A66-30833
Boundary value problem of temperature stresses of rectangular orthotropic plates solved, using separation of variables method 16 p2818 A66-31067
Stochastic analysis of systems described by linear differential equations subject to random disturbances, noting application to variational behavior of optimal control systems 17 p2900 A66-32076
Variational method calculation of refraction angle in inhomogeneous laminar medium, using approximate integration of series of exponential functional of electron concentration 17 p2873 A66-32241
Stationary heat conduction problems with internal heat sources treated by Kontorovich variational method 17 p3034 A66-32565
Variation equation for steady state creep applied to semimomentless cylindrical shell 17 p3030 A66-32935
Approximate solution of boundary layer problems by variational techniques, using multiparameter approach 18 p3096 A66-33594
Surveyor midcourse guidance treated by minima and maxima theory, noting terminal phase 19 p3397 A66-35600
Optimum form for hypersonic profile with minimum drag for given bending strength solved by variational method 20 p3491 A66-36922
Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 20 p3532 A66-37863
Optimum parameters for low-thrust propulsion system with energy storage for specific maneuver 21 p3808 A66-38974
Variational theorems for creep of shallow cylindrical shells, noting buckling and snap-through of square cylindrical panel compressed along

- generatrix 21 p3829 A66-38977
HF long wavelength conductivities of solid state plasmas in thermal equilibrium derived, using variational formalism 21 p3791 A66-39106
Perturbation theory of constraints applied to variational calculation on ground state of lithium hydride molecule, using 28-term wave function 22 p3947 A66-39925
Stressed state near round opening in orthotropic cylindrical shell solved for various loading and boundary conditions by Bubnov-Galerkin variational method 22 p3990 A66-40145
- VARIATIONAL CALCULUS
Huygens principle in geometrical optics to solve certain time problems in calculus of variations, particularly airplane minimum time [SAE PAPER 650784] 01 p0105 A66-10841
Successive approximations for variational problems in control theory including pulse amplitude and pulse width modulation, using quasi-linearization techniques 03 p0349 A66-12685
Necessary and sufficient criteria for absolute minimum of multidimensional integrals, depending on arbitrary number of real functions of real variables and partial derivatives of arbitrary maximum order 03 p0387 A66-12686
Time optimization problem involving dynamic programming, boundary value problem, differential equations and optimal control 03 p0349 A66-12687
Global maximum for particle idealization of rocket propelled vehicle moving in calculus of variations, noting Lagrange equation 04 p0538 A66-13462
Optimum motion in central force field, discussing orbital transfer for circular orbits when energy source is controllable 04 p0576 A66-13560
Variational and optimal control theory discussing extension of McShane and Pontryagin methods to general problem of Bolza 04 p0505 A66-13988
Differential games, theorem and analysis, discussing controlled object pursuits and computation of minimal time of termination 04 p0539 A66-13989
Extremal problems in aerodynamics, discussing mathematical and physical models for optimum aerodynamic shape 04 p0455 A66-13995
Design of optimal servocontrol system with feedback, using variational calculus method 05 p0657 A66-15099
Steepest ascent method for trajectory optimization 06 p0952 A66-15916
Discrete maximum principle as restatement of constrained static variational problem 06 p0861 A66-16359
Variational calculus problem of bounded space coordinates as Hestenes problem 06 p0863 A66-16617
Optimal control, discussing fundamental general necessary conditions for Mayer problem solution 06 p0864 A66-16623
Direct method of calculus of variations for finding minimum point for scalar function on functional space 06 p0904 A66-17009
Removable singularities in multidimensional minimal hypersurfaces in compact space 07 p1057 A66-17837
Iteration technique used to study minimum climb time of rockets 07 p1141 A66-18232
Calculus of variations method used to maximize payload capability for multistage launch vehicles [AIAA PAPER 66-92] 08 p1304 A66-18998
Limiting rate of decrease of harmonic function in three variables 08 p1246 A66-19711
Dynamic programming approach to nonparametric problem in calculus of variations 09 p1394 A66-20131
Interpolation function of real variable, investigating process constructed for given system of points 09 p1394 A66-20456
Variation in number of particles in interconnected components and lifetime estimation for given system 09 p1394 A66-20496
Extinction probability of system at time t as function of probabilistic parameters of system 09 p1394 A66-20497
Optimal trajectory and guidance role of

conjugate points in determining maximum duration of optimal control for linear and nonlinear processes 10 p1516 A66-21076

Digital computer solutions to rigorous linear equations system for current density by enforcing boundary conditions at discrete points in scattering body 10 p1497 A66-21589

Variational calculus in one independent variable for optimum aerodynamic shapes and extension to two independent variables 11 p1721 A66-22502

Successive approximation methods of solving optimal control problems, based on variational calculus and Euler-Lagrange equation 11 p1679 A66-23273

Asymptotic conditions of extremum as function of small parameter in calculus of variation 11 p1723 A66-23327

Variational problem of Hestenes with necessary conditions for piecewise continuous control variables obtained under weakened hypotheses 11 p1681 A66-23453

Approximate solution for differential equations and restrictive conditions with unbounded controls 11 p1681 A66-23454

Existence theorems for optimal control solutions of Pontryagin and Lagrange problems 11 p1725 A66-23458

Monograph on continuous maximum principle covering design and control of industrial and process engineering systems, dynamic programming, process optimization, etc 12 p1901 A66-23534

Variational calculus methods for convective heat transfer to nonhomogeneous fluids and fluids with thermal expansion 12 p1979 A66-24817

Dual quadratic programming of dynamic response of frictionless mechanical system with one-sided constraints 13 p2117 A66-25347

Reducing optimal control variational problems to limit problem associated with Hamilton-Jacobi equation 13 p2047 A66-25423

Averaging method for differential equations with retarded arguments 13 p2118 A66-25827

Signal to noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-25940

Controllability of general class of nonlinear systems describable by nth order ODE with bounded state and control 13 p2052 A66-26079

Variational problem of Lagrange with inequality, analyzing splitting of extremals, dead-end, entry and exit from boundary, etc 13 p2120 A66-26139

Variational calculus formulation of classical electromagnetic field theory 14 p2330 A66-27022

Variational problem of designing maximum draft nozzle supersonic section for three-dimensional supersonic flow 14 p2221 A66-28057

Nonlinear and constrained variational problems in search theory and boundary value problem construction by maximum principle 14 p2324 A66-28190

Approximate synthesis of second-order optimum system with controlled coefficients 14 p2269 A66-28479

Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520

Optimal control process for brachistochrone motion, discussing solution and inversion of synthesis problem 15 p2470 A66-29150

State variable determination for linear time invariant plants with known parameters, noting noise suppressing characteristics of technique 15 p2471 A66-29329

Variational problem of transition of aircraft with inertial system without stabilizers solved by reduction to Lagrange problem 15 p2534 A66-29336

Variational problem in Banach space including optimal control problems, deriving conditions for extremality and Pontryagin maximum principle 15 p2473 A66-29378

Uniqueness, existence and stability of solutions to polyvibrant systems with delayed remainder and

arguments 15 p2528 A66-29652

Dependent random variables containing independent variables, m-dependent variables, stationary and nonhomogeneous Markov processes, etc 15 p2529 A66-29849

Gurtin variational principles characterizing linear elastodynamics initial value problems extended to dynamic viscoelasticity theory 16 p2813 A66-30262

Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30611

Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 16 p2734 A66-30782

Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137

Duality theory of optimal control and resulting duality correspondence between formulation of optimal control and calculus of variations, noting decomposition algorithm 16 p2671 A66-31229

One-dimensional MHD equation solution, using calculus of variations 16 p2765 A66-31513

Necessary conditions of calculus of variations applicable to optimization of control processes dependent on discontinuity point time and location 16 p2672 A66-31520

Text on relation between dynamic programming and variational calculus, noting application to Mayer problem, optimization and stochastic processes, etc 16 p2739 A66-31750

Acoustic problems formulated and solved by finite element method of variational calculus, using both force and displacement procedures 17 p2957 A66-31945

Minimum drag bodies with elliptical cross section, using Newtonian flow theory and calculus of variations 17 p2838 A66-32346

Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168

Extremization of products of powers of functionals as applied to flat top wings for maximizing lift drag ratio in hypersonic flow 17 p2842 A66-33242

Variational and reciprocity theorems on thermoelastic distortions in homogeneous isotropic body 17 p3032 A66-33331

Direct method in calculus of variations for boundary value problem of Mangeron type 17 p2948 A66-33416

Variational formulation of equilibrium stability of nonlinear elastic circular cylindrical panel under radial stress 18 p3251 A66-33704

Vlasov variational analysis of stress-strain state of plates and shallow shells under large deflections 18 p3252 A66-33707

Nonlinear transformations for solution of variational problems 18 p3089 A66-33737

Infinite boundary value problem solution for third-order differential equations obtained in convergent series form 18 p3126 A66-33974

Topological classification of higher dimensional systems of ordinary differential equations by Liapunov functions 18 p3127 A66-33976

Optimal control for plant with polynomial ratio as transfer function, noting general performance index which involves output and control variables 19 p3323 A66-35341

Newton-Raphson method solution of variational problems with inequality restraints on control variables 19 p3388 A66-35880

Optimal and suboptimal design of vehicular control and proportional navigation system based on Pontryagin maximum principle 19 p3397 A66-35882

Newtonian variational problem for pressure on surface of nonshallow body moving at hypersonic velocity 19 p3276 A66-36472

Adaptive subfield method for solution of variational problems by dynamic programming, applicable to pinpoint problem 19 p3310 A66-36651

Absolute extremum existence in boltz-

mayer-type variational problem established by optimality principle 19 p3472 A66-36843

Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853

Equations describing motion of satellite in Paetzold-Zschoerner model of Earth atmosphere 20 p3654 A66-37848

Book on variational methods in control engineering covering optimal processes based on maximum principle, variational calculus and dynamic programming 20 p3539 A66-37985

Shortest route problem with constraint, using set of nodes 21 p3717 A66-38537

Free jet MHD accelerator for determining minimum length of crossed field accelerators, noting operation and solution in closed form 21 p3699 A66-39645

Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 22 p3939 A66-40444

Deduction procedure for generalized Clebsch necessary condition for singular extremals for which final form of accessory minimum problem is nonsingular Bolza problem 22 p3940 A66-40530

Perturbation theory-variational calculus analysis of optical rotatory power of molecules based on wavefunction badness 22 p3951 A66-40907

Variational techniques in solving BVPs for nonlinear plastic, elastoplastic and viscous media and in predicting existence, uniqueness and equilibrium conditions 23 p4136 A66-40996

Variational methods for approximating perturbation effect on nondegenerate eigenvalue extended to degenerate case 23 p4084 A66-41390

Real time computer technique for least squares estimates of current system state for noisy nonlinear system, using Pontryagin maximum principle 23 p4050 A66-41615

Functional analysis applied to optimum control by reduction of variational problem to finite dimensional analysis and calculation of algorithms for use with digital computer 24 p4231 A66-42470

Optimum control problems solved by numerical methods based on variation in state space 24 p4231 A66-42471

Method of weighted residuals /MWR/, Galerkin method and variational method compared for approximate solution of differential equations 24 p4232 A66-42836

VARIATIONAL PRINCIPLE
SA RAYLEIGH-RITZ METHOD

Second order energy correction calculated by Hylleraas variation principle with approximate zero order function, shows no relationship to true value 01 p0108 A66-10310

Variational theorem that is equivalent to elastic field equations for incompressible and nearly incompressible materials 02 p0297 A66-11541

Biot variational method applied to transient heating of porous half-space from which gas escapes [AIAA PAPER 65-118] 03 p0444 A66-12766

Variational techniques for synthesis of optimum nonuniform transmission lines 05 p0652 A66-14576

Extension of minimum variational principle applied to time-dependent perturbational problems instead of original stationarity principle 06 p0820 A66-16122

Melting and freezing of finite and semiinfinite bodies, discussing variational, heat balance integral, Riemann-Mellin contour integral, etc 06 p0971 A66-16728

Green function/Gorkov variational procedure calculation of transition temperatures of superposed superconducting films dominated by inhomogeneous electron-electron interactions 07 p1108 A66-18436

Supersonic gas dynamics variational problems concerning determination of axisymmetric minimum drag 08 p1166 A66-19573

Motion equations and Hamilton-Ostrogradskii principle in mechanics of variable mass system dependent on time, coordinates and velocity 08 p1256 A66-19706

Variational principle for free oscillations of

gravitating elastic compressible sphere 09 p1456 A66-20412

Optimum control for supersonic winged vehicle, allowing for inequality-type limitations in solution algorithm for maximum range in nonmaneuvering flight 11 p1733 A66-23340

Generalized form of variational principle for minimum dissipation of energy applied to anisotropic thermal conductivity formulation 11 p1788 A66-23448

Nonequilibrium thermodynamics, variational techniques and hydrodynamic stability - Symposium, University of Chicago, May 1965 12 p1974 A66-23540

Generalized theorem of minimum entropy production in terms of fluctuation theory and variational principle, noting application to heat flow in rarefied gases 12 p1974 A66-23541

Variational principle application to heat conduction in solids, noting temperature dependence, physical meaning of Lagrangian heat flow between parallel plates, etc 12 p1975 A66-23542

Variational extremal principles for continuum systems, analyzing various approaches to boundary layer flow 12 p1975 A66-23544

Lagrangian for particular collisional models in fluid dynamics, considering fluctuation theory relations and stability in presence of external field 12 p1918 A66-23552

Variational formulation for equilibrium and stability of plasma with particle orbits described by guiding center approximation 12 p1923 A66-24569

Variational principle extended to problems of nonself-adjoint differential equations, with application to slow viscous incompressible Poiseuille flow 14 p2273 A66-26935

Ideal conducting fluid in electromagnetic and gravitational fields treated by relativistic mechanics, using variational principles 14 p2277 A66-28049

Analysis of means, using decision lines for nonrandom variability of set of means, noting correlation between analysis of means and error variance 15 p2508 A66-28807

Plasma stability analysis, discussing low density fluid equations, variational principle and sufficiency condition at moderate densities, electric field effect, etc 15 p2554 A66-29746

Crack formation and cleavage surfaces treated via variational principle 16 p2727 A66-31529

Constant flow velocity and constant Mach number flow problems in MHD generator of minimal length for given temperature drop at output and internal efficiency 16 p2638 A66-31611

Dynamic characteristics of built-up plates analyzed with modified Reissner principle, obtaining natural frequencies and mode shapes 17 p3022 A66-32011

Variational principle applied to formulation of stability equations of shallow shells subjected to creep 17 p3026 A66-32594

Hashin-Shtrikman theorems application in three types of boundary value problem in elasticity 18 p3249 A66-33600

Trust programming in central gravitational field, discussing reduction of Mayer-Bolza variational problem to boundary value problem for system of nonlinear differential equations 18 p3241 A66-33846

Augmented Born approximation based on variational principles applied to electromagnetic scattering from inhomogeneous dielectric spheres of finite extent 18 p3071 A66-34452

Variational principle applied to boundary value problems in kinetic theory, specifically examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919

Relativity theory for solid-media model design, deriving equations of state and closed system of differential equations based on variational principle 19 p3401 A66-36832

Hamilton principle extended to compressible MHD flow of perfect conducting fluid 20 p3610 A66-37987

Stress tensor analysis of elastic plates in reference state, noting nonlinear plate

theory and variational principle 20 p3673 A66-38273

Continuous media model theory and comparison with theory of many-dimensional non-Euclidean manifolds, noting kinematic characteristics of particle deformation, variational principles, thermodynamic equation, etc 21 p3756 A66-38627

Axiallysymmetrical deformation of multilayer circular sandwich cylindrical shells, deriving governing differential equations by variational theorem 21 p3831 A66-39272

Time-mass dependent events during motion of material particle, using Hamilton-Jacobi equation of relativistic mechanics in Minkowski continuum 21 p3772 A66-39276

Energy levels of rotationally hindered linear molecules calculated, using variational principle based on Schroedinger-like integral equation 22 p3949 A66-39665

Hamilton principle, motion equations, natural boundary conditions and constitutive relations for finite deformation of one-dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-40138

Variational principles for viscous, incompressible hydromagnetic equations of flow including continuity equation, motion equations, etc 23 p4099 A66-41123

Rall theorem on variational principle for linear elastodynamic BVPs on Hilbert space 23 p4136 A66-41538

Minimum and variational principles in study of stress locking functions and stress-strain law of elastic perfectly locking materials 23 p4146 A66-41990

Equilibrium theory of plasma stability in EM field, applying virial theorem and variational principle to random infinitesimal plasma perturbations 24 p4241 A66-42330

Inadequacy of Corson variational principle as foundation of classical and quantum dynamics 24 p4237 A66-42406

Hamilton variational principle formulation of damped acoustical-structural vibration motion equations, with application to radiation problems 24 p4291 A66-42858

VECTOR ANALYSIS

Vector tetrad in mathematical formulation of general theory of relativity and cosmological red shift 02 p0287 A66-11470

Intermediate observation for satellite compensation of spatial triangulation 03 p0424 A66-12460

Time-varying linear differential systems, discussing minimum time identification via scalar valued transform of Zadeh 05 p0654 A66-14607

Global asymptotic stability problem for complex high order system solved by transformation into interconnected set of lower subsystems 05 p0654 A66-14608

Operations in vector analysis applied to velocity field of image point in phase plane, establishing stability criterion for singular points 09 p1361 A66-20436

Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field and boundary and initial value problems 10 p1555 A66-21226

Scattering theory by perfectly conducting irregular surface at very short wavelength developed, using vector field theory 11 p1852 A66-22550

Nonlinear circuit theory, discussing invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-22629

Instantaneous center of vector

accelerations of free solid body 11 p1736 A66-22848

General vector notation for multiple integrals 12 p1903 A66-24091

Deterministic optimal control, discussing Bellman dynamic programming method, Pontryagin maximum principle, orbital transfer, interplanetary guidance, etc 12 p1854 A66-24635

Global solutions of Navier-Stokes equations, analyzing solution vector for nonnegative time values in three-dimensional Euclidean space for continuous initial data 12 p1867 A66-24962

Transient motion of simple mechanical systems using vectors as alternative to finding equivalent control system and solution by root locus method 12 p1971 A66-24975

Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916

Structural dislocation theory and structural distortion vector analysis 15 p2606 A66-28525

Anisotropic vector functions of vector argument connected with crystal symmetry 15 p2526 A66-28951

Tensor field/vector field representation of stress functions for couple and dipolar stresses 16 p2812 A66-30261

First-order linear elliptic system with areolar derivatives involving n unknown complex functions 16 p2738 A66-31706

Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707

Sensitivity analysis of time varying systems, comparing vector output errors of feedback and open loop system with same nominal transfer characteristics 19 p3327 A66-36013

Maximization of second-degree polynomial on unit sphere 19 p3392 A66-36787

Vectorial photoelectric effect and quantum efficiency measurement in thin gold films for two light polarizations, using Lallemand electronic camera 20 p3614 A66-37279

Vector scatter theory for backscatter of circularly polarized waves from Moon and Venus 22 p3866 A66-40174

VECTOR CALCULUS

Integral inequalities related to nonoscillation theorems for differential equations 03 p0387 A66-12618

Electromagnetic field in current-carrying region, discussing existence criteria of improper integrals 06 p0908 A66-16130

Vector equation $F(X)/\text{equals zero}$ solved by transforming nonlinear algebraic equation into nonlinear differential equation 06 p0865 A66-16746

Singular solutions of concentrated force and concentrated heat source thermoelectricity 09 p1467 A66-20498

Variational calculus formulation of classical electromagnetic field theory 14 p2330 A66-27022

Broken symmetry densities within current algebra arising in magnetic moment ratio, renormalization constants and unitary symmetry correction 20 p3606 A66-38293

Investigations 20 p3606 A66-38293

Mayor-Mises method for solution of kinematic and kinetostatic problems of three-dimensional mechanisms [ASME PAPER 66-MD-2] 21 p3741 A66-38475

Vector equations of steady inviscid thermally nonconducting gas flows from geometric theory of triply orthogonal spatial curves 21 p3729 A66-39446

Trajectory stability of diffusion-type random Markov process described by Ito stochastic differential vector equations 23 p4085 A66-41554

VECTOR CONTROL

Jet tab system influence on pressure distribution within rocket nozzle for missile control 03 p0431 A66-12749

Necessary conditions for extremum in problems of control with aftereffect 10 p1518 A66-21975

Automata theory and control theory analytically compared for general and linear systems and tolerance automata 11 p1680 A66-23275

Newton-Raphson method iterative solution of two-point boundary value problem and

- application to trajectory optimization and tubular reactor design 11 p1680 A66-23276
- Parameter estimation utilizing state vector model, regression methods, asymptotic methods, etc 11 p1680 A66-23278
- Optimal control and trajectory optimization in aperiodic discrete time functional systems 11 p1681 A66-23422
- Complete controllability of particular plant 11 p1682 A66-23455
- Sufficient conditions for optimal stochastic control of diffusion processes governed by vector equations satisfying local Lipschitz conditions 11 p1682 A66-23459
- Successive approximations to determine vector in theory of optimal control 13 p2045 A66-25294
- Inequality constraints in open-loop minimum time control 13 p2053 A66-26080
- Determination for piecewise analytic F/t of what vectors can be represented by bang-bang control having finite number of discontinuities 15 p2469 A66-28514
- Systems analysis, discussing mathematical model formulation and control 15 p2472 A66-29369
- Tests on rocket thrust vector control using hot injectant gas from same fuel and oxidizer as main engine, tabulating data 16 p2810 A66-30902
- Vector formulation of boundary value optimization problems 19 p3388 A66-35871
- Optimal control of time-varying linear systems subject to additive noises and load disturbances, based on exact plant equations 19 p3325 A66-35877
- Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879
- Steepest descent method of solving multiple-arc optimal control problems of orbital transfer 19 p3388 A66-35881
- Necessary conditions for extremum in problems of control with aftereffect 19 p3330 A66-36185
- Suboptimal adjoint-vector control theory for linearization of feedback control systems independent of nominal trajectory 20 p3535 A66-36849
- Maximum principle in optimization of discrete time systems described by difference equations 20 p3536 A66-36857
- All-fluid control systems, noting achievements in vector control navigation aids and vehicle flight 20 p3503 A66-38263
- Sufficient conditions for linear time optimal control system on compact real intervals in Euclidean n space 23 p4049 A66-41536
- VECTOR CURRENT**
- Vector pairing in small dimensional superconductors vanishes when pair dimensions are larger than sample or electron mean free path 06 p0930 A66-17054
- Mean wind vector shear and shear interval and standard deviation, examining correlation 11 p1730 A66-23097
- Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions evaluation using vectormeter 21 p3739 A66-39275
- VECTOR SPACE**
- SA BANACH SPACE
- SA HERMITIAN POLYNOMIAL
- SA HILBERT SPACE
- Removable singularities in multidimensional minimal hypersurfaces in compact space 07 p1057 A66-17837
- Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269
- Optimal demodulation of analog-type signal transmitted through randomly fading channel, assuming additive Gaussian noise and using vector space approach 15 p2474 A66-29379
- Irreducible unitary representations of restricted Lorentz group on manifolds of time-, light- and space-like 4-vectors, obtaining plane-wave solutions of Klein-Gordon equation 15 p2528 A66-29622
- Graph-theoretic concepts for relating Reed segs and their duals to two classes of subgraphs 17 p2900 A66-32054
- Metric vector space with one-dimensional linear subspace not approximating 21 p3756 A66-38809
- VEGETATION**
- Interpretation of vegetation types from aerial photographs 15 p2505 A66-30015

- Similarity method for accelerations and velocities 17 p2960 A66-33424
- Psychological effects of velocity and hermetic compartments on astronaut performance 24 p4166 A66-43146
- VELOCITY DISTRIBUTION**
- Velocity distribution in turbine stage with compressible medium for repeating axial velocity profile derived, employing approximation method 01 p0130 A66-10211
- Velocity distribution in laminar viscous liquid-into-liquid jet 01 p0057 A66-10407
- Compressibility effect on velocity distribution and gradient at stagnation point in plane subsonic jet incident at arbitrary angle on infinite plate 01 p0007 A66-10474
- Turbulent motion of elastoviscous fluid degeneration when highest velocity and stress field correlation moments are neglected in comparison with second moments 02 p0217 A66-11394
- Electron beam generating plasma in tube aligned with magnetic field, measuring plasma density, beam velocity distribution and RF noise spectrum 02 p0266 A66-11442
- Microwave scattering from nonequilibrium plasmas where electrons have large steady drift velocity with respect to ions 02 p0266 A66-11479
- High speed compression of viscoplastic thin disk between smooth dies considering inertia effects 02 p0299 A66-11690
- Equation of velocity distribution of fluid in duct, evaluating effect of eddy activity on second derivative 02 p0218 A66-11759
- Oseen flow in plane studied, using approach having velocity field expressed in terms of four auxiliary functions 02 p0218 A66-11805
- Angular distribution of fast H and H plus ion dissociation fragments on hydrogen gas, noting transverse velocity distribution 03 p0394 A66-12329
- Shock wave structure for gas with discrete velocity distribution, examining compression and reflection from plane surface, Broadwell model and increase in specific mass 03 p0354 A66-12538
- Wind tunnel contraction study of inviscid incompressible flow using rheoelectrical analogy, discussing experimental techniques, contour velocity distribution, optimum smoke injector and adverse pressure gradient estimation 03 p0352 A66-12719
- Scalar quantity spectrum in statistically stationary turbulent velocity field, using closure approximations to provide unified comparison, noting eddy diffusivity, transfer function, etc [AIAA PAPER 65-814] 03 p0357 A66-13082
- Itinerant oscillator model of liquids covering classical velocity autocorrelation function of atom and neutron scattering experiments 04 p0547 A66-13809
- Two-point correlation function expressed in terms of structural function of velocity field 04 p0542 A66-14305
- Anisotropic electron velocity distribution for magnetosphere assumed and complex refractive indices evaluated, using cyclotron absorption explanation of whistler cut-off 05 p0631 A66-14835
- Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations 05 p0662 A66-14989
- Pressure index for predicting upstream nonnormal velocity distributions on orifice meters [ASME PAPER 65-WA/FM-3] 05 p0684 A66-15518
- Aerodynamic analysis of cryogenic radial-inflow turbines, noting optimum velocity distribution [ASME PAPER 65-WA/PID-6] 05 p0608 A66-15604
- Heat transfer and velocity characteristics of thermal and hydrodynamic laminar flow in ducts of arbitrary cross section, considering boundary conditions at wall [ASME PAPER 65-WA/HT-13] 05 p0790 A66-15650
- Laminar heat transfer in inlet tube, determining velocity and temperature distribution [ASME PAPER 65-WA/HT-36] 05 p0792 A66-15671
- Turbulent velocity profile produced by controlling boundary layer thickness, using wires placed parallel to plate and normal to flow direction [ASME PAPER 65-WA/FE-29] 05 p0664 A66-15711
- Phase velocity and growth coefficient of instability of plasma with discontinuous velocity distribution, noting role of ion distribution function 07 p0187 A66-17852
- Momentum and energy accommodation coefficients for moving gas interaction with solid surface, with attention to molecular mass and velocity flux distribution 07 p0183 A66-18135

Landau solution of plasma oscillation problem, discussing dielectric function, Lorentzian distribution and cut-off distribution 08 p1260 A66-18536

Two-dimensional probability distribution for simultaneous turbulent velocities at two points in plane perpendicular to mean velocity of wind tunnel 08 p1205 A66-18542

Higher order calculation of laser output, noting approximation method for linewidth parameter and Lamb dip shape accuracy 08 p1233 A66-19063

Particle velocity distribution in free convection in air for flat velocity field 08 p1321 A66-19733

Antisymmetric disk loading effect on distribution of induced rotor velocity 09 p1327 A66-20252

Harris and Priester model used to compute amplitude of diurnally varying component of horizontal pressure acceleration, showing increase with altitude 10 p1529 A66-21150

Exospheric model of solar wind for ionized atmosphere with velocity-dependent collision cross section 10 p1605 A66-21206

Solar motion and velocity dispersions determined together with results on distribution of peculiar motion of stars 11 p1766 A66-22255

Statistical determination of stellar motion compounded of radial velocity in line of sight and transverse velocity perpendicular to it, considering galactic orbits of nearby stars, velocity ellipsoids, etc 11 p1766 A66-22256

Secondary flows in turbine cascades, obtaining correlations between velocity distributions and circulations along span by expanding Fourier series 11 p1632 A66-22664

Velocity field excitation due to thin wing motion in vicinity of finite length pressure wave with variable gas parameters 12 p1797 A66-24431

Nonequilibrium effect in two-dimensional steady flow of ionizing gas past magnetized wall, calculating velocity distribution along wall 12 p1924 A66-24809

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 12 p1875 A66-24871

Turbine blade vibration damping, expressing mechanical forces via method of concentrated masses 12 p1938 A66-24982

Rarefied gas flow problems solved by hydrodynamic equations and representations of stress tensor and heat flux reproducing Navier-Stokes continuum limit and free molecule limit, noting velocity distribution interpolation 13 p2061 A66-25163

Velocity gradient instability for monotone distribution function in guiding-center plasma 13 p2154 A66-26670

Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704

Constant current hot-wire anemometer determination of experimental time-amplitude distribution function of velocity in turbulent boundary layer 13 p2072 A66-26753

Meteor ablation, analyzing size and velocity distributions of meteor showers, noting how hydration in secondary particles promotes formation of charged particles which contribute to noctilucent cloud formation 14 p2378 A66-27094

Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416

Density distribution in exosphere, particularly Maxwellian velocity distribution disturbed by light particle escape 14 p2284 A66-27620

Velocity field in turbulent flow based on momentum transfer, determining velocity distribution for flow near solid surface 14 p2276 A66-27681

Two-point correlation function expressed in terms of structural function of velocity field 14 p2327 A66-28218

Laminar adiabatic gas flow in parallel plane channel taking place up to 3/4 of

critical velocity 14 p2278 A66-28315

Unified field theory applied to relaxation of ion velocity distribution in plasma 15 p2552 A66-29396

Complex flow-perturbing potential for Joukowski profile in incompressible fluid with parabolic velocity distribution, using Jacob first order approximation to solve Dirichlet problem 16 p2627 A66-30211

Pressures in incompressible fluid around obstacle for parabolic velocity distribution at infinite distance 16 p2627 A66-30212

Velocity distribution of subsonic flow around von Mises profile, noting compressibility corrections 16 p2628 A66-30215

Velocity profile in incompressible turbulent boundary layer determined by two methods, noting coincidence of velocity distributions in external portion of layer with velocity defect law 16 p2684 A66-30326

Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations [ASME PAPER 65-WA/GTP-2] 16 p2684 A66-30344

Structure and properties of free supersonic jets including impact pressure and velocity distribution measurements, condensation, etc 16 p2628 A66-30376

Optimum conditions for molecular beam generation determined by measuring particle flow density and speed ratio of short beam pulses from convergent nozzle 16 p2752 A66-30384

Thermal energy exchange between gases and solid surfaces, using realistic interaction potentials of Morse type, Maxwellian velocity distribution 16 p2825 A66-30387

Rotating target experiments on nitrogen gas molecule interaction with engineering surfaces and velocity distribution of scattered beam 16 p2753 A66-30394

Airfoil theory in incompressible flow for boundary layer suction or Helmholtz type wake 16 p2629 A66-31039

Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction of current of free molecules and rigid body 16 p2686 A66-31042

Numerical solution of MHD equations for boundary layer conducting gas flow near flat plate when velocity distribution of external flow obeys power law 16 p2764 A66-31366

Velocity spikes in near-wake of circular cylinders held transversely to air stream 16 p2690 A66-31654

Origin of polarization of radiation from GaAs diodes, noting intensity dependence on current density and effect of anisotropic electron velocity distribution 16 p2667 A66-31770

Pitot tube readings in viscoelastic turbulent stream, noting stress and kinetic contribution, momentum average factor, etc 17 p2906 A66-32035

Electron velocity distribution in ionized gas under alternating electric field as function of density, temperature, etc, including effects of recombination, ionization, etc 17 p2960 A66-32426

Velocity distribution in laminar plasma jet determined from energy equation and spectroscopic measurement of temperature distribution 17 p2967 A66-32459

Eddy kinematic viscosity in transition region between laminar sublayer and turbulent core 17 p2916 A66-33417

Velocity and temperature fields in mixed flow of five turbulent jets injected by means of separate nozzles into chamber 18 p3103 A66-35051

Plateau formation mechanism for electron velocity distribution function during damping of monochromatic plasma waves 19 p3406 A66-35737

Approximation technique for analysis of two-dimensional boundary layer flows with arbitrary external velocity distribution 19 p3341 A66-36321

Stable domain propagation for case when electrons have field-independent diffusion coefficient and follow arbitrary static velocity field characteristic exhibiting negative resistivity 19 p3446 A66-36371

Microinstability due to non-Maxwellian velocity distribution in hot electron plasma

within magnetic mirror configuration 19 p3422 A66-36545

Macroscopic velocity field in solar atmosphere and physical nature of motion, analyzing radiative transfer in spectral lines 19 p3465 A66-36604

Amplifiers using properties of vortex flow confined within flattened cylindrical chamber, considering velocity distribution 19 p3281 A66-36634

Electron velocity distribution function in nonequilibrium plasma having spatial distribution governed by electron-electron and inelastic collisions 20 p3606 A66-36974

Variation in velocity circulation and vorticity in nonisentropic flow 20 p3492 A66-37573

Approximate method of integrating linearized equation for laminar boundary layer to establish relations of velocity distribution with friction stress 20 p3546 A66-37679

Horizontal temperature gradient produced by water body effect on distribution of wind velocity and direction in atmospheric boundary layer 20 p3594 A66-38375

Velocity field and suction effects on viscoelastic flow past porous circular cylinder 21 p3724 A66-38709

Velocity distribution of fluctuating axisymmetric flow of incompressible second-order fluid near stagnation point 21 p3728 A66-39346

Extension of extremum principles concerned with velocity fields for boundary value problems of incompressible rigid viscoplastic /Bingham/ solid 21 p3832 A66-39440

Homogeneous rotating low density plasma permeated by magnetic field with anisotropic velocity distribution may exhibit hose instability as well as gravitational instability 21 p3794 A66-39562

Wave theory calculation of moments of velocity change of charged particle in magnetoplasma 21 p3794 A66-39573

Velocity distribution for inlet flow in finite radial diffuser 21 p3731 A66-39591

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 22 p3912 A66-40332

Non-Markovian evolution equation for velocities distribution in homogeneous gravitational system 23 p4100 A66-41249

Simulator study of computing and displaying velocity in head-up display for low speed flight path control by pole track or velocity vector [ICAS PAPER 66-16] 23 p4089 A66-41257

Line-of-sight velocities in gas in peculiar extragalactic radio source NGC 4038-39 measured in orientations across object 23 p4129 A66-41805

Surface mass transfer effect for supersonic flow over cone, examining solution of equations of motion for inviscid compressible gas with velocity field normal to surface of inner cone 23 p4011 A66-41898

Velocity discontinuity surface instability and fluid compressibility effect on stationary flows 23 p4059 A66-42006

Spectral distribution of space-time velocity correlations as function of velocity fluctuation scale in turbulent boundary layer 23 p4014 A66-42026

Turbulent boundary layer at flat plate in extremely turbulent flow, noting effect on shearing stress and velocity distribution 23 p4061 A66-42028

Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure distributions 24 p4193 A66-42156

Velocity field of conducting fluid interaction with electromagnetic fields, noting applications to electric propulsion, MGD power generation and reentry 24 p4240 A66-42281

Maxwell field equations and constitutive equations, discussing best pedagogical formulation for electrodynamics 24 p4189 A66-42633

Inhomogeneity of axial velocity component in or near blades forming impeller intake of

- radial compressor attributed to flow deflection 24 p4158 A66-43067
- VELOCITY ERROR**
Velocity defect law for transpired turbulent boundary layers 02 p0217 A66-11553
Frequency instability induced velocity error measurement in two-way coherent Doppler system 17 p2895 A66-33112
Optimization of midcourse velocity corrections, applying for variable-time-of-arrival guidance and determining optimum correction time as function of miss parameter 18 p3131 A66-33850
- VELOCITY MEASUREMENT**
SA ACCELEROMETER
SA SPEEDOMETER
SA TACHOMETER
SA WIND VELOCITY MEASUREMENT
Doppler radar for aerial navigation noting decoupling of transmitter from receiver, velocity measurement within frequency spectrum, etc 02 p0256 A66-11896
Solar cell transducer to measure mechanical movements 03 p0323 A66-12576
Group delay time and group velocity measurement methods in radio technology, noting phase-characteristic transconductance, pulse modulation, etc 04 p0482 A66-13902
Explosive shock wave velocity measurement by microwave transceiver in waveguide 04 p0566 A66-14281
Heating processes in plasma jet with hot interior and colder sheath, determining velocity and temperature 04 p0554 A66-14297
Velocity measurements of electron front in electromagnetically generated T-tube shock waves made with microwave interferometer 04 p0558 A66-14479
Terminal rise velocity of small distorted gas bubbles in liquid of small viscosity 06 p0874 A66-17000
Diffraction velocimeter detecting and measuring transverse movement of surface by sensing light backscattered by it when laser illuminated 07 p1044 A66-18333
Spectroscopic analysis of velocity field in radio and Seyfert galaxy NGC 1275 suggests occurrence of violent outburst in galaxy 08 p1287 A66-18776
Relationship between friability of powders and rolling speed in powder rolling, using suspension-system hoppers and smooth rollers 08 p1231 A66-18901
Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502
Vehicle motion parameters in Newtonian central force field determined, using geometrical structures devised from properties of velocity hodograph 08 p1226 A66-19584
Performance and operation of one-inch-square plasma accelerator to simulate reentry velocities [AIAA PAPER 66-180] 10 p1519 A66-21430
Langmuir probe velocity and acceleration measurements for coaxial Hall accelerators [AIAA PAPER 66-196] 10 p1562 A66-21441
Velocity overshoot within boundary layer in alternating laminar air flow near mouth of square channel 10 p1524 A66-21827
Doppler shift measurements using low resolution monochromator to determine mass motion in plasmas [AIAA PAPER 66-177] 11 p1735 A66-22213
Velocity, momentum and stagnation heating measurements at exit of free jet plasma accelerator 11 p1684 A66-22833
Optical diffraction velocimeter, using backscattered laser light to measure relative velocity between light source and surface 11 p1706 A66-22958
Doppler radar techniques for velocity measurement, citing military and industrial application 11 p1707 A66-23061
Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846
Transducer for measuring pressure, temperature, velocity, force, torque and displacement 13 p2082 A66-26312
Mean velocity, rms velocity fluctuations and Reynolds shear stress for air flow at high Reynolds number in rectangular channel partially roughened, measuring turbulence intensity 13 p2070 A66-26703
Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053
Velocity of plasma jet ejected from electric-arc device measured through jet brightness fluctuation 14 p2344 A66-27834
Sensing device of angular velocity vector with respect to inertial system, noting sensitive mass and parasitic terms arising from nonlinearity 14 p2296 A66-27888
Sound velocity measurements in liquid argon, liquid oxygen and liquid nitrogen 14 p2336 A66-28276
Orbital rendezvous, stressing necessity of measuring absolute angular velocity of line of sight connecting two vehicles, noting details on gyroscopes, coupling, optimization, etc 16 p2743 A66-30314
Ion beam velocity measurement, using radial electric and tangential magnetic field 16 p2701 A66-30347
Velocity distribution function of helium atom measured, using Doppler profile of helium line 16 p2701 A66-30377
High velocity shock machines and ancillary equipment including elastic cord machines, air guns, rocket-propelled devices, accelerometers, strain gauges, etc 16 p2682 A66-31197
Flow of turbulent incompressible fluid downstream from step-shaped wall, determining velocity fields in isobaric region, considering existence of boundary layer thickness at separation point 16 p2687 A66-31205
Wire-to-surface heat transfer and error in hot-wire anemometer measurements 16 p2708 A66-31256
Velocity dependence of meteor luminous efficiency evaluated, using statistical analysis [AIAA PAPER 66-515] 16 p2805 A66-31482
Gauge to measure transient velocities up to 600 cm/sec 17 p3023 A66-32073
Geocentric velocity of Leonids measured via meteor radar equipment 17 p3000 A66-32339
Meteor velocity determination via diffraction method, noting instrumental errors, recording and data processing techniques, etc 17 p3000 A66-32340
Doppler shift, velocity and line width measurements for mass motion in plasmas 17 p2925 A66-32488
Velocity of arc wind measured for various magnetic fields and distances above arc path, using temperature probe and dragmeter 17 p2969 A66-32639
Conducting fluid flow velocity measuring technique using properties of pulsed electromagnetic field 17 p2926 A66-32873
Frequency instability induced velocity error measurement in two-way coherent Doppler system 17 p2895 A66-33112
Solar wind and type I comet tails, noting solar wind and plasma velocities as compared with Mariner II measurements 17 p3012 A66-33391
Tail of Tomita-Gerber-Honda /1964 c/ comet, noting importance of spacecraft measurement of solar wind plasma direction 17 p3012 A66-33394
Staff flight test design velocity comparison technique for estimating in-flight inertial platform attitude 18 p3132 A66-34044
Effect of mass entrainment from vacuum tank and electrode erosion on plasma velocity determined from mass flow and thrust of Hall accelerator [AIAA PAPER 65-297] 18 p3147 A66-34585
Compressional wave velocity in limestones, marbles and single crystal of calcite under hydrostatic pressure to 20 kbar 19 p3351 A66-36387
Plasma velocity measurements in and outside plasmatron nozzle and free stream from combustion chamber as function of flow rate of stabilizing gas and combustion chamber 20 p3609 A66-37567
Group delay time and group velocity measurement methods in radio technology, noting phase-characteristic transconductance, pulse modulation, etc 20 p3518 A66-37860
Dynamic characteristics of muscle, discussing effect of contraction and force developed on state of activity in terms of force velocity diagrams 20 p3507 A66-38100
Coefficients of Taylor expansion of correlation function in various velocities defined to describe space-time behavior 21 p3770 A66-38749
Radial velocity measurements with objective prisms, discussing error sources, luminosity, etc 21 p3737 A66-38821
Microwave experimental technique for continuous velocity measurement of shock and contact discontinuities bounding air plasma generated in cylindrical hypersonic shock tube 24 p4190 A66-42173
Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184
Microwave reflectometer instrumentation for Ames light-gas guns, measuring time-distance values of projectiles during acceleration 24 p4209 A66-42185
Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408
Instantaneous shear stress at liquid flow boundary, measuring turbulence and velocity fluctuation in close proximity of pipe wall 24 p4194 A66-42415
Laser Doppler velocimeter for gas and liquid flow velocity measurement 24 p4211 A66-42557
Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880
Irregular diffraction analysis with ultrasonic waves, measuring air stream temperature fluctuations and velocity 24 p4176 A66-43020
- VELOCITY MODULATION**
Harmonics in cylindrical electron beams traveling in circular drift tube and velocity-modulated by gridless buncher gap 04 p0491 A66-13421
Thermocouple and inertialess temperature sensor for velocity fluctuations in gas flow 04 p0519 A66-13657
Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 09 p1357 A66-20778
Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 22 p3873 A66-39837
- VELOCITY POTENTIAL**
SA STOKES-BELTRAMI EQUATION
Masses attached to body of revolution estimated by Vandrey method of calculating disturbed velocity potential of flow of ideal fluid 01 p0058 A66-10462
Transonic flow in throat of plane axisymmetric nozzle determined by taking velocity potential in form of power series and determining coefficients of series from set of recurrence equations 01 p0007 A66-10714
Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 05 p0774 A66-15036
Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 05 p0607 A66-15449
Very arbitrary triple transformation applied to differential equation of perturbation velocity potential for case of supersonic flow 06 p0873 A66-16916
Velocity potential equation for linearized steady motion of gas mixture with multiple reactions 07 p1023 A66-18116
Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 12 p1797 A66-23968
Asymptotic flow at distance from three-dimensional transonic obstacle showing increased velocity 13 p1990 A66-25431
Degree of clustering expected from 500-mb horizontal sounding system, using stream functions and velocity potentials derived from historical tapes of National Meteorological Center 13 p2121 A66-25815

Exothermal discontinuities propagation in conducting media without restricting magnetic field orientation, noting velocity and energy released, showing that existence of propagation velocities leads to two detonation modes 13 p2149 A66-26260

Low aspect ratio wing moving above interface of two fluids of different density, replacing value of velocity potential by value obtained at large distance downstream from wing 13 p2068 A66-26539

Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity potential 14 p2218 A66-27387

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 18 p3257 A66-34594

Chaplygin equation solution translating current function and velocity potential from physical into hodograph plane 19 p3342 A66-36474

VELOCITY PROFILE

Two-phase flow over flat plate analyzing velocity profile, shear coefficient and heat transfer of laminar boundary layer formed over plate 01 p0006 A66-10423

Propagation of longitudinal oscillations in plasma with thermal velocity spread 01 p0029 A66-10576

Velocity defect law for transpired turbulent boundary layers 02 p0217 A66-11553

Effect of exit velocity profile /shear/ on jet noise analyzed, considering structure of turbulence in mixing region of jets 02 p0176 A66-11587

Tangential velocity profile and flow temperature in vortex chamber of vortex tube and dimensions of tube, nozzle and cold-end orifice 02 p0217 A66-11589

Hydromagnetic flow against rotating disk noting magnetic field effect on torque, boundary layer thickness and velocity profile, applying motion equation 03 p0399 A66-12689

Turbulent boundary layer interaction with graphite heat shield noting boundary layer velocity, temperature and chemical composition profiles [AIAA PAPER 65-824] 03 p0446 A66-13232

Intermittency profiles of turbulent boundary layers for various pressure gradients to determine relationship between descriptive quantities and form factor of velocity profile 04 p0508 A66-13516

Velocity distributions in molecular beams of argon produced by supersonic nozzle sources, using time of flight method 04 p0548 A66-14012

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 04 p0512 A66-14220

Flow of orientable fluid between coaxial cones, discussing fluid behavior for low and moderate velocity gradients 04 p0512 A66-14473

MHD flow in rectangular ducts, discussing laminar motion of conducting liquid under uniform transverse magnetic field 04 p0558 A66-14475

Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer [ASME PAPER 65-WA/FE-1] 05 p0664 A66-15708

Gas mean and solid mean velocity profiles of small particles suspended in turbulent air, noting effect of solid motion on laminar structure and shear stress at wall [ASME PAPER 65-WA/FE-24] 05 p0665 A66-15713

Compressor blade cascade in flow with boundary layer separation, calculating velocity distribution and blade angle 06 p0803 A66-16967

Concentration profile in laminar boundary layer frozen to wall by catalytic chemical reaction 07 p1019 A66-17245

Pressure gradient influence on velocity profile in boundary layer of plate with semicircular transverse ribs 07 p0979 A66-17449

High energy particle jets analysis by Lobachevskil velocity diagram 07 p1116 A66-17560

Stability of piecewise linear velocity profile of shear flow in convectively unstable layer 07 p0980 A66-17942

Wall jet on rotating disk totally immersed in fluid, with derivation of laminar flow velocity profiles 07 p0981 A66-18047

Velocity profiles of transitional viscous boundary layer for plane Poiseuille flow 07 p1023 A66-18120

Velocity profile of main section of axisymmetric turbulent jet of incompressible fluid flowing into homogeneous companion flow of same fluid 08 p1206 A66-18876

Book on two-dimensional laminar boundary layers with and without suction noting velocity profile role, wind tunnel models, transition measurements, etc 08 p1208 A66-19355

Unsteady flow of second order fluid near stagnation point on harmonically oscillating flat plate 08 p1212 A66-19814

Operations in vector analysis applied to velocity field of image point in phase plane, establishing stability criterion for singular points 09 p1381 A66-20436

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 10 p1523 A66-21469

Velocity profiles in point-to-point mapping of compressible turbulent boundary layers into constant density flows 10 p1523 A66-21769

High precision high-spatial resolution tracer study of low-noise steady air flow in rectangular pipe, emphasizing region within two microns of wall 10 p1524 A66-21804

Transition front movements in barium titanate, noting dependence of velocity on rate of heating and thermal gradients 10 p1582 A66-21882

Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 10 p1569 A66-21991

Velocity defect profiles in equilibrium turbulent boundary layers and eddy viscosity hypotheses 11 p1693 A66-23005

Effective viscosity in defect portion of turbulent boundary layer when flow is under pressure gradients, showing overlapping of wall velocity profiles and defect velocity profiles 11 p1693 A66-23006

Calculating thickness and velocity profile of turbulent boundary layer with pressure gradient 12 p1882 A66-23850

Transverse flow velocity effect on laminar flow shape stability 12 p1863 A66-24428

Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer [ASME PAPER 65-WA/FE-1] 12 p1864 A66-24541

Species diffusion in frozen hypersonic boundary layer with Falkner-Skan velocity profiles, where surface is linear, given as Mellin transform, constructing series and asymptotic expansion of surface concentration 13 p2060 A66-25158

Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404

Excess velocity profiles in confined jets in presence of uniform transverse magnetic field, confirming affinity hypothesis 13 p2140 A66-25433

Electron and proton differential velocity spectra observed for low-energy relativistic cosmic rays, noting spectral neutrality of radiation 13 p2174 A66-25570

Macroscopic inhomogeneities in solar atmosphere, noting vertical velocity fluctuations in chromosphere, oscillation spectrum, etc 13 p2183 A66-25616

Velocity profile within boundary layer region for flow of second-order fluid past symmetrical cylinder determined for nondimensional parameter formed by velocity and material constants 13 p2068 A66-26666

Rarefied gas flow in hydrodynamic entrance region of circular tube, noting variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713

variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713

Secondary flow in entrance section of straight rectangular duct, measuring primary and secondary velocities, turbulence, axial component, Reynolds stress gradients, etc 13 p2070 A66-26714

Unsteady laminar forced and free convection in coaxial sector tubes in presence of constant axial temperature gradient, accounting for oscillation and resonance 13 p2210 A66-26719

Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and temperature variations, flow pattern, etc 13 p2070 A66-26721

Velocity profiles of jets and wakes with longitudinal pressure gradient obtained, using polynomial for turbulent shear stress 14 p2217 A66-27276

Calorimetric measurement of local temperatures and velocities in weakly ionized nitrogen plasma at subsonic velocity and thermodynamic equilibrium 14 p2294 A66-27487

Plane parallel submerged two-dimensional turbulent jet with nonuniform initial velocity 14 p2275 A66-27611

Perturbation spectra and decrements of plane parallel flows at small Reynolds numbers with even and odd velocity profiles 14 p2278 A66-28055

Vortex tube with double row nozzle, discussing energy separation efficiency, velocity profile, temperature characteristics, etc 16 p2685 A66-30801

Velocity profile of incompressible and electrically conducting flow in entrance region of constant area MHD channel 16 p2763 A66-31255

Turbulent flow field in straight circular tubes of sodium carboxymethylcellulose solutions, measuring pressure drop velocity profile over wide range of Reynolds numbers 17 p2906 A66-32037

Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular and flat tube 17 p2909 A66-32583

Fringing effect on sensitivity of magnetic flow meter 17 p2926 A66-32874

Fully developed laminar incompressible flow in stepped rectangular channel, with velocity profiles obtained by variational method 18 p3097 A66-33596

Navier-Stokes equations, differences for laminar jets and turbulent jets, submerged jets and transition layer stability 18 p3099 A66-34123

Static enthalpy and velocity profile within viscous wake of circular cylinder at Mach 20 18 p3049 A66-34582

Shock wave velocity and pressure in solids, noting design and construction of measuring device, application and operation 18 p3157 A66-34630

Velocity and temperature profile for turbulent boundary layers in adverse pressure gradients, including Prandtl number and surface roughness effects in analysis 18 p3101 A66-34667

Velocity profile measurements in turbulent liquid jets via photography, noting calculation of flow turbulence characteristics 18 p3114 A66-34894

Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 18 p3150 A66-34968

Plasmoid structure produced by coaxial plasma gun with interchangeable polarity electrodes, noting experimental setup, particle velocity, density, energy, etc 18 p3151 A66-35071

Velocity profile downstream from stepped wall having incompressible turbulent fluid flows 19 p3340 A66-35580

Approximation method for transition section calculation of turbulent jet, obtaining velocity profiles for initial and basic sections 19 p3276 A66-36466

Blasius series for heat and mass transfer in two-dimensional boundary layers, discussing velocity and concentration profiles 20 p3678 A66-37122

- Stability of liquid Newtonian jets ejected from circular capillary tubing into stagnant air, noting influencing factors such as nozzle turbulence, velocity profile development and ambient medium 20 p3545 A66-37509
- Hot-wire anemometer design with linear characteristics for measurement of velocity fluctuations of flow 20 p3560 A66-37760
- Asymmetric shear flow of viscous fluid past flat plate, justifying constant pressure assumption and examining flow patterns at lower surface in plate proximity 20 p3547 A66-37978
- Distortion of laminar circular Couette flow measured by end effects, noting two-dimensional tangential motion near axial plane of symmetry 20 p3547 A66-37980
- Plasma flow velocity profile measurement by electrostatic probe detection of plasma drop caused by gas breakdown due to focused giant pulse laser 20 p3612 A66-38395
- Velocity distribution function of plasma in high intensity perturbation field, noting linear response for weak interaction and long wavelengths, connection formulae and absorption of electromagnetic waves 21 p3777 A66-38760
- Wall flow analysis of logarithmic velocity profile of turbulent boundary layer with zero skin friction throughout region of pressure rise 21 p3729 A66-39449
- Torsional oscillations of infinite plate in elasticoviscous fluid solved by motion equation expansion of velocity profile in powers of amplitude 21 p3730 A66-39457
- Velocity profile, induced magnetic field, shear stresses and skin friction on plates for viscoelastic liquid flow between nonconducting oscillating infinite flat plates in uniform TM field 21 p3794 A66-39575
- Boundary layer equation solution along vertical hot plate for constant plate temperature, noting use of Blasius technique 21 p3837 A66-39590
- Clear air turbulence near jet stream, discussing velocity profiles and various meteorological parameters 22 p3902 A66-39677
- Pitot tube technique for measuring velocity profiles, using Bernoulli equation in stress measurement in laminar viscoelastic flow 22 p3898 A66-40010
- Intermittency in favorable and adverse pressure gradients in turbulent boundary layer measured by modified Corrsin and Kistler method 22 p3900 A66-40384
- Rayleigh turning-point criterion in velocity profile extended to spatially increasing flow disturbance 22 p3900 A66-40395
- Self-preserving flow in outer part of two-dimensional curved turbulent wall jet for constant ratio of jet thickness to wall radius of curvature 22 p3844 A66-40489
- Laminar boundary layer equations solved in presence of nonuniform velocity and enthalpy profiles in initial cross section or on bodies extending to infinity upstream and downstream 22 p3901 A66-40685
- Heat transfer through turbulent boundary layer, using velocity and temperature profiles as phenomenological relations 23 p4147 A66-41120
- Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses 23 p4056 A66-41726
- Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029
- Velocity field generated by current flow between electrodes immersed in conducting fluid permeated by uniform magnetic field 23 p4108 A66-42034
- Flow coefficient of elliptical cylindrical pipe, analyzing boundary layer at exit for various Reynolds numbers, noting velocity profile 23 p4014 A66-42057
- Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-42541
- Velocity gradient on blunt axisymmetric bodies in stagnation region if pressure distribution is known, using isentropic flow equations 24 p4158 A66-42798
- Velocity profile in isobaric zone downstream from step-shaped wall in case of incompressible fluid 24 p4197 A66-43002
- Aerodynamic coefficients of large-aspect-ratio fan-in-wing airfoil, noting that velocity field consists of inflow to fan, parallel flow and circulation flow 24 p4158 A66-43050
- VENT**
- Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation tests 22 p3891 A66-40236
- VENTILATION**
- SA HYPERVENTILATION**
- Personnel comfort and protection from thermal stress, discussing clothing, environmental temperature, metabolic heat production, solar radiation, etc 10 p1492 A66-22120
- Crosswind effect on turbulent jet parameters for submerged jet propagation at angle to unrestricted flow 12 p1864 A66-24445
- VENTILATOR**
- SA FAN**
- High efficiency radial ventilator design and frictionless incompressible flow treated by conformal mapping 01 p0005 A66-10199
- VENTURI TUBE**
- Nonstandard approach section effects on flow coefficients for venturi and orifice meters [ASME PAPER 65-WA/FM-5] 05 p0684 A66-15519
- Cavitation bubble collapse in venturi, discussing flow characteristics under large pressure gradient [ASME PAPER 65-WA/FE-20] 05 p0683 A66-15610
- Behavior of individual cavitation bubbles in cavitating flows of water and liquid Mercury, using two-dimensional Plexiglas venturi 07 p1025 A66-18177
- Atomization of liquid-spray particles in Venturi scrubber, investigating acceleration by high-speed photography 08 p1208 A66-19422
- Cavitation behavior of Herschel-type venturi tube, noting constant flow for varying venturi profile 18 p3114 A66-34646
- High speed photographic investigation of propagation and disintegration of interaction of two-phase gas-liquid flow in venturi scrubber 18 p3114 A66-35059
- Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties 20 p3544 A66-36924
- Water and mercury cavitation damage on solids in cavitating venturi tunnels consisting of single event symmetrical craters and irregular fatigue-type failures 20 p3586 A66-37813
- VENUS**
- Mission requirements for manned flyby, orbiter and lander missions to Mars and Venus 02 p0289 A66-11621
- Brightness temperature of Venus at 3.3-mm with correction for atmospheric attenuation 05 p0758 A66-14805
- Radio noise emission from Venus surface explained in terms of glow discharge 06 p0957 A66-17174
- Radiometric observation of Venus near inferior conjunction and Mars near opposition of 1965 at 430 mc/s 08 p1289 A66-18790
- Spectrophotometric study of Venus in 340 to 660 millimicron wavelength range 08 p1294 A66-19326
- Brightness temperature measurements on illuminated side of Venus at 10.6 cm challenges Troitski theory of planetary radiation emission 08 p1297 A66-19457
- Venus radiation at 13.5 mm water vapor line and planetary brightness variation with solar illumination phase 09 p1450 A66-20111
- Microwave radar observations of Venus, discussing surface thermometric temperatures, greenhouse effect, etc 09 p1451 A66-20113
- Muhleman radar scattering law indicates that surface of Mercury is similar to Moon in roughness 09 p1452 A66-20121
- Retrograde rotation of Venus established by radar observations is attributed to collision with 200-km diam asteroid 09 p1452 A66-20122
- Soviet radar observations of Venus in 1964 using frequency-shift keying and periodic linear FM of transmitter 09 p1452 A66-20123
- Stability of commensurate spin angular velocity for Venus, assuming solar tidal torque action and suggesting Venus rotation period is commensurate with synodic period 12 p1953 A66-24969
- Brightness temperature of radio emission from Venus 13 p2186 A66-26034
- Planetary model of Venus indicates clouds composed of water and ice particles 14 p2381 A66-27555
- Five-channel microwave radiometer measurements of Venus near 1-cm wavelength 14 p2386 A66-28125
- Book on planet Venus including data on atmosphere, temperature, etc, by IR and UV spectroscopy, radio astronomy, etc 15 p2595 A66-29127
- Radar studies of Venus, noting values for rotation vector, latitudes and longitudes of several features and Earth influence on Venus rotation 15 p2602 A66-29955
- Mars and Venus exploration - Conference, Virginia Polytechnic Institute, August 1965 16 p2796 A66-30350
- Orbits and gravitational fields of Mars and Venus, including celestial mechanical theories, perturbations, satellites, Mars oblateness and Venus mass 16 p2797 A66-30351
- Mathematical models of Mars and Venus computed, using seismology, Earth mean density and Earth moment of inertia 16 p2797 A66-30354
- Swing-by and capture-orbit trajectories for Mars or Venus exploration described by numerical methods 16 p2798 A66-30358
- Mariner program results of Venus and Mars exploration, discussing atmospheres, surfaces, exospheres, etc 16 p2798 A66-30359
- Unmanned spacecraft trajectory and guidance considerations for close flyby of planet Mercury [AIAA PAPER 65-90] 16 p2801 A66-30885
- Radio telescopic temperature measurements of Venus at 3.75 cm wavelength over full cycle of planetary phase angle 17 p3006 A66-33017
- Brightness temperature measurements on illuminated side of Venus at 10.6 cm challenges Troitski theory of planetary radiation emission 18 p3232 A66-34486
- Near IR two-beam interferometer built for astronomical observations by Fourier transform spectroscopy, noting resolution of spectra of Venus and Mars 20 p3556 A66-36939
- Venus brightness temperature and polarization of integral radio emission at 3.75 cm wavelength 20 p3648 A66-37044
- Guidance, navigation, propulsion and course correction specifications for Mars or Venus manned flyby missions 20 p3596 A66-37226
- Radio emission of Venus at 3 cm and solar activity 20 p3653 A66-37616
- Water-vapor mixing ratios near cloudtops of Venus decreases with altitude at rates comparable to Earth atmosphere 20 p3655 A66-38020
- Venus phase simulator experiment indicating anomaly due to observer 23 p4128 A66-41208
- VENUS ATMOSPHERE**
- Structure and composition of Mars and Venus atmospheres 03 p0426 A66-12875
- Thermal maps of Murray and Venus atmosphere statistically analyzed into solar effects, latitude variations and limb darkening 04 p0579 A66-14450
- Electromagnetic propagation characteristics of Venus and Mars derived from atmospheric data 06 p0831 A66-16436
- Observations concerning origin of Venus radio emission and about ionosphere surrounding planet 06 p0954 A66-16625
- Water vapor content in Venus atmosphere above reflecting cloud layer determined, using automatic daytime telescope and grating spectrometer 07 p1137 A66-18054
- Reflection spectrum of clouds in Venus atmosphere measured, using telescope mounted on helium balloon, noting details of instrument 07 p1137 A66-18055
- Abundance and stability of major sulfur compounds in lower atmosphere of Venus

- calculated, assuming equilibrium between atmospheric gases and mineral phases 08 p1293 A66-19262
- Atmospheres of Venus and Mars-Astrophysics Conference, Kiev, Ukrainian SSR, June 1964 08 p1293 A66-19322
- Probability of presence of nitrogen, oxygen and water in atmosphere of Venus, based on spectroscopic studies 08 p1294 A66-19323
- Strelkov theory of radio emission from Venus attributes high temperature radiation to radioactive heating of planetary surface 08 p1294 A66-19324
- Atmospheric composition of Venus and effect on radio emission in visible and near IR spectral bands 08 p1294 A66-19325
- Venus cloud layer and brightness temperature from radiometric microwave observations from nocturnal side of planet 09 p1451 A66-20112
- Data recording, data reduction and interpretation of information on water content of Venus atmosphere gathered by balloon-borne instruments 10 p1603 A66-21109
- Venus IR limb darkening observations by Mariner II 10 p1603 A66-21110
- Supercooled water droplets hypothesized in Venus cloud layer, based on radiometric observation in SHF range 12 p1944 A66-23503
- Radio astronomy studies of Venus and Mars noting surface properties, atmospheric structure, etc 13 p2186 A66-26031
- Earth reentry simulation of planetary entry environment with exponential atmospheres of Mars and Venus type [AIAA PAPER 65-218] 14 p2392 A66-27875
- Venus probe design of expandable balloon-type instrument package capable of entry into and of static equilibrium within Kaplan atmosphere 14 p2392 A66-27887
- Venus surface temperature from microwave measurements, noting thermal and nonthermal radiation 14 p2386 A66-28129
- Balloon-carried automatic telescope-spectrometer observation of Venus upper atmosphere and determination of water vapor content 16 p2797 A66-30352
- Limb darkening measurements of Venus at 8-14 microns with 200 inch Hale telescope 17 p3002 A66-32517
- Venus atmosphere, surface temperature and radiation 19 p3460 A66-35799
- Supercooled water droplets hypothesized in Venus cloud layer, based on radiometric observation in SHF range 20 p3646 A66-37016
- Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-40469
- Retrograde rotation of cloud formations of Venus with angular velocity corresponding to one rotation in four days analyzed by high resolution photography 23 p4128 A66-41181
- Absorption lines on Venus spectrograms of rotational fine structure of excited vibrational transition of carbon dioxide 23 p4130 A66-41816
- Venus atmosphere noting pressure induced absorption in carbon dioxide-nitrogen atmosphere as indicated in decline of microwave brightness 24 p4277 A66-42668
- VENUS FLY TRAP ROCKET**
- SA COLLECTOR**
- Experiments for space dust collection, describing rocketborne micrometeorite collection during Venus Fly Trap and Nike-Cajun flights 11 p1771 A66-22649
- VENUS PROBE**
- Scale of distances and masses in solar system, IR characteristics of Venus and interplanetary space fields and particles revealed by Mariner II 03 p0425 A66-12867
- Trajectory possibilities for Venus swingby mission and role in manned exploration of Mars [AIAA PAPER 66-37] 08 p1290 A66-18988
- Mariner II radiometric measurements of limb darkening of Venus in terms of cloud structure and vertical temperature distribution 10 p1603 A66-21111
- Venus probe design of expandable balloon-type instrument package capable of entry into and of static equilibrium within Kaplan atmosphere 14 p2392 A66-27887
- Mars and Venus manned interplanetary flyby missions 16 p2808 A66-30368
- Transfer paths to Mars via Venus compared with direct flight, discussing direct free fall transfer, flyby and free fall transfer 20 p3651 A66-37392
- Repeated close Venus flybys and several close solar approaches incorporated in same mission 24 p4278 A66-42687
- VENUS RADAR REFLECTION**
- Improved determination of astronomical unit as result of radar measurements of Venus 03 p0429 A66-13114
- Planetary radar system at Venus site of NASA Deep Space Instrumentation Facility for space communications, noting continuous-wave transmitters and receivers 04 p0478 A66-13602
- Radar observations of Venus in Soviet Union in June 1964 using frequency keying and linear frequency modulation techniques 07 p1134 A66-17619
- Spectrum and range spectrum analysis of Venus radar echoes obtained from experiments 09 p1451 A66-20117
- Angular dependence of mean power backscattered from Moon and Venus indicates greater smoothness of Venus surface 09 p1452 A66-20127
- 1964 results of high resolution CW radar spectral studies of Venus at NASA/JPL Deep Space Instrumentation Facility at Goldstone, California 13 p2185 A66-25812
- Rejection of Jones ionospheric model where Venus microwave emission is attributed to free-free electron emission, analyzing formation of dense Cytherean ionosphere 15 p2597 A66-29255
- Vector scatter theory for backscatter of circularly polarized waves from Moon and Venus 22 p3866 A66-40174
- VERNEUIL TECHNIQUE**
- Starting concentration, surface distribution of additive in alumina powder, trajectory distance and growth rate in Verneuil growth of ruby crystals 21 p3795 A66-38527
- Burnout of additives for flame fusion growth of crystal 22 p3931 A66-39920
- VERNIER ENGINE**
- Pneumatic vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature 20 p3627 A66-36916
- Surveyor vernier propulsion system, discussing design of thrust chamber, propellant tank assemblies, functions of VPS, etc [AIAA PAPER 66-593] 20 p3629 A66-37632
- VERONIQUE ROCKET**
- Solar limb darkening measured at various wavelengths by Veronique rocket, obtaining data on continuous absorption coefficient 13 p2180 A66-25421
- VERTEBRAL COLUMN**
- Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 period 16 p2644 A66-31132
- VERTEX FUNCTION**
- Axissymmetric supersonic flow involving shock waves applied to flow near vertex region of pointed bodies of revolution with arbitrary geometry 14 p2218 A66-27354
- Gauge transformations of third kind and operator gauge transformations of first and second kinds, relating electron and photon propagators to quantum electrodynamical vertex function 23 p4098 A66-41392
- VERTICAL AIR CURRENT**
- Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 02 p0224 A66-12134
- Wind tunnel technique for measuring frequency response of flexible airplane to vertical sinusoidal gusts [AIAA PAPER 65-787] 03 p0438 A66-13071
- Vertical velocity fluctuations in nocturnal low level jet examined by sonic anemometers 04 p0541 A66-13666
- Wind velocity, vertical wind profile and temperature fluctuations in near-water air layer measured, noting differences from pulsation measurements 04 p0542 A66-14300
- Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 06 p0906 A66-16552
- Closed vertical and horizontal air circulation effect on steady state distribution of ozone in Earth atmosphere 08 p1213 A66-19031
- Spectral density of vertical wind gusts in clouds calculated, including turbulent energy dissipation rates in cloud strata 09 p1398 A66-19884
- Spectra of vertical turbulent thermal fluxes and momenta in lower atmospheric layer, including review of relevant literature sources 09 p1398 A66-19893
- Mesoscale perturbations in vertical wind velocity profiles obtained from superpressure balloons tracked by FPS-16 radars 11 p1731 A66-23381
- Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 14 p2287 A66-28091
- Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 14 p2327 A66-28224
- Behavior of superpressure balloons in vertical air currents, noting various combinations of wind speed and wave amplitude 15 p2426 A66-28941
- Pulsation spectrum of vertical wind-velocity component at 70 m 16 p2742 A66-31343
- Muon component of vertical and inclined extensive air showers, determining energy spectrum, lateral distribution at sea level and relation of mean height of origin and sea level energy 18 p3211 A66-35134
- Jet flow turbulence characteristics, calculating vertical wind velocity pulsation component, determining thermodynamic characteristics of atmosphere 20 p3595 A66-38381
- Pulsation spectrum of vertical wind-velocity component at 70 m 24 p4234 A66-42651
- VERTICAL DISTRIBUTION**
- Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 04 p0542 A66-14301
- Rocket measurements to investigate vertical current distribution of electrojet over India to correlate magnetic profiles with simultaneous electron density measurements 05 p0668 A66-14794
- Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 06 p0876 A66-16553
- Dependence of horizontal extent of shower cells on vertical wind distribution 08 p1247 A66-18804
- Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 09 p1375 A66-20942
- Vertical temperature and humidity distributions of atmosphere determined from satellite measurements of carbon dioxide and water-vapor absorption bands 09 p1376 A66-20999
- Seasonal variation of atmospheric ozone, determining via IR method total amount and vertical distribution 10 p1526 A66-21124
- Vertical distribution of neutral composition of atmosphere between 100 and 200 km, comparing mass spectrometer with optical measurement 11 p1698 A66-23038
- Ozone photochemistry in atmosphere containing hydrogen, calculating equilibrium vertical distribution, rate of formation of hydroxyl, diurnal variation, etc 11 p1700 A66-23138
- Local peculiarities of vertical distribution of ozone in equatorial and polar regions for different turbulent dynamic models of stratosphere 12 p1869 A66-24279
- Vertical measurement of ionospheric absorption at continuously varying frequency, showing diurnal variation of absorption 12 p1870 A66-24289
- Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 12 p1874 A66-24868
- Atmospheric vertical temperature profile

determined from outgoing radiation spectrum, evaluating error probability and accuracy 12 p1874 A66-24869
 Macroscopic inhomogeneities in solar atmosphere, noting vertical velocity fluctuations in chromosphere, oscillation spectrum, etc 13 p2183 A66-25616
 Vertical temperature distribution in Martian atmosphere, noting insensitivity to surface pressure and carbon dioxide variations 13 p2186 A66-26132
 Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 14 p2327 A66-28215
 Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 14 p2289 A66-28225
 Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 15 p2483 A66-28530
 High energy muon energy spectrum, energy loss rate, primary nucleon energy spectrum and inelasticity fluctuations 15 p2587 A66-29571
 Vertical atmospheric temperature and wind distribution in optimal parametric representations 15 p2489 A66-29775
 Threshold rigidities for vertical incident cosmic ray particles derived, using trajectory computations by higher-order simulation of geomagnetic field 18 p3198 A66-34881
 Small-scale fluctuations in vertical distribution of atmospheric ozone analyzed, examining possible transport mechanisms in Southern Hemisphere stratosphere 20 p3551 A66-37469
 Boundary layer equation solution along vertical hot plate for constant plate temperature, noting use of Blasius technique 21 p3837 A66-39590
 Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 22 p3912 A66-40329
 Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 22 p3912 A66-40330
 Nocturnal high altitude ozone distribution determined, using small geophysical sounding rockets with Moon as light source to measure atmospheric absorption of UV radiation 22 p3914 A66-40559
 Vertical distribution and transport of radioactive strontium aerosols in rain and air across trade wind inversion at Hawaii 23 p4124 A66-41843
VERTICAL FLIGHT
 Flight trajectory analysis of body in vertical ascent from planet under constant thrust, by numerical integration of motion equations 13 p2188 A66-26292
 Vertical landing on atmosphereless body under constant thrust in high order approximate solution 17 p3017 A66-33241
VERTICAL MOTION
 Cause and elimination of vertical oscillations of aircraft landing gear system in motion of aircraft over unpaved airfield 01 p0011 A66-10470
 Four wind profiles analyzed for vertical scale structure and wind shear in mesosphere due to falling sphere 11 p1729 A66-22564
 Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613
 Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical Reynolds number 15 p2617 A66-29399
 Lower thermospheric turbulence investigated for scale size, turbulent velocity spectra and energy dissipation rate 15 p2491 A66-29954
 Vertical propagation of long period small amplitude temperature perturbation in medium with photochemical processes and radiative heat transfer 16 p2742 A66-31642

Divergent vertical helicopter oscillations due to pilot presence in collective control loop and physiological response of pilot to oscillations 17 p2843 A66-32719
 Surface friction induced vertical motions for nonaccelerated flow calculated from surface pressure pattern 18 p3129 A66-33963
 Vertical velocities in atmospheric front motions, noting pressure and temperature field distributions and application of computer to solve obtained equations 20 p3593 A66-37750
 Statistical characteristics of atmospheric ozone distribution, determining autocorrelation and cross correlation functions, concentration and temperature profiles 20 p3552 A66-37751
 Vertical motion of moisture fields and saturation deficit determination from nephelanalysis of Tiroos cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054
VERTICAL PERCEPTION
 Perception of apparent vertical without visual cues depending on longitudinal axes of body and head to direction of resultant acceleration above 1 g 04 p0468 A66-14086
VERTICAL TAKEOFF
 Straight-through wind tunnel tests on VTO aircraft models with fully simulated lift systems [AIAA PAPER 65-720] 03 p0352 A66-12578
 Calculation method for pinpointing design characteristics and performance parameters of sounding rockets 09 p1464 A66-20543
VERTICAL TAKEOFF AND LANDING
 S VTOL
 S VTOL AIRCRAFT
VERTIGO
 SA BARANY CHAIR
 Spatial disorientation experiences of Army helicopter pilots, noting accident and incident statistics, methods of correction, etc 11 p1648 A66-22578
 Alternobaric /pressure/ vertigo severity and frequency among Swedish RAF pilots 11 p1644 A66-22584
VERY HIGH FREQUENCY
 Light activated negative resistance effect, discussing VHF signal generation via semiconductor photocurrent modulation 06 p0892 A66-16680
 Comparison of signals received on two VHF scatter circuits of different geometry but viewing common scattering region 08 p1184 A66-19211
 Threshold technical possibilities of measuring phase /frequency/ fluctuations of generators by Vhf 20 p3513 A66-37150
 HF and VHF guided propagation in ionospheric whispering gallery treated by geometrical optics, emphasizing long-range paths between two terminals in ionosphere 22 p3863 A66-39933
VERY HIGH FREQUENCY RADIO EQUIPMENT
 Disk and parasitic resonance of broadband and small circulators for UHF and VHF 01 p0040 A66-10551
 Resistor stabilized VHF power transistor discussing power output, reliability, bias stability and application 05 p0642 A66-14566
 Coaxial helical resonator for VHF filters with sharp selectivity 05 p0644 A66-14578
 Cascode configuration using two interconnected field effect transistors to reduce reverse feedback capacitance for better suitability for VHF communications circuits 05 p0645 A66-14585
 VHF aircraft-satellite relay /VASR/ as means of improving long-range communications, with flight test results 06 p0825 A66-15988
 Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 07 p1002 A66-17775
 International satellite communications, noting application for air traffic, using VHF band 09 p1346 A66-20561
 VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731
 Coaxial helical resonator for VHF filters with sharp selectivity 11 p1666 A66-22688

VHF overlay transistor for lightweight single-sideband equipment, noting design, output and efficiency 13 p2035 A66-25510
 Packaging VHF/UHF circuits involved in design of RF equipment used in air and spaceborne vehicles 13 p2041 A66-25844
 Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 13 p2058 A66-25862
 Broadband slotted cone antenna exhibiting multioctave bandwidth properties in UHF-VHF range 14 p2256 A66-27912
 Conventional VHF circuits adaptation to equivalent molecular structures, considering tuner and amplifiers 17 p2883 A66-32123
 VHF communications system for S-band transmission link 20 p3515 A66-37228
 Civil aviation communications between pilot and ground controller on over-ocean flights, considering use of VHF and HF and synchronous satellite to extend VHF 20 p3515 A66-37234
VERY LOW FREQUENCY
 VLF radio propagation conditions and phase delays in design of long range navigation aids 02 p0259 A66-12053
 Frequency spectrum of large positive and negative Doppler shifts in VLF signals in whistler mode of propagation 04 p0517 A66-14182
 Relationships between VLF phase fluctuations, radio signal fading and natural geomagnetic background observed in British Columbia 04 p0487 A66-14367
 LF/VLF pulse radiation using solid state elements in switching mode to generate RF power, presenting time and energy functions 05 p0652 A66-14596
 Whistler in Alouette I satellite VLF recordings, variation of time delay with frequency given by Eckersley law time delay and additive correction term 05 p0668 A66-14797
 Propagation between Earth and ionosphere up to 100 km of VLF radio waves sent by ground transmitter, calculating field pattern 05 p0672 A66-15041
 Omega, navigation radio aid with worldwide coverage 08 p1249 A66-18708
 Proton whistler observations from Injun III VLF data, including spectrograms, time-latitude-altitude graphs and theory 08 p1217 A66-19392
 Fractional concentration of hydrogen ions in ionosphere from VLF proton whistler measurement 08 p1218 A66-19393
 Dynamic Navigation System /Dynav/ for providing aircraft velocity and position-fixing information from VLF Doppler range rates 08 p1252 A66-19507
 Cylindrical and truncated cone-type metallic dipole antennas for reception of VLF, examining theory of behavior in ionosphere 09 p1340 A66-19847
 Design feasibility of dipole antenna for measuring electric fields at VLF from satellite moving through ionosphere 09 p1340 A66-19848
 VLF sudden phase anomaly data for 1963 compared with solar X-ray emission measurements made by Vela satellites 09 p1435 A66-19972
 Lower ionospheric characteristics determined by VLF radio waves propagated over long distances by multiple reflections between Earth and D region 09 p1370 A66-19973
 Diurnal variation of aurora zone geophysical disturbances, examining VLF phenomena including noise, aurora and ionospheric absorption 09 p1372 A66-20375
 Direct relation between SSC and enhancement of VLF chorus and ULF with SSC observed simultaneously on day and night side of Earth 09 p1344 A66-20387
 VLF phase perturbations produced by Soviet high altitude nuclear explosion of November 1, 1962 10 p1496 A66-21153
 VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136
 Causes giving rise to or influencing change of integral field strength of atmospherics during solar flare in VLF region brought to quantitative stage 14 p2237 A66-27400

VLF radio wave propagation in model Earth ionosphere waveguide with finite surface impedance and arbitrary height 15 p2449 A66-28598
 VLF emission associated with flickering aurora 16 p2696 A66-30721
 Communication effectiveness over VLF paths impaired by variability of VLF field strength due to modal interference effects 16 p2653 A66-30723
 Phase variation of vlf radio waves received from NPG/NLK 16 p2653 A66-30799
 VLF dipole antenna impedance values, magnetotonic and collision effects in ionospheric magnetoplasma 17 p2874 A66-32386
 Receiver design and results of dual VLF transmissions for obtaining timing information 19 p3357 A66-35693
 Whistler mode excitation in ionosphere by leakage from VLF guide-wave modes, noting nonreciprocal attenuation over north-south propagation path 22 p3863 A66-39932
 VLF radio wave propagation in model Earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary 22 p3863 A66-39936
 VLF electric fields in magnetosphere surveyed with polar orbiting spacecraft 1964-45A may produce large amplitude plasma oscillations 22 p3903 A66-39937
 VLF resonances in conjunction with topside sounder provide information about composition and temperature of terrestrial ionosphere 22 p3909 A66-39975
 Sunrise effect on amplitude of very-long-wave signal level 23 p4036 A66-41201
 Increase in standard deviation of VLF propagation over very long paths 24 p4172 A66-42420

VERY LOW FREQUENCY EMISSION RECORDER

Broadband VLF emissions observed to determine whether whistler mode signals appearing below ionosphere travel toward polar regions and at low latitude from auroral zone 01 p0012 A66-10893
 Precipitation of solar cosmic ray particles in polar cap regions detected, using test network for reliability of VLF phase recordings on transpolar propagation-paths 03 p0417 A66-12655
 Whistler and VLF emissions recorded in northern Italy, noting daily occurrence and positive correlation with geomagnetic activity 05 p0671 A66-14983
 Polar cap absorption effect on polar VLF emissions used for analysis of solar proton events 09 p1374 A66-20880
 Field produced at 100 km altitude by ground located VLF transmitter examined, noting absorption, power propagation and propagation variation 10 p1526 A66-21127
 VLF anomalies on midlatitude paths during local nighttime not caused by solar flares, nuclear detonations or magnetic storms 13 p2074 A66-26365
 Ion composition and natural electromagnetic emissions of VLF phenomena observed by Alouette I and II 15 p2496 A66-30074
 Radioelectric emission of VLF at two conjugate points 16 p2693 A66-30590
 Electron densities, magnetic field strength and energetic particle fluxes in magnetosphere determined, using VLF background radiation 22 p3911 A66-39990

VESSEL

S CIRCULATORY SYSTEM

S PRESSURE VESSEL

VESTIBULAR APPARATUS

Disorientation in flight, discussing vestibular apparatus, perception and illusion and effect on pilot performance 10 p1494 A66-22138
 Vegetative responses of human organism to angular, linear and Coriolis accelerations 13 p2011 A66-26230
 Model of vestibular apparatus emphasizing function of otolithic part, noting reactions of receptor-neuron system to g forces 15 p2444 A66-29496
 Gravitational environment, effect of change on frogs measured using gravitoceptors in vestibular apparatus 17 p2865 A66-32183
 Twofold transversely applied 8-g centrifuging effect on functional state of otolithic part of vestibular apparatus of

guinea pigs 23 p4026 A66-41337
 Vibration stimulus effect on oxygen metabolism of brain in rats with partial destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41341

VESTIBULAR EFFECT

Vestibulo-ocular disorganization in aerodynamic spin, noting roll plane of skull 03 p0325 A66-12363
 Hypoxic hypoxia and hyperventilation effect on nystagmus induced by angular acceleration 03 p0326 A66-13356
 Vestibular sickness susceptibility under conditions of weightlessness 04 p0467 A66-14082
 Comparative effects of prolonged rotation at 10 rpm on postural equilibrium in vestibular normal and vestibular defective human subjects 06 p0813 A66-16826
 Vestibular system response of pilot and nonpilot to banking and turning in USAFSAM blaxial simulator 09 p1335 A66-20530
 Vestibular function in conditions of subgravity 11 p1641 A66-22481
 1 g rotating linear acceleration vector producing compensatory nystagmus, noting effects when rotation axis was vertical and horizontal 11 p1643 A66-22579
 Interaction between optokinetic and vestibulo-ocular responses during head rotation in various planes 11 p1643 A66-22583
 Vestibular reactions of deaf during angular and corollis accelerations 13 p2010 A66-25892
 Vestibular neuronal response to rotating linear acceleration vectors, noting generation of compensatory ocular nystagmus 17 p2858 A66-32177
 Vestibular tolerance differences among members of crew of Voskhod to 24-hour stay in zero-weight environment 19 p3286 A66-36377
 Manually imposed angular accelerations during weightlessness period of parabolic flight, obtaining electrooculographic recordings for analyzing nystagmic response 19 p3286 A66-36382
 Human vestibular responses to combined stimulation by angular and linear accelerations tested, noting relation between tolerance and habituation 19 p3287 A66-36647
 Vestibular training for aerospace operations, discussing function of otolith and semicircular organs, suppression, sensory control theory, spatial disorientation and motion sickness 21 p3700 A66-38634
 Prolonged gamma-radiation induced electromyographic characteristics of vestibular reflex guinea pig hind-leg muscle 23 p4028 A66-41349
 Vestibular analyzer changes of guinea pigs exposed to twofold vibration and prolonged gamma irradiation 23 p4028 A66-41350
 Slow waveform of eye position change relative to head oscillating sinusoidally about vertical axis 24 p4163 A66-42449

VESTIBULAR TEST

Brief Vestibular Disorientation Test /BVDT/ assesses subject reaction produced by head movements in rotating chair 11 p1647 A66-22574
 Human otolith and cupula system behavior under anomolous gravity conditions 15 p2434 A66-29446
 Portion of human vestibular system response determined through eyeball counterroll measurement, noting experimental techniques and methods of computing results 16 p2639 A66-30807

VFW-HEINKEL VC-400 AIRCRAFT

Interferometric hologram evaluation and real time vibration analysis of diffuse objects 07 p1144 A66-18040
 Eigenvalues of vibrating homogeneous membrane 09 p1396 A66-20631
 Monograph on nonlinear vibration and stability theory 11 p1721 A66-22267
 Mass matrix to solve rectangular plate vibration problems 12 p1957 A66-23610
 Text on vibrational mechanics covering conservative and dissipative vibrating systems of one, two and multidegrees of freedom, aeroelastic instability, etc 14 p2396 A66-27366
 Relative vibrational transition probabilities and r centroids for 36 bands of C-X system of singly ionized nitrogen molecule 14 p2337 A66-27705
 Motion equations for large-amplitude transverse vibrations of tensioned string and necessary conditions for linearization 17 p2959 A66-33033
 Acoustics, shock and vibration bibliography of 1959-1965 meetings of Institute of Environmental Sciences 17 p2904 A66-33040
 Shock and vibration - Underground, under water and in air - Volume 2, Symposium on environmental engineering and society, London, April 1966 18 p3095 A66-34205
 Basile hypothesis applied to diagonalization of vibration equation matrix, using phase curve 20 p3589 A66-36953

VIBRATION ABSORBER

Passive electrical simulation of properties of Maxwell type viscoelastic connection in vibration absorber, noting dynamical analogy and velocity-acceleration optimization 05 p0775 A66-15300
 Steady state harmonic and combination response of nonlinear dynamic vibration absorber tuned to two forcing frequencies 12 p1962 A66-24001
 Optimum vibration-insulating system for devices fixed on moving plants analytically constructed, using theory of filters 15 p2498 A66-28775
 Dynamic absorber tuning and damping of resonance of cantilever beams excited by sinusoidally varying force 17 p3030 A66-33034
 Book on nonlinear theory of vibration absorbing systems especially elastic shock absorbers 23 p4137 A66-41053

VIBRATION DAMPER

Structure-borne active vibration damper and relation of passive and reactive feedback paths to system stability 03 p0373 A66-12821
 Damping properties in terms of dynamic storage and loss moduli in elastomers, thermoset resins and semicrystalline polymers 05 p0705 A66-14551
 Oscillation amplitude of rotor with hydraulic dampers on elastic supports 14 p2374 A66-27689
 Passive wobble damping system with pendulum damper designed for manned rotating space station 20 p3664 A66-38159

VIBRATION DAMPING

Natural frequencies of sheet-stringer panels which do not deflect laterally but rotate when subjected to arbitrary external loads 01 p0148 A66-10137
 Optimum proportion of surface-damping treatment to surface metal thickness to minimize randomly excited skin surface stresses in stiffened plate structure 01 p0149 A66-10148
 Damping parameters for extensional and flexural vibrations of sandwich plates and for axisymmetric vibrations of sandwich cylindrical shells 01 p0149 A66-10149
 Modification of Ritz equations for natural frequencies of homogeneous isotropic plates to apply to natural frequencies of laminated panels 01 p0149 A66-10150
 Optimization of viscoelastic damping materials for use in specific composite systems of metal skins and damping viscoelastic layers 01 p0150 A66-10151
 Mechanisms and relative magnitudes of internal damping in structural metals subjected to multiaxial state of stress 01 p0150 A66-10153

- Comparison of two tuned-damping concepts applied to pinned rectangular plate, fluid flow past piston and viscoelastic layer in shear 01 p0150 A66-10154
- Frequency, amplitude and stability of natural damped oscillations of bar on two hinged supports with concentrated load at one end 01 p0155 A66-10741
- Forced vibration of system with polygonal hysteresis loops in presence of constant force 01 p0159 A66-11174
- Forced vibration in nonlinear system with Coulomb and combination 01 p0159 A66-11176
- Friction 01 p0159 A66-11176
- Damping effect on subharmonic vibrations in nonlinear oscillating system 01 p0159 A66-11178
- Optimal surface damping in two-layered cantilever for random periodic loading decreasing in symmetrical cycle 01 p0160 A66-11180
- Parameter and matrix solution techniques for analyzing forced vibrations response of damped multidegree of freedom systems [AIAA PAPER 65-786] 03 p0438 A66-13070
- Structural damping by means of integrally damped sheet laminates for controlling resonant response 04 p0525 A66-13639
- Thermal counterflow of He 2 in wide channels of rectangular cross section investigated in terms of damping of small-amplitude transverse vibration of fine wire 04 p0510 A66-13712
- Friction induced vibration to determine existence of critical velocity of driven surface [ASME PAPER 65-LUB-5] 04 p0527 A66-14241
- Parametric response of elastic clamped-free column, noting agreement between theory and experiments for first three spatial and first four temporal modes 04 p0594 A66-14391
- Macromechanisms of composite structure damping, using viscoelastic materials as in extensional and shear deformation 05 p0772 A66-14552
- Curves relating loss factor, characteristic mode value and frequency parameter for designing damped sheet laminates 05 p0687 A66-14992
- Aerodynamic coupling between longitudinal and lateral-directional rigid body modes of aircraft trimmed at nonzero sideslip angles and degradation of dutch roll damping 05 p0606 A66-15081
- Perturbed-motion damping for characteristic equation with null root or two imaginary roots 05 p0717 A66-15313
- Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1] 05 p0776 A66-15425
- Steady state response of damped cylindrical sandwich shell under radially symmetric time harmonic pressure [ASME PAPER 65-WA/UNT-1] 05 p0779 A66-15601
- Pendulum motion in system of coordinates related to pendulum base, considering damping of absolute and relative angular velocity 08 p1223 A66-18892
- Self-excited vibrations of damped systems with traveling waves, using oscillators moving along beam resting on elastic foundation, noting flutter of plates and shells 08 p1309 A66-19116
- Damping of small amplitude vibrations of fine wire as probe of onset and development of critical flow phenomena in He 2 at moderate Reynolds numbers 09 p1365 A66-20016
- Damping effects on initial angular motion of spinning shell with overturning and yawing moment 09 p1466 A66-20260
- Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 09 p1469 A66-20968
- Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1] 10 p1616 A66-21483
- Amplitude calculation of forced mass vibrations in damped linear mechanical system from column matrices of oscillation modes of eigenfrequencies 11 p1783 A66-23018
- Ureka, vibration balancing device capable of reducing helicopter shaft eccentricity to zero 11 p1638 A66-23260
- Mistuning effect on vibration of turbomachine blades induced by wakes 12 p1959 A66-23796
- Bounds for decay times of pendulum damper vibrating in plane containing spin axis of space vehicle [AIAA PAPER 64-658] 12 p1954 A66-24693
- Transient motion of simple mechanical systems using vectors as alternative to finding equivalent control system and solution by root locus method 12 p1971 A66-24975
- Turbine blade vibration damping, expressing mechanical forces via method of concentrated masses 12 p1938 A66-24982
- Defects in gallium arsenide crystals studied by internal friction with measurements showing damping peak at 140 degrees C 13 p2157 A66-25045
- Control of large engine motion from soft mountings during starting and stopping [SAE PAPER 660222] 13 p2088 A66-26399
- Text on dynamics of vibrations covering oscillations with variable and constant amplitude, damping, differential equations of motion, nonlinear oscillations, wave propagation in elastic solids, etc 13 p2207 A66-26573
- Forced oscillations of three-layer plate used as vibration dampers for engine components 14 p2400 A66-27696
- Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 15 p2468 A66-26926
- Optimum control of two-dimensional oscillating system when placing limitations on control, using Butkovskii L-problem of moments 16 p2668 A66-30753
- Amplitude ratio of two forced vibrations for asymmetric shaft rotor excited by periodic external force 16 p2714 A66-30811
- Flexible baffle effect on nature and magnitude of damping and sloshing motions of liquid propellants over wide range of conditions 16 p2685 A66-30915
- Statics and dynamics of measuring devices, deriving equation for oscillating parameters via Taylor series 16 p2709 A66-31693
- Nonstationary automatic control systems design by reaction quenching method 17 p2902 A66-32580
- Absorption of vibration, high acceleration and impact shocks on instruments of rigid moving vehicles using damping or spring systems 17 p3027 A66-32604
- Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of rotor 17 p3027 A66-32605
- Shaft-rotor system with bearing configuration such that load-deflection relation at rotor is nonlinear and radially symmetric, noting harmonic whirl and free undamped vibrations 17 p2930 A66-32892
- Measurement method for aerodynamic damping of helicopter rotors in forward flight 18 p3047 A66-33684
- Characteristic phase-lag method for analyzing forced response of damped systems used in optimal multipoint excitation 21 p3824 A66-38568
- Shell immersion in moving fluid under vibrations which can be damped or amplified, analyzing instability due to fluid constituting energy reservoir 21 p3825 A66-38578
- Continuous system replacement by lumped parameter models, considering undamped flexural vibrations of beam systems, particularly free vibrations 21 p3825 A66-38581
- Matrix equations of rigid-body motion for general vibration isolation system, analyzing conditions for decoupling translational and rotational motions 21 p3770 A66-38650
- Energy dissipation effect on panel vibration damping due to structural joints 21 p3827 A66-38693
- Rotational axisymmetric mean flow and damping of acoustic waves in solid propellant rocket 21 p3807 A66-38720
- Damping measurement for resonant base oscillation 21 p3828 A66-38746
- Resonance excitation and Cerenkov damping of HF plasma oscillations 21 p3780 A66-39004
- Steady state response of damped cylindrical sandwich shell under radially symmetric time harmonic pressure [ASME PAPER 65-WA/UNT-1] 21 p3832 A66-39530
- Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-770] 22 p3895 A66-40651
- Pulse and harmonic techniques used in flight flutter testing, emphasizing natural turbulent excitation and limitations [ICAS PAPER 66-10] 23 p4015 A66-41256
- General method of averaging transformed motion equations of slightly damped nonlinear oscillations of simple pendulum 23 p4090 A66-41542
- Nonlinear damping effectiveness in stabilizing time delayed systems compared to linear damping 23 p4091 A66-41692
- Transient discontinuous oscillation of system with two degrees of freedom and Coulomb damping 23 p4024 A66-41948
- Satellite gravitational stabilization system in orbital coordinate system, considering atmospheric resistance and damping natural oscillations 23 p4134 A66-41979
- Rotor instability factors, noting difficulty of applying linear theory to actual damping forces in rotor 24 p4287 A66-42269
- Hamilton variational principle formulation of damped acoustical-structural vibration motion equations, with application to radiation problems 24 p4291 A66-42858
- ## VIBRATION EFFECT
- Ultrasonic soldering and welding, noting contribution of vibrations to metal joining [SAE PAPER 650761] 01 p0078 A66-10837
- Strongly nonlinear vibrating system interaction with energy source of limited capability 01 p0159 A66-11172
- Vibration exposure with varying peak and rms acceleration and frequency in low altitude high-speed flight 03 p0329 A66-13355
- Vibrational excitation effect in hydrogen-deuterium exchange 05 p0718 A66-15156
- Bistable vibration of rotors in bearing clearance [ASME PAPER 65-WA/MD-1] 05 p0689 A66-15520
- Human response to sinusoidal and random vibrations [ASME PAPER 65-WA/HUF-19] 05 p0625 A66-15693
- Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA/GTP-3] 05 p0780 A66-15718
- Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-16065
- Endocrine and metabolic response of restrained dogs to body vibration, nonanesthetized or anesthetized, showing increase in plasma and blood epinephrine 06 p0812 A66-16822
- Parametrically excited oscillations in flat shells of rectangular cross section subjected to rim loading by pulsating middle-surface forces 07 p1145 A66-18226
- Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889
- Machine parts of complicated form manufactured from powdered materials by vibrational compacting 10 p1540 A66-21506
- EEGs of monkeys stimulated cyclically by whole-body vibration, plotting coherence functions relating brain records to acceleration records 12 p1806 A66-24228
- Granato-Luecke frequency dependent internal friction calculated for pinning point distributions after vibration at dislocation temperature 12 p1971 A66-24922
- Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells 13 p2194 A66-25142
- Eigenvalue density in vibration of elastic plates and shells, noting concentration points for natural frequencies and influence

of rotational inertia and shear strain 14 p2398 A66-27455

Blade vibration simulation in helicopter trainer by applying amplitude motion to trainer 14 p2271 A66-28030

Cystamine hydrochloride, strychnine nitrate and hexobarbital injections effect on mice subjected to vibration, noting vibration effect on swimming 15 p2431 A66-28740

Vibration effect on reception of certain organs and tissues of white mice to dye introduced intravenously 15 p2437 A66-29477

Effect of combined action of accelerations, vibration and radiation of nuclei of bone marrow cells in mice 15 p2437 A66-29478

Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-29836

Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA-GTP-3] 16 p2813 A66-30342

Cardiovascular measurement on anesthetized dogs subjected to vibration, noting recording techniques, instrument sensitivity, etc [AIAA PAPER 66-442] 16 p2642 A66-30622

Vibrational and static plastic deformation effect on structure of 40KhNMA steel and VD 17 aluminum alloy 16 p2728 A66-31800

Evolution of two different homogeneous media separated by straight wall with arbitrary transmission and reflection properties, noting heat flow, vibration, diffusion coupled vibration, etc 17 p3036 A66-32842

Vibration exposure of mice 4 and 24 hours prior to irradiation tends to lessen mortality and increase mean longevity 17 p2861 A66-32938

Vibration effects on chromosomes of *Tradescantia paludosa* and other microspores subjected to Vostok satellite conditions 18 p3058 A66-33781

Laboratory measurement of psychological, pathological and physiological effects of LF vibration on man 18 p3062 A66-34202

Vibration analysis of CSIRO 210-ft radio telescope, discussing natural frequencies, structure resonance effects, error detection, etc 18 p3083 A66-34297

Aircrew response effects to prolonged low altitude high-speed flight vibration 19 p3287 A66-35507

Chemical blanking and vibratory radiusing of Mo alloys 19 p3370 A66-36134

Origin of chest pains associated with G force sinusoidal vibration, noting effect of anterior chest wall anesthetization, results suggest pain originates in chest wall 19 p3286 A66-36375

Effect of vibration of base on indications of gyrocompass extended to include LF sinusoidal displacements of base corresponding to rocking motion, noting free play effect, gyro drift and vertical moment 21 p3738 A66-38989

Vertical sinusoidal vibration as psychological stress in considering capacity for handling information 22 p3854 A66-40007

Repeated vertical/head-tail vibration effect on functional state of spinal reflex arc of guinea pigs 23 p4026 A66-41338

Repeated vertical vibration and noise effects on conditioned reflexes of rats 23 p4026 A66-41339

Vibration effect on bioelectric activity of brain and oxygen consumption, using experimental rats 23 p4027 A66-41340

Vibration stimulus effect on oxygen metabolism of brain in rats with partial destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41341

Vibration effect on conditioned reflexes, oxidation mechanism and electric activity of brain in rats 23 p4027 A66-41342

Vibration effect on external respiration of rats, noting independence of oxidation metabolism from respiratory changes 23 p4027 A66-41343

Laminar gas jet mixing as affected by periodic vorticity produced by mechanical vibration of orifice 23 p4055 A66-41497

Machine parts of complicated form

manufactured from powdered materials by vibrational compacting 23 p4073 A66-41527

Gyroscopic dynamics for obliquity in gimbal axes noting free motion, nutation and drift rate 23 p4071 A66-41698

Vibrational energy exchange between molecules during collision behind direct shock wave front examined as function of wave velocity 23 p4010 A66-41732

Neutrino energy losses from vibrating neutron stars, noting density profiles 23 p4131 A66-41863

Free and forced vibration effect on drift of gyroscope supported in gimbals 23 p4071 A66-41981

Thermodynamics of real air expansion using state equation applied to large temperature range, including contribution of vibrational energy 24 p4293 A66-42155

Laboratory measurement of psychological, pathological and physiological effects of LF vibration on man 24 p4167 A66-42575

Transmissibility, isolator mass effects, vibration source and receiver characteristics for HF vibration isolation problem 24 p4291 A66-42860

Perturbation of ruby laser by vibrating one of mirrors constituting resonant cavity 24 p4225 A66-42999

Electric contact design factors for shock vibration environments 24 p4186 A66-43058

VIBRATION MEASUREMENT

Site selection, construction features and acceleration criteria for inertial test facility 01 p0052 A66-10040

Viscosity measurement using LF vibrations and two types of vibration viscometer 03 p0368 A66-12519

Transverse vibrations of viscoelastic rod hinged at ends and sinusoidally excited by inertia 03 p0440 A66-13244

Displaced frequency technique to determine generalized masses of freely vibrating structure 06 p0967 A66-16930

Linear vibratory system response to random impulses, describing nonstationary white noise and mean square resonance 07 p1143 A66-17731

Flexible unbalanced rotating shaft, discussing vibration of system with axial symmetry in asymmetric bearings 07 p1037 A66-17733

Data acquisition of acoustic, vibration and heat flux during static rocket testing, using balloon rigging arrangement 08 p1202 A66-18927

Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638

Calculation method for vibrations of twisted pinned blades under combined bending and torsion 12 p1965 A66-24053

Vibration constant of electromechanical transformation in electrodynamic vibrators 13 p1997 A66-25079

Calculation of natural twisting and bending vibrations of beam whose characteristics vary along length 14 p2400 A66-27683

Small-order vibration displacements measurement by Michelson interferometer, using CW laser source 17 p2926 A66-33037

Structural dynamics research on launch vehicles at Langley Research Center, examining analytical method limitations and need for improved mathematical models for vibrational characteristics 18 p3240 A66-33818

Sag and vibration of flexible rotating shaft with axial asymmetry 18 p3116 A66-33968

Natural vibration frequencies of rocket nozzles, accounting for anisotropic elastic behavior, internal gas dynamic pressure, boundary conditions, etc 18 p3258 A66-34601

Laser application for vibration measurement utilizing Doppler shift produced on wave reflected from surface vibrating normal to beam path 19 p3356 A66-35673

Successive approximation method for solving fundamental equations of nonlinear flexural vibration for rectangular elastic plate, noting effect of temperature and large amplitude 20 p3672 A66-38236

High-speed rotor operation in bearing clearances, discussing induction of nonlinear vibration, harmonic generation and computer simulation results

[ASME PAPER 66-MD-1] 21 p3741 A66-38474

Vibration measurement results on air supported isolation platforms, noting effects of heavy vehicle passing sound pressure 21 p3722 A66-38874

Rational one-dimensional theory of wave propagation and vibrations in elastic bars with rectangular cross section 24 p4284 A66-42137

Microwave transducers for measuring geometric dimensions and displacements in industrial process control 24 p4214 A66-43012

VIBRATION MEASURING APPARATUS

SA SEISMOGRAPH

Shock and vibration measurement system with error correcting techniques including dynamic calibration data, noise detection, etc [SAE PAPER 650820] 01 p0069 A66-10822

Stress distribution measurement by vibration method, applying hand-held extensometer place by place on surface of structure subjected to dynamic load of finite amplitude [AIAA PAPER 65-785] 03 p0438 A66-13069

Vibration measuring apparatus for resonance frequencies of turbines and other machine parts 04 p0519 A66-13758

Electromechanical correction of vibrometric devices, using Lagrange-Maxwell method for refining expressions 06 p0879 A66-16421

High sensitivity method for measuring small phase modulations according to line width of Lissajous figures 07 p1005 A66-17346

Design and operation of electromagnetic LF vibration counter, also used as tachometer when connecting electric timer into counter circuit 09 p1380 A66-20308

Capacitive torsional vibration transducer for measuring angular displacement of vibrations in engine shaft 12 p1880 A66-23845

Random vibration testing, discussing Derritron vibration control oscillator and frequency measurement by splitting into narrow bands 16 p2715 A66-31202

Accelerometer standard designed for reciprocity and comparison calibrations of vibration transducers 18 p3112 A66-34207

Departure phenomena of pointer type moving-coil instrument for electrical measurement with capability of torsional vibrations 23 p4071 A66-41952

VIBRATION MODE

Flexible satellite attitude control, analyzing satellite as thin circular plate with application to radio telescopes, noting vibration modes and nonlinear gyroscopic coupling terms 01 p0142 A66-10674

Square plate vibration patterns determined, using stereophotogrammetry 01 p0157 A66-10921

Oscillation modes on oscillators in locally concentrated magnetic field determined by simultaneous study of predominant and helical modes 01 p0116 A66-11195

Natural frequencies and modes of vibration of prestressed toroidal membrane under internal pressure [AIAA PAPER 65-110] 02 p0297 A66-11545

Aerodynamic damping effect on cascading double circular arc blades vibrating in translatory mode 03 p0313 A66-12397

Axisymmetric modes and frequency vibration of thin conical shells subjected to rapid surface heating [AIAA PAPER 65-788] 03 p0434 A66-12558

Elliptic eigenvalue for reentrant region to determine vibration modes of membrane 03 p0387 A66-12620

Model consisting of closed rectangular box with one vibrating panel, comparing results of one-term approximation with orthogonal-mode solution 03 p0437 A66-12809

Transient response of truncated conical shell due to traveling pressure front of constant velocity and amplitude approximating vibration modes 03 p0437 A66-12819

Equivalent networks for transversely vibrating bars under various end conditions 03 p0437 A66-12820

Vibration modes of gaseous medium in parabolical cavity investigated for development of liquid rocket motor 03 p0356 A66-12823

Dynamic matrices for natural vibrations of

- missile considered as beam and as thin walled shell under given boundary conditions 04 p0587 A66-13534
- Nonlinear spring-mass system with many degrees of freedom subjected to periodic exciting forces, deducing steady state forced vibrations equal to forcing function [ASME PAPER 65-APMW-30] 04 p0593 A66-14230
- Vibrational analysis of multicomponent systems using Rayleigh-Ritz type of approximation, treating cases of fuselage and T tail assembly 04 p0594 A66-14389
- Gravimeter monitoring S dilatational mode of Earth, consisting of fused quartz operating in high vacuum incorporated into electrostatic null-seeking servo 04 p0524 A66-14453
- Damping and spring forces acting on single mode oscillator considered as power series, deriving power spectral density of response through perturbation 05 p0717 A66-15738
- Computer analysis of axisymmetric free vibrations of orthotropic shells of revolution and elastic rings [AIAA PAPER 65-109] 05 p0781 A66-15790
- Current instabilities in gallium arsenide, noting oscillation frequency and volt-ampere characteristics 06 p0925 A66-16688
- Technique for extracting natural modes and frequencies from resonance tests 06 p0987 A66-16929
- Transversely isotropic cylindrical shell vibrations solved via Bessel function for flexural, axisymmetric and torsional modes 07 p1143 A66-17499
- Nonlinearity effect on harmonic mode shape in almost-periodic vibration of autonomous weakly-nonlinear multiple degree of freedom systems 07 p1144 A66-18094
- Displaced frequencies in vibration analysis, emphasizing close or equal natural frequencies 07 p1146 A66-18278
- Thin shell theory to determine natural frequencies for cylindrical shells with any end conditions 07 p1146 A66-18279
- Electrostatic waves in uniform plasma without collisions in linear approximation, presenting normal oscillation mode as model for damped and unstable waves 11 p1744 A66-22447
- Dynamic asymmetry and anomalous vibration characteristics of thin walled steel shell 12 p1957 A66-23614
- Variational method for determining frequencies and modes of oscillation of pinned variable incidence blade 12 p1965 A66-24052
- Coupled parametric and self-excited vibration of plate with supersonic flow past one side, assuming periodically varying forces act in plane of plate, noting degeneration of parametric resonance main region 14 p2398 A66-27456
- Separation of variable technique to solve partial differential equations for vibration of cable containing turnbuckle 14 p2399 A66-27660
- Response of vibrating body with two degrees of freedom when colliding with stiff body, useful for communication relays and terminal analysis 14 p2407 A66-28040
- Modes and frequencies of transverse vibrations of composite beams 15 p2610 A66-29339
- Temperature dependent soft-mode lattice vibration in perovskite-type ferroelectric crystal single-oscillator 15 p2567 A66-29394
- Uniqueness, existence and stability of solutions to polyvibrant systems with delayed remainder and arguments 15 p2528 A66-29652
- Atomic scattering from perfect crystal, considering effects of absorption potential, surface vibrational modes momentum and energy exchange etc 16 p2752 A66-30389
- Centrifuge performance, noting angular velocity constancy vibration levels in terms of acceleration, temperature effects, etc 16 p2679 A66-30476
- Vibration modes of conical frustum shells with free ends [AIAA PAPER 66-450] 16 p2814 A66-30603
- Balancing of flexible rotors having arbitrary mass and stiffness distribution 16 p2714 A66-30858
- Self-excited vibrations of infinitely long cylindrical shell, situated in flow of supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31333
- Vibration mode of conical shells measured, showing that it varies with conical angle and circumferential wave number 16 p2821 A66-31381
- Natural environmental random excitation used to measure eigenfrequencies of linear structure 17 p3018 A66-31839
- Generalized masses of vibrational modes of elastomechanical system determined by three methods 17 p3018 A66-31876
- Monograph on digital computer solution of matrix problems of elastic system vibrations 17 p2877 A66-32987
- Natural frequency of thin rectangular plate for first six modes under clamped and free-edge conditions 17 p3032 A66-33526
- Nonlinear spring-mass system with many degrees of freedom subjected to periodic exciting forces, deducing steady state forced vibrations equal to forcing function [ASME PAPER 66-APMW-30] 18 p3249 A66-33591
- Necessary and sufficient conditions for existence of classical normal and quasi-normal modes in damped linear dynamic systems [ASME PAPER 65-WA/APM-25] 18 p3134 A66-33592
- Free vibrations of two flat plates fixed at right angle with cross-sectional distortion 18 p3251 A66-33678
- Vertical and horizontal structure of negative eigenvalue modes of diurnal atmospheric oscillation 18 p3107 A66-34524
- Natural frequencies and modes for axisymmetric vibration of orthotropic shells 18 p3258 A66-34605
- Static nodal patterns associated with normal modes of vibration disappear at large motion amplitudes due to occurrence of traveling wave component 19 p3474 A66-36344
- Liquid instability of vibrating partially filled elastic tank, emphasizing resonant breathing mode and frequency response 20 p3672 A66-38153
- Temperature dependence of absorption bands by localized vibration modes associated with substitutional impurities in phosphorus-doped gallium arsenide 20 p3622 A66-38249
- Normal modes of vibration in aircraft design, noting mass distribution effect on calculation accuracy 21 p3823 A66-38562
- Transfer matrix in calculating natural frequencies and normal modes of one-dimensional system, noting numerical stability problem in evaluating frequency determinant 21 p3823 A66-38563
- Automatic resonance testing technique for exciting normal modes of vibration of complex aircraft structures 21 p3823 A66-38566
- Response of continuous structure to random forces distributed over surface of structure estimated through normal mode method, exemplifying with aircraft fuselage in vibration 21 p3824 A66-38575
- Free vibration of composite system analyzed, using Rayleigh-Ritz method 21 p3825 A66-38583
- Coupled-modal equations for arbitrary vibratory system, with example for longitudinal vibrations of bar 22 p3992 A66-40298
- Vibration modes frequencies of lead telluride propagating in certain symmetric direction determined by inelastic neutron scattering 22 p3966 A66-40405
- Resonant frequencies and associated mode shapes of transverse vibrations of truncated conical shells over wide range of geometrical and modal parameters 23 p4139 A66-41691
- Orthogonality condition for eigenvalue problem of out-of-plane twist-bending vibrations of elastic ring for various sets of boundary conditions 23 p4139 A66-41693
- Steady state free and forced vibration response of beams supported on nonlinear springs of Duffing type 23 p4140 A66-41913
- Free and forced vibrations, static and dynamic stability and air elasticity of orthotropic shells and plates in time-alternating temperature field 23 p4142 A66-41955
- Nonlinear flexural vibrations of thin circular rings analyzed, using Galerkin procedure on motion equations 24 p4285 A66-42142
- IR active localized vibrational modes absorption in lithium and copper compensated silicon doped gallium arsenide 24 p4251 A66-42298
- Acoustic resonance tube used to change radiation to sound 24 p4213 A66-42854
- VIBRATION PERCEPTION**
- Holographic study of time average of coherent wavefronts scattered from vibrating object 07 p1144 A66-18034
- VIBRATION PROTECTION**
- Review of current knowledge and techniques for stabilizing test pads for high precision inertial guidance and control components 01 p0051 A66-10028
- Vibration and shock isolation of electronic equipment, examining isolation theory of periodic vibrations and random vibrations 11 p1667 A66-22764
- Problems of manned spacecraft design such as weight restriction, structural problems, heat protection, thermal control, vibration, etc 11 p1778 A66-23073
- Dynamic Antiresonant Vibration Isolator noting design, operation and capability of passively isolating VLF vibrations with high static stiffness 17 p2929 A66-32738
- Stability of precision gravity sensing tiltmeter determined, noting test facility used, results and performance characteristics 21 p3721 A66-38871
- Ground tilt isolation platform construction and performance noting design features, performance characteristics and efficiency 21 p3722 A66-38872
- Laboratory equipment protection from vibration environment, noting instrumentation and results 21 p3722 A66-38873
- VIBRATION SIMULATOR**
- Rotating orbiting cables, determining lateral vibration in orbital plane via mathematical model analysis [AIAA PAPER 66-98] 06 p0962 A66-16264
- Plane vibration characteristics of pneumatic tire model in form of elastically supported cylindrical shell [SAE PAPER 650492] 12 p1800 A66-23744
- Equalization systems for stochastic processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848
- Vertical vibration simulator for low-altitude high-speed /LAHS/ aircraft systems human factor research 13 p2059 A66-26547
- VIBRATION TESTING**
- Accelerometers and gyroscopes tested underground, discussing ground motion attenuation with depth investigated in Deep-Hole program 01 p0051 A66-10038
- Isolation of test pads for inertial guidance systems, investigating soil dynamics for proper selection of sites 01 p0052 A66-10039
- Random vibration testing and evaluation of optimization criteria in designing random vibration simulators [SAE PAPER 650824] 01 p0156 A66-10825
- Centralized vibration control of vibration testing noting details of automatic equalizers, switching panel, data reduction, etc 04 p0508 A66-14446
- Control of vibratory force input below test system, consisting of test item and mass representing foundation, compared to system where input to test item is motion controlled 04 p0528 A66-14448
- Vibration temperature chamber design considering access to top of shaker head, fast stabilization time and reduced downtime for maintenance and adaptability 04 p0508 A66-14449
- Structural response analysis of mechanical structure in total harmonic vibration tests [ONERA TP 303] 05 p0776 A66-15323
- Spectral density analog and digital analyses used for random vibration testing program for on-line equalization and off-line response [ISA PREPRINT 1.5-4-85] 05 p0683 A66-15500
- Self-oscillating hydraulic vibration apparatus capable of generating high cyclic actuating power for testing purposes 07 p1147 A66-18389

Total vibration testing of structures in VLF suspension with no effect on eigenmodes 08 p1306 A66-18724

Electric analogy to derive sound laboratory test specification and procedure for testing Nike-Tomahawk payload 08 p1308 A66-18928

vibration 08 p1308 A66-18928

Effect of environmental extremes on Miniature Inertial Navigation System, showing vibration and centrifuge testing data 08 p1251 A66-19491

Solder flow under wire insulation and effect on reliability, noting destructive and vibration test results 11 p1665 A66-22680

NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703

Equipment and methods for simulating natural or induced environments for reliability testing 12 p1833 A66-24079

Sine wave and wide band random vibration testing 14 p2399 A66-27568

Automatic control of wideband vibration testing of nonrigid structure with wide range of acceleration levels requiring computation of feedback 14 p2267 A66-27665

Static-equivalent load approach to designing structures for vibration environment 14 p2406 A66-28002

Monitoring device for detecting short-duration, vibration-induced electrical malfunctions, noting Gemini tests 16 p2677 A66-30454

Design concepts and requirements for combined acceleration-vibration testing 16 p2678 A66-30459

Forced aperiodic vibrations in idealized viscously damped system, subjected to parametric excitation by forcing function with uniformly accelerating frequency and constant displacement 16 p2678 A66-30460

Computer system for control of deceleration of electrodynamic shaker during vibration test 16 p2678 A66-30465

Frequency, dynamic response and jettison analyses for payload shrouds, with application to OAO 16 p2808 A66-30468

Parallel-filter automatic random equalizer for improved vibration testing 16 p2679 A66-30478

Centralization of environmental control equipment for cost reduction, improved tolerances and test 16 p2680 A66-30479

Nondestructive attachment of small electronic components and integrated circuits for simulated mounting in vibration and shock testing 16 p2680 A66-30481

Kohn-Kato bounds for natural frequencies of axial shear vibrations for solid circular bar, extending calculations through conformal transformations for bar with many-lobed plane curved boundary 17 p3022 A66-32014

True natural frequencies and modes determined from harmonic vibration test using not exactly appropriate excitation 17 p3024 A66-32332

Shock and vibration test characteristics revealing equipment failures, designed to have damage potential of field conditions 18 p3095 A66-34206

Capability, calibration and testing of linear variable differential transformers /LVDT/ for Gemini rendezvous 18 p3096 A66-34497

radar 18 p3096 A66-34497

Transient motion used in overall vibration testing of dynamic behavior of mechanical structure 20 p3666 A66-36954

Linearized equilibrium conditions for force densities of aircraft oscillating in flight, determining Rayleigh-Ritz equations, measuring elastomechanical parameters by vibration tests 21 p3825 A66-38579

Common electronic techniques for studying aeroelasticity in high performance aircraft 21 p3827 A66-38654

Hydraulic support system for free-flight simulation with Saturn V-Apollo vehicle, discussing stability requirements, upper bounds of system design, conversion from nonlinear to linear model, etc 21 p3722 A66-38876

Lateral vibration of rotating bar with

circular cross section under simultaneous axial force and torque, noting eigenvalue equations and damping 21 p3833 A66-39598

Vibration test specifications for flight vehicle components developed from broad engineering viewpoint 21 p3822 A66-39609

Aircraft in-flight vs ground testing, noting better SNR, freedom of jamming and decreased parameter requirements for vibration and transient monitoring 22 p3917 A66-39995

Rotor imbalance concentration on turbine vibration by comparison of oscillation amplitudes 23 p4072 A66-41402

VIBRATION TESTING MACHINE

Laboratory vibratory stand for calibrating sensors of oscillatory motion 01 p0070 A66-11020

Measurement instrumentation of compressor blade vibrations of Rolls-Royce lifting turbojets during testing 02 p0226 A66-11203

Vibration generator consisting of electrodynamic shake table, control amplifier, drive generator, auxiliary servo equipment and equalization 13 p2058 A66-25496

Multiple force generator for vibration testing large packages which minimizes problems of mobility, isolation and alignment 16 p2677 A66-30457

Averaging systems for control of sinusoidal vibration tests noting methods, crosstalk effect etc 16 p2678 A66-30463

Vibration equipment, discussing armature and control oscillator 16 p2679 A66-30474

Shipborne vibratory stress device for measurements on propeller blade and shaft by periodic data sampling 20 p3668 A66-37505

VIBRATIONAL FREQUENCY

Large amplitude-free oscillations of beam and plates by means of Ritz-Galerkin technique 02 p0297 A66-11554

Explicit lower bounds for lowest eigenvalue of nonhomogeneous membrane with fixed boundary, using Payne-Weinberger method 03 p0435 A66-12613

Vibration of thin cylindrical shell giving natural frequency and mode shape 06 p0967 A66-16931

Torsional vibration analog computer and determination of torsional oscillation frequencies in multimass in-line systems 07 p1144 A66-18164

Frequency of free oscillations of beam when two of four boundary conditions for elastic clamping at both ends contain nonlinear terms 10 p1613 A66-21325

Frequencies of free lateral resonant vibration of conical beams and truncated wedges for all combinations of simply supported, clamped and free end conditions 10 p1616 A66-21491

Natural frequencies and node patterns for clamped and simply supported square plates of linearly variable thickness solved by finite-difference approximation, using pulsed-air vibrator 11 p1780 A66-22329

Calculation technique for eigenfrequencies of parallelepiped-shaped flexural mode vibrators with natural frequencies incalculable from elementary theory 11 p1705 A66-22651

Theoretical behavior and frequency response of electrohydraulic valve-controlled cylindrical vibrator capable of high thrust over wide frequency range 12 p1803 A66-23798

Lower bounds for frequencies of continuous linear elastic systems in free vibration 12 p1960 A66-23947

Influence of homogeneous state of initial stress on frequency of three-dimensional vibrations of plates and rods 12 p1961 A66-23984

Linear taper effect on lowest natural extensional frequency of clamped circular elastic arc 12 p1962 A66-24000

Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140

Relations among vibrational frequencies of isotopically substituted molecules when only one Cartesian coordinate of any atom is involved in motion, obtaining general valence-force-constant

matrix 14 p2336 A66-27373

Modes and frequencies of transverse vibrations of composite beams 15 p2610 A66-29339

Frequency equations from plane cross sections law and exact linearized theory solved for oscillating rigid band in supersonic flow 16 p2823 A66-31631

Radial loading effect on vibration frequencies of thin spherical shells 17 p3024 A66-32362

Frequency equation for free vibration of uniform cantilever beam carrying concentrated mass and moment of inertia at tip 17 p3030 A66-32966

Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647

Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708

Bearing flexibility effect on vibration frequency of rotating assembly resting on two bearings and assembly with overhanging mass 18 p3116 A66-34006

Liquid water and nitrogen drops vibrating in natural frequencies above hot plate on vapor cushion analyzed by photographic techniques and used to simulate atomic nuclei fission 18 p3262 A66-34377

LF self-vibrations of laminar diffusion flames in axial mode at frequencies corresponding to fuel system natural frequencies [WSCI 66-30] 18 p3263 A66-34414

Free vibration analysis techniques for computers and derivation from past methods 21 p3823 A66-38561

Vibrations of complex structure analyzed, using coordinate system relative to displacement modes, calculating errors due to natural vibration 21 p3826 A66-38584

Floating vibratory gyroscope having enhanced sensitivity to angular velocity 21 p3739 A66-39329

Finite Fourier sine transform method of obtaining closed-form solution, calculating eigenfrequencies for free vibrations of partially fixed beam carrying concentrated masses 22 p3992 A66-40296

Stimulated emission of polymethine dyes upon pumping with Q-switched laser, noting wavelength parameters and oscillation 24 p4219 A66-42247

VIBRATIONAL RELAXATION

Diatom molecules, discussing interrelation between vibrational relaxation and thermal dissociation 04 p0597 A66-13878

Vibrational relaxation model of high temperature gas to determine dissipative coefficients in highly nonequilibrium gas mixtures with binary collisions 04 p0455 A66-14140

Master equation for intramolecular relaxation processes, with application to internal vibrational relaxation and isomerization reactions 06 p0911 A66-16170

Methane concentration relation to relaxation frequency and vibrational specific heat of mixtures of oxygen and methane 08 p1178 A66-18938

Anisotropy of Snoek relaxation measured for oxygen and nitrogen in niobium 10 p1576 A66-21554

Motion yielding transition probabilities between low-lying vibrational levels of diatomic molecules 11 p1738 A66-22878

Vibrational relaxation of hydrogen mixed with argon in shock tube studied by schlieren technique 11 p1739 A66-22886

Range of importance of molecular impurities on nitrogen vibrational relaxation determined, using spectroscopic sodium line reversal techniques 11 p1741 A66-23218

Vibrational and rotational relaxations in carbon dioxide and nitrous oxide laser systems, using Q-switching techniques 11 p1714 A66-23355

Interferometric measurement of ultrasonic velocity in gases at frequencies around 100 kc/s to determine vibrational relaxation 12 p1913 A66-23821

Carbon dioxide relaxation processes in shock waves, measuring density variation, vibrational energy, relaxation time, shock

- Density profile, etc 13 p2061 A66-25161
- IR maser action on vibrational transitions of thermally pumped polyatomic molecules 13 p2101 A66-26203
- Laser action on vibrational-rotational transitions and vibration energy transfer 13 p2101 A66-26204
- Inverse problem of nonequilibrium dissociation and vibrational relaxation of diatomic duct flow 14 p2219 A66-27428
- Expression derived for vibrational relaxation in recombining expanding nozzle-exhaust gas, assessing effect of chemical reactions on this 16 p2687 A66-31164
- Excitation of vibrational degrees of freedom in molecular collision from vibrational relaxation data and molecular beam elastic scattering experiments 16 p2755 A66-31588
- Vibrational excitation, population inversion and coupling out of carbon dioxide-nitrogen-water vapor laser 18 p3118 A66-33758
- Vibrational relaxation of carbon dioxide in mixtures with noble gases 19 p3295 A66-35494
- Classical/quantum views of nonequilibrium gas flow equations with arbitrary number of relaxation times 19 p3340 A66-35738
- Population inversion in adiabatic expansion of molecular gas mixture with three vibrational levels 19 p3402 A66-36068
- Cross sections for vibrational excitation of water by collision with water and molecular hydrogen calculated, using radial scattering equations 19 p3403 A66-36330
- Electrical resistance and Hall effect measurements in layer structures, confirming existence of interaction with optical relaxation vibration modes 19 p3446 A66-36343
- Initial rotation effect upon vibrational excitation of diatomic molecules studied in two-dimensional collisions shows that with higher rotational energies it is increasingly difficult to excite vibration 19 p3404 A66-36802
- Vibrational relaxation measurements in carbon dioxide, using induced-fluorescence technique 20 p3578 A66-37595
- Mode selection, relaxation oscillations, mode interaction and thermal effects in room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546
- VIBRATIONAL SPECTRUM**
- SA SHOCK SPECTRUM**
- Spectral absorption due to parallel bands of nitrous oxide computed for temperatures of 200 and 300 degrees K 02 p0263 A66-12213
- IR-active lattice vibrational spectra of alpha-aluminum oxide and chromium oxide analyzed by reflection and transmission measurements 03 p0380 A66-12341
- Molecular collision cross sections discussing vibrational excitation of carbon dioxide by collision with molecular hydrogen 04 p0548 A66-13811
- Laser action on rotational transitions of 10-9, 9-8, 8-7, 7-6 and 6-5 vibrational bands of ground electronic state 07 p1046 A66-18424
- CO Fine structure of vibrational-rotational spectrum of difluoroborane and difluoroborane-d 08 p1178 A66-18935
- Spectrum line reversal measurements of excitation temperature of Na atoms in expansion flows of shock-heated Ar and one percent nitrogen plus Ar 08 p1258 A66-18939
- Asymptotic method of integral estimation of space-time broadband random vibrations boundary value problem for elastic systems 11 p1781 A66-22616
- Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216
- Laser action on rotational line in carbon dioxide and nitrous oxide vibrational spectra in both P and R branches up to J values of over 50 11 p1714 A66-23357
- Tri-halogen nitro-methane valence force field and vibrational spectrum, noting sensitivity of potential energy to structural variations, molecular geometry, symmetry, etc 12 p1811 A66-23622
- Vibrational analysis, discussing spectrum analyzers, correlation and autocorrelation analysis and hybrid and digital computer applications 12 p1970 A66-24722
- Temperature measurement in shock heated gases via spectrum line reversal method, noting connection between electronic excitation and effective vibrational temperature 13 p2208 A66-25159
- Coriolis interaction in first and third fundamental frequencies of ozone, noting vibration rotation spectrum and coupling of two states 13 p2016 A66-25373
- Vibrational-rotational line strengths and widths in carbon dioxide, using carbon dioxide-neon laser 14 p2306 A66-27030
- Franck-Condon factors for ionization of hydrogen and deuterium, noting vibrational eigenenergies of D sub 2 14 p2337 A66-27972
- Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749
- Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120
- Power spectral density computer program for vibration-acceleration calculation 17 p2878 A66-33039
- Rotational and vibrational temperature of diatomic C in comets derived from high resolution spectra, considering transition probabilities in R and P branches 17 p3010 A66-33380
- Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922
- Vibration-rotation interaction effect on Franck-Condon factors for band system of RbH molecule 18 p3137 A66-33923
- Coupling between free electron and molecular vibrational temperatures in plasma environments, noting energy distribution, application to MHD generation, etc 18 p3145 A66-34105
- Amplitude analysis and statistical implications of random data analysis applied to evaluation of random signals 18 p3135 A66-34498
- Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational /vibron/ transition 19 p3402 A66-36067
- Anomalous escape of ions from plasma contained in magnetic mirror into loss cone studied for evaluation feasibility of controlled thermonuclear reaction in magnetic mirror trap 19 p3415 A66-36517
- Vibrational spectrum of liquid, solid and gaseous tetradeuterated hydrazine and Raman study of hydrogen bonding in hydrazine 19 p3295 A66-36801
- Spectroscopic electron beam diagnostic technique, examining negligible effect elevated vibrational temperatures have on measured rotational temperatures of molecular nitrogen [AIAA PAPER 66-747] 22 p3919 A66-40633
- Asymptotic solution of broadband random vibration BVP for elastic systems, based on excitation spectral width and natural frequency density 23 p4142 A66-41953
- Response spectrum of random vibration of nonlinear oscillator predicted by applying classical perturbation method to statistical moments of random response of nonlinear systems 23 p4097 A66-41954
- Temperature of fluorine-hydrogen flame from /3, 0/ band of FH vibration-rotation experimentally determined to be in agreement with theoretical figure of 3994 degrees K for stoichiometric mixture 24 p4295 A66-42992
- VIBRATIONAL STRESS**
- Space-time correlation function of response of finite cylindrical shell to purely random pressure field and to subsonic boundary layer pressure fluctuations 01 p0147 A66-10131
- Vibrational creep of polymer materials when small dynamic component resulting from heating of material due to energy dissipation of oscillations is imposed on static load 04 p0538 A66-14426
- Superimposed vibrations, corresponding to different propagation constants for same frequency parameter, satisfy boundary conditions at flat surfaces of cylinder 05 p0781 A66-15739
- Vibrational excitation cross sections of diatomic molecules calculated, using Born approximation by including polarization interaction between incident electron and molecule 06 p0912 A66-16630
- Internal organ injury mechanism of cats subjected to severe vertical sinusoidal vibration and observed by high speed X-ray cinematography 09 p1335 A66-20525
- Positive pressure breathing effect on vibration tolerance of mice 09 p1335 A66-20529
- Mechanical forced vibrations encountered in aviation, assessing physiological and neurophysiological effects including visual acuity 10 p1493 A66-22128
- Low-gravity vibration stress effects on weight, growth, metabolism, white blood cells and endocrine system of albino Wistar rats 11 p1643 A66-22581
- Prestressing of skin effect on strength and durability of riveted weld tested under static, repeated static and vibrational loads 11 p1782 A66-22855
- Thermally induced vibration of thin nonshallow spherical shells, investigating missile and space vehicle structures [AIAA PAPER 65-409] 12 p1957 A66-23586
- Vibrocreeper mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 12 p1958 A66-23665
- Yield and flow stress reduction in high strength metals during ultrasonic vibration 16 p2821 A66-31462
- Mechanical impedance of human body subjected to vibration combined with various magnitudes of linear acceleration 17 p2863 A66-32154
- Pathomorphological changes in hemopoietic organs of mice under combined effects of proton radiation and vibration and gamma radiation and acceleration 17 p2861 A66-32937
- Human tolerance of short-term transverse seat vibration, noting visual effects 18 p3060 A66-33682
- Axial shear vibrations of long hollow cylinder subjected to time-dependent body forces in axial direction 18 p3257 A66-34589
- Vibrational creep phenomenon occurring when small dynamic loads are superposed on static loads in thin wall steel tube 21 p3830 A66-38983
- Vibrocreeper mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 22 p3988 A66-39709
- Large amplitude oscillations of cylindrical and prismatic bodies resulting from generalized shear deformation in longitudinal direction 22 p3990 A66-40141
- VIBRATOR**
- S CHOPPER**
- VIBRATORY LOADING**
- Parametric response of structures with periodic loads 01 p0152 A66-10399
- Pilot protection from aircraft vibration caused by atmospheric turbulence 20 p3508 A66-36997
- Vibrational creep of Al alloy at normal temperature, noting plastic deformation magnitudes creep limit equations, etc 24 p4228 A66-42864
- VIBROCARDIOGRAM**
- Myocardiograph study of dogs leading to development of flight-rated vibrophonocardiographic system for monitoring cardiac dynamics in flight environment 17 p2924 A66-32191
- VICKERS VC10 AIRCRAFT**
- VC10 C Mk I jet transport for troop transport, freighting, casualty evacuation and refueling 07 p0989 A66-18163
- Compass system on VC10 provides magnetic heading reference, or alternately, inertial reference for grid navigation 13 p2125 A66-26283
- Low speed handling with special reference to super stall, emphasizing rate of change of angle of attack and flight trials of BAC 111 and VC10 aircraft 19 p3280 A66-36748
- Duplicate monitored system for automatic landing control of VC10 and Concorde 23 p4088 A66-41163

VC10 test flight of autoflare and automatic landing instrumentation 23 p4015 A66-41165

VIDEO DATA

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 04 p0484 A66-14058

Video densitometer to extract data from video display, specifically densicardiogram 06 p0819 A66-16851

Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar video signal analysis 11 p1732 A66-22899

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 17 p2873 A66-32224

Video data compression by redundancy techniques, using a posteriori curve fitting techniques to adaptively change effective resolution as function of picture detail 20 p3557 A66-37203

Measurements of voice channel loading with data for systems carrying video information and determination of interference noise 22 p3864 A66-40062

VIDEO EQUIPMENT

Video maps for air traffic control by associating radar picture with geographic features noting mechanical, optical and electronic components 01 p0022 A66-10486

Design details of video mapping equipment including distortion causes and correction measures 01 p0022 A66-10493

In-flight entertainment system discussing video, audio and motion picture systems 02 p0231 A66-12015

Solid-state camera system consisting of monolithic phototransistor mosaic sensor and molecular digital readout system 08 p1226 A66-19545

Lunar facsimile camera, noting large angular field coverage and electromechanical scanning system with optically narrow instantaneous field 19 p3356 A66-35675

Digital video system for measuring broadband spectral intensity of stars and coordinates onboard OAO 20 p3557 A66-37202

Video recording and playback systems applied to radar systems provides capability of measuring reentry phenomenon and tracking more than one object 20 p3514 A66-37220

Cathode ray tube device for digital video processing of Ranger pictures 23 p4071 A66-41677

VIDICON

SA FIBER OPTICS

Line structured pattern by vidicon tube and beam control logic 03 p0337 A66-12438

Determination of lunar luminance to set video gain of Ranger TV cameras 08 p1222 A66-18733

Relative spectral response of vidicons in Nimbus satellite system 09 p1403 A66-20520

Automatic control theory application to null-balance processing of spectral data generated by vidicon television camera 11 p1706 A66-22890

Spark chamber with vidicon readout for balloon and satellite-borne high energy gamma ray astronomy analysis, noting Cerenkov counter 12 p1877 A66-23685

Vidicon applicability as radiation sensor in star tracking systems 13 p2024 A66-25981

Preflight and in-flight testing of stellar sensor subsystem for guidance of ballistic missiles 18 p3111 A66-34046

Ionizing particle trajectory analysis via vidicon TV techniques, noting methods of increasing system sensitivity 18 p3115 A66-35230

High resolution IR scanning system and vidicon automatic picture transmission of Nimbus II and ground station printout instrumentation 21 p3821 A66-39497

Electron tubes operation and performance, discussing TV, vidicon, photographic recording tubes and photoelectric devices 21 p3716 A66-39618

Digital computer processing of Tiro, Nimbus and Essa vidicon cloud pictures for machine nephalanyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055

Digital TV spectrometer for measuring

optical radiation from reentry vehicles, using IR vidicon and magnetic recording for data processing 23 p4069 A66-41665

Calibration problem of using vidicon for making radiometric and spectrometric measurements, examining application to digital TV spectrometer system 23 p4069 A66-41666

Performance changes of various commercial types of vidicons tested in thermal chamber at practical extremes of temperature 24 p4185 A66-42959

VIGILANCE

Vigilance research, relevance to modern aerospace monitoring tasks 11 p1646 A66-23371

Extraneous stimulation effect on vigilance performance investigated by repeated threshold measurement 11 p1646 A66-23372

Signal detectability in elicited observing rate and decision processes in vigilance 11 p1646 A66-23373

Performance sharing when two audio visual vigilance tasks are performed concurrently 11 p1646 A66-23374

Vigilance performance in observing light flashes analyzed for effect of noise and signal rate 11 p1646 A66-23375

Signal and response complexity effect on eighteen hours of visual monitoring digital display boxes 11 p1646 A66-23376

Individual differences in performance of vigilance task 14 p2228 A66-28480

Lowering of psychic tone, absentmindedness and vigilance decline during astronaut weightlessness on long space flights 15 p2442 A66-30003

Present status of human engineering field, considering relationship of specific human functions constituting subsystem to system as whole 17 p2868 A66-32875

Air ionization effect on vigilance task performance, noting smaller decrement for environment containing negative ions 20 p3504 A66-36933

Vigilance training for signal detection 22 p3858 A66-40858

VINYL

Cis-and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis-and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498

VINYL POLYMER

Cis-and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis-and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498

SA POLYVINYL CHLORIDE Mechanism of conduction in pyropolysiloxanes studied for electrophysical properties of vinyl polymers 07 p1099 A66-17870

Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-37311

Hall effect in poly-n-vinylcarbazole-iodine charge-transfer complex, noting sign discrepancy of majority carrier 22 p3963 A66-40109

VIRIAL THEOREM Equilibrium thermodynamics from transport theory including interaction studied up to second virial coefficient, determining velocity of first sound and zero sound 01 p0161 A66-10327

Interaction virial coefficient of binary gas mixtures by Guggenheim-McGlashan method 05 p0718 A66-15527

Second and third virial coefficient for exponential repulsive potential by accurate numerical integration and by asymptotic formula 07 p1083 A66-17934

Differences in spherical intermolecular potentials of hydrogen and deuterium determined from reanalysis of second-virial-coefficient data 08 p1258 A66-18940

New force theorem for determining molecular energy derivatives with respect to internuclear distance derived from Hellmann-Feynman expression 11 p1741 A66-23217

Morse potential functions for nonpolar gases determined from experimental viscosity and second virial coefficient 12 p1917 A66-23934

Three-body nonadditivity of repulsive forces on classical third virial coefficient 16 p2749 A66-30113

Virial expansions for plasma free energy in method of collective

variables 16 p2767 A66-31728

Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002

Lennard-Jones potential application to properties of simple gases, noting values of second and third virial coefficients, molecular interaction, collision integrals, etc 18 p3140 A66-34926

Statistical mechanical predictions of second virial, adiabatic Joule-Thomson, viscosity and diffusion coefficients for intermolecular potential functions 20 p3678 A66-37313

Quantum corrections to second virial coefficient for low-temperature gas 21 p3836 A66-39175

Semiempirical theory based on virial and Feynman theorems relating physical parameters and mechanical behavior of metals with structural characteristics 22 p3937 A66-40927

Equilibrium theory of plasma stability in EM field, applying virial theorem and variational principle to random infinitesimal plasma perturbations 24 p4241 A66-42330

VIRTUAL WORK Nonlinear theory for elastic surface deformation, assuming existence of strain-energy function governed mechanically by virtual work 12 p1970 A66-24564

VIRUS SA BACTERIA SA BACTERIOPHAGE Virus purification methods including density gradient centrifugation, liquid-phase partition, etc, evoke high antibody levels 09 p1333 A66-19899

C and D antigens of coxsackievirus, centrifugation separation and similarity to poliomyelitis 09 p1335 A66-20633

Biophysical property similarities of several human enteroviruses as shown by density gradient ultracentrifugation of virus mixtures 13 p2009 A66-25872

VISCOELASTIC CYLINDER Transverse vibrations of viscoelastic shaft fixed at one end and supporting mass subjected to sinusoidal force at other 01 p0158 A66-11080

Stress analysis of finite length cylinders by station function technique coupled with radial single collocation [AIAA PAPER 65-179] 03 p0437 A66-12798

Symmetric deformation of viscoelastic-plastic hollow circular cylinder under internal pressure [ASME PAPER 65-APMW-24] 04 p0592 A66-14225

Nonlinear viscoelastic incompressible materials under small finite deformation for short time ranges, noting kernel functions for tension tests [ASME PAPER 65-APMW-31] 04 p0593 A66-14231

Oscillating coaxial cylinder viscometer to determine rheological properties of viscoelastic materials, using Bessel function approximations 05 p0678 A66-14969

Nonuniform shear modulus effect on thermal stress analysis of hollow viscoelastic cylinder [AIAA PAPER 66-121] 06 p0962 A66-16260

Forced vibration function for stresses and displacements in viscoelastic thick-walled cylinder case-bonded to thin shell, noting pressure and strain effect [AIAA PAPER 65-173] 10 p1617 A66-21784

Nonlinear viscoelastic theory to predict solid propellant reliability [AIAA PAPER 65-158] 12 p1934 A66-24703

Instability of nonlinearly viscoelastic column under finite compression, noting boundary conditions, application to buckling problem, types of stability loss, etc 15 p2615 A66-29720

Torsion of nonlinear viscoelastic circular cylinder in terms of stress tensors prescribed by time-functionals of finite strains 17 p3032 A66-33332

Ablation and viscoelasticity effects on vibratory response of hollow viscoelastic cylinder 18 p3247 A66-33572

Nonlinear viscoelastic incompressible materials under small finite deformation for short time ranges, noting kernel functions for tension tests

- ASME PAPER 65-APMW-31] 18 p3248 A66-33577
Symmetric deformation of viscoelastic-
lastic hollow circular cylinder under
internal pressure
- ASME PAPER 65-APMW-24] 18 p3248 A66-33579
Nonsteady helical flow of viscoelastic
liquid contained in circular cylinder, noting
occurrence of oscillations in fluid decaying
exponentially with time 21 p3723 A66-38588
Longitudinal wave in cylinder of
viscoelastic material for case of small
frequencies, obtaining propagation equations
by using stress-strain relations, compatibility
conditions and motion 22 p3996 A66-40703
- VISCOELASTIC DAMPING**
Optimization of viscoelastic damping
materials for use in specific composite
systems of metal skins and damping
viscoelastic layers 01 p0150 A66-10151
Comparison of two tuned-damping concepts
applied to pinned rectangular plate, fluid
flow past piston and viscoelastic layer in
shear 01 p0150 A66-10154
Residual stress distributions in
thermoviscoelastic materials due to surface
cooling
- ASME PAPER 65-APMW-9] 04 p0592 A66-14215
Passive electrical simulation of properties
of Maxwell type viscoelastic connection in
vibration absorber, noting dynamical analogy
and velocity-acceleration
optimization 05 p0775 A66-15300
Residual stress distributions in
thermoviscoelastic materials due to surface
cooling
- ASME PAPER 65-APMW-9] 10 p1615 A66-21482
Structural resonant amplitude reduction
for increased fatigue life and component
malfunction reduction, noting application of
internal damping, and use of viscoelastic
materials 16 p2715 A66-31201
- VISCOELASTIC FLOW**
Velocity and pressure fields caused by
slow rotation of sphere in slightly
viscoelastic fluid contained in infinite
cylinder 01 p0057 A66-10428
Constitutive law of viscoelastic solid
developed from energy
consideration 02 p0297 A66-11309
Turbulent motion of elastoviscous fluid
degeneration when highest velocity and
stress field correlation moments are
neglected in comparison with second
moments 02 p0217 A66-11394
Turbulent shear flow of elastico-viscous
fluid in pipe or channel 02 p0217 A66-11526
[AIAA PAPER 64-36] 02 p0217 A66-11526
Temperature dependence of viscoelastic
behavior of polystyrene analyzed in terms of
creep and recovery 02 p0248 A66-11592
Stress wave propagation in linear
viscoelastic solids for rods, filaments and
blocks 02 p0300 A66-11850
Plane-strain and generalized plane-stress
analysis of viscoelastic disk by comparing
transient thermal stresses in disk and
cylinder 04 p0591 A66-14204
Density and viscosity changes of lubricants
in contact due to pressure changes in
concentrated-contact lubrication
[ASME PAPER 65-LUB-4] 04 p0527 A66-14240
Laminar flow stability of layer of
viscoelastic fluid flowing down infinite
inclined plane under action of
gravity 04 p0512 A66-14428
Flow of orientable fluid between coaxial
cones, discussing fluid behavior for low and
moderate velocity
gradients 04 p0512 A66-14473
Infinitesimal time-dependent perturbation
of steady viscoelastic flows with application
to Couette viscometer 08 p1208 A66-19229
End effects on viscoelastic polymer flow
through capillary tube 08 p1209 A66-19552
Shock wave discontinuity of steady one-
dimensional viscoelastic
flow 09 p1466 A66-20261
Spherically divergent stress pulses in
linear viscoelastic solids, measuring change
in shape of polyethylene polymethyl
methacrylate and polystyrene
- blocks 09 p1393 A66-20662
Oscillation of viscoelastic liquid between
stationary outer coaxial cylinder and
vibrating inner coaxial
cylinder 11 p1688 A66-22440
Overstability in elastico-viscous flow
between rotating
cylinders 11 p1693 A66-23010
Two-dimensional stagnation point flow of
elastico-viscous liquid 12 p1862 A66-23956
Elastico-viscosity, cross-viscosity and
suction variation effects on rheological
behavior of fluid moving steadily past
porous circular cylinder and between two
coaxial right circular
cylinders 12 p1865 A66-24808
Stress in viscoelastic polystyrene in
Aroclor flowing in straight, converging and
diverging channels 16 p2686 A66-31043
Pitot tube readings in viscoelastic
turbulent stream, noting stress and kinetic
contribution, momentum average factor,
etc 17 p2906 A66-32035
Small transverse vibrations of linearly
viscoelastic Timoshenko beam of
incompressible material, detailing free and
forced vibration 17 p3024 A66-32361
Spiral flow stability of idealized
viscoelastic liquid between two rotating
concentric cylinders with axial pressure
gradient 17 p2914 A66-33171
Transient response of linear viscoelastic
solid in analytic prediction and experimental
measurement 18 p3249 A66-33601
Velocity field and suction effects on
viscoelastic flow past porous circular
cylinder 21 p3724 A66-38709
Maxwell-Lorentz field equations for
Couette flow birefringence of Rivlin-
Ericksen viscoelastic fluid and Noll simple
fluid 21 p3724 A66-38761
Elastodynamic reciprocity theorem for
impulsive disturbances in linear viscoelastic
medium 21 p3772 A66-39347
Stability of viscoelastic liquid in Couette
flow compared with non-Newtonian liquid of
same limiting viscosity 21 p3729 A66-39451
Torsional oscillations of infinite plate in
elastoviscous fluid solved by motion
equation expansion of velocity profile in
powers of amplitude 21 p3730 A66-39457
Velocity profile, induced magnetic field,
shear stresses and skin friction on plates
for viscoelastic liquid flow between
nonconducting oscillating infinite flat plates
in uniform TM field 21 p3794 A66-39575
Unsteady flow of two immiscible Maxwell
fluids between two parallel plates when
upper plate is given transient velocity and
lower plate is fixed 21 p3731 A66-39605
Pitot tube technique for measuring
velocity profiles, using Bernoulli equation in
stress measurement in laminar viscoelastic
flow 22 p3898 A66-40010
Irreversible thermodynamics of large
viscoelastic deformations, showing hidden
coordinates as scalar functionals and
applicability to quasi-equilibrium
states 22 p3999 A66-40456
Pressure induced flow of elastoviscous
electrically conducting incompressible fluid
between relatively moving porous walls in
presence of transverse magnetic
field 23 p4053 A66-41121
Viscoelastic properties of liquids under
steady flow determined experimentally in
frequency range 5-75 mc/s, using internal
reflection of pulse of shear wave at surface
of fused quartz bar 23 p4066 A66-41159
Incompressible viscoelastic flow studied by
simple Maxwell model within rheological
reference point 23 p4054 A66-41171
Thermodynamics and approximation theory
of viscoelastic materials, developing
Coleman-Noll theory, thermodynamic theory
for fluids, etc 24 p4288 A66-42278
- VISCOELASTICITY**
Mechanical response or viscoelastic
properties of material at given hydrostatic
pressure 01 p0151 A66-10174
Normal incidence reflective polariscope
and auxiliary instrumentation used in
viscoelastic strain
measurements 01 p0070 A66-10922
Difference between dynamic and
equilibrium tension in macromolecular chain
expressed as functional of variation of
nonlinear strain function, developed in
- kinetic elasticity theory 02 p0261 A66-11427
Stress function for linear viscoelastic
problems where body shape, boundary
condition type or both vary with
time 02 p0298 A66-11576
Dissipation inequalities and relaxation
integral law of linear
viscoelasticity 02 p0301 A66-12152
Eigenvalue problem definition of
acceleration wave propagation in
viscoelasticity theory 02 p0219 A66-12154
Transverse vibrations of viscoelastic rod
hinged at ends and sinusoidally excited by
inertia 03 p0440 A66-13244
Viscoelastic contact problem for linear
materials and quadratic surfaces of bodies
[ASME PAPER 65-APMW-36] 04 p0594 A66-14236
Vibrational characteristics, natural
frequencies and associated composite loss
factor of finite-length laminated beam with
alternate elastic and viscoelastic layers
[ASME PAPER 65-WA/APM-1] 05 p0776 A66-15425
Stress relaxation of wound reel of
magnetic tape, assuming homogeneous and
isotropic material, exhibits instantaneous
and delayed elasticity, creep under shear
and elastic behavior under hydrostatic stress
[ASME PAPER 65-WA/APM-8] 05 p0689 A66-15430
Asymptotic expressions for axial stress in
thin viscoelastic shells due to longitudinal
impact obtained, using Laplace transform,
determining viscosity effect on propagating
wave shape
[ASME PAPER 65-WA/APM-10] 05 p0776 A66-15432
Poisson ratio for viscoelastic materials
undergoing large strains measured, using
compression test
[ASME PAPER 65-WA/RP-8] 05 p0706 A66-15629
Nonlinear elasticity model for materials
with partially constrained or unconstrained
internal rotations 07 p1145 A66-18242
Viscoelastic behavior of solid polymers
including Boltzmann superposition principle,
mechanical models, anisotropic elasticity,
statistical molecular and structural analytic
theories, etc 08 p1244 A66-19219
Creep problem of thin shallow shells in
terms of viscoelastic theory, considering
isotropic homogeneous and orthotropic
quasi-homogeneous
materials 08 p1311 A66-19340
Nonlinear creep and recovery behavior of
polypropylene fibers and hereditary
functionals describing nonlinear viscoelastic
behavior 09 p1393 A66-20663
Three-dimensional linear elasticity and
viscoelasticity theory to obtain axisymmetric
plane-strain thickness-stretch modal
response of isotropic and orthotropic thick
shells 09 p1468 A66-20948
Bending of slightly curved solid
viscoelastic rod of circular cross section
under effect of quasi-static and dynamic
radial forces 10 p1613 A66-21324
Asymptotic expressions for axial stress in
thin viscoelastic shells due to longitudinal
impact obtained, using Laplace transform,
determining viscosity effect on propagating
wave shape
[ASME PAPER 65-WA/APM-10] 10 p1615 A66-21476
Stress relaxation of wound reel of
magnetic tape, assuming homogeneous and
isotropic material, exhibits instantaneous
and delayed elasticity, creep under shear
and elastic behavior under hydrostatic stress
[ASME PAPER 65-WA/APM-8] 10 p1539 A66-21481
Vibrational characteristics, natural
frequencies and associated composite loss
factor of finite-length laminated beam with
alternate elastic and viscoelastic layers
[ASME PAPER 65-WA/APM-1] 10 p1616 A66-21483
Boltzmann modulus used to predict stress-
strain design parameters of viscoelastic
materials, including time as
variable 11 p1783 A66-23172
Heat and mass transfer phenomena
analyzed, using thermodynamics of
irreversible processes and incorporating
certain particular data of kinetic and
statistical theories 12 p1980 A66-24910

Functional analysis demonstrating existence and uniqueness of displacement field, providing solution for linear viscoelasticity problem for medium having behavior satisfying coercivity condition 13 p2195 A66-25463

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-26109

Apparatus for determining dynamic compressibility, creep behavior and viscoelastic properties of polymers 13 p2115 A66-26115

High speed testing to determine viscoelastic properties of composite propellant polymers, for use in solid propellant rockets 13 p2115 A66-26119

Creep compliance testing apparatus for surface penetration of low modulus viscoelastic plate by 1/4-inch steel sphere 13 p2115 A66-26288

Viscoelastic constant of four metals drawn into wire 13 p2111 A66-26754

Small motion superposed on stationary slow deformation process of viscoelastic material with fading memory, based on Rivlin and Ericksen differential equation 14 p2397 A66-27384

Contact process of linearly viscoelastic axisymmetric die, for case of noncommutative operators 15 p2611 A66-29342

Gurtin variational principles characterizing linear elastodynamics initial value problems extended to dynamic viscoelasticity theory 16 p2813 A66-30262

Thermomechanical instability in viscoelastic structures subject to prescribed HF alternating loads 16 p2820 A66-31277

Anisotropic nonhomogeneous linear viscoelasticity analogy with thermal stresses in terms of Fourier transform 17 p3020 A66-31998

Fracture initiation and growth in linearly viscoelastic materials using energy formulation, establishing extension of Griffith initiation criterion 17 p2939 A66-32304

Elasticoviscosity and cross viscosity of second-order fluid effects on advancement over infinite flat plate 17 p2912 A66-32981

Quasi-linear hyperbolic equations governing one-dimensional longitudinal wave propagation in viscoelastic material 17 p3032 A66-33502

Viscoelastic contact problem for linear materials and quadratic surfaces of bodies [ASME PAPER 65-APMW-36] 18 p3249 A66-33589

Temperature range of nonlinear rigid, elastic and viscoelastic behavior in quasi-isotropic polymeric materials and derivation of stress-strain-time relations by method of small parameters 18 p3251 A66-33701

Thermodynamics and one-dimensional shock waves in material with memory 18 p3254 A66-33969

Existence and uniqueness of solution in viscoelasticity theory for aging materials, considering four boundary value problems for body subjected to finite deformations 18 p3255 A66-34393

Complex shear modulus measuring apparatus for viscoelastic materials, including data obtained for butyl rubber and other elastomers 18 p3256 A66-34560

Reflection of time-harmonic plane dilatational or shear waves from rigid or stress-free boundary of arbitrary linearly viscoelastic half-space 18 p3136 A66-35025

Sufficient condition for stability of linearly viscoelastic continuum subjected to surface tractions following partial deformation of solid are nonconservative and associated with energy source 19 p3401 A66-36302

Viscoelastic stress-strain equations for treating strong material nonlinearities, comparing experimental and theoretical results for solid propellants 19 p3449 A66-36428

First- and second-order constitutive equations of viscoelasticity based on mechanical and invariant theory, discussing relaxation under finite twist of incompressible isotropic bar 19 p3475 A66-36639

Linearity, stress, strain, time and

birefringence relations in plastic model materials, using Hooke law 20 p3668 A66-37498

Nonisothermal deformation of viscoelastic medium analyzed on basis of thermodynamically irreversible processes 20 p3671 A66-38112

Macroscopic viscoelastic properties of fiber reinforced materials analyzed on basis of composite cylinder assemblage model and correspondence principle 21 p3827 A66-38697

Riemann representation method in viscoelasticity extended to functional partial differential equations of hyperbolic type 21 p3829 A66-38941

Viscoelastic half-space problems with noncommutative operators including solution for equilibrium equation 22 p3989 A66-39821

Rheology theories of material deformation and flow including classical theories of elasticity and hydrodynamics covered by nonlinear viscoelasticity theory 22 p3898 A66-40019

Free longitudinal oscillations of finite viscoelastic rod, neglecting relaxation 23 p4139 A66-41555

Viscoelastic stress analysis for load bearing components made of plastics and polymers, discussing time and thermal effects, irreversibility, solution techniques and design applications 23 p4145 A66-41974

Inequality, derived from entropy law, for irreversible processes of nonequilibrium thermodynamics, with attention to viscoelastic materials 24 p4293 A66-42136

Applied mechanics - U.S. National Congress, University of Minnesota, Minneapolis, June 1966 24 p4287 A66-42265

Stress wave propagation, particularly dilatational waves in high polymers, rate-of-strain effects in metals and wave propagation in nonlinear time dependent solids 24 p4287 A66-42268

Computer technique for constitutive equations of viscoelastic modulus, using Laplace transform and Volterra integral equation, applied to data on solid propellants 24 p4289 A66-42279

Friction and viscoelastic properties of polymeric solids 24 p4229 A66-42702

VISCOMETER

Viscosity measurement using LF vibrations and two types of vibration viscometer 03 p0368 A66-12519

Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601

Oscillating coaxial cylinder viscometer to determine rheological properties of viscoelastic materials, using Bessel function approximations 05 p0678 A66-14969

Infinitesimal time-dependent perturbation of steady viscoelastic flows with application to Couette viscometer 08 p1208 A66-19229

VISCOMETRY

Capillary viscosity meter measurements of hydrogen-deuterium solutions 13 p2114 A66-25970

Book on theory of steady viscometric flows of non-Newtonian fluids, discussing design and interpretation of experiments 17 p2912 A66-32992

VISCOPLASTIC FLOW

Couette and Poiseuille flow and temperature distribution of fluids with two viscosity ranges, including viscoplastic and dilatant fluids 19 p3341 A66-36304

Extension of extremum principles concerned with velocity fields for boundary value problems of incompressible rigid viscoplastic /Bingham/ solid 21 p3832 A66-39440

VISCOPLASTICITY

High speed compression of viscoplastic thin disk between smooth dies considering inertia effects 02 p0299 A66-11690

Propagation of spherical waves produced by thermal shock acting on boundary of spherical cavity in infinite elastoviscoplastic body 08 p1309 A66-19115

Uniqueness theorem for dynamically loaded rigid-plastic and rigid-viscoplastic idealizations of deformable bodies 12 p1962 A66-23999

Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial

motion of beam in motion equation 14 p2397 A66-27386

Geometrical dispersion effect on propagation of longitudinal harmonic stress waves in prestressed elastic viscoplastic bars 16 p2813 A66-30264

Thermorheological equation of state derived for fiber-reinforced polymers indicating dependence of elongation or contraction on linear expansion coefficients 18 p3125 A66-33711

VISCOSITY**SA GAS VISCOSITY**

Constants in empirical equation log evaluated from viscosities and densities for various n-alkanes 03 p0330 A66-12335

Boundary layer relation between viscosity laws of perfect gas and equilibrium dissociating air 04 p0456 A66-14158

Mesoscale eddies in wake of islands describing properties, characteristic parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365

Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity 07 p1148 A66-17394

Similar solutions to laminar boundary layer equations affected by Prandtl number, viscosity-temperature variation, mass transfer and hypersonic parameter 07 p1023 A66-18136

Velocity defect profiles in equilibrium turbulent boundary layers and eddy viscosity hypotheses 11 p1693 A66-23005

Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215

Nonstationary contributions to transport coefficients, especially bulk viscosity coefficient, combine with stationary ones yielding result equivalent to that provided by autocorrelation function theory 12 p1916 A66-23617

Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565

Capillary viscosity meter measurements of hydrogen-deuterium solutions 13 p2114 A66-25970

Electrical output and conversion cycle efficiency of vortex type MHD induction generator, considering viscosity effects 13 p2156 A66-26708

Viscosity of liquid nitrogen and oxygen measured as function of temperature and pressure 14 p2276 A66-27642

Effect of instantaneous change in viscosity on laminar vortex of flow through suddenly widening pipe 14 p2277 A66-27933

Viscous forces influence on instability of liquid conductor model of hard-core pinch 17 p2964 A66-32032

Method and equipment effects on shear stability measurements of hydraulic oils, using mechanical and sonic methods 17 p2943 A66-32830

Elasticoviscosity and cross viscosity of second-order fluid effects on advancement over infinite flat plate 17 p2912 A66-32981

Kinetic theory of liquid viscosity made tractable by using approximation of perturbation of radial distribution function of monatomic liquid by nonuniform flow field 17 p2940 A66-33335

Contamination, viscosity, shear stability, breakdown and foaming of MIL-H-5606 hydraulic fluid and swelling effect on synthetic rubber 18 p3125 A66-34652

Magnetic viscosity effect on Rayleigh-Taylor instability and Kelvin-Helmholtz instability of superposed fluids 19 p3408 A66-36271

Statistical mechanical predictions of second virial, adiabatic Joule-Thomson, viscosity and diffusion coefficients for intermolecular potential functions 20 p3678 A66-37313

Viscosity effect on small periodic oscillatory disturbance of rigidly rotating incompressible fluid 20 p3545 A66-37474

Viscosity distribution within Moon analyzed, using Navier-Stokes and continuity equations, abnormal inertia moment

explained, maria and continent distribution examined for understanding internal state of Moon 20 p3656 A66-38030

Minimum changes in viscosity of liquid lubricants with temperature, discussing low temperature lubricating oils [ASME PAPER 66-MD-68] 21 p3743 A66-38497

Turbulent viscosity forces in nonlinear three-dimensional nonstationary problem of thermal convection 21 p3760 A66-39359

Polymer degradation dosimeter of polyisobutylene in heptane noting viscosity range effects, concentration change and molecular weight 21 p3739 A66-39383

Errors caused by using artificial viscosity terms to represent steady state shock waves 21 p3730 A66-39469

Longitudinal viscosity effect in equation for plane transonic flow for initial stages of shock formation downstream in nozzle 22 p3844 A66-40387

Viscosity, surface tension and inclination angle effect on motion of long bubbles in closed tubes 22 p3900 A66-40388

Anisotropic acoustic attenuation measured from surface excitation in novel resonant cavity configuration, discussing validity in quartz and effective viscosity in silicon 22 p3866 A66-40407

Steady liquid flow between rotating coaxial cylinders with arbitrary dependence of viscosity on temperature 22 p3902 A66-40814

Variational techniques in solving BVPs for nonlinear plastic, elastoplastic and viscous media and in predicting existence, uniqueness and equilibrium conditions 23 p4136 A66-40996

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929

VISCOUS DAMPING

Experimental study of damping of planar wave motion in vicinity of resonance 01 p0059 A66-10644

Damping effect on subharmonic vibrations in nonlinear oscillating system 01 p0159 A66-11178

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 05 p0774 A66-15036

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 05 p0777 A66-15439

Fluid squeeze-film damping, presenting linear analysis and approximate design equations for several damper configurations [ASME PAPER 65-WA/AUT-6] 05 p0664 A66-15706

Model of elastoplastic body undergoing strain hardening, examining microstresses via internal viscosity 07 p1143 A66-17629

Slow instability caused by dissipation of negative oscillation energy in mirror-type plasma-containment device 07 p1089 A66-17959

Three-dimensional linear elasticity and viscoelasticity theory to obtain axisymmetric plane-strain thickness-stretch modal response of isotropic and orthotropic thick shells 09 p1468 A66-20948

Forced vibrations of two-degree-of-freedom system with combined Coulomb and viscous damping 09 p1469 A66-20950

Stability of steady state response of one degree of freedom double bilinear hysteretic model [ASME PAPER 65-WA/APM-4] 10 p1616 A66-21489

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 12 p1961 A66-23983

Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140

Destabilization of linear system with N degrees of freedom without damping

subjected to nonconservative forces 15 p2609 A66-29251

Forced aperiodic vibrations in idealized viscously damped system, subjected to parametric excitation by forcing function with uniformly accelerating frequency and constant displacement amplitude 16 p2678 A66-30460

Viscous ring damper for removing wobble motion of spin-stabilized satellite analyzed by studying energy dissipation 16 p2820 A66-31276

Squeeze-film method for generating high damping coefficients with limited space based on Reynolds equation and simplified Navier-Stokes equation 17 p2930 A66-32946

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 18 p3257 A66-34594

Oscillation of tubular cantilevers conveying fluid, checking stability aspects of theory and accounting for internal and viscous damping 22 p3994 A66-40409

VISCOUS DRAG

Unstable precession of plasma particles in gradB under influence of drag forces associated with viscous or resistive energy dissipation in background plasma 05 p0721 A66-14711

Perturbations in amplitude and period of oscillators derived by simultaneous application of variation-of-constants and successive approximation methods 07 p1145 A66-18241

Prediction of drag due to lift of plane wings at subsonic speeds, based on correlation of wind tunnel measurements in terms of viscosity effect on lift curve slope 16 p2632 A66-31664

Aerodynamic gaseous drag torque on electromagnetically suspended isolated sphere rotating at high Mach numbers in rarefied transition regime from continuum to free molecule flow 20 p3492 A66-37473

Nonlinear ODE of radial motion of body in nonlinear central force fields, considering drag effects 21 p3773 A66-39436

Viscous drag on flat plate in supersonic flow injected with gas in boundary layer, examining exit cone of rocket nozzle 22 p3970 A66-39875

Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity 23 p4060 A66-42018

VISCOUS FLOW

SA INVISCID FLOW

SA POHLHAUSEN SOLUTION

Waves on surface of moving viscous fluid of infinite depth 01 p0055 A66-10172

Laminar flow through parallel and uniformly porous walls of different permeability 01 p0057 A66-10425

Temperature distribution of slow incompressible viscous flow through conical tube and comparison with two inclined walls 01 p0161 A66-10435

Flow stability theorem for viscous homogeneous and incompressible fluid through infinitely long cylindrical pipe of arbitrary cross section 01 p0058 A66-10504

Separating force determined for boundary layer of nonsedimentating suspension of various configurations 01 p0060 A66-11092

Viscosity effect on transition between axisymmetric and nonaxisymmetric flow regimes of vertical rotating annulus of liquid 02 p0223 A66-11826

Sphere drag measurements at low Reynolds number 02 p0219 A66-11956

Hartmann problem solved for isothermal motion of heavy neutral viscous gas containing small impurities of light ions and electrons in crossed electric and magnetic fields 02 p0269 A66-12131

Iterative solution of Navier-Stokes equations for class of flows generated within rectangular cavity by surface passing over open end 03 p0356 A66-12888

Tensorial character of eddy viscosity coefficient in incompressible turbulent flow 03 p0358 A66-13099

Supersonic viscous gas flow past bodies calculated by solving approximately system of Navier-Stokes equations for limited regions with great dissipative terms 03 p0359 A66-13183

Generalization of Milne-Thomson solution to Navier-Stokes equation governing motion of viscous incompressible fluids 04 p0510 A66-13827

Entrance region Newtonian flow analysis in tube of circular cross section for possible use in viscometry and flow stability studies [AICE PREPRINT 19D] 04 p0511 A66-13935

Oscillating thin airfoil theory, using Oseen method for classical potential solution of flow about thin airfoil 04 p0456 A66-14476

Laminar boundary layer on impulsively started rotating sphere, discussing viscous incompressible axially symmetric flow in terms of nonsteady partially linearized Navier-Stokes equations 04 p0513 A66-14477

Slow viscous shear flow past plate midway between two walls studied analytically, using Stokes approximation 05 p0605 A66-14702

Three-dimensional incompressible viscous flow calculated for axial-flow turbine stage of given blade profile, verified by computer method developed from cascade theory 05 p0605 A66-14961

German book on theoretical fluid dynamics covering potential flow of ideal fluids and gases, viscous fluids, boundary layer theory, hydrodynamic stability and turbulent flow 05 p0662 A66-15085

Streamline curvature effect on mixing within boundary layer, deriving magnitude of concentration and pressure 05 p0665 A66-15798

Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 06 p0871 A66-16254

Stabilized flow of two-phase incompressible viscous media in cylindrical tube 06 p0871 A66-16312

Book on motions of viscous incompressible fluids, covering laminar and turbulent jets and solutions, based on exact Navier-Stokes equations 06 p0872 A66-16562

Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996

Energy transfer to small disturbances in viscous compressible heat-conductive medium defined as quantity that is monotone nonincreasing function of time 06 p0874 A66-17005

Slow stationary MHD motion of electrically conducting viscous liquid in weak induced magnetic field in moving spherical envelope 07 p1086 A66-17836

Asymptotic derivation for viscous decay of wake behind plane plate in fluid with power law 07 p1019 A66-17841

Viscous flow eddy behavior near sharp corner, considering outer boundary conditions and stream function 07 p1023 A66-18115

Velocity profiles of transitional viscous boundary layer for plane Poiseuille flow 07 p1023 A66-18120

Two-dimensional viscous incompressible wedge flow treated by Navier-Stokes equation with Prandtl boundary layer approximation 07 p0982 A66-18138

Three-dimensional Cauchy-Poisson problem for waves in viscous fluid 07 p1026 A66-18196

Vortex flow of incompressible viscous fluid bounded by two parallel finite flat plates [AIAA PAPER 66-88] 07 p1026 A66-18454

Convective heat transfer and artificially turbulent flow through roughened corrugated channels 08 p1317 A66-18864

Mass transfer and first order boundary layer effects on sharp cone drag [AIAA PAPER 66-33] 08 p1163 A66-18954

Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers [AIAA PAPER 66-34] 08 p1163 A66-18957

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571

Asymptotic behavior of solutions of steady state Navier-Stokes equations for viscous incompressible fluid flow in two dimensions 09 p1387 A66-20630

Stationary flow of viscous incompressible

anisotropically conducting fluid in coaxial channel 11 p1743 A66-22235
 Oscillating viscous flows past cylinder and torsionally vibrating disk 11 p1687 A66-22438
 Effective viscosity in defect portion of turbulent boundary layer when flow is under pressure gradients, showing overlapping of wall velocity profiles and defect velocity profiles 11 p1693 A66-23006
 Torsional oscillations of fluid sphere with rigid boundary in uniform magnetic field 11 p1745 A66-23007
 Turbulent channel flow, discussing friction flow anisotropy, and homogeneity, vortex flow, channel viscosity, etc 12 p1860 A66-23532
 Simplified Navier-Stokes equations for steady hypersonic viscous flow past slender shapes with sharp leading edges 12 p1796 A66-23613
 Supersonic viscous gas flow near blunt body numerically determined by equations similar to Navier-Stokes equations 12 p1796 A66-23900
 Viscous fluid motions around conical surface, using Navier-Stokes equations 12 p1797 A66-24198
 Elastico-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808
 Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157
 Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics, effect of normal pressure gradient, etc 13 p2061 A66-25164
 Approximate solution of Navier-Stokes equations applicable to viscous and incompressible fluids 13 p2062 A66-25429
 Hypersonic viscous interaction on very slender body of revolution having thick boundary layer and surface mass transfer 13 p1992 A66-26447
 Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709
 Laminar fluid flow of two-phase ideally viscous medium between two parallel surfaces 13 p2072 A66-26766
 Variational principle extended to problems of nonself-adjoint differential equations, with application to slow viscous incompressible Poiseuille flow 14 p2273 A66-26935
 Solution of boundary layer equation for two-dimensional laminar steady motion of viscous incompressible fluid in convergent channel with suction at wall 14 p2276 A66-27728
 Perturbation equations solved for viscous flow stability over concave cylindrical surface 14 p2276 A66-27729
 Hartmann problem solved for isothermal motion of heavy neutral viscous gas containing small impurities of light ions and electrons in crossed electric and magnetic fields 14 p2345 A66-28088
 Unsteady flow of viscous liquid through tube of rectangular cross section under nonuniform pressure gradient assumed to be linear function of time 14 p2279 A66-28462
 Optimal controllability and stability criteria for viscous and inviscid fluid dynamics 14 p2348 A66-28463
 Two-dimensional steady viscous flow in differential equations akin to Stokes problem of sphere in viscous fluid 15 p2477 A66-28515
 Liquid flow with viscosity changing under effect of nonisothermicity 15 p2478 A66-29222
 Variational problem solved, giving lower stability bounds for finite disturbances of viscous incompressible flow 15 p2478 A66-29245
 Extension to MHD hypersonic stagnation flow theory of Bush, including viscous term and solving boundary value problem from both ends at once 15 p2424 A66-29307
 Steady free convection in vertical slot, noting growth of boundary layers and

temperature gradient 15 p2618 A66-29693
 Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214
 Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375
 Hydrodynamical modification of Heller treatment of mixing and unmixing of viscous fluid between two rotating cylinders 16 p2685 A66-30940
 Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane through which supplementary fluid is injected, solved by Navier-Stokes equations 16 p2687 A66-31293
 Navier-Stokes equations for rotational motion of incompressible viscous fluid at small Reynolds numbers between rotational surfaces 16 p2688 A66-31298
 Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 16 p2688 A66-31301
 Three-dimensional boundary layer flow over windward side of flat delta wing in hypersonic flow at moderate angle of attack, examining viscous-inviscid interaction [AIAA PAPER 66-492] 16 p2631 A66-31477
 Hypersonic strong-interaction similarity solutions for viscous compressible flow past plate analyzed using Navier-Stokes equations 16 p2632 A66-31655
 Absolute stability of some plane parallel flows at high Reynolds numbers 17 p2907 A66-32322
 Static and dynamic stability derivatives of sharp wedges in viscous laminar hypersonic flow determined, using approximate pressure relations 17 p2839 A66-32444
 Boundary conditions in viscous interaction theory, noting boundary layer growth effect on outer inviscid flow 17 p2909 A66-32492
 Discontinuous one-dimensional dissipative flow of perfect liquid and gas conductor in magnetic field, emphasizing case where magnetohydraulic jump may occur 17 p2973 A66-33070
 Implicit finite difference method applied to plane hypersonic flow over blunt circular cylinder 17 p2842 A66-33170
 Noniterative finite-difference method for solution of Poisson and Laplace equations for linear boundary conditions, discussing slow viscous flow results [ASME PAPER 66-FE-1] 17 p2914 A66-33258
 Eddy kinematic viscosity in transition region between laminar sublayer and turbulent core 17 p2916 A66-33417
 Viscous incompressible fluid motion between two parallel planes and between two co-axial circular cylinders with one boundary moved by impulse 17 p2916 A66-33418
 Vekua method to solve Oseen form of Navier-Stokes equation for incompressible viscous fluid flow 18 p3097 A66-33712
 Static enthalpy and velocity profile within viscous wake of circular cylinder at Mach 20 18 p3049 A66-34582
 Two-dimensional non-Newtonian nonisothermal viscous liquid boundary layer flow in stagnation point proximity and flow deviations due to pressure gradient and shearing stress 18 p3266 A66-34637
 Stability of swirling flow of viscous conducting fluid in presence of circular magnetic field 18 p3150 A66-34934
 Helical flows of viscous compressible fluids for homogeneous and inhomogeneous flows 18 p3103 A66-34942
 Viscosity effect on performance of turbine type flow meters calculated to meet accuracy requirement for complete use of propellants in rocket propelled vehicles 19 p3361 A66-36646
 Plane viscous problem of gas motion through weak straight line discontinuity of acceleration, noting formation of boundary layer 19 p3278 A66-36845
 Viscous thermoconductive model of solar wind motion, using Navier-Stokes equations 20 p3631 A66-37335

Ordinary nonlinear differential equation arising in theory of both axisymmetric and two-dimensional viscous jets falling under gravity 20 p3591 A66-37593
 Density of steady state gas flow expanding from viscous to molecular flow regime approximately calculated 21 p3723 A66-38507
 Tangential velocity and radial flow of unsteady viscous vortex with annular region and flow toward center 21 p3728 A66-39345
 Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, doubly laminar flow and plane flow 21 p3728 A66-39435
 Finite difference analysis of viscous laminar converging flow in conical tubes, assuming parabolic inlet velocity profile and simplified motion 21 p3729 A66-39450
 Liquid drop flow in twisted fan-shaped nonisothermic jet allowing change in viscosity coefficient in flow field, using boundary layer equations 23 p4055 A66-41567
 Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations 23 p4056 A66-41721
 Extrusion of viscous incompressible substance through round hole in infinite wall, obtaining pressure and velocity fields 23 p4057 A66-41738
 Mass transfer and first-order boundary layer effects on sharp cone drag [AIAA PAPER 66-33] 23 p4011 A66-41877
 Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 23 p4057 A66-41881
 Turbulent viscous-interaction parameter in connection with boundary layer growth in presence of mass transfer, examining comparison of effects of strong and weak interactions 23 p4058 A66-41902
 Approximate Navier-Stokes equations for viscous flow conditions near trailing edge of flat plate 23 p4059 A66-42001
 Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029
 Heat transfer from enclosed rotating disk, analyzing effects of radial outflow and inflow on temperature profile and Nusselt numbers on rotor and stator 24 p4294 A66-42705

VISCOUS FLUID
 Nonuniqueness and low stability of solutions to hydromechanical problems demonstrated by steady motion of viscous fluid 01 p0055 A66-10168
 Velocity distribution in laminar viscous liquid-into-liquid jet 01 p0057 A66-10407
 Slow motion of sphere in compressible, viscous and heat conducting fluid analyzed, using Navier-Stokes equations 01 p0006 A66-10424
 Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 01 p0058 A66-10487
 Process fluid lubrication of system bearings 01 p0079 A66-10867
 Axisymmetric steady flow of incompressible viscous fluid in circular tube of constant porosity treated by small parameter method 01 p0059 A66-11003
 Forced motion of viscous liquid heated nonuniformly from below and subject to nonlinear basic temperature profile 02 p0219 A66-11958
 Perturbation velocity and magnetic fields due to interaction of slow flow field of viscous fluid with aligned quadrupole magnet calculated 02 p0270 A66-12159
 Incompressible laminar boundary layer for plate with slot suction at high Reynolds number 04 p0509 A66-13654
 Laminar flow of viscous electrically conducting fluid through annular channel in presence of transverse magnetic field 04 p0551 A66-13824
 Couette flow, unpressurized axial flow in annular gap between two cylinders and flow between two rotating cylinders, taking into account energy dissipation and dependence of viscosity on

temperature 04 p0512 A66-14423
Cavitation bubble collapse in venturi,
discussing flow characteristics under large
pressure gradient [ASME PAPER 65-WA/FE-20]
05 p0663 A66-15610
Steady flow of incompressible viscous fluid
through space between rotating coaxial
cones with porous walls, calculating effect
of injection and suction on radial
flow 06 p0870 A66-16182
Viscous fluid flow, examining effect of
time dependent suction applied at wall of
infinite extent 06 p0871 A66-16351
MHD stagnation-point flow, discussing
incompressible viscous conducting fluid
boundary layer behavior 06 p0916 A66-16355
Motion of solid body with cavity filled
with viscous incompressible fluid at small
Reynolds number, reducing hydrodynamic
problem to solution of stationary linear
boundary value problems 06 p0873 A66-16707
Gravity anomalies and convection currents,
examining sphere and cylinder sinking
beneath surface of viscous
fluid 06 p0877 A66-16785
Viscous fluid model estimates of crustal
thickness and free-air anomaly compared
with measured free-air anomalies and
seismic depths of Puerto Rico trench and
mid-Atlantic rise 06 p0877 A66-16786
Slow steady motion of viscous and
electrical conducting fluid in moving rigid
spherical envelope immersed in uniform
magnetic field 07 p1087 A66-17838
Mathematical analysis of steady flow of
incompressible viscous fluid in presence of
magnetic field, taking flow as momentum
source 07 p1089 A66-17960
Interaction of two identical spheres falling
freely in viscous fluid under laminar flow
conditions 09 p1367 A66-20701
Heat convection in vertical annular tube
filled with mechanically incompressible
viscous liquid 09 p1471 A66-20823
Unsteady motion of viscous incompressible
liquid flow between two concentric
cylinders 09 p1368 A66-20828
Solvent purity effects on non-Newtonian
power law viscosity 09 p1368 A66-20947
Parameter estimation for laminar conical
flow of viscous inelastic non-Newtonian
fluids 10 p1521 A66-21056
Pneumatic fluid elements used in
automatic control systems, noting viscous
fluid properties and application to turbine
rpm control 10 p1486 A66-21753
Internal wave ripples from fluid impacts
on base of stably stratified fluid region,
calculating particular case of single ripple in
viscous fluid 11 p1693 A66-23009
Viscosity and thermoconductivity effects
on asymptotic sonic flow structure near
profiles and bodies of
revolution 12 p1863 A66-24342
Boundary value problems in plane and
axisymmetric hypersonic flow of viscous
ideal gas past blunt body 12 p1797 A66-24343
Asymptotic solution to motion of solid
containing cylindrical or spherical cavities
filled with viscous liquid 12 p1863 A66-24356
Small oscillations of pendulum with
spherical cavity filled with viscous
incompressible liquid 12 p1882 A66-24357
Pressure distribution of viscous electrically
conducting fluid in lubricating layer of
cylindrical bearing 12 p1887 A66-24425
Taylor stability of liquid film on body
surface and flow stabilization relative to
two-dimensional
perturbations 12 p1863 A66-24434
Linearization of Rayleigh problem for
viscous compressible conducting fluid,
considering compressibility effects by
evaluating solution of pressure
equation 12 p1924 A66-24580
Orr-Sommerfeld equation regarding
stability of parallel flows solved for large
Reynolds number, using inner and outer
expansion theory 12 p1866 A66-24944
Heat-transfer coefficients calculated for
forced convection from heated flat plate at
zero incidence to stream of viscous fluid,
noting role of Reynolds
number 12 p1981 A66-24945
Numerical analysis of steady two-
dimensional motion of viscous fluid past flat
plate at zero incidence to uniform stream,

with solutions for Navier-Stokes
equations 12 p1866 A66-24949
Two-dimensional Stokes flows for functions
time-periodic with common frequency,
noting analogy to oscillations of long
cylinder in viscous fluid 12 p1867 A66-24963
Convergence of Keck-Beyer perturbation
solution of nonlinear differential equation
for finite-amplitude plane wave propagation
in viscous fluid 13 p2060 A66-25143
Relativistic hydrothermodynamics in
covariant form for simple viscous fluid,
omitting infinite heat conduction velocity
and instantaneous diffusion flux theory from
treatment of Eckart 13 p2210 A66-26333
Analog computer solution of simplified
turbulent viscous layer boundary value
problem 13 p2064 A66-26370
Heat transfer in Couette flow of radiating
fluid with viscous dissipation, noting
conduction coupling, effects of temperature
level, profile, wall emission, fluid optical
thickness, etc 13 p2210 A66-26718
Invariant rheological equation for flow of
fluid whose viscosity varies independent of
time 14 p2272 A66-26776
Laminar ducted flow of viscous electrically
conducting fluid under uniform arbitrarily
oriented magnetic field for rectangular duct
with nonconducting walls 14 p2342 A66-27407
Shear relaxation time of monatomic fluids
for liquid and dense gas phases calculated,
using LF viscosity data and estimates of HF
elastic moduli 14 p2277 A66-27977
Oscillation frequency and attenuation
factor for long cylindrical waves in viscous
fluid 14 p2278 A66-28068
Solution for free nonstationary convection
in bounded region of Landau-Lifshits
mechanics of continuous
media 14 p2414 A66-28282
Fundamental equations for birefringence of
isotropic elastic solids and isotropic viscous
fluid derived from Toupin theory of
photoelasticity and stress 14 p2408 A66-28388
Three-dimensional MHD flow with jet and
vortex nature in viscous incompressible
conducting fluid 14 p2348 A66-28393
Two-dimensional flow of incompressible
conducting viscous liquid in inlet region of
straight channel under magnetic field,
obtaining flow
characteristics 15 p2553 A66-29742
Motion equations for incompressible
viscous fluid with constant vortex derived,
using complex variable 16 p2683 A66-30216
Turbulent flow of dilute viscoelastic non-
Newtonian fluids in pipes, noting frictional
characteristics, elastic fluid parameters,
etc 17 p2906 A66-32036
Turbulent flow field in straight circular
tubes of sodium carboxymethylcellulose
solutions, measuring pressure drop velocity
profile over wide range of Reynolds
numbers 17 p2906 A66-32037
Stationary boundary value problem of
Navier-Stokes equation for incompressible
viscous fluids 17 p2911 A66-32817
Unsteady slip flow of electrically
conducting viscous fluid over porous flat
plate under transverse magnetic
field 17 p2973 A66-32980
Numerical solution for complete Navier-
Stokes equations for one-dimensional time-
dependent propagation of compressible
viscous thermally conducting diatomic gas,
including presence of traveling shock
wave 18 p3102 A66-34918
Plane steady flow of thin viscous fluid film
between solid wall and free surface, solving
linear and nonlinear
cases 19 p3342 A66-36469
Steady state heat convection in viscous
incompressible fluid sandwiched between
two surfaces perpendicular to direction of
force of gravity 19 p3342 A66-36471
Steady isothermal motion of viscous gas
between outer fixed sphere and
eccentrically located rotating inner
sphere 19 p3371 A66-36481
Motion of hollow body filled with viscous
fluid at large Reynolds numbers,
determining Zhukovskii potentials and
examining small
oscillations 19 p3343 A66-36830
Asymmetric shear flow of viscous fluid
past flat plate, justifying constant pressure

assumption and examining flow patterns at
lower surface in plate
proximity 20 p3547 A66-37978
Radial flow of incompressible viscous fluid
between two parallel
disks 20 p3548 A66-37990
Calculation of heat transfer in laminar
flows of structurally viscous fluids in tubes
with constant thermoconductivity, heat
capacity and density 20 p3681 A66-38122
Weak shock wave structure in viscous
heat-conducting fluid, accounting for
dissipation of energy during one-dimensional
flow 21 p3723 A66-38587
Free laminar boundary layer flow between
parallel streams of different magnetic fields
and temperatures for incompressible viscous
fluid 21 p3776 A66-38682
Mathematical flow-intermittence model for
turbulent patterns, noting viscosity
effects 21 p3725 A66-38954
Conicoidal MHD shock wave in
axisymmetric hypersonic viscous-layer
flow 21 p3727 A66-39185
Steady laminar flow of viscous
incompressible fluid through two-
dimensional channel with fluid sucked or
injected with different velocities through
uniformly porous parallel
walls 21 p3730 A66-39461
Shear stress, velocity profiles, MHD and
cross-viscous effects on forced non-
Newtonian flow of Reiner-Rivlin liquid
against rotating disk 21 p3795 A66-39576
Constitutive equations for nonlinear elastic
solid-linear viscous fluid mixture and for
mixture of two nonlinear elastic
solids 22 p3898 A66-40140
Small parameter method to study steady
state flow of viscous incompressible fluid in
journal bearing 22 p3928 A66-40688
MHD flow in rectangular channel due to
periodic pressure gradient at high Hartmann
number 22 p3957 A66-40704
Temperature dependence of viscosity due
to molecular rotation in non-Arrhenius range
of supercooled liquids 22 p3902 A66-40912
Existence theorem for stationary flow in
magnetic field of incompressible viscous
fluid electrically conductive around solid
electrically conducting
obstacle 23 p4100 A66-41173
Integral operator for solving aerodynamic
problems for slightly rarefied viscous
gas 23 p4054 A66-41356
Falling of sphere along axis of vertical
tube filled with viscous liquid, examining
effect of cylindrical walls by linearized
Navier-Stokes equations, using successive
approximations 23 p4055 A66-41446
Wave resistance of viscous liquid of
infinite depth, examining system of normal
stresses that flow along
surface 23 p4056 A66-41730
Volterra equation and Green function to
solve MHD problem of unsteady flow of
viscous incompressible conducting fluid with
time dependency 23 p4106 A66-41837
Boundary layer solutions to two-
dimensional stationary viscous
incompressible flow past finite object under
vanishing skin friction 23 p4060 A66-42009
Viscous electrically conducting liquid
oscillating in laminar regime between
parallel planes when applying magnetic field
normal to planes and motion
direction 23 p4108 A66-42047
Finite difference method solution of
Navier-Stokes equations and applicability to
cylindrical-channel viscous flow at small
Reynolds numbers 23 p4062 A66-42061
Slow steady viscous flow through annulus
between porous circular cylinders with
uniform arbitrary injection and suction
velocities, calculating wall porosity effect on
velocity and pressure
distributions 24 p4193 A66-42156
Stroboscopic instantaneous velocity
measurements near wall in turbulent flow of
water in channel and analysis of viscous
layer turbulent pulsations 24 p4196 A66-42880

VISIBILITY

SA HAZE SA LIGHT TRANSMISSION

Visibility range of 100-watt lamp and
relation to absorption coefficient of
tropospheric fog 01 p0096 A66-10223
Airport lighting facilities for aiding aircraft

takeoffs and landings in conditions of poor visibility 12 p1859 A66-24832
Possible use of IR radiation to improve visibility through fog, including atmospheric attenuation effects and radiant energy source 16 p2740 A66-30088
Visibility forecasting for London /Heathrow/ Airport by diagrams based on Freeman objective 16 p2740 A66-30227
Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 17 p2948 A66-31907
Overcast sky luminances above snow covered terrain and directional luminous reflectance of backgrounds and objects under overcast skies 17 p2948 A66-32612
Transport approach and landing visibility requirements, examining design of forward portion of airplane 17 p2950 A66-32683
All-weather landing systems in U.K., examining safety and reliability criteria in connection with trident airborne equipment [ICAS PAPER 66-8] 22 p3946 A66-40676
Visibility and small ion density correlated by comparing light scattering with ion attachment processes on airborne scatters 23 p4065 A66-41842

VISIBLE RADIATION

Protection devices against vision impairment occurring during exposure of airmen and military personnel to intense visible radiation 01 p0019 A66-10481
Visible and IR radiation attenuation by artificial fogs found to depend on droplet size and distribution 01 p0097 A66-10860
Mesospheres radiative and photochemical response to fluctuations in UV and visible radiation 02 p0222 A66-11821
Visibility conditions for fibrous structure of auroral arcs and bands 04 p0516 A66-13863
Visible and near UV radiation intensity profiles for ablating Teflon boundary layer in hot subsonic arc-jet flow at one atmosphere [AIAA PAPER 66-56] 07 p0983 A66-18450
IR radiation effect on photovoltaic effect in cadmium sulfide excited by visible light 12 p1927 A66-23772
Sky luminance distribution for upper and lower sky at various levels 15 p2484 A66-28831

VISIBLE SPECTRUM

Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 01 p0133 A66-10755
Design and fabrication methods of semiconductor optoelectronic devices, noting junction emitter outputs into visible spectrum 04 p0494 A66-13764
Visible spectrum absorption cross section of trivalent chromium in metastable 2E state of pink ruby 05 p0694 A66-14902
Output spectra of argon ion laser in ring resonator and two mirror resonators 05 p0694 A66-14904
Unidirectional reflectance of imperfectly diffuse surface defined in terms of surface radiance and equivalent hemispherical radiance of source 08 p1227 A66-19704
Interferometric examination of Jupiter decimeter radio emission, noting equipment, polarization characteristics and distribution of nonthermal emission 09 p1450 A66-20106
Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236
Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334
Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 14 p2285 A66-27854
Multiplier phototubes for UV and visible spectra, noting dark current, equivalent noise input, etc, for space application 15 p2498 A66-28839
Visible spectrum of radiation release from type I supernova 16 p2796 A66-30163
Far IR radiation detected at visible frequency, using nonlinear optical mixing

with lasers 17 p2959 A66-33322
Coherent laser-type light generators with capability of adjusting frequency over visible spectrum 19 p3375 A66-36265
Photographic photometry of comet Ikeya-Seki using telescope in red region of spectrum, obtaining stellar magnitude 22 p3977 A66-39862
Photodetectors capable of microwave modulation frequency response operating in visible or near IR portion of optical spectrum 24 p4212 A66-42808

VISION

SA EYE
SA FLASH BLINDNESS
SA MICROVISION
SA MONOCULAR VISION
SA NIGHT VISION
SA PERSPECTIVE
SA STEREOSCOPIC VISION
Photochemistry of vision including spectrophotometric analysis of rhodopsin optical density, absorbance and quantum efficiency 04 p0461 A66-13789
Claudea-Bagolini optometer investigation of far point in scotopic vision and nocturnal myopia 22 p3856 A66-40501

VISUAL ACCOMMODATION

Contribution of accommodation and eye movements to effectiveness of visual observation and tracking of objects by aircraft personnel 10 p1490 A66-22133
Optical art, discussing mechanism of visual perception, necessity of stimulation of visual cortex, etc 15 p2443 A66-28844
Decay time of positive afterimage following high intensity flashes measured by monocular and binocular brightness matching 18 p3062 A66-33993
Arterial blood pressure, visual accommodation power, vital capacity and body weight of pilots and tower controllers 18 p3059 A66-34407
Thresholds, b-wave latencies, stimulus intensity/b wave amplitude relationships and diffuse adaptation effects upon electroretinogram stimulation by light subtending 20 degree visual field 22 p3856 A66-40965

VISUAL ACUITY

Basic physiological oculomotor mechanisms that make human image stabilization possible, examining flight disturbance effect on system stability 01 p0019 A66-10607
Visual acuity definition and clinical measurement of relevant factors 04 p0462 A66-13793
Supersonic commercial aircraft, discussing piloting problems such as reaction time, visual acuity reduction, etc 06 p0816 A66-16060
Visual acuity decrement during aircraft-simulated weightlessness 09 p1334 A66-19977
Human visual acuity as affected by body position and various g values 09 p1334 A66-19978
Mechanical forced vibrations encountered in aviation, assessing physiological and neurophysiological effects including visual acuity 10 p1493 A66-22128
Human eye, capabilities as optical instrument, particularly spatial filtering effects, visual acuity, eye movement and light receptors 14 p2228 A66-27650
Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual acuity 15 p2437 A66-29473
Windshield scratches and effect on depth perception, visual acuity and fatigue 17 p2862 A66-31833
Visual requirements of space missions, discussing navigation, rendezvous and docking, lunar landing and lunar exploration 17 p2862 A66-32136
Head-up display used during transition from instrument to visual contact in Category II operations based on pilot sensitivity to movement and peripheral vision 17 p2953 A66-33210
Intermediate visual acuity testing of senior airline pilots, including separate testing of each eye with trifocal chart and artificial accommodation measurement 22 p3857 A66-39799

VISUAL AID

Flight simulation developments for

V/STOL visual device requirements including mirrors focusing images at infinity, transparency image storage techniques, optical probes, etc 06 p0869 A66-16814
Visual aid in detection, recognition and acquisition of targets at different altitudes and speeds 07 p0998 A66-17285
White light rather than red for illumination of instruments and cockpits 11 p1648 A66-22667
Illumination systems used as visual aids for pilots when approaching airport 12 p1857 A66-24089
Image intensifier application as aid to visual acquisition of weak luminous moving targets against night sky 23 p4071 A66-41676

VISUAL CONTROL

Approach and landing visibility requirements in terms of information needed by civil pilot 01 p0101 A66-10032
Influence of eye lid movement upon electro-oculographic recording of vertical saccadic eye movements 07 p0999 A66-17662
Book on aviation physiology including atmospheric pressure effect, visual factors in aviation, British Institute of Aviation Medicine, etc 10 p1487 A66-22104
Mathematical evaluation of human visual performance, discussing functions in man-machine systems, application of TV for systems monitoring, etc 19 p3294 A66-36283

VISUAL CUE

Trajectory vs line-of-sight space rendezvous, using direct visual cues only 02 p0187 A66-11830

VISUAL DISPLAY

Closed circuit television display system performance levels required for human visual simulation in flight training [AIAA PAPER 65-264] 03 p0353 A66-12778
TV camera, visual display and video-signal information storage tubes, noting secondary electron conduction camera tube 05 p0642 A66-14561
Building blocks of pictorial navigation display for projection of servo-driven microfilm map onto rear projection screen 07 p1069 A66-17707
Subsonic and supersonic aircraft navigational systems requirements, discussing pictorial presentation and effect on command function 07 p1075 A66-17788
Visual display system providing instrument data in one-to-one correspondence with real world, using cathode ray tube images of horizon and runway projected on aircraft windscreen 08 p1203 A66-19764
Flight environmental simulation of control loading, fuselage movement and visual systems 10 p1520 A66-21855
Computer controlled visual display 11 p1660 A66-22269
Flight deck display for future aircraft projects, emphasizing vertical scale director instruments for cockpit display 11 p1649 A66-23250
Performance sharing when two audio visual vigilance tasks are performed concurrently 11 p1646 A66-23374
Salient hardware, software, and operational features of machine for automatic graphics interface to computer /MAGIC/ operating display system 12 p1827 A66-23835
Asymmetric instability and charge motion in metal-silicon oxide-silicon structures 12 p1932 A66-24823
PCM picture transmission, pseudorandom scanning, noise, bandwidth compression and digital simulation 15 p2450 A66-28785
Navigational information conversion from digital readout to pictorial display 16 p2743 A66-30670
Visual simulation device for aircraft pilot and astronaut 16 p2643 A66-30952
Electroluminescence in avionic display application, noting panel design and ceramic ferroelectrics 16 p2708 A66-31411
Airport operation under low visibility conditions, discussing use of pictorial display to aid in surface movement 17 p2953 A66-33208
Psychophysiological study of compensatory tracking on digital altimeter display and on combined digital and scale-and-pointer display 17 p2869 A66-33448
Image interpretation in manned space surveillance systems 18 p3060 A66-33742

Image related scanning systems for visual simulation display for space rendezvous and docking
[AIAA PAPER 65-263] 18 p3093 A66-33788

Gas laser used to determine residual wedge angle in optical flats and direct display of relief maps 19 p3373 A66-35390

Visual displays to aid pilot to fly, monitor and control power plant, navigational and other equipment and communicate with ATC ground stations 20 p3508 A66-36996

Information display - National Symposium, New York, September 1965 22 p3927 A66-40286

Visual write-erase-nonstore and electrical readout accurate tracking display storage tube operating on principle of secondary electron emission charging of thin film dielectric 22 p3927 A66-40287

Man-machine disciplines and integrated visual display techniques in vehicle stabilization and control 22 p3945 A66-40289

Alphanumeric generator for display of digital computer data on TV raster and storage in memory 22 p3927 A66-40290

Target conspicuity for predicting level of search performance as function of spatial and temporal variables 22 p3859 A66-40862

Retinal analogs of three-dimensional forms produced on CRT for three-dimensional oscillographic display system 23 p4047 A66-41596

Pictorial representation of pulse-height energy spectra with two independent variables originating from experimental analyzer 24 p4172 A66-42490

VISUAL FIELD

Receiver characteristics for visual range location signal due to quantum structure of field 02 p0193 A66-12272

Receiver characteristics for visual range location signal due to quantum structure of field 12 p1813 A66-23876

Correlation of simultaneous optical and radio auroral data showing that radio wave scattering belt includes visual auroral belt 16 p2692 A66-30329

Relation between size of visual fields of observers and time required to locate targets on static displays, presenting equations determining search time 21 p3701 A66-39421

VISUAL FLIGHT

Marine pilot training to develop visual habit patterns as aid in reducing mid-air collision hazards 07 p0999 A66-17712

High altitude visual flight environment, discussing sky brightness, instrument and runway lighting, visual fields, eye protection, etc 10 p1494 A66-22131

Optical and atmospheric conditions contributing to visibility loss at high altitude for high-speed aircraft approaching each other with very rapid closing times 10 p1494 A66-22134

VISUAL OBSERVATION

Computer simulation of pattern recognition system employing same variables as human visual system and using cell assemblies and contour projection 01 p0034 A66-10963

Visual data of sudden changes in motion of Jupiter Great Red Spot during 1962 02 p0292 A66-12191

Visual aurora morphology and dynamics, luminosity curves, angular and energy distributions of auroral electrons, etc 03 p0365 A66-12859

Visual and photographic observation of solar photosphere in 1964 shows abundance of sunspots 03 p0428 A66-13032

Meteor observation over Poland pertaining to sightings from 1921 to 1937 03 p0428 A66-13033

Scattering particles for visual polarimetric and UV photometric estimates of surface pressure of Mars 04 p0578 A66-13896

Mount Bezovec meteor expedition /1961/ observations on luminosity function of visual Persids and sporadic meteors 07 p1135 A66-17634

Instrumental effects distorting data of telescopically observed meteors analyzed by simultaneous observation with various binocular telescopes and naked eye 07 p1135 A66-17635

Design and operation of telemagnetograph for visual observation of geomagnetic field 08 p1228 A66-19799

Moon illusion and distance estimation as affected by observer 09 p1334 A66-19979

Visual observations made by crew of Voskhod I spacecraft, including photographs of atmospheric and geophysical features 09 p1376 A66-20994

Visual, photographic and radiometric observation of Mars surface and atmosphere 13 p2013 A66-25278

Time characteristics of visual detection and recognition of two-dimensional images against varicolored background 14 p2230 A66-27652

Life detection on Mars by visual techniques, discussing imaging devices, filters, shutters and microscopy 18 p3063 A66-34371

Design and operation of telemagnetograph for visual observation of geomagnetic field 21 p3736 A66-38795

Interstellar space navigation, considering problem of observables, navigation schemes and instrumentation 21 p3767 A66-38894

Venus phase simulator experiment indicating anomaly due to observer 23 p4128 A66-41208

Satellite orbit determination and air density and scale height analysis, using visual observation 23 p4128 A66-41359

VISUAL PERCEPTION

SA COLOR PERCEPTION

SA FORM PERCEPTION

Monographs on vision and visual perception 04 p0461 A66-13787

Electrophysiology of vision describing neural and photochemical processes and motor response 04 p0461 A66-13788

Human eye adaptation to dark and light, noting threshold dependence on previous history of illumination 04 p0461 A66-13790

Brightness discrimination and brightness contrast of human and animal eyes in suprathreshold luminance difference 04 p0461 A66-13791

Characteristics of afterimages produced by persisting visual effect after termination of illumination 04 p0462 A66-13794

Specification of stimulus conditions for visual space perception in terms of monocular and binocular cues 04 p0462 A66-13795

Visual perception of forms and relevant factors 04 p0462 A66-13796

Visual perception of real and apparent movement, noting cues and threshold 04 p0462 A66-13797

Psychophysiological effects of low friction on man, particularly rotation on visual reaction time, heart rate and spatial orientation 06 p0868 A66-16240

Visual contours in homogeneous space, describing Julesz figure application to problems of stereoscopic vision 06 p0811 A66-16348

Analog method for simulating visual receptor network as model for inhibitory interaction in retina 06 p0819 A66-16849

Visual factors in aviation, examining night vision and dark adaptation, scanning technique to locate object, glare and dazzle from artificial source 10 p1490 A66-22132

Human ability to detect small excursions of apparent movement of point light source, considering visual guidance system application 12 p1808 A66-23923

Changes in shock-evoked response complex /SERC/ recorded from visual cortexes of cats after retinal illumination, noting enhancement of waveform after photic stimulation and role of barbiturate anesthetization 13 p2012 A66-26581

Optical art, discussing mechanism of visual perception, necessity of stimulation of visual cortex, etc 15 p2443 A66-28844

Psychophysiological factors which influence performance of photointerpreter 15 p2504 A66-30008

Image distortion within cinematographic process as related to photography, noting quality estimation, visual perception criteria, etc 16 p2702 A66-30432

Portion of human vestibular system response determined through eyeball counterroll measurement, noting experimental techniques and methods of computing results 16 p2639 A66-30807

Light propagation through Schwarzschild

singular sphere, solving problem of visual image of emitting surface of gravitating sphere as seen by observer 16 p2748 A66-31171

Automatic vortex recognition system for Tiros satellite photograph analysis, noting phases of development and results obtained 16 p2658 A66-31251

Visual monitoring of multichannel displays, noting number of channels used, operator performance characteristics, etc 16 p2644 A66-31269

Visual effects produced by factors of so-called glare from stationary and moving targets 16 p2641 A66-31388

Target recognition performance, examining relative effect of size and smear or blur of display 17 p2864 A66-32155

Vector transformation properties of tristimulus color-coordinates used to characterize human visual sensation 18 p3111 A66-33992

Eye movement data used for studying nonvisual processes involved in ocular patterns 18 p3059 A66-34198

Pulse stimulated eye response cancellation due to information contained in subsequent pulse with longer duration 20 p3504 A66-36944

Increment threshold of vision cannot be used as reliable index of visual brightness due to variable and complex relation 20 p3504 A66-36947

Scale of bidirectional similarity in recognition and identification problems 20 p3505 A66-37052

Tone quality variation with time interval of perception, using photometer with Balzer interference filter 20 p3507 A66-38099

Human performance analysis based on two criteria, zero and 100 percent legibility of moving targets consisting of black alphanumeric symbols, finding mean angular velocities 21 p3701 A66-39423

Perceptual masking and enhancements of two flashes in evoked cortical potentials recorded by electroencephalography 23 p4029 A66-41549

Visual perception threshold based on Wiener or power spectrum of noise in relation to Fourier transform of relevant image detail 24 p4165 A66-43025

VISUAL SIGNAL

SA OPTICAL SIGNAL

Operation principle, design and application of colorists which change color at predetermined temperatures determined by current passing through them 03 p0340 A66-12475

Inter- and intramodal comparisons of light and tone durations in two-alternative forced-choice situation, noting possible judgment errors 13 p2015 A66-25789

VISUAL STIMULUS

Effects of physical location of visual stimuli on intentional response time /IRT/ 02 p0183 A66-12075

Light and noise level, stimulus intensity and background shade variation effect on reaction time 02 p0183 A66-12076

Review of data on visual flicker fusion and intermittent stimulation 04 p0462 A66-13792

Interaction between optokinetic and vestibulo-ocular responses during head rotation in various planes 11 p1643 A66-22583

Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval length 12 p1806 A66-24232

Occipital evoked potential correlated with visual anomaly under stimulus of incoherent succession of randomly patterned optical images 12 p1806 A66-24393

Adaptive color shifts due to chromatic adaptation interpreted as linear mappings 20 p3504 A66-36942

Sensitivity to color differences as function of step size 20 p3505 A66-36948

Quantitative multivariate statistical analysis of average evoked potentials and application to visual stimulus intensity and duration 20 p3589 A66-37050

Psychophysiological fusion linking afterimages of separate visual stimuli causing artifacts in visual astronomical observations 20 p3507 A66-38053

EEG relation to average evoked potentials and human reaction time to visual stimuli

for trials with and without feedback 23 p4029 A66-41550
Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-41577
Possible sustantation of observing behavior in pigeons by stimuli of chain schedule or by stimuli correlated with passage of time in interval schedules 24 p4167 A66-42366

VISUAL SYSTEM

Transmission and information processing rate of human visual system 15 p2435 A66-29450
Response characteristics of lateral geniculate cells of macaque monkey, discussing hue, saturation and brightness encoding in primate color visual system 20 p3504 A66-36946
Observed regularities of contrast characteristics of human visual system in photopic luminance region examined by psychophysics of response/stimulus peak-to-peak measurements of spatial sine wave patterns 21 p3700 A66-39129

VISUAL TASK

Vigilance research, relevance to modern aerospace monitoring tasks 11 p1646 A66-23371
Vigilance performance in observing light flashes analyzed for effect of noise and signal rate 11 p1646 A66-23375
Signal and response complexity effect on eighteen hours of visual monitoring digital display boxes 11 p1646 A66-23376
Vigilance in six-hour monitoring as affected by knowledge of results and differential monetary reward 11 p1646 A66-23377
Visual monitoring of multichannel displays, noting number of channels used, operator performance characteristics, etc 16 p2644 A66-31269
Square root of time effect on human perception of stimulus pattern unvarying over time 20 p3505 A66-37108
Effect of color and brightness contrast, direction of contrast and contrast values on legibility of circular dial 21 p3701 A66-39420
Competing visual tasks used in psychological stress testing of special mission personnel 21 p3701 A66-39425
Vigilance training for signal detection 22 p3858 A66-40858

VISUALIZATION**S FLOW VISUALIZATION**

VITAMIN B 06
S PYRIDOXINE

VITON RUBBER

Stress relaxation of gamma irradiated fluorocarbon elastomers to study radiation induced chain scissions in copolymers 20 p3587 A66-37310

VITREOUS MATERIAL**SA GLASS**

Average heat of atomization in correlating physical properties of vitreous semiconductor 08 p1268 A66-18655
Gibbs-DiMarzio theory of glass transition used to derive Simba-Boyer parameter, which is function only of fractional unoccupied volume 22 p3938 A66-40911

VJ-101 AIRCRAFT**SUD VJ-101 AIRCRAFT****VLASOV EQUATION**

Finite gyro-radius corrections to hydromagnetic equations for Vlasov plasma 03 p0400 A66-12950
Kinetic energy in unstable and weakly stable plasma noting optical and acoustical modes in electron-ion system, Vlasov term in quasi-linear theory and two-particle correlation term 04 p0550 A66-13406
Vlasov nonlinear equations for solving equilibrium problem of shallow shells 04 p0587 A66-13484
Solution for group properties of equations for monoenergetic charged-particle beam extended to beam in presence of stationary background and multiveLOCITY and multicomponent beams 04 p0556 A66-14417
Collisionless damping of nonlinear plasma oscillations, with exact solution of Vlasov equation for resonant electrons 08 p1260 A66-18537
Stationary state of plasma in magnetostatic and HF fields used to derive solution for corresponding Vlasov equation 09 p1410 A66-20981
Vlasov equation of particle orbits in plain

magnetic fields, with application to shock wave at geomagnetopause 10 p1606 A66-21242
Relationship between AC probe resonance and resonant scattering used to calculate probe response from Vlasov equation, employing model of plasma probe 11 p1707 A66-22974
Equilibrium equations of shallow cylindrical shell of arbitrary cross section subject to arbitrary loading 11 p1783 A66-23033
Plasma stability problem, discussing macroscopic and microscopic approaches and application of Liapunov method 13 p2141 A66-25583
Vlasov equation solution, using expansion in inverse powers of magnetic field 13 p2145 A66-25732
Flute instability of beta and neutral plasma contained in mirror machine, considering particle motion for solution of Vlasov equation, obtaining eigenvalue equation for potential of flute-like perturbation 13 p2146 A66-25742
Dielectric tensor in relativistic Vlasov plasma in electron cyclotron harmonic resonance region 13 p2155 A66-26676
Generalized Penrose condition for wave modes in plasma 13 p2156 A66-26687
Finite difference solution of nonlinear boundary value problem of Landau-Vlasov equation for charged particle for Maxwellian distribution function 14 p2344 A66-27625
Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749
Response of finite relativistic beam plasma system to small disturbances analyzed, using coupled Vlasov-Maxwell equations 17 p2970 A66-32640
Vlasov variational analysis of stress-strain state of plates and shallow shells under large deflections 18 p3252 A66-33707
Landau damping in inhomogeneous plasmas indicated by solution of Vlasov equation 18 p3150 A66-34936
Extension of Vlasov bending theory for thin shells to include shells with undamped solutions, obtaining partial differential equations for normal deflection and stress function 19 p3472 A66-35466
Fluid equations used in describing electron and ion motion perpendicular to field lines in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-36527
Hydromagnetic, resistive and microinstabilities in plasmas, noting particle collisions and effect and validity of Maxwell-Vlasov equations with Fokker-Planck collision term 19 p3417 A66-36528
Inhomogeneous plasma instability for cylindrical rotational geometry examined, using Vlasov equations 19 p3418 A66-36534
Reversible property of Vlasov equation describing thermalization of electron beam in plasma and Landau damping, noting entropy is constant in nonlinear approximation 20 p3608 A66-37460
Macroscopic hydromagnetic equations with magnetic viscosity for collisionless plasma, determining Larmor radius ratio to characteristic length, using Vlasov equation in drift frame 20 p3610 A66-38054
Input resistance of short filamental antenna in warm isotropic plasma from kinetic /Vlasov equation/ rather than hydrodynamic approach 22 p3874 A66-39939
Error correction in Vlasov equations of continuity of deformations in curvilinear coordinates 22 p3948 A66-40374
Higher order corrections to Chew-Goldberger-Low theory, with attention to Vlasov equation 23 p4103 A66-41487
Electric field normally incident onto warm semimfinite plasma obtained by Wiener-Hopf technique and Vlasov equation 23 p4103 A66-41492
Electrostatic plasma wave propagation in hot inhomogeneous media, obtaining WKB solution for Vlasov equation 23 p4104 A66-41506
Stationary effective interaction between particles in quantum Vlasov plasma for particular model 23 p4104 A66-41509

VOCODER

Pole-sharing method for reducing number of poles required for synthesis of bank of contiguous bandpass filters 15 p2463 A66-29038

VOICE COMMUNICATION

Voice communication channels expansion, using mans binaural listening capability 02 p0187 A66-11828
Voice communication in space discussing Gemini subsystem, Apollo Command Module system and laser communication techniques 04 p0477 A66-13588
UHF voice communications system for 412L Air Weapons Control System discussing transmitter, receiver and compliance testing 04 p0497 A66-13964
Electrodeless excitation of discharge in helium-neon gas laser tube applied to voice transmission 05 p0696 A66-14924
Simulated flights evaluating verbal communication intelligibility in oxygen breathing mixtures at low atmospheric pressures compared with results obtained in room air at ground level 06 p0813 A66-16827
Audio signal processing techniques in future space exploration, discussing channel capacity, speech processing, bandwidth narrowing, etc 13 p2025 A66-26024
Gemini Voice Recording System, MRS 200 for voice-time tape recording during manned space flights 13 p2081 A66-26025
Formant frequency parameter of speech spectrum pattern by cancel method 16 p2653 A66-30800
Transceiver subsystem of two-way voice communication system consisting of ear device and master station 19 p3288 A66-35694
Measurements of voice channel loading with data for systems carrying video information and determination of interference noise 22 p3864 A66-40062

VOICE DATA PROCESSING SYSTEM

Automatic command control system using phonetic voice pattern recognition 04 p0469 A66-13496
Functional requirements for man-machine dialogue, noting voice insertion of data 22 p3871 A66-40729

VOLCANIC THEORY

Lunar Lake depression explained by cryptovolcanic activity or meteorite impact 03 p0365 A66-12721
Volcanic origin of lunar and Martian craters, noting distribution, diameters, etc 18 p3225 A66-33625
Similarity in frequency distribution of Martian and lunar craters with terrestrial volcanic craters 18 p3226 A66-33626
Thermal energy calculations from circular and elliptical spots in area of crater Aristarchus to support volcanic origin 18 p3228 A66-34099
Terrestrial calderas, defined as basins of subsidence larger than volcanic craters, associated pyroclastic deposits and possible lunar application 19 p3458 A66-35450
Mechanism for selenological processes assuming lunar surface is anorogenically molded and crater pattern stems from reactivation of anorogenic zones 19 p3464 A66-36312
Volcanic vs meteoritic origin of lunar craters, discussing survival advantages in lunar landing 22 p3980 A66-40398
Impact theory of crater formation on surfaces of Moon and Mars not as consistent with evidence as endogenous cratering theory 24 p4280 A66-43028

VOLCANICS

Volcanic sublimates and secondary impact craters of Llanana Volcano, Hawaii, with reference to lunar craters 02 p0288 A66-11500
Stable aerosol formation from vapor pressure of hot lava of volcanic eruptions, causing evaporation and condensation from gas phase 10 p1607 A66-21288

VOLT-AMPERE CHARACTERISTICS

Static drift in epitaxial planar silicon transistor choppers 01 p0035 A66-10208
Optical and electrical characteristics of injection electroluminescence p-n homojunctions from zinc selenide telluride crystals 01 p0119 A66-10346
Cobalt electrode performance in high temperature fuel cells, presenting V-I characteristics 01 p0014 A66-10358

Volt-ampere characteristics of variable Josephson current interaction with resonance oscillations in superconducting film tunnel structure 01 p0119 A66-10449

Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode spacing 01 p0016 A66-10702

Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 01 p0043 A66-10764

Current-voltage characteristics of tunnel diode measured by bridge circuit and mmeter 01 p0045 A66-10995

Cathode ray curve tracer for differentiated current-voltage characteristics of tunnel diode 01 p0046 A66-11043

Electric current oscillations in germanium emiconductors having carriers in nonthermal equilibrium 01 p0128 A66-11197

Oscillator circuits with several series-connected tunnel diodes to increase voltage amplitude and full utilization of power of bias batteries 02 p0196 A66-11412

Field-emission current voltage behavior of n-type germanium crystals whose surfaces were prepared by high field evaporation 02 p0271 A66-11439

Nonlinear electrical effects and recombination of hot electrons in compensated germanium, studying steady and transient I-V characteristics 02 p0273 A66-11717

DC and LF AC characteristics of silicon transistor over collector current range 02 p0200 A66-11878

Low energy nitrogen ion irradiation of germanium plates resulting in conductivity and inverse current variation 02 p0277 A66-12081

Volt-ampere characteristics and minority carrier recombination region width in regenerated semiconductor p-n junction 02 p0277 A66-12085

External electric field effects on volt-ampere characteristics and breakdown in p-n, p-n-p and p-n-p-n structures 02 p0277 A66-12090

Steps for V-I characteristic of Josephson tunnel current interaction with electromagnetic field in dielectric superconductors 03 p0407 A66-12282

Nonohmic behavior of silicon monoxide under various conditions and proposed model for current-voltage and current-temperature relations 03 p0409 A66-12727

Current oscillations in forward biased silicon p-i-n diode with wide intrinsic region 03 p0342 A66-12728

Temperature effect of nonlinear volt-ampere characteristics in piezoelectric semiconducting tellurium 03 p0410 A66-12730

Tunnel diode monostable multivibrator studied by single trajectory on I-V characteristics of tunnel diode 03 p0343 A66-13013

Liquid element tantalum diode characteristics 03 p0345 A66-13103

Volt-ampere characteristics of variable Josephson current interaction with resonance oscillations in superconducting film tunnel structure 03 p0413 A66-13312

Temperature dependence of input and output current-voltage characteristics of N-riode 03 p0346 A66-13320

Current-voltage characteristics of gallium arsenide diode noting temperature effect on threshold voltage and breakdown current 03 p0346 A66-13323

Temperature sensitivity of p-n junction volt-ampere characteristic may make such devices suitable for meteorological sensors 04 p0519 A66-13675

Current-voltage characteristics of zinc-diffused gallium arsenide diodes measured between 4.2 and 300 degrees K with varying carrier concentrations in n-type region 04 p0494 A66-13733

Current-voltage characteristics of long diodes calculated by dividing diode base into three regions 04 p0495 A66-13767

Channel shape effect on current-voltage characteristics in channel transistors 04 p0496 A66-13906

Properties of silicon diodes with gold alloy

bases, examining anomalies in V-I characteristics 04 p0499 A66-14055

Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 04 p0499 A66-14060

Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature distribution 04 p0554 A66-14298

Tunnel diode in superregenerative amplifier, using phase-plane method to investigate volt-ampere characteristics of diode and effect on oscillation 04 p0501 A66-14410

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 05 p0731 A66-14655

Neutron-induced base current component in silicon transistor which varies with integrated neutron flux and base-to-emitter voltage 05 p0735 A66-14857

Steps for V-I characteristics of Josephson tunnel current interaction with electromagnetic field in dielectric superconductors 05 p0738 A66-15454

Ignited mode of current voltage characteristics of thermionic diodes 05 p0617 A66-15550

Phenomenology of ignited cesium diode discharge noting saturation mode, obstructed mode and ball of fire 05 p0728 A66-15552

Maximum obtainable efficiencies of cesium diodes with cesium fluoride additive from experimental U-I curves 05 p0618 A66-15559

I-V characteristics of thermionic converters with ohmic resistance, using differential equation with boundary conditions for local potential difference between emitter and collector 05 p0619 A66-15564

Influence of plasma on efficiency of thermionic converter filled with krypton, noting current-voltage characteristics 05 p0621 A66-15574

Pulsed volt-ampere characteristics of oxide-coated cathode at various pulse repetition rates 06 p0838 A66-15890

Frequency dependence of dynamic properties of semiconductor small area ohmic contacts in volt-ampere characteristic regions when constant current and sinusoidal pulses are applied 06 p0838 A66-15893

Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 06 p0915 A66-16150

Current voltage characteristics of cadmium sulfide semiconductors showing departures from Ohm law associated with ultrasonic amplification, crystal length and increasing conductivity 06 p0923 A66-16183

Low level garnet limiter with operating range greater than one octave, using conductivity change due to impact ionization in n-type germanium, noting volt-ampere characteristic 06 p0851 A66-16459

Effect of nonsinusoidal pump voltage waveform on performance of tunnel diode mixer 06 p0854 A66-16677

Current instabilities in gallium arsenide, noting oscillation frequency and volt-ampere characteristics 06 p0925 A66-16688

Polarization and volt-ampere characteristics of ferroelectrics simultaneously under static and alternating fields 06 p0854 A66-16726

Thin electrostatic sheath near body immersed in weakly ionized flowing gas in mean free path regime for relatively small Debye length 06 p0921 A66-17102

[AIAA PAPER 66-6] 06 p0921 A66-17102

Current-voltage characteristics of silicon p-n-p-n structures in cutoff region for controlled and uncontrolled diodes, transistors with hooks and binistors 06 p0940 A66-17187

Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 06 p0860 A66-17196

Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 06 p0860 A66-17197

Automatic biasing effect on mean conductivity and constant current

component of germanium tunnel-diode autooscillator 06 p0860 A66-17198

Space-charge-limited currents and electron traps in CdS crystals thermally stimulated after electron injection 07 p1097 A66-17738

Current creep in selenium rectifier and effect on local conductivity channels in p-n junction of rectifier 07 p1099 A66-17930

Fast neutrons effects on operating characteristics of silicon controlled rectifiers 07 p1010 A66-18149

Electrical characteristics of supersonic MHD generator with arc heated argon plasma, noting discharge modes 07 p0993 A66-18311

Volt-ampere characteristics of n-silicon in strong electric field from 77 to 300 degree K 07 p1105 A66-18365

Volt-ampere characteristics of silicon carbide crystals with negative differential resistance 07 p1105 A66-18375

Carrier formation due to passage of current through elastically deformed Ge, detecting nonlinearity of volt-ampere characteristics 07 p1106 A66-18381

Current-voltage relationship of Au on GaAs Schottky barrier, examining introduction of single temperature independent parameter 07 p1106 A66-18399

Single injection measurements in n-type silicon at liquid-helium temperatures under transient conditions, using pulse measurements 07 p1107 A66-18414

Current-voltage characteristics of aluminum-aluminum oxide-gold diodes 08 p1188 A66-18641

Tunnel diode I-V characteristics, RF detector suitability, input-output characteristics, sensitivity and noise 08 p1191 A66-18943

Transient characteristics of theoretical model of drift transistor when voltage jump appears on emitter junction, noting transient velocity 08 p1193 A66-19110

Optical modulation of current in germanium-silicon n-n heterojunctions, noting consistency of I-V, C-V and photocurrent spectra characteristics with depletion region model of material 08 p1273 A66-19253

Time dependence of forward overload current passing through silicon rectifier, considering thermostability loss, current-time characteristics and p-n junction temperatures 08 p1195 A66-19314

Origin of channel currents associated with P plus regions in silicon, discussing breakdown of field-induced junction 08 p1195 A66-19357

Network design implementing solar cell array simulator, using wideband constant current source in conjunction with conventional diodes and linear resistors 08 p1169 A66-19494

Space vehicle automatic electric power system test mockup 08 p1169 A66-19503

Second breakdown volt-ampere characteristics in triple diffused n-p-n Si transistor 09 p1351 A66-19936

Mobility of hot electrons in runaway regime of n-type InSb and GaAs at low temperatures 09 p1412 A66-19987

Hysteresis nature of current-voltage characteristics observed in p-n junctions obtained by bombarding germanium crystals with fast electrons 09 p1413 A66-20001

Tunneling between thick lead-thallium films and very thin superconducting aluminum films in magnetic field studied, using current-voltage characteristics of alloy 09 p1417 A66-20032

Second derivatives of tunnel junction obtained as function of applied bias by observing intermodulation frequency signal 09 p1417 A66-20033

High field V-I characteristics of transistor 09 p1355 A66-20570

Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 09 p1428 A66-20593

Blue haze on electropolished silicon surfaces 09 p1432 A66-20977

Behavior of current carrying superconducting coil with heat generation in windings, noting voltage-current characteristics 10 p1509 A66-21562

- Microplasma breakdown in reverse biased p-n junctions in epitaxial gallium arsenide 10 p1577 A66-21571
- Current-voltage characteristics of tunnel diode measured by bridge circuit and ammeter 10 p1510 A66-21875
- Boron semiconductor devices acting as contactless switches, based on current vs voltage characteristics of boron 10 p1511 A66-21729
- Annular magnetic Hall current plasma accelerator 10 p1594 A66-21779
- Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968
- Current saturation from negative resistance and domain trapping in n-type gallium arsenide crystal 10 p1586 A66-22096
- Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 11 p1661 A66-22275
- Norator and nullator effects on nodal admittance matrix 11 p1652 A66-22385
- Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 11 p1666 A66-22730
- Space-charge-limited current in solid for field depletion of filled traps, noting current-voltage characteristics 11 p1751 A66-22733
- Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 11 p1667 A66-22742
- Superconducting systems partitioned by thin barriers allow supercurrents to pass through, noting magnetic field penetration into barrier, AC supercurrents, structure in DC, current-voltage characteristics of barrier, etc 11 p1756 A66-22978
- Cadmium sulfide space charge limited diodes, noting current voltage characteristics and field and electron density distributions 11 p1668 A66-23026
- Current-voltage characteristics of CW X-band GaAs microwave Gunn generator 11 p1713 A66-23029
- Volt-ampere characteristics of short semiconductor diode at high injection levels 11 p1757 A66-23229
- Monostable and bistable counting circuit synthesis and analysis of volt-ampere characteristics 11 p1678 A66-23238
- Cathode ray curve tracer for differentiated current-voltage characteristics of tunnel diode 11 p1671 A66-23290
- Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode spacing 11 p1640 A66-23307
- Current-voltage characteristics of electric arcs approximated by dimensionless criteria 11 p1747 A66-23312
- Characteristics of periodic fluctuations in voltage, current and luminous intensity of discharge through inert gases and mercury vapor, using commercial discharge tubes 11 p1747 A66-23369
- Field effect transistor application to linear amplifier and attenuator 11 p1673 A66-23470
- Nondestructive breakdown mechanism in silicon planar transistors between collector and base with emitter open-circuited, noting negative resistance region 12 p1837 A66-24308
- Planar silicon insulated-gate field-effect transistor using silicon nitride as diffusion mask, passivating layer and gate insulator 12 p1837 A66-24310
- Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456
- Equation relating voltage, current, ampere-hours consumed and temperature for silver oxide-zinc batteries, noting dual potential concept 12 p1804 A66-24667
- Surface state and surface recombination velocity characteristics of Si-SiO₂ sub 2 interfaces 12 p1932 A66-24827
- High sensitivity apparatus for measuring current voltage characteristics or any selected derivative in tunnel diodes 12 p1847 A66-24983
- Current voltage characteristics of dielectric films 13 p2157 A66-25040
- Current-voltage characteristics of conductivity-modulated silicon p-i-n diode as affected by high-level injection and fast-neutron bombardment 13 p2158 A66-25054
- Copper diffused gallium arsenide p-n junctions, explaining current-voltage characteristics, light emission and capacitance of diodes at 300 and 77 degrees K 13 p2161 A66-25186
- Weimer triode with contact rectifier for use as component of microminiature radio circuits, noting effect of contact rectification on current-voltage characteristics and amplifying power of such triodes 13 p2031 A66-25228
- Current limitation by space charge in polycrystalline barium titanate, noting volt-ampere characteristics and hysteresis effects 13 p2164 A66-25472
- Thermionic converter, motive diagram and current voltage characteristics, showing variations of power at maximum efficiency with emitter temperature 13 p2181 A66-25529
- Triple diffused high-voltage silicon transistors, characteristics and application 13 p2037 A66-25544
- Arc discharge in cesium vapor within diode, noting plasma parameter distribution in electrode spacing during low, luminous and arc discharge phases 13 p2142 A66-25681
- Potential profile around negatively biased spherical and cylindrical ion probes in collisionless plasma computed numerically 13 p2142 A66-25707
- Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 13 p2167 A66-25930
- Static composite characteristics of series-connected tunnel diode 13 p2042 A66-26098
- Normalized low-level characteristics of saturated transistor 14 p2247 A66-27043
- Anode current in cut-off smooth-bore magnetron 14 p2248 A66-27057
- V-I characteristics of tunnel diode by approximation method of polynomials of degree no higher than sixth 14 p2254 A66-27739
- Inductive impedance of dynistor and relationship to positive and negative differential resistance of V-I characteristics 14 p2254 A66-27742
- Long diode theory not limited by conditions of quasi-neutrality, noting V-I characteristics 14 p2254 A66-27744
- V-I characteristics of alloyed p-n junctions in InAs in temperature range from 78 to 296 degrees K 14 p2264 A66-27745
- Temperature dependence of input and output current-voltage characteristics of N-triode 14 p2260 A66-28294
- Current-voltage characteristics of gallium arsenide diode, noting temperature effect on threshold voltage and breakdown current 14 p2260 A66-28297
- Temperature dependence of FET drain characteristics, square wave behavior, carrier mobility transfer characteristics and contact potential 14 p2261 A66-28375
- Dielectric field cathode model of field and photofield emission from high resistivity Si and Ge at low temperatures 15 p2558 A66-28609
- High field properties of gold doped germanium at liquid nitrogen temperature 15 p2560 A66-28633
- Conventional point-contact diodes and junction diodes with point-contact geometry, examining fabrication techniques and millimeter wave application 15 p2461 A66-29013
- Current-voltage characteristic for tunnel-diode millimeter wave harmonic generator in 24 to 72 gc region 15 p2462 A66-29024
- Feedback effect on current voltage characteristic of device with negative feedback and reactivity of device in negative resistance region 15 p2464 A66-29121
- Current voltage characteristic of gas discharge for one-dimensional stationary case with fixed temperatures at conductor end, noting voltage saturation 15 p2551 A66-29224
- Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 15 p2429 A66-29880
- Subharmonic structure in superconductive Pb-Pb tunneling junctions, noting energy gap values and background current-temperature dependence 16 p2769 A66-30160
- Magnetic coupling effect on flux pinning and flux-flow resistivity in superconducting tin film 16 p2770 A66-30170
- Magnetic field effect on direct band-to-band tunnel current in doped germanium, noting decreases in reverse current and current-voltage characteristics 16 p2776 A66-30735
- Simultaneous measurement of voltage, current, current derivative and X-ray output as function of time in low inductance flash X-ray discharge tube 16 p2706 A66-30935
- Bulk oscillations in n-type Si compensated with either Au or Co deep level impurities 16 p2778 A66-31078
- Axially flowing gas through arc discharge, examining effect on I-V characteristic and radial temperature distribution in arc column 16 p2762 A66-31159
- Partial differential equation solution, using small parameter method for electron hole transition 16 p2784 A66-31553
- Space charge formation and decay during passage of electric current through plasma moving in electric field, obtaining V-I characteristics 16 p2766 A66-31598
- Current voltage characteristic of three-layer germanium semiconductors, noting quadratic dependence of current on voltage 16 p2785 A66-31668
- Secondary breakdown relaxation oscillations and I-V characteristics of point-contact n-type Ge diode 17 p2879 A66-31868
- Undepleted current carrier effect on characteristics of inverse p-n junction 17 p2976 A66-32069
- Properties of silicon diodes with gold alloy bases, examining anomalies in V-I characteristics 17 p2885 A66-32221
- Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 17 p2885 A66-32226
- Space charge limited currents theory in thin semiconductor layers, showing relationship of current-voltage characteristics and effect of traps 17 p2976 A66-32261
- Field emission in thin semiconductor layers upon metallic substrate, noting V-I characteristics dependence on Si layer thickness, tunnel effects, etc 17 p2977 A66-32265
- Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288
- High field V-I characteristics of n-type GaAs, noting critical field current saturation, field distribution, trapping, hysteresis, etc 17 p2978 A66-32403
- Plotting of first and second derivatives of tunnel junction V-I characteristics, noting application to thin films prepared by vacuum evaporation 17 p2886 A66-32496
- Space-charge-limited electron current in silicon 17 p2980 A66-32646
- MOS structure as resistor in monolithic integrated circuits, noting volt-ampere characteristics, temperature coefficient, etc 17 p2887 A66-32697
- Unijunction transistor parameter and design charts 17 p2888 A66-32780
- Thyristor selection for control application, discussing V-I characteristics, SCR behavior, optical control feasibility, etc 17 p2888 A66-32781
- Diode characteristics and application guidelines 17 p2888 A66-32782
- Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107
- Intermodulation elimination in transistors, determining figure of merit and sensitivity as function of operating current 17 p2895 A66-33115
- FET structures with linearly graded junctions noting maximum gain

- configuration, transconductance expression, etc 17 p2895 A66-33116
- Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2885 A66-33292
- Strong injection in nondegenerated p-n junction producing electron-hole plasma in n region near junction 17 p2986 A66-33307
- Current-voltage characteristics peculiarities of fine cadmium sulfide single crystals with ohmic contacts 17 p2986 A66-33311
- Negative photoconductivity in germanium, noting breakdown and negative conductivity in n region, volt-ampere characteristics, etc 17 p2987 A66-33315
- Current oscillation observations in photoconductive cadmium sulfide crystal 17 p2987 A66-33317
- Photocurrent and leakage current in zinc diffused GaAs junction diodes in terms of channel effect 17 p2987 A66-33319
- Microplasma internal parameter measurement including switch-on voltage, switch-off voltage, plasma resistance, parallel capacity and internal series resistance 17 p2896 A66-33320
- Direct current volt-ampere characteristics of junction gate germanium alloy FET, including field-dependent mobility effect and channel-height distribution 17 p2897 A66-33463
- Composition, heat conduction and radiative energy transfer characteristics of hydrogen and argon plasmas produced by arc in cylindrical channel with cooled walls 18 p3142 A66-34023
- Arc burning mechanism of vortex-stabilized plasmatrons, noting effect of arc shunting on volt-ampere characteristics 18 p3143 A66-34034
- Instant antenna patterns for estimating far field characteristics, noting location of peaks and zeros of radiation patterns, voltage ratios, etc 18 p3077 A66-34063
- V-I characteristics of GaAs Schottky barrier rectifiers applied in determining relation between electron energy and complex wave vector over portion of forbidden energy gap 18 p3155 A66-34161
- New type of negative resistance in barrier tunneling 18 p3156 A66-34238
- Nonlinear operational amplifier with high power switching devices, noting volt-ampere characteristics 18 p3086 A66-34494
- Low pressure combination of barium and cesium vapors for reduction of transport-affected losses in thermionic energy converters, noting work function and V-I characteristics 18 p3055 A66-34584
- Field and thermionic field emission responsible for excess currents in Schottky barriers formed on doped semiconductors 19 p3434 A66-35345
- Transient behavior of current to applied voltage step for semiconductor structure with double injection behavior in initial and final states 19 p3435 A66-35406
- Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35428
- Current-voltage characteristics of silicon p-n-p-n structures in cut-off region for controlled and uncontrolled diodes, transistors with hooks and pinpoints 19 p3438 A66-35545
- Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 19 p3315 A66-35554
- Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 19 p3315 A66-35555
- Automatic biasing effect on mean conductivity and constant current component of germanium tunnel-diode auto-oscillator 19 p3315 A66-35556
- Device having symmetrical voltage-current characteristics acting as rectifier of pulse or even harmonic distorted waveforms, using Zener diodes 19 p3315 A66-35561
- Polarized pyrometric probe with thermal insulation, comparing probe radiation with volt ampere characteristics of plasma to obtain particle density and energy 19 p3409 A66-36280
- Periodic volt-ampere curves of anode oxidation mechanism of hydrocarbons, alcohols, ketones, aldehydes and carboxylic acid to carbon dioxide, using Raney platinum catalyst 19 p3295 A66-36291
- Theoretical distribution of charges and potential in vicinity of metal-dielectric barrier in absence and presence of applied field 19 p3448 A66-36753
- Field of high temperatures produced by transitional and steady state processes, using electric arcs in nonrarefied gases, obtaining existence and stability criteria for arc 20 p3606 A66-36965
- Temperature, illumination intensity and degradation factor effects on solar cell output characteristics 20 p3497 A66-37164
- Silicon variable capacitance diodes with high-voltage sensitivity produced by low-temperature epitaxial growth technique 20 p3528 A66-37494
- Noise sources analysis in electrical device, applying equivalent voltage or current spectrum 20 p3518 A66-37580
- Diode curve tracer for observing I-V characteristics of semiconductor junctions and diodes via pulse method 20 p3560 A66-37587
- Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 20 p3619 A66-37688
- Electrical and photoelectrical properties of silicon photocells with different impurities, examining load characteristics, V-I forward and reverse branches plotted for silicon cells 20 p3502 A66-37734
- Gunn oscillations in indium arsenide, measuring electrical properties of diodes, noting current voltage characteristics as function of applied stress 20 p3620 A66-37773
- Channel shape effect on current-voltage characteristics in channel transistors 20 p3532 A66-37864
- Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 20 p3622 A66-38126
- Application of regulation factor in designing temperature-compensated Zener diode references 20 p3534 A66-38300
- Lampert double injection theory for CdS diodes with negative resistance I-V characteristic curve 20 p3535 A66-38435
- Volt-ampere characteristics and photomicrographs of p-n junctions produced by diffusion of Zn and Cd into InP 21 p3798 A66-38918
- I-V characteristics of p-gallium antimonide based tunnel junction at various temperatures analyzed, finding secondary peaks exhibited by inverted diodes 21 p3799 A66-38925
- Electrical explosion of copper wire in air and in vacuum, discussing plasma emission and I-V characteristics 21 p3791 A66-39084
- IR and microwave radiations associated with current controlled instability /negative resistance/ in GaAs, noting Gunn threshold and V-I characteristics 21 p3802 A66-39162
- Flux flow in type II superconductors, measuring critical current, longitudinal and transverse voltages for varied orientation of magnetic field 21 p3802 A66-39201
- Dynamic resistance and derivative of superconducting tunnel junction measured by combined harmonic detection and bridge techniques 21 p3793 A66-39384
- Scaling parameters in explosive driven linear MHD generators, noting Reynolds number and volt-ampere characteristics 21 p3698 A66-39506
- Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 21 p3805 A66-39547
- Negative resistance in cathode current and grid and plate current of tube in which electrodes are situated behind cathode 22 p3871 A66-39658
- Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746
- Separation method for two components of excess and thermal currents in gallium arsenide tunnel diodes 22 p3873 A66-39748
- Back contact effect on distribution of current carrier concentration in semiconductors based on diode volt-ampere characteristic 22 p3873 A66-39825
- Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045
- Four-layer p-n-p-n diodes having two separate capacitance modes enables use as controlled element in frequency keying circuits 22 p3875 A66-40074
- Theoretical model for effect of mechanical stress on generation-recombination currents in p-n junctions 22 p3963 A66-40095
- Electric field domain motion in Ge samples with Au and Sb impurities, noting temperature and illumination effect on V-I characteristics 22 p3964 A66-40312
- Steady state behavior of free steadily traveling electrical domain in gallium arsenide 22 p3967 A66-40864
- Field emission diode and triode with narrowly spaced electrodes, noting voltage and current characteristics 22 p3882 A66-40894
- Output characteristics of cesium thermionic converter as function of size of electrode gap, using device with movable air-cooled stainless steel anode 22 p3853 A66-40943
- Noise performance of MOS structures, noting parametric dependence on input voltage and current source magnitude 22 p3883 A66-40962
- Current characteristics of solution and vapor grown p-n Ge-Si and Ge-GaAs heterojunctions as function of voltage and temperature 22 p3968 A66-40963
- Prebreakdown currents, conditioning rates and ultimate voltage capability of vacuum gaps and solid insulation, analyzing data on large-gap concentric cylinder configuration 23 p4042 A66-41041
- Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41444
- I-V characteristics of junction diode with antibarrier layer and oxide film pressed on rear contact 23 p4045 A66-41445
- Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 23 p4045 A66-41468
- Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 23 p4113 A66-41471
- Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 23 p4045 A66-41480
- Volt-ampere characteristics of germanium and silicon diodes with p region formation by gold diffusion into n-type material 23 p4046 A66-41566
- High energy density Zn/O battery system, noting good low oxygen pressure and low temperature performance characteristics 23 p4022 A66-41759
- Electrical and electroluminescent property of GaP diffused p-n junctions, accounting for V-I characteristics due to space-charge recombination by Sah-Noyce-Shockley theory 24 p4249 A66-42226
- Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress and humidity effects 24 p4181 A66-42381
- Diffusion current in MOS transistors analyzed, using three-dimensional energy band diagrams 24 p4253 A66-42383
- Transmission coefficient and tunnel current for trapezoidal potential barrier calculated as function of applied voltage 24 p4254 A66-42385
- Charge transport through hemispherical metal contacts on semiconductors, calculating V-I characteristics and injection ratios 24 p4254 A66-42388
- MOS transistor structures with enhancement mode of operation, discussing fabrication processes via V-C characteristics, temperature effects on performance, etc 24 p4181 A66-42389
- Methanol-air fuel cells as long-life sources

of energy for lighted buoys, TV stations, meteorological stations, etc 24 p4161 A66-42501

Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

VOLTAGE

Transient voltage across series-connected silicon rectifier cells immediately after commutation 01 p0035 A66-10206

Determination of output voltage of square law device ascertained from input voltage 01 p0050 A66-10221

Algebraic sign of voltage field components in orbital coordinate system, using bipolar approximation of Earth magnetic field 02 p0295 A66-11655

Electrical and electroluminescent properties of GaAs diodes at voltages below onset of negative resistance 07 p1042 A66-17330

Direct current voltage measuring and recording system for laboratory use 07 p1036 A66-18486

Effect of voltage and film thickness on sputtered tantalum film resistivity when used as microcircuits 09 p1411 A66-19941

Errors in measuring correlation function of two random processes represented in form of voltages 09 p1345 A66-20444

Formation of oxide films on metals using polarized light to measure film thickness and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211

Voltage drop in direction of current flow produced in superconducting alloys by current perpendicular to magnetic field explained by assuming Abrikosov filaments move under influence of Lorentz force 13 p2168 A66-26022

Density and location of surface states at silicon-silicon dioxide interface determined by analyzing capacitance-voltage characteristics of MOS diode 15 p2567 A66-29412

Determination of output voltage of square law device ascertained from input voltage 17 p2898 A66-31905

Active component of voltage behavior in channel of helium pulse discharge measured, obtaining time dependence of channel resistance, input velocity and energy magnitude 22 p3953 A66-39755

Voltage oscillations as function of applied magnetic field in weak contacts between superconductors in resistive region when applying currents above critical value 23 p4111 A66-41251

Three-dimensional voltage traps for charged particles, using equilibrium equations with or without thermal agitation 24 p4245 A66-42996

VOLTAGE AMPLIFIER

Automatic gain control circuits, discussing performance and comparing theoretical and experimental results 04 p0501 A66-14409

RC active networks, describing circuits using voltage or current amplifiers with gain larger than unity 06 p0858 A66-16985

Active network synthesis involving voltage amplifier with fixed voltage transfer ratio and two-terminal RC network 08 p1199 A66-18670

Wideband low-level amplifier design and operation 11 p1662 A66-22404

Wideband DC amplifier operating with double full-wave signal transformation 11 p1664 A66-22621

Approximate equations for dependence of electron-drift mode over cathode-triode/tetrode/ grid spacing on parameters of UHF triode power amplifier 12 p1830 A66-23733

Selectivity of synchronous detector with preliminary filter taking into account odd harmonics 14 p2252 A66-27244

Selective amplification of signal voltages in analog computers with integrated circuitry 21 p3716 A66-39623

Approximate equations for dependence of electron-drift mode over cathode-triode/tetrode/ grid spacing on parameters of UHF triode power amplifier 22 p3875 A66-40076

Low pass elliptic function filter fabricated from RC network and low gain voltage

amplifier 23 p4050 A66-41611

VOLTAGE BREAKDOWN

Prebreakdown current in high vacuum noting field strength and field emission hypothesis 01 p0106 A66-10641

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 01 p0082 A66-10646

Microplasma and avalanche diode noise pulse rate determined by carrier generation within space charge layer of breakdown region 02 p0197 A66-11431

Collector-to-base junction breakdown occurring in planar transistors over whole surface due to emitter presence 02 p0205 A66-12002

Lasing in p-type GaAs in which population inversion is brought about by avalanche breakdown of high resistivity region in material 03 p0378 A66-13008

Optimum performance voltage sources with silicon reference elements 04 p0491 A66-13382

Avalanche breakdown for low voltage silicon p-n junctions 05 p0733 A66-14772

Cesium plasma thermionic converter, calculating voltage drop in emitter, collector and plasma 05 p0615 A66-15536

Extension into microwave region of pulse-driven oscillators produced by biasing common diffused p-n junctions into avalanche breakdown region 06 p0851 A66-16451

Comparative determination of HF electrical discharge threshold in electromagnetic system 09 p1349 A66-19852

Recovery of electric strength of gap after arcing related to Paschen law and measured from atmospheric pressure to vacuum by device with copper contacts 12 p1842 A66-24665

Maximum dielectric strength of thin evaporated silicon oxide films, calculating breakdown processes 12 p1933 A66-24830

Gold or copper diffusion effect on breakdown and multiplication characteristics of high voltage silicon p-n junctions, noting presence and formation of microplasma 13 p2161 A66-25194

Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2164 A66-25490

Avalanche breakdown voltages of abrupt and linearly graded p-n junction in Ge, Si, GaAs and GaP 14 p2356 A66-27027

Microplasma breakdown in high voltage avalanche rectifiers, considering leakage current and junction impurity dislocation migration 14 p2363 A66-27583

Controlled noise generation at high pulse rate with avalanche diodes, noting spectral voltage density and temperature coefficient 15 p2458 A66-28894

Avalanche breakdown voltages for diffused junctions in silicon epitaxial layers 2-32 microns thick for different impurity profiles 15 p2564 A66-28899

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 17 p2933 A66-32061

Base drive and internal structural irregularities of transistor effect on internal current distribution and second breakdown characteristics of device 19 p3312 A66-35343

Effect of reduction of breakdown voltage by external illumination of oxide protected planar diode or by nonequilibrium carriers drifting in surface channel 20 p3528 A66-37493

Bias voltage dependence of capacitance in n-type silicon p-n junctions with voltage breakdown 20 p3621 A66-38007

Metallurgical junction radius of curvature effect on avalanche breakdown voltage in Ge, Si, GaAs and GaP spherical and cylindrical p-n junctions 22 p3959 A66-39740

Avalanche breakdown voltage of quasi-planar/circular cylindrical/silicon junction and relation to increased electric field intensity in curved portion 22 p3959 A66-39741

Imperfection of silicon dioxide layers caused by dust particles during thermal oxidation of silicon, measuring breakdown

voltage 22 p3961 A66-39999

Dual-element power devices for solid state inverters, evaluating potential hazards of reverse second, 22 p3881 A66-40741

BREAKDOWN

Prebreakdown currents, conditioning rates and ultimate voltage capability of vacuum gaps and solid insulation, analyzing data on large-gap concentric cylinder configuration 23 p4042 A66-41041

Constant voltage avalanche breakdown state of gallium arsenide diodes after switching attributed to peak in hole generation rate 23 p4047 A66-41623

Multiple energy bands effects on stress dependence of breakdown and order of magnitude in breakdown voltage of Ge and Si junction diodes 24 p4251 A66-42306

Prebreakdown region of selenium rectifiers, using pulse method with exponential pulse leading edge 24 p4254 A66-42426

Transistor parameters in integrated circuits including saturation resistance, voltage breakdown and frequency response and optimization of operation dependence on impurity concentration, geometry, etc 24 p4186 A66-43079

VOLTAGE GENERATOR

Testing dielectrics by direct application of two high-voltage LF electrostatic generators with long-period sinusoidal waves 03 p0340 A66-12467

Circuitry of diode pump integrator used for generating mean voltage which is function of repetition rate of applied pulse train 03 p0345 A66-13241

Thyratron generator of nanosecond high voltage pulses 04 p0495 A66-13884

Electromagnetic shock generator of high voltage nanosecond pulses with controlled length 04 p0495 A66-13885

Microwave induced generation of DC voltage across thin n-type germanium rod in waveguide 06 p0925 A66-16678

Field effect transistors and unijunction transistors in sawtooth generator, cascade amplifier, voltage regulator, etc 06 p0856 A66-16920

First-order approximation for second-harmonic distortion in sinusoidal voltage generator connected through resistor to base-emitter circuit of transistor 06 p0858 A66-16984

Rectangular voltage pulse generator using capacitor partial discharge and pulsed thyatron as switching element 08 p1194 A66-19281

Generator for high-voltage pulses with pulses shaped by two-section length of line with transformation by pulse transformer employing coaxial cable windings 08 p1194 A66-19282

Correcting network with nonlinear inductance for high voltage pulse generator noting operation, design and fabrication 08 p1194 A66-19283

Generalization of Manley-Rowe theorem for case in which one or more pumping generators act on nonlinear reactive element 08 p1197 A66-19603

Natural frequency and self-excitation of transistor-operated autogenerator with open-loop feedback 09 p1354 A66-20453

Transistor sawtooth-voltage generators with positive feedback and nonlinear distortions correction by amplification factor control 10 p1511 A66-21679

High voltage capacitor discharge from Marx circuit, using stepup transformer 10 p1486 A66-21862

Narrow voltage pulse open core ferromagnetic oscillator generation with high off-duty factor 11 p1667 A66-22791

Sinusoidal voltage converted to rectangular voltage, using charge storage diodes 11 p1668 A66-23064

Transient processes resulting from instantaneous application of constant potential difference to plasma capacitor plates 12 p1922 A66-24216

Thyratron generator of nanosecond high voltage pulses 15 p2466 A66-29696

Electromagnetic shock generator of high voltage nanosecond pulses with controlled length 15 p2466 A66-29697

Circuit of step voltage generator using two transistors operating in avalanche

breakdown regime 16 p2664 A66-31358
 Generalization of Manley-Rowe theorem for
 use in which one or more pumping
 generators act on nonlinear reactive
 element 18 p3087 A66-34961
 High-voltage generators of nanosecond
 pulses, noting delay stability between
 triggering and output pulses, using
 thyatrons as
 commutators 20 p3529 A66-37519
 Transient processes resulting from
 instantaneous application of constant
 potential difference to plasma capacitor
 plates 22 p3878 A66-40580
 Electromagnetic shock generator of high
 voltage nanosecond pulses with controlled
 length
 [ASME PAPER 64-WA/FE-29] 24 p4157 A66-42580
VOLTAGE REGULATOR
 Optimum power conditioning system and
 electronic circuitry for maximum efficiency
 and reliability, lowest weight and other
 performance factors in space-vehicle
 design 02 p0179 A66-11280
 General approach to design of miniaturized
 power converters and regulators up to 100
 v 02 p0180 A66-11282
 Voltage regulator circuit using one discrete
 component and three semiconductor
 devices 03 p0347 A66-13333
 Voltage stabilization using cold cathode
 trigger tubes 05 p0647 A66-14769
 Field effect transistors and unijunction
 transistors in sawtooth generator, cascade
 amplifier, voltage regulator, 06 p0856 A66-16920
 Thyristor equipped DC to DC regulated
 power converter for voltage range between
 10 and 300 v DC based on printed circuit
 principle 06 p0857 A66-16966
 Load-voltage battery charger power-
 optimizing regulator for maintaining
 continuous maximum power loading on solar
 cells under various
 environments 08 p1169 A66-19495
 Control-voltage transducer synthesis with
 variable capacitor compensation of quartz
 resonator frequency-temperature
 characteristics 09 p1354 A66-20451
 Feedback to quadrupole that incorporates
 device for converting voltage into time
 parameter of periodic sequence of pulses
 and vice versa 11 p1671 A66-23334
 Chronotron/
 Stability of automatic phase control system
 for output generation from voltage
 controlled oscillator 12 p1836 A66-24305
 DC-to-DC nondissipatively regulated
 converter using inductive energy storage for
 voltage transformation and
 regulation 13 p2001 A66-26297
 Pulse width modulated switching voltage
 regulator for spacecraft power supplies
 [AIAA PAPER 64-742] 13 p2044 A66-26658
 Transistor voltage regulators for onboard
 generators, for operation within modern
 aircraft current-supply
 tolerances 14 p2226 A66-27714
 Zener diode voltage stabilizer
 design 14 p2254 A66-27715
 RC network and ideal current negative
 admittance converter with unity gain used
 in obtaining RLC voltage transfer
 functions 15 p2471 A66-29326
 Breakdown diodes in voltage stabilization,
 noting temperature effects, cascade
 switching, etc 21 p3710 A66-38748
 Feedback to quadrupole that incorporates
 device for converting voltage into time
 parameter of periodic sequence of pulses
 and vice versa 22 p3877 A66-40414
 Chronotron/
 Voltage control by means of Zener diode,
 transistor and variable-gain amplifier
 circuit 23 p4044 A66-41214
VOLTAGE VARIATION INDICATOR
 Temperature parameters introduced into
 expressions characterizing transistor
 performance as function of
 temperature 02 p0199 A66-11756
 Low energy proton damage to partially
 shielded solar cells, noting invalidity of
 simple area scaling law in predicting
 decrease in open circuit
 voltage 17 p2849 A66-33113
VOLTERRA EQUATION
A RADIATION

Volterra integral equation used in alpha
 operational method for solution of linear
 differential equations 01 p0093 A66-10404
 Volterra integral applied to steady
 supersonic flow past annular wings of
 various configurations to determine
 aerodynamic
 characteristics 04 p0455 A66-14139
 Stabilization of gyrostat using motion
 equations as given by
 Volterra 07 p1035 A66-18193
 Equations of motion of gyrostat having
 fixed point and gyrostat rotating about
 fixed point in Newtonian force
 field 08 p1227 A66-19761
 Nonlinear system analysis by Volterra-
 Wiener functionals, considering convergence
 and kernels 09 p1363 A66-20797
 Nonlinear filters, including system analysis
 optimization, realization via Volterra
 functionals, etc 11 p1675 A66-22630
 Congruence theorems for Volterra
 equations with delay 14 p2322 A66-27676
 Theory of physical systems governed by
 nonlinear functional equations such as
 vector nonlinear Volterra integral equation
 [AIAA PAPER 64-680] 14 p2375 A66-27884
 Mixed problem for general two-dimensional
 second-order hyperbolic equation with
 discontinuous coefficients solved by
 reduction to system of Volterra integral
 equations 16 p2734 A66-30747
 Volterra series analysis of aperiodic
 solutions to certain second order
 integrodifferential equations with nonlinear
 damping and nonlinear restoring
 force 16 p2737 A66-31334
 Nonlinear theoretical derivation of creep
 equations for three-dimensional processes in
 polymers, based on Boltzmann-Volterra
 creep heredity concept using stress-strain
 summation 17 p2943 A66-32807
 Volterra equation and Green function to
 solve MHD problem of unsteady flow of
 viscous incompressible conducting fluid with
 time dependency 23 p4106 A66-41837
 Computer technique for constitutive
 equations of viscoelastic modulus, using
 Laplace transform and Volterra integral
 equation, applied to data on solid
 propellants 24 p4289 A66-42279
VOLTMETER
 Assured performance calibration discussing
 statistical quality control, instrument
 variability, vacuum tube and digital
 voltmeter histories, calibration costs,
 etc 04 p0520 A66-13941
 Bead leakage affect on voltmeter,
 discussing quality control measurement and
 thermal effects on electric
 equipment 04 p0521 A66-13942
 Error of measurement of mean square
 value of fluctuation signals due to voltmeter
 calibration 23 p4038 A66-41523
VOLUME
 Method for measuring amount of liquid
 remaining in tank under near-zero-g
 conditions based on relation between gas
 volume, pressure and
 pressure 13 p2000 A66-25693
 P-V-T behavior of argon, nitrogen and
 argon-nitrogen gas 20 p3677 A66-37089
 Load prediction method necessitated by
 minimum weight and volume requirements
 for spacecraft recovery system, considering
 nonuniform opening of parachutes in
 cluster 22 p3849 A66-40596
VON KARMAN EQUATION
 Von Karman-Donnell large-displacement
 equations for thin circular cylindrical shells
 extended by considering larger term
 numbers in Fourier series representing
 radial displacements after
 buckling 08 p1309 A66-19143
 Iterative procedure to obtain numerical
 solutions of von Karman equations for
 rectangular plates with finite
 deflections 10 p1615 A66-21477
 Von Karman equations for axisymmetric
 nonlinear bending circular
 plates 12 p1969 A66-24363
 Flow produced by impulsively started
 rotating disk 15 p2480 A66-29691
 Von Karman plate equations specialized to
 describe large symmetric deflections of
 circular membranes 17 p3020 A66-31999
 Postbuckling behavior of clamped infinite

flat strip under action of shearing forces
 analyzed based on von Karman
 equations 20 p3669 A66-37531
 Von Karman integral concept for
 incompressible laminar boundary layers
 extended to second-order for two-
 dimensional or axisymmetric flow by
 generalizing definition of displacement and
 momentum thickness 22 p3898 A66-40137
VON NEUMANN THEOREM
 Exact numerical solution of time-dependent
 compressible Navier-Stokes equations
 describing transient compressible viscous
 heat-conducting flow 08 p1207 A66-18986
 Generalization of high accuracy alternating
 direction implicit /ADI/ method for solving
 wave equation in two space
 dimensions 10 p1550 A66-21845
VON ZEIPPEL METHOD
 Relativistic perturbed oscillator, solving
 problem via canonical
 transformation 07 p1080 A66-17498
 Generalized method of averaging and von
 Zeipel method as applied to perturbed
 Hamiltonian system of appropriate form
 [AIAA PAPER 65-687] 19 p3462 A66-35893
VOR SYSTEM
 Flight control by ground-based radio
 system discussing aerial navigation safety,
 operating principles, equipment for VOR
 and ILS and importance of
 calibration 03 p0390 A66-13011
 Precision Doppler VOR installation in West
 Germany 07 p1075 A66-17781
 Comparison of VOR systems and
 compatible precision Doppler VOR
 system 07 p1075 A66-17782
 VOR developments in terms of degree of
 compatibility with respect to airborne
 equipment 07 p1075 A66-17787
 Cockpit flight instrument display in
 integrated navigation system for SST,
 stressing smooth transition in handling from
 enroute navigation to terminal-area and
 approach procedures 07 p1078 A66-17810
VORTEX
 Quantized vortices in thin superconductors
 in perpendicular magnetic field, noting that
 superconducting sample completely expels
 flux 09 p1415 A66-20008
 Free energy calculations and
 crystallographic properties of vortex line
 lattices in type II semiconductor for square
 and triangular lattices in given magnetic
 field 09 p1421 A66-20058
VORTEX BREAKDOWN
 Delta wing vortex breakdown in terms of
 theory of stability of spiraling
 flows 07 p0979 A66-17478
 Polar vortex breakdown and explosive
 warming in upper stratosphere in numerical
 tests based on observed height patterns,
 noting kinetic energy 21 p3759 A66-39206
VORTEX DISTURBANCE
 System of equations derived for dynamics
 of convective atmospheric vortices for
 model with unstable stratification and basic
 vorticity 10 p1530 A66-21274
 Turbulent vortices in quantum and
 classical fluid and time dependent meniscus
 depth of water, He I and He
 II 10 p1525 A66-21965
 Inviscid hypersonic flow of nonuniform
 incident stream over wedge, noting vorticity
 effects, perturbation equations and boundary
 conditions 13 p1992 A66-26665
 Turbulent vortices in quantum and
 classical fluid and time dependent meniscus
 depth of water, He I and He
 II 21 p3731 A66-39544
 Three-dimensional oscillatory vortex
 instability in uniform inviscid rotating
 fluid 23 p4061 A66-42043
VORTEX FLOW
 Vorticity distribution in wake of circular
 cylinder oscillating in unperturbed flow,
 using Burger linearization of Navier-Stokes
 equations 01 p0007 A66-10715
 Excitation of magnetic field in spherical
 conductor for case where vortex
 concentration is assumed to be constant for
 entire core 02 p0225 A66-12141
 Steady flow possessing extremal kinetic
 energy compared to equivortex flow for
 stability analysis 02 p0219 A66-12169
 Lift force of airfoil section determined for
 sudden change in angle of attack, analyzing

Prandtl vortex positions 03 p0314 A66-12526
Stabilization of inviscid pure-vortex flow with finite conductivity, using axially applied magnetic field
[AIAA PAPER 64-435] 03 p0399 A66-12787
Motion of vortex lines in superconductors noting dissipation and viscosity, Hall effect and effective mass 03 p0411 A66-13143
Four-way fluid state vortex hydraulic servovalve discussing design principles, performance and application 04 p0460 A66-13785
Group of transforms derived for functional in which Euler equation coincides with Crocco equation describing plane vortex gas streams 04 p0512 A66-14437
Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow
[AIAA PAPER 64-591] 05 p0610 A66-15069
Steady secondary flow in stratified fluid in rotating frame, noting secondary vorticity [ASME PAPER 65-WA/FE-14] 05 p0664 A66-15613
Ringleb theory on snow cornice-like flows analyzed, including arguments on representation of real fluid flows and model of step-sink flow
[ASME PAPER 65-WA/FE-11] 05 p0664 A66-15678
Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996
Slow stationary MHD motion of electrically conducting viscous liquid in weak induced magnetic field in moving spherical envelope 07 p1086 A66-17836
Variational problems in gas dynamics, examining vortex and vortex free motion, minimum drag conditions, etc 07 p0983 A66-18144
Complex perturbing potentials of constant circulation around single wing profile treated by method based on Dirichlet problem 07 p0983 A66-18341
Vortex flow of incompressible viscous fluid bounded by two parallel finite flat plates [AIAA PAPER 66-88] 07 p1026 A66-18454
Uniform motion of vortex system in inviscid fluid, examining effect of compressibility on motion of vortex singularities 08 p1204 A66-18528
Vortex characteristics of thin very elongated wings in low velocity flow 08 p1161 A66-18719
Superfluid basic theory noting Josephson tunneling, liquid helium kinetic theory, quantized vortex lines, etc 09 p1415 A66-20005
Vortex lines in superconductors, noting free energy of pure superconducting metal in presence of currents and fields for slowly varying drift velocities 09 p1415 A66-20007
Vorticity growth when steady heat current is applied to liquid He 2 in narrow tube 09 p1366 A66-20017
Existence of vortex lines in superconducting niobium in mixed state demonstrated via neutron diffraction 09 p1420 A66-20050
Burst effects due to vortex motion within thin superconducting films in which perpendicular magnetic field acts upon current flow 09 p1422 A66-20063
Operation, design, application and technology of vortex devices 09 p1332 A66-20318
Shape and propagation velocity of rotational separation zones in isolated array of blade profiles 09 p1328 A66-20762
Onset of turbulence in detached laminar shear layer 09 p1368 A66-20803
Synoptic analysis on structure of cold vortex with steady eastward movement by time-space transformation 09 p1400 A66-20858
Mesoscale disturbance observed in vicinity of cold vortex center, emphasizing gravity waves 09 p1400 A66-20859
Stability of baroclinic circular vortex in incompressible inviscid fluid for axially symmetric disturbances 10 p1530 A66-21275
Rapid expansion of supersonic boundary layer and application to vortical flow of near wake 10 p1480 A66-21772
Turbulent channel flow, discussing friction

flow anisotropy and homogeneity, vortex flow, channel viscosity, etc 12 p1860 A66-23532
Nonlinear hydrodynamic stability theory, considering application to thermal convection and curved flows 12 p1976 A66-23551
Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in cascades 12 p1796 A66-23800
Current vortices and critical surface shape for stationary axisymmetric plasma flow in azimuthal magnetic field 12 p1922 A66-24341
Flow graph in model of jet curtain in ideal incompressible weightless fluid with isolated vortex 12 p1798 A66-24433
Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867
Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 12 p1865 A66-24879
Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 12 p1865 A66-24880
Small gap equations for Couette flow stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946
Vortex flow of ideal incompressible fluid past plate or slender wing near solid wall 13 p2067 A66-26532
Standard inductive energy formulas lead to error if applied to vortices in rotating fields 13 p2068 A66-26684
Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor 13 p2156 A66-26707
Electrical output and conversion cycle efficiency of vortex type MHD induction generator, considering viscosity effects 13 p2156 A66-26708
Secondary motion generation in vortex field, noting vortex core deformation by oscillation, radial perturbation effect on vorticity distribution, etc 13 p2070 A66-26715
Constant vorticity of fluid in discontinuity region checked by method based on temperature analog 14 p2273 A66-26784
Plasma core nuclear rocket utilizing MHD driven vortex [AIAA PAPER 65-583] 14 p2329 A66-27409
Bistable flow in hemispherical cavities induced by external stream, noting skewed position 14 p2274 A66-27437
Yaw effect on vortex shedding from circular cylinder at low Reynolds number 14 p2219 A66-27440
Effect of instantaneous change in viscosity on laminar vortex of flow through suddenly widening pipe 14 p2277 A66-27933
Excitation of magnetic field in spherical conductor for case where vortex concentration is assumed to be constant for entire core 14 p2287 A66-28097
Three-dimensional MHD flow with jet and vortex nature in viscous incompressible conducting fluid 14 p2348 A66-28393
Effect of unsteady longitudinal vortices on Blasius profile in traditional boundary layer of flat plate 14 p2279 A66-28461
Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605
Potential complex and forces in perfect incompressible fluid at rest at infinity with free vortices determined by pointless profiles excited by arbitrary motion 15 p2479 A66-29637
Steady free convection in vertical slot, noting growth of boundary layers and temperature gradient 15 p2618 A66-29693
Thermal forces on vortices and entropy transport by vortex flow in type II superconductor from measurements of temperature gradient and potential differences 16 p2770 A66-30189

Two-dimensional flow in fluids related to system of vortex coordinates, using Hamiltonian operator for characterization of motion studies 16 p2683 A66-30213
Motion equations for incompressible viscous fluid with constant vortex derived, using complex variable 16 p2683 A66-30216
Hydraulic resistance, heat and mass transfer in vortical flow, noting power optimal conditions of operation 16 p2825 A66-30323
Vaporization cooling of inner wall surface of externally heated cylinder by vortex flow 16 p2829 A66-31162
Nonlinear theory for flow past slender wings with leading edge vortices in sudden plunging motion 17 p2837 A66-32082
Progress in aeronautical sciences, noting delta wing vortex sheets, rotating flows, boundary layer flows, etc 17 p2906 A66-32273
Structure of axisymmetric core of spiraling fluid with high vorticity 17 p2907 A66-32277
Two-dimensional wake in incompressible unsteady vortex flow downstream of cylindrical body 17 p2907 A66-32279
Vortex structure of internal flow upstream of nozzles of various models of solid propellant rockets 17 p2838 A66-32330
Solution of Stokes equation for growing and dying vortices 17 p2907 A66-32413
Stationary, two-dimensional solutions of Euler equation which contain closed regions of constant vorticity 17 p2907 A66-32414
Vortex effects on aerodynamic characteristics of aircraft and missiles 17 p2841 A66-33081
Rotating vortex flow and transition phenomena in conical diffuser [AIAA PAPER 66-426] 18 p3046 A66-33643
Sources of nappe image in variable-analysis plane as related to distribution of vortices 18 p3097 A66-33909
Arc burning mechanism of vortex-stabilized plasmotrons, noting effect of arc shunting on volt-ampere characteristics 18 p3143 A66-34034
Vorticity and vortex flows, discussing free and forced vortices, circular vortex, spiral vortex, compressible fluids and incompressible flows 18 p3099 A66-34126
Free shear layer diffusion and vortex formation region behind bluff bodies 18 p3049 A66-34669
Vibration spectrum of lattice of rectilinear vortices in charged and neutral superfluid systems studied in terms of Landau superfluid hydrodynamics 19 p3400 A66-35997
Amplifiers using properties of vortex flow confined within flattened cylindrical chamber, considering velocity distribution 19 p3281 A66-36634
Variation in velocity circulation and vorticity in nonisentropic flow 20 p3492 A66-37573
Steady state characteristics and transient behavior of vortex valve, examining effect of wall friction and shearing stresses due to radial velocity gradients 20 p3501 A66-37649
Tangential velocity and radial flow of unsteady viscous vortex with annular region and flow toward center 21 p3728 A66-39345
Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328
Solution of motion and energy equations in boundary layer of main portion of vortex jet 22 p3902 A66-40817
Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 23 p4053 A66-41086
Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 23 p4053 A66-41087
Annular vortices method applied to determine aerodynamic characteristics of lifting propeller in axial and oblique flows 23 p4010 A66-41785
Spectral characteristics of turbulence in presence of mean velocity and temperature gradients 23 p4087 A66-41801
Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929

Stability of laminar boundary layers at concave wall with vortex type disturbance introduced by interference baffles 23 p4060 A66-42022

Acoustic streaming in flow near vibrating membrane and in flow generated by absorption of magnetoacoustic wave 23 p4108 A66-42035

Taylor vortices growth and instability using mathematical model 23 p4062 A66-42045

Linear perturbation theory of flow due to convection of entropy and vorticity in nonuniform flow field, noting sound generation 23 p4062 A66-42051

Axisymmetric vortex jet behavior of ideal incompressible fluid at large distances from nozzle, noting surface waves 24 p4195 A66-42851

Generalization of experimental data on hydraulic resistance in tubes with ribbon turbulizers for laminar flow with macrovortices and turbulent flow 24 p4198 A66-43223

VORTEX GENERATION

Turbulence wake suppression in Karman vortex street of circular cylinders by controlling transverse oscillations of vortex generating cylinder in transition range 04 p0453 A66-13514

Analogy between impulsive flow over circular cylinders and flat plates, and separated flow about lifting bodies moving at high angles of attack in subsonic and supersonic range [AIAA PAPER 65-395] 12 p1795 A66-23575

Boundary layer control on walls by means of longitudinal vortices created by row of wings in shape of swallow 17 p2907 A66-32328

Two-dimensional solution of Laplace equation for vortex formations in incompressible fluid 18 p3100 A66-34634

Superconducting-to-mixed state phase transformation in type II superconductors in applied magnetic field and accompanying onset of vortex filaments at surfaces 18 p3158 A66-34686

VORTEX GENERATOR

Arc-driven vortex type heater-accelerator for possible use in reentry flight simulation 11 p1684 A66-22832

Conical vortex tunnel investigated for thermal efficiency and cold production 14 p2415 A66-28320

VORTEX RING

Motion and properties of quantized vortex rings in superfluid helium at low temperatures 09 p1415 A66-20009

Diffusion of viscous vortex ring in rotating fluid, noting effect of inertial waves 15 p2480 A66-29690

Unsteady aerodynamic characteristics of model helicopter rotor operating in vortex ring state, considering thrust and torque fluctuation 16 p2634 A66-31322

Unsteady aerodynamics of tandem rotor operating in vortex ring state 17 p2840 A66-32744

Thermoanemometric and high speed motion-picture photographic experimental analysis of air vortex ring structure 24 p4196 A66-42879

Parachutes and other devices for slowing body falling through air including Rogallo wing, ballute, ribbon parachute and vortex-ring parachute 24 p4160 A66-43197

VORTEX SHEET

Ground proximity effect on maximum lift-drag ratio for wing with uniform spanwise circulation, considering vortex model 11 p1636 A66-23253

Wing lift in slipstream with boundary represented by vortex sheath in computer determination of span loading [AIAA PAPER 66-466] 16 p2631 A66-31472

Asymptotic behavior of horn-shaped vortex sheet in neighborhood of x-axis 17 p2905 A66-31840

Flow along free border of conical vortex sheet above delta wing and rolling-up conically from apex 17 p2837 A66-32274

Vortex sheets rolling-up along leading edges of delta wings, comparison with slender body theory and conical flow 17 p2837 A66-32275

Coherent conical vortex sheet formation theory in two-dimensional and three-dimensional vortex

filaments 17 p2906 A66-32276

Digital computer program for V/STOL aircraft static propeller characteristics and optimization, based on initial wake hypothesis and trailing vortex sheet properties 22 p3843 A66-40294

VORTEX STREET

SA KARMAN VORTEX STREET

Vortex streets behind circular cylinders and flat plates analyzed, using photography and hot wire techniques, noting role of walls and wakes 03 p0354 A66-12321

Aerodynamic forces of oscillating lifting surfaces of large aspect ratio in subsonic range investigated by approximation method 10 p1479 A66-21378

Aerodynamics of heavily loaded wing, discussing relation of longitudinal shear before and after deformation of vortex street 11 p1635 A66-23170

Cavitation effects on periodic wakes behind symmetric wedges, noting Strouhal number variation [ASME PAPER 65-FE-15] 12 p1864 A66-24549

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two-dimensional flow 16 p2688 A66-31299

Velocity spikes in near-wake of circular cylinders held transversely to air stream 16 p2690 A66-31654

Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751

VORTEX TUBE

Tangential velocity profile and flow temperature in vortex chamber of vortex tube and dimensions of tube, nozzle and cold-end orifice 02 p0217 A66-11589

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 03 p0354 A66-12390

Refraction index variations in vortex tube 08 p1209 A66-19423

Motion of three-dimensional diffusing vortex tube in incompressible viscous fluid 08 p1210 A66-19634

Secondary flows influence on concentration distribution of heavy species in vortex comprised primarily of lightweight gas [AIAA PAPER 65-582] 12 p1860 A66-23573

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 13 p2062 A66-25396

Vortex tube with double row nozzle, discussing energy separation efficiency, velocity profile, temperature characteristics, etc 16 p2685 A66-30801

Vortex devices, describing Hilsch tube, vortex diode, triode, oscillator, pressure ratio sensor, etc 18 p3054 A66-34130

Motion of three-dimensional diffusing vortex tube in incompressible viscous fluid 18 p3099 A66-34172

Ranque tube application for gas cooling, discussing performance characteristics of vortex tube with and without heat exchanger 21 p3834 A66-38625

VORTICITY EQUATION

SA BALANCE EQUATION

Vorticity equation describing properties of large-scale atmospheric motions 04 p0542 A66-14304

Relationship between local growth mean secondary vorticity and Reynolds stresses and gradients of anisotropic turbulence for steady mean flow [ASME PAPER 65-WA/FE-28] 05 p0665 A66-15712

Analytical particular solution of vorticity equation, using kinematic boundary condition and wind field approximations 08 p1246 A66-18801

Predicting wake-induced nonuniform flow field in plane of rotor disk [AIAA PAPER 66-17] 08 p1162 A66-18951

Secondary motion generation in vortex field, noting vortex core deformation by oscillation, radial perturbation effect on vorticity distribution, etc 13 p2070 A66-26715

Spectral method more efficient than grid-point method for integrating typical barotropic filtered-equation numerical weather prediction 17 p2949 A66-33337

VOSKHOD I SPACECRAFT

Correlation analysis to study reactions of human cardiovascular system during space flight of Voskhod 06 p0814 A66-17175

Visual observations made by crew of Voskhod I spacecraft, including photographs of atmospheric and geophysical features 09 p1376 A66-20994

Mitotic phases of *Tradescantia paludosa* microspores as affected by spaceflight factors of Voskhod I 10 p1486 A66-21989

Pre- and postflight medical examinations of Voskhod I cosmonauts 11 p1645 A66-23049

Chromosome configuration and mitosis impairment in microspores *Tradescantia paludosa* due to space flight effects of Voskhod I 11 p1645 A66-23050

Cardiac and respiratory changes in spacemen under light physical strain during Voskhod I orbital flight 13 p2010 A66-25891

Radiation doses measured by onboard dosimeters and those fastened to space suits of crews of Voskhod I and Voskhod II compared, noting radiation composition analysis by means of nuclear emulsions 22 p3855 A66-40473

VOSKHOD II SPACECRAFT

Orbital flight of cosmonauts Beliaev and Leonov on March 18, 1965 includes description of spacecraft and extravehicular activity 09 p1464 A66-20460

Dynamic characteristics of human operator in tracking system under spaceflight conditions onboard Voskhod II spacecraft 11 p1648 A66-23047

Medical tests of spacemen Beliaev and Leonov during training and orbital flight 15 p2442 A66-28502

Extravehicular activity during Voskhod II flight, discussing motion and orientation of Soviet cosmonaut in space 21 p3701 A66-39337

Radiation doses measured by onboard dosimeters and those fastened to space suits of crews of Voskhod I and Voskhod II compared, noting radiation composition analysis by means of nuclear emulsions 22 p3855 A66-40473

VOSKHOD MANNED SPACECRAFT

Physiological test results on cosmonauts during Voskhod I and II flights including electrocardiograms, electroencephalograms, pneumograms, blood tests, space suit parameters, etc 01 p0017 A66-10416

Soviet space program, development of proton booster and proton and electron satellites and likelihood of Russia winning Moon race 06 p0955 A66-18802

Water balance test for investigation of kidney functions of astronauts of Voskhod I spacecraft 06 p0814 A66-17176

Physiological responses of astronauts Komarov, Feoktistov and Egorov during 24-hour orbital flight 13 p2011 A66-26229

Physiological reactions of astronauts to acceleration of Voskhod spacecraft characterized by greater emotional stress than during centrifuge simulation 17 p2861 A66-32936

Weightlessness effects on man with data from Voskhod flights 19 p3284 A66-35568

Terrestrial aureole structure in daylight, twilight and night and explanation for luminous particles observed in wake of Voskhod spacecraft 19 p3347 A66-35646

Vestibular tolerance differences among members of crew of Voskhod to 24-hour stay in zero-weight environment 19 p3286 A66-36377

Bacteria survival and mutation in radiation environment on Voskhod I and II 22 p3855 A66-40474

VOSTOK V SPACECRAFT

Book on physiological and medical observations on cosmonauts Bykovskii and Tereshkova during simultaneous flights in Vostok V and VI spacecraft 06 p0820 A66-16917

VOSTOK VI SPACECRAFT

Book on physiological and medical observations on cosmonauts Bykovskii and Tereshkova during simultaneous flights in Vostok V and VI spacecraft 06 p0820 A66-16917

VOSTOK SPACECRAFT

Biological experiments under flight conditions in Vostok spacecraft, noting

reproduction of *Drosophila melanogaster* and effect of weightlessness and cosmic radiation on hereditary structures 15 p2436 A66-29465
 Microbiological and cytological experiments in Vostok spacecraft, noting behavior of lysogenic *E coli* K-12 culture and normal and cancerous human cells 15 p2436 A66-29466
 Immunological reactions of Russian spacemen before and after space flight 15 p2436 A66-29468
 Vibration effects on chromosomes of *Tradescantia paludosa* and other microspores subjected to Vostok satellite conditions 18 p3058 A66-33781
 Control signal generator and output characteristics of angular position and velocity sensors used in single-axis Sun-oriented system of Vostok spacecraft 19 p3394 A66-35280

VOYAGER PROJECT

Sterilization requirements for Voyager spacecraft to ensure that no terrestrial organism contaminates Martian surface 11 p1648 A66-23171
 Reliability feasibility evaluation of Voyager spacecraft, determining launches necessary, chances of success and program cost 13 p2192 A66-25509
 Voyager program of unmannned scientific exploration of planets, discussing Flyby, Orbiter, Capsule and Lander missions 16 p2798 A66-30360
 NASA Voyager project, discussing planetary orbit design and selection and Mars orbiter trajectory 16 p2808 A66-30365
 Photography required for Voyager Mars landers to carry out effective biological exploration, noting Apollo relevance 24 p4276 A66-42665
 Frog retina layered model, stereoscopic system and decision/control system in connection with robot data reduction in Voyager missions 24 p4168 A66-43081

VTOL

Pilot role in VTOL safety during takeoff and transition phase 19 p3279 A66-36440

VTOL AIRCRAFT

Acoustical fatigue study of propeller duct designed for minimum weight to maintain specified thrust-to-weight ratio 01 p0150 A66-10155
 Short haul transport systems early and rapid evolution requirements to select first generation vehicles [SAE PAPER 650783] 01 p0012 A66-10840
 VTOL aircraft construction problems, particularly high performance aircraft employing combination of lift and lift-cruise engines 01 p0012 A66-10923
 Variable stability system /VSS/ incorporated into X-22A aircraft to obtain flight data on VTOL aircraft [AIAA PAPER 65-706] 01 p0013 A66-10944
 Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707] 01 p0130 A66-10945
 Reliability factors in flight controls, particularly automatic landing systems and controls for VTOL aircraft in transitional regime 02 p0231 A66-11863
 VTOL aircraft application to short haul aircraft, supersonic transports and space launchers 02 p0178 A66-12219
 Comparative design study of low-disk-loading VTOL concepts including stopped-rotor, tilt-prop-rotor, tilt-wing, transport effectiveness, etc [AIAA PAPER 65-756] 03 p0318 A66-12551
 Lift jet installation noting low-cost lightweight RB 162 second-generation using extensively glass reinforced plastics [AIAA PAPER 65-798] 03 p0319 A66-12563
 Cost effectiveness of VTOL short range jet airlines, discussing significance of block time [AIAA PAPER 65-797] 03 p0320 A66-12598
 Jet deflection by curvilinear walls in VTOL takeoff, examining parameters affecting flow separation 04 p0572 A66-13512
 Analytical tool for computer flight testing of VTOL designs, evaluating effects of steady state flight, maneuvers, gust response and weapon recoil 04 p0490 A66-14137
 Propulsive duct combustion chamber with

application of feedback and spark discharge for VTOL and aircraft propulsion 05 p0744 A66-14997
 Mixed translation and attitude control system using single cockpit stick for low-speed flight control of VTOL aircraft 05 p0610 A66-15078
 Future developments in supersonic transport and V/STOL aircraft 05 p0611 A66-15269
 Hot cycle rotor/wing aircraft for high speed VTOL, embodying lightweight lift/propulsion system and high payload capability with economic benefits 06 p0805 A66-16810
 Quad tilt propeller, tilt prop/rotor and two direct lift jets for VTOL aircraft compared for design 06 p0806 A66-16811
 Control power composition and usage characterized for VTOL aircraft flight control system design 06 p0806 A66-16812
 Size effect on VTOL aircraft hover and low speed handling qualities for helicopter and jet VTOL 06 p0806 A66-16813
 X-22A variable stability and control VTOL aircraft 06 p0809 A66-16816
 Engine drive design for high speed VTOL aircraft, discussing thrust requirements, system type and leading area parameters 06 p0943 A66-17018
 Thrust vector control using thrust jet deflection for VTOL aircraft systems 06 p0943 A66-17022
 Schuler tuned inertial system as flight sensor and control of VTOL aircraft translational velocity during hover phase and landing 07 p1070 A66-17724
 British and French VTOL landing gear design, describing unique SConc fixed-wing VTOL aircraft 08 p1167 A66-18627
 VTOL control power requirements under low speed flight conditions for randomly disturbed mechanical system 09 p1330 A66-20736
 Operation of VTOL aircraft in vicinity of airport including safety, noise and air traffic control factors 10 p1482 A66-21372
 Attitude control for VTOL aircraft facilitates control of hovering flight, noting construction, operation principles and performance 10 p1484 A66-21379
 VTOL aircraft static and dynamic performance measurement technology, analyzing application of data processing methods 10 p1535 A66-21381
 Effect of bleeding air behind compressor for VTOL stabilization on dynamic behavior of jet engine 10 p1591 A66-21405
 Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707] 10 p1594 A66-21890
 Efficiency factors such as roll scanning methods and pitch control effectiveness in hover control system for VTOL aircraft 11 p1638 A66-23258
 Takeoff dynamics of VTOL aircraft, noting thrust-weight ratio, wing load, initial thrust angle, engine tilt, etc 11 p1733 A66-23339
 Lift jet installation, noting low-cost lightweight RB 162 second-generation, using extensively glass reinforced plastics [AIAA PAPER 65-798] 13 p2172 A66-25563
 Design of V/STOL aircraft including propulsion systems, control and lift configurations 14 p2222 A66-26924
 Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [ASME PAPER 66-GT-92] 14 p2300 A66-26996
 High performance rotary wing VTOL aircraft, noting results from High Performance Helicopter Program and Exploratory Development Compound Program [SAE PAPER 660314] 14 p2223 A66-27293
 Dual-flow and single-flow jet engines 15 p2572 A66-29364
 Effect of VTOL size on operational cost per ton-mile, noting mission weight vs payload variations, comparison of fuel consumption of STOL, time savings, etc [SAE PAPER 660316] 15 p2428 A66-29840
 Design and mission requirements and weight penalties claimed for jet VTOL tactical aircraft 16 p2633 A66-30597

Stability of wing mounted pro-rotor pylon systems in fully converted aircraft configuration, showing in-plane force generated by blade flapping as destabilizing factor 16 p2633 A66-30599
 VC 400 VTOL aircraft design, development and performance 16 p2633 A66-30941
 Lift engine technology, noting effect on operational transport aircraft design, VTOL capabilities, low speed control, etc 17 p2844 A66-32732
 Flight control design parameters and performance effects on VTOL aircraft handling qualities, noting manufacture and flight test results 17 p2845 A66-32733
 VJ-101C high-speed research aircraft having combination of VTOL capability and supersonic level flight speed 17 p2846 A66-32745
 Future civil VTOL aircraft potentialities and limitations 17 p2846 A66-32886
 Dynamics of noise and loading actions on helicopters, V/STOL aircraft and ground effect machines 18 p3050 A66-33679
 Wind tunnel test on VTO aircraft models 18 p3093 A66-33970
 Inlet/door performance characteristics of VTOL lift-engines studied in full-scale wind tunnel tests [AIAA PAPER 66-655] 18 p3048 A66-34222
 VTOL aircraft performance characteristics noting flying qualities, hover dynamics, transition flight and variable stability system 18 p3052 A66-34623
 Form and swimming characteristics of dolphin applied to design of high-speed commercial aircraft and VTOL aircraft 19 p3279 A66-36049
 Handling in hovering mode of Dornier VTOL transport aircraft with and without autostabilizer, obtaining moments about roll, pitch and yaw axis 20 p3493 A66-36879
 STOL and VTOL aircraft classification 20 p3495 A66-37576
 VTOL operational availability computer simulation model, studying initial and tradeoff design, maintenance, logistics, manpower and flight operational requirements 20 p3543 A66-37909
 Attitude control system/engine control system for hover control of turbojet VTOL aircraft 21 p3697 A66-38902
 Control laws providing attainment of prescribed attitude and acceleration to prescribed speed in minimum time or fuel consumption for VTOL aircraft 21 p3768 A66-39606
 Optimization of VTOL control concepts with and without stabilization compared with six degree of freedom motion simulator, noting system failure effects and nonlinear concepts [ICAS PAPER 66-9] 22 p3851 A66-40675
 Engine thrust requirement comparison for vertical and short takeoff aircraft with same flight mission 23 p4088 A66-41187
 Automatic flight control for VJ 101C VTOL aircraft, noting autopilot function 23 p4016 A66-41931
 Aluminum and titanium alloys, composite materials and nonmetallic materials for supersonic transports and VTOL aircraft noting intakes, nozzles and variable-geometry wings [ICAS PAPER 66-1] 23 p4016 A66-41932
 Power plant development trends and effect on short and vertical takeoff aircraft design, noting improvement in thrust-weight ratio 24 p4262 A66-43051

Karman vortex street pattern of mesoscale eddies in wake of islands
[AIAA PAPER 65-16] 02 p0221 A66-11548
Base bleeding effect on near-wake structure for very low Reynolds number 03 p0355 A66-12805
Numerical solution of two-dimensional Navier-Stokes equations for confined wake formed by merging of two-plane Poiseuille flow streams 04 p0511 A66-13936
Emf induced by plasma moving across constant transverse magnetic field used to determine rate of flow behind shock wave in shock tube 04 p0557 A66-14434
Radiation emitted by wake
[AIAA PAPER 66-137] 06 p0970 A66-16411
Effect of wake of flow past body on pressure distribution over body 07 p0979 A66-17477
Asymptotic derivation for viscous decay of wake behind plane plate in fluid with power law 07 p1019 A66-17841
Near wake of slender cone at free stream Mach numbers of 8 and 12 08 p1164 A66-19130
Corresponding compressible and incompressible jets and wakes in boundary layer equations of turbulent and laminar cases 10 p1480 A66-21411
Wake transition and Strouhal number for incompressible wake of solid cones, spheres, disks and teardrops 10 p1524 A66-21807
Flow separation, wake configuration and droplet motion in purified systems shadowgraphically analyzed 10 p1524 A66-21808
Mistuning effect on vibration of turbomachine blades induced by wakes 12 p1959 A66-23796
Cavitation effects on periodic wakes behind symmetric wedges, noting Strouhal number variation 12 p1959 A66-23796
[ASME PAPER 65-FE-15] 12 p1864 A66-24549
Flow in vicinity of right cylindrical body, considering shocks between molecules and solid 13 p1991 A66-25469
Trails arising in wake of fan-type jets in transverse gas flow during uniform fuel-air mixture combustion 14 p2413 A66-27693
Criticism of Ivanov assumption regarding IMP-I observation of lunar wake in solar wind by magnetic field and plasma measurements 15 p2575 A66-29104
Mellor solutions for linearized wakes and jets in laminar and turbulent flow for class of pressure gradients 15 p2424 A66-29293
Airfoil theory in incompressible flow for boundary layer suction or Helmholtz type wake 16 p2629 A66-31039
Field potential, electron and ion concentration contours in wake of orbiting body 16 p2631 A66-31540
Velocity spikes in near-wake of circular cylinders held transversely to air stream 16 p2690 A66-31654
Three dimensional character of wake of circular cylinder at three Reynolds numbers utilizing hot wire anemometers 16 p2632 A66-31659
Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751
Diffusion parameters for fluid stream flowing from round hole with given radius and velocity into wake 20 p3544 A66-36914
Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-38012
Digital computer program for V/STOL aircraft static propeller characteristics and optimization, based on initial wake hypothesis and trailing vortex sheet properties 22 p3843 A66-40294
Loads on bodies in wakes resulting from crossflow at submerged body or from wake translation over submerged body, noting dynamic instability 22 p3846 A66-40607

WAKE GENERATOR

Unsteady forces in turbomachines are due to circulation effect, blade thickness effect, wake effect and wake distortion effect [ASME PAPER 64-WA/GTP-3] 02 p0176 A66-11763
Wake motion through moving blade row, demonstrating chopping phenomenon via hot-wire anemometer traces taken downstream of rotor 24 p4157 A66-42583

Torsional oscillations of plane with large suction effect on magnitude of induced axial steady inflow toward surface of disk 01 p0057 A66-10429
Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463
Simple wave interaction in polytropic rarefied gases flowing from parallel wall channel 01 p0006 A66-10473
Boundary layer on spherically blunted cones in supersonic air flow at given wall temperature and thermally insulated wall, graphing calculation 01 p0008 A66-11016
Inlet region of laminar meridional flow in arbitrarily shaped narrow gap between two axisymmetrically formed walls 02 p0217 A66-11585
Natural convection at thermal leading edge on vertical wall matched with known solution immediately above this region 02 p0304 A66-12199
Nonisothermal wall problem for vertical right circular cone in laminar free convection for fluids with low Prandtl numbers 02 p0305 A66-12200
Space charge convection effect on magnetic field transition, with reference to pressure-balance condition of unified rarefied plasma flow and wall 03 p0417 A66-12324
Pohlhausen method application to stagnation point flow, noting failure for case of stretch wall caused by exclusion of MHD boundary layer compatibility condition 03 p0356 A66-12807
Convective mass exchange in heterogeneous chemical reactions in laminar flow along wall 04 p0597 A66-14186
Special cases of conical flow permitting two flows to join and predicting flow limited by conic wall 05 p0605 A66-14536
Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 05 p0664 A66-15656
Quasi-linearization solution of two-component laminar compressible boundary layer with heat transfer on ablating wall [ASME PAPER 65-WA/HT-41] 05 p0792 A66-15667
Viscous fluid flow, examining effect of time dependent suction applied at wall of infinite extent 06 p0871 A66-16351
Mass transfer method for measuring skin friction from isothermal adiabatic leading-edge flat plate in compressible laminar airflow with negligible pressure gradient 07 p0980 A66-17943
Lagrangian similarity hypothesis to determine structure of turbulence that arises during fluid flow over rough rigid wall 07 p1022 A66-18103
Approximate solutions with error estimate for stationary boundary layer with desired distribution of pressure and mass transfer along wall 08 p1166 A66-19828
Heat transfer and distribution of velocity, temperature and concentration in laminar supersonic boundary layers with blowing of light gas with desired pressure and heat distribution 10 p1620 A66-21394
Multidimensional radiation transport equations for nonscattering quasi-equilibrium gray gas obtained by spherical harmonic approximation [AIAA PAPER 65-81] 10 p1621 A66-21774
Velocity defect profiles in equilibrium

turbulent boundary layers and eddy viscosity hypotheses 11 p1693 A66-23005
Effective viscosity in defect portion of turbulent boundary layer when flow is under pressure gradients, showing overlapping of wall velocity profiles and defect velocity profiles 11 p1693 A66-23006
Working section size and shape for V/STOL wind tunnels, emphasizing wall effect magnitude limitation, aircraft aerodynamic and propulsion system characteristics 12 p1857 A66-23657
Analytical solution for surfaces with longitudinal curvature of larger magnitude than that considered in early forms of boundary layer theory, noting condition for self-similar solutions, main flow, boundary layer equations, etc 12 p1861 A66-23811
Nonlinear two-dimensional cavity theory for choked unsymmetric flow over flat plate at arbitrary attack angle, noting variation of lift and drag coefficients [ASME PAPER 65-FE-13] 12 p1864 A66-24544
True static pressure and shear stress of wall turbulent flow obtained, using two static holes of different diameter 12 p1867 A66-24981
Velocity defect law for turbulent incompressible boundary layer with wall injection or suction 13 p2063 A66-25430
Boundary layer generation for viscous incompressible fluid flow past rigid wall or obstacle to which fluid adheres 14 p2274 A66-26940
Direct measurement of tangential stresses for uniform flow over rough wall, using wall balance 14 p2277 A66-27935
Asymptotic behavior of solutions to equations for laminar boundary layer far from wall 16 p2684 A66-30582
Monte Carlo calculation of probability of free molecular conductance of cylindrical tube with wall sorption 17 p2906 A66-31977
Boundary layer control on walls by means of longitudinal vortices created by row of wings in shape of swallow tail 17 p2907 A66-32328
Wall heat transfer behind plane detonation wave moving past flat plate into stationary hydrogen-oxygen mixture 17 p3033 A66-32461
Wall shape effects on flow regimes and performance in straight two-dimensional diffusers [ASME PAPER 66-FE-13] 17 p2915 A66-33267
Random turbulence in wall shear layer, discussing practical application of theory 17 p2916 A66-33481
Liquid high-velocity jets dispersion from variable-roughness injector nozzles, considering effect of roughness of nozzle walls near orifice 19 p3340 A66-35579
Velocity profile downstream from stepped wall having incompressible turbulent fluid flows 19 p3340 A66-35580
Hydrogen combustion in air above solid noncatalytic wall heated to 800 degrees C, examining diffusion equation for slow combustion and laminar boundary layer flow over noncatalytic wall 19 p3479 A66-36249
Wall interaction digital stream amplifier with increased flow gain, impedance matching, outputs decoupled and noise reduction 19 p3283 A66-36812
Similar solutions for compressible boundary layers with heat transfer and blowing or suction 20 p3546 A66-37535
Wall conductance effect on stability of Hartmann flow in curved channel, solving eigenvalue problem via Galerkin method 21 p3777 A66-38762
Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-39169
Compensation of positive and negative anisotropies in ZnNi and ZnLi ferrites, noting effects of magnetization, wall motion and temperature on rotational permeability 21 p3803 A66-39203
Wall flow analysis of logarithmic velocity profile of turbulent boundary layer with zero skin friction throughout region of pressure rise 21 p3729 A66-39449
Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 22 p3898 A66-40025

Total boundary layer mass flow with mass transfer at wall 22 p3899 A66-40370
 Falling of sphere along axis of vertical tube filled with viscous liquid, examining effect of cylindrical walls by linearized Navier-Stokes equations, using successive approximations 23 p4055 A66-41446
 Approximation method for wall effect in cavitation flow around bodies in water tunnel, examining effect of solid boundary on resistance factor 23 p4056 A66-41727
 Extrusion of viscous incompressible substance through round hole in infinite wall, obtaining pressure and velocity fields 23 p4057 A66-41738
 Instantaneous shear stress at liquid flow boundary, measuring turbulence and velocity fluctuation in close proximity of pipe wall 24 p4194 A66-42415
 Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880

WALL JET

Hydraulic jump as plane turbulent wall jet under adverse pressure gradient and finite depth of flow 01 p0056 A66-10314
 Turbulence characteristics measurements of wall jet 01 p0059 A66-11081
 Jet deflection by curvilinear walls in VTOL takeoff, examining parameters affecting flow separation 04 p0572 A66-13512
 Incompressible laminar boundary layer equations for flow due to jet against body of revolution extending to infinity in absence of pressure gradient but with axially symmetrical swirl 07 p0981 A66-18045
 Wall jet on rotating disk totally immersed in fluid, with derivation of laminar flow velocity profiles 07 p0981 A66-18047
 Magnetic forces effect on laminar wall jet of electrically conducting incompressible fluid of constant 12 p1796 A66-23594
 Empirical relationships between momentum, kinetic energy and displacement thicknesses for uniform-density turbulent boundary layer and wall jet flows 15 p2479 A66-29301
 Model study of thrust loss due to recirculation of gases from jets of V-STOL aircraft to engine intakes 18 p3162 A66-33683
 Flow in two-dimensional plane wall jet in still air with various initial gaps between nozzle exit and leading edge of wall 18 p3097 A66-33951
 Incompressible turbulent two-dimensional wall jet flow, discussing viscous interactions with surrounding fluid attachment streamline, momentum-flux equations, etc 18 p3099 A66-34125
 Entrainment function in turbulent boundary layer and wall-jet calculations 18 p3102 A66-34668
 Flow model analysis of shape of curved two-dimensional jet reattaching to offset inclined wall with ventilated cavity beneath jet 20 p3501 A66-37647
 Self-preserving flow in outer part of two-dimensional curved turbulent wall jet for constant ratio of jet thickness to wall radius of curvature 22 p3844 A66-40489

WALL PRESSURE

Wind tunnel wall pressure measurements in slip flow using heated wire as pressure sensor and Wheatstone bridge to record pressure variation 01 p0056 A66-10387
 Wall-pressure histories of plane shock wave reflexion from cold end wall, noting vibrationally relaxing gas and shock front profile 02 p0218 A66-11949
 Turbulent boundary layer pressure fluctuations in subsonic wind tunnel flow and relation to panel vibration response 04 p0509 A66-13535
 Wall curvature effect on performance of high pressure ratio single-stage compressor [ASME PAPER 65-WA/GTP-12] 05 p0745 A66-15727
 Wall pressure fluctuations in subsonic and supersonic turbulent boundary layer flows related to mean shear and turbulence interactions 07 p1023 A66-18113
 Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar 14 p2225 A66-27688

Directional heat meter for wall shear stress measurements in turbulent boundary layers 18 p3112 A66-34242
 Wall effect removal on supercavitating flow, estimating effects due to tunnel ducts and boundary layer blocking 18 p3101 A66-34643
 Wall thickness requirement for cylindrical shell stability under critical radial compression derived by generalized power series 20 p3673 A66-38271
 Miniature transducer assembly for wall-pressure measurements in turbulent boundary layer flows 21 p3736 A66-38651
 Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859

WALL TEMPERATURE

Temperature distribution of slow incompressible viscous flow through conical tube and comparison with two inclined walls 01 p0181 A66-10435
 Adiabatic heating and temperature recovery factor of tubes carrying liquids of high Prandtl number 01 p0185 A66-10905
 Injection method for coolant has no substantial effect on efficiency of gas curtain used to shield machine parts 04 p0598 A66-14438
 Exact solution for wall and fluid temperature distributions for counterflow heat exchanger with effect of longitudinal heat conduction [ASME PAPER 65-HT-63] 05 p0786 A66-14764
 Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 05 p0790 A66-15648
 Reversed heat conduction in natural convection at thermal leading edge on vertical wall [ASME PAPER 65-WA/HT-34] 05 p0792 A66-15672
 Backside wall temperatures of ablative rocket nozzle exposed to hyperthermal environment treated for backside with heat transfer 07 p1151 A66-17584
 One-dimensional heat flow to cool wall, discussing effects of compressibility and variable thermal conductivity 08 p1205 A66-18540
 Thermal radiation into space of limited areas of inner walls of space radiators determined, assuming cylinder and cone are isothermal black body 08 p1317 A66-18835
 Stationary heat transfer through wall with longitudinal rectangular ribs and variable coefficient of thermal conductivity 08 p1319 A66-19426
 Nonstationary temperature distribution in long cylinder solved by integral transforms, giving results in form of series in Bessel and error functions 10 p1620 A66-21327
 Friction resistance of compressible turbulent gas flow through initial section of cooled pipe with large gas-wall temperature gradients 11 p1688 A66-22597
 Concise numerical technique for reduction of data from thin platinum film heat transfer resistance 12 p1876 A66-23608
 Compressible laminar boundary layer equations solved, noting wall flow and suction problem 13 p2063 A66-25467
 Thermal profiles in turbulent boundary layers with obstacles at wall temperature 13 p1991 A66-26338
 Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717
 Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718
 Approximation method for limit Nusselt number for channels of nonuniform geometrical configuration and linearly variable wall temperature 16 p2684 A66-30677
 Diffusive corrosion processes caused in

circular tubes by reactive fluid simulated by rotating disk electrodes 16 p2728 A66-31597
 Mixing zone of two wakes, studying cooling effect of gas stream directed tangentially or at small angle to container wall 16 p2689 A66-31607
 Wall thermal factor for supersonic flow incident on cone 17 p2838 A66-32283
 Transient heat transfer to liquids in cylindrical enclosures subjected to step change in wall temperature 18 p3263 A66-34384
 Absorption of thermal radiation from gaseous fuel by transparent wall of nuclear light bulb rocket engine [AIAA PAPER 66-619] 18 p3134 A66-34434
 Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632
 Free convection boundary layer along isothermal plate, using equation of laminar compressible flow and heat transfer, noting profile dependency upon wall coordinate 21 p3835 A66-38945
 Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 22 p3997 A66-40027
 Integral ratios for calculating diffusion rate of magnetic field into wall-cooled plasma 23 p4106 A66-41716
 Unsteady compressible boundary layer equations solved when wall temperature is perturbing about zero and steady mean 23 p4057 A66-41868
 Reentry heat flux condition transformation into specified convective coefficients and temperatures, accounting for variation of flux with wall temperature 24 p4261 A66-42795
 Laminar flow of fluid with varying viscosity in tube with walls at constant temperature, analyzing equations of motion and equations for conservation of energy 24 p4197 A66-42991

WALL TEMPERATURE DISTRIBUTION

Effect of heat removal through MHD channel walls on stability of temperature distribution during electrical discharge in gas between two planes 04 p0557 A66-14421
 Heat transfer of internal heat generating fluid in turbulent regime, using electrical dissipation and measuring wall to bulk temperature differences [ASME PAPER 65-WA/HT-15] 05 p0790 A66-15649
 Differential equation derived for cooling of infinite porous tube by gas injection through wall, determining wall temperature distribution 16 p2827 A66-30674
 Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment [AIAA PAPER 66-459] 16 p2811 A66-31491
 Heat transfer of internal heat generating fluid in turbulent regime, using electrical dissipation and measuring wall to bulk temperature differences [ASME PAPER 65-WA/HT-15] 22 p3997 A66-40028

WANKEL ENGINE

Envelope of parametric equations determined, using geometrical understanding for identification of singularities on envelope, noting relevance to Wankel engine design 21 p3755 A66-38599

WARNING DEVICE

SA COLLISION WARNING DEVICE
 Stall prevention device for Beechcraft T-34B aircraft equipped with stall warning wing device 17 p2843 A66-32190
 Biological hazard of radiation doses to which passengers of high-flying Concorde aircraft may be subjected, considering use of in-flight warning meter 19 p3452 A66-35796

WARNING SYSTEM

SA BALLISTIC MISSILE EARLY WARNING SYSTEM/BMEWS/
 SA EARLY WARNING SYSTEM
 Comparative merits of visual, audible and composite aircraft warning systems for

Optimum human response to causal condition 01 p0021 A66-10939

Fluid amplifier application to process control including turbulence amplifiers, logic function performance, etc

ASME PAPER 66-MD-8] 21 p3697 A66-38477

ASTE

HUMAN WASTE

LEAKAGE

METABOLIC WASTE

ASTE DISPOSAL

Chromate waste treatment methods, noting hexavalent chromium reduction method and ion-exchange method 21 p3743 A66-38769

ASTE UTILIZATION

Life support closed cycles for missions to outer space lasting 12 months or longer, considering recovery and replenishing of water, food and oxygen from wastes 07 p0998 A66-17229

Recovery of reusable products of human excretory wastes in closed-loop life support systems for long-duration manned spaceflight

[AICE PREPRINT 19B] 10 p1491 A66-21185

Human waste products water reclamation systems render space crew independent of stored water requirements

[AICE PREPRINT 54A] 17 p2867 A66-32668

ATER

SA BODY FLUID

SA ICE

SA OVER-WATER FLIGHT

SA POTABLE WATER

SA SEA WATER

Chemical reaction occurring between low temperature plasma jet and nearly inviscid fluid/water/ 02 p0264 A66-11388

Linewidth parameters for self-broadening and foreign gas broadening of water line measured, noting temperature dependent result and Zeeman components 03 p0443 A66-12342

Atmospheric thermal radiation calculated from unresolved molecular absorption spectra of atmospheric carbon dioxide and water 05 p0675 A66-15860

Photolysis of water at 1470 angstroms in absence and presence of ethylene 09 p1338 A66-20679

Carbon dioxide effect on shattering of freezing water drops, using methanol-cooled chamber with variable temperature control 10 p1552 A66-21290

Forms of water in biologic systems - Conference, New York, October 1964 11 p1644 A66-22987

Nonpolar solutes on structure of water and hydrophobic bond in protein stability in aqueous solutions 11 p1649 A66-22988

Physical state of water in living cell and model systems such as collagen and wool 11 p1645 A66-22989

Intracellular water structure and mechanisms of cellular transport, examining plasma and intracellular membranes 11 p1645 A66-22991

Structured water forms in biologic systems, relationship to macromolecular system, detection and evaluating electron microscopy 11 p1645 A66-22992

Extraterrestrial life detection based on catalysis of oxygen exchange between labeled oxyanions and water, noting equipment 15 p2441 A66-29961

Critical heat flux for boiling water, sodium and rubidium, correlating burnout data for liquid metals only and as relation for metallic and nonmetallic fluids 18 p3262 A66-34376

Liquid water and nitrogen drops vibrating in natural frequencies above hot plate on vapor cushion analyzed by photographic techniques and used to simulate atomic nuclei fission 18 p3262 A66-34377

Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-36384

Swept frequency measurement of water-drop diameter in spherical resonator, using dielectric materials 19 p3394 A66-36417

Equipment design and weight estimates for lunar production of oxygen and water 22 p3977 A66-39896

Atomization of water drops by high speed airstreams, noting dependency on time 23 p4016 A66-42053

WATER BALANCE

Effects, singly and in combination, of heat, exercise and hypohydration upon voluntary dehydration in four acclimated physically-fit young men 06 p0812 A66-16533

Water balance test for investigation of kidney functions of astronauts of Voskhod I spacecraft 06 p0814 A66-17176

WATER CONTENT

Hydrothermodynamic equations for calculating velocity, temperature and pressure fields and water content for model of stationary axisymmetric cumulus cloud 04 p0540 A66-13414

Quantitative detection and washing and pumping methods for removal of traces of water from alkali halides 09 p1339 A66-20874

IR spectral study of water deficiency in S stars and water abundance variation with Mira phase 11 p1771 A66-22771

Mass transfer potential in colloidal bodies, discussing relation between water content of dispersed substance and amount of moisture that can be absorbed by it 14 p2416 A66-28329

Cloud and fog droplet spectra rearrangement due to external conditions calculated from distribution function of water content 20 p3594 A66-38374

Seed water content influence on oxygen effect as detected in gamma irradiated barley seeds and prolonged post-storage period in terms of biological effect and paramagnetic resonance signal 22 p3855 A66-40378

Electrolysis of wet hydrogen fluoride, noting analysis of anode products by gas chromatography and water content measurement by IR spectroscopy 23 p4118 A66-41236

WATER DEPRIVATION

S DEHYDRATION

WATER FLOW

Electrokinetic transducers to measure potential fluctuations of turbulent flow of tap water in open channel 04 p0509 A66-13664

Laminar fully-developed flow of water between parallel flat plates examined, using motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179

Oscillation stability criteria for simple surge tank obtained from second method of Liapunov 10 p1523 A66-21497

Simulated fish propulsion analysis of boundary layer transition and vortex chain shedding 13 p2071 A66-26725

Periodically excited boundary layer disturbances above flat plate in water flow scanned by hot-wire anemometer under various conditions 14 p2275 A66-27477

Time variation of ocean temperatures and relation to internal waves and oceanic heat flow measurements from four stations 14 p2289 A66-28337

Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880

WATER INTAKE

Human water consumption in warm environment examined by linear regression analysis of 22 metabolic variables 13 p2015 A66-26733

WATER JET

Optimum design parameters for water ejectors

[ASME PAPER 65-WA/FE-31] 05 p0691 A66-15710

Stability of vertical water jet examined by imposing audiofrequency disturbances 13 p2060 A66-25133

Degree of similarity of turbulent flow characteristics in geometrically similar flows 24 p4197 A66-42949

WATER LANDING

Human tolerance limits in water impact, identifying environmental and trauma characteristics 03 p0327 A66-12356

Model tests for determination of structural response of Apollo command module to water impact 14 p2393 A66-28020

Aircrew body heat loss from cold water immersion and developments in heating systems and insulative clothing 15 p2442 A66-28656

Theoretical and experimental data on

Apollo command module during water impact 20 p3664 A66-38169

WATER RECOVERY

Electrodialytical removal of reaction water from alkaline electrolyte of oxygen-hydrogen fuel cells 04 p0460 A66-14033

Role of solar furnaces in production of water on Moon

[ASME PAPER 65-WA/SOL-2] 05 p0661 A66-15633

Life support closed cycles for missions to outer space lasting 12 months or longer, considering recovery and replenishing of water, food and oxygen from wastes 07 p0998 A66-17229

Drinking water reclamation from urine by thermoelectrics, including operational theory and data for working models 08 p1176 A66-18730

Recovery of reusable products of human excretory wastes in closed-loop life support systems for long-duration manned spaceflight

[AICE PREPRINT 19B] 10 p1491 A66-21185

Biological procession of human secretions and water regeneration by Chlorella in bacterial colony 15 p2440 A66-29501

Human waste products water reclamation systems render space crew independent of stored water requirements

[AICE PREPRINT 54A] 17 p2867 A66-32668

Water management system design for long duration manned space flights emphasizing hardware, flow diagram, operation and control rather than component design or selection

[AICE PREPRINT 54B] 17 p2867 A66-32669

Feasibility of using water condensates recovered from heat exchangers of pressure suits as emergency drinking water source 19 p3294 A66-36379

Two-gas regenerative life support system for pressure, thermal and humidity control, water reclamation, atmospheric circulation, carbon dioxide and trace contaminant removal

[AIAA PAPER 65-501] 20 p3510 A66-38172

Solar energy vs electrical or nuclear power for recovery of water, oxygen and various chemicals from lunar soil

[AICE PREPRINT 46B] 22 p3977 A66-39897

Storage, dumping and regeneration techniques in air, water and food needed to keep astronauts alive 22 p3857 A66-40022

Tests for obtaining water trajectory data and underwater flow field photographs used in determining deployment sequence of water recovery system flotation bag for reentry vehicle 22 p3987 A66-40601

WATER TUNNEL

Vortex streets behind circular cylinders and flat plates analyzed, using photography and hot wire techniques, noting role of walls and wakes 03 p0354 A66-12321

Shaft deflections in turbopumps from cavitation-induced unbalanced hydrodynamic forces in inducer 07 p1038 A66-18174

Behavior of individual cavitation bubbles in cavitating flows of water and liquid Mercury, using two-dimensional Plexiglas venturi 07 p1025 A66-18177

Motion picture on cavitation hysteresis, details on test apparatus, noting cavitation delay time 07 p1025 A66-18178

Water entry cavity for missiles, noting parameters, cavity development and collapse, etc 13 p2071 A66-26722

Dynamic and steady state flow disturbances encountered by aircraft during carrier landing approach in water tunnel simulation study

[AIAA PAPER 65-332] 16 p2634 A66-31319

WATER VAPOR

SA HUMIDITY

Intensity of water vapor in atmosphere of planet Mars 01 p0138 A66-11087

Optical processes effect on integral water plasma radiation to determine atmospheric pressure and temperature 03 p0399 A66-12824

Water vapor content in Venus atmosphere above reflecting cloud layer determined, using automatic daytime telescope and grating spectrometer 07 p1137 A66-18054

Water vapor influence on latitudinal and seasonal distribution of stratospheric ozone concentration explained via Hampson chemical mechanism 08 p1216 A66-19209

Venus radiation at 13.5 mm water vapor

line and planetary brightness variation with solar illumination phase 09 p1450 A66-20111

Earth atmosphere physical properties including temperature, density, pressure and water vapor 09 p1398 A66-20270

Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 09 p1375 A66-20942

Silicon dioxide glass films by decomposing tetraethoxysilane in AC-induced glow discharge in which water is chemically incorporated into oxide films 09 p1432 A66-20979

Data recording, data reduction and interpretation of information on water content of Venus atmosphere gathered by balloon-borne instruments 10 p1603 A66-21109

Oxygen and water vapor effects on propagation of fatigue cracks in aluminum alloy sheets 10 p1614 A66-21338

Short wavelength wing of pure rotation emission spectrum of water vapor measured at various temperatures and nearly constant optical depth, calculating mean spectral absorption coefficient 11 p1739 A66-22952

Devitrification of glass around collapsed bubbles in tektites, noting formation mechanism 11 p1773 A66-22962

Stress corrosion on E glass fibers exposed to water vapor 11 p1720 A66-23120

Diffusion and propagation phenomena in air-water and water-steam emulsions in one-dimensional flow 12 p1973 A66-23524

High-resolution interference spectrometer to observe water vapor absorption in 500 to 1500 gc region 13 p2020 A66-25203

Atmospheric noise temperature spectra observed from satellite at wavelength near rotational lines of water vapor molecule 13 p2075 A66-26742

Quantum mechanics calculation of transmission functions of rotational band of water vapor for 8 spectral regions at 20 to 50 micron wavelengths 14 p2326 A66-27538

Effect of radiative sound absorption in atmosphere, calculating absorption due to radiation by water vapor in far-IR rotation spectrum 14 p2334 A66-27659

Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 15 p2483 A66-28530

Contaminating effect of water vapor in optical path of spectrometer on measurements of stratospheric water vapor absorption 15 p2530 A66-28601

Density, temperature and wind data of strato- and mesosphere, together with water vapor measurements in central tropical Pacific, using rocket and balloon soundings 15 p2485 A66-28937

High Q Fabry-Perot interferometer for measurement of atmospheric gas losses, particularly water vapor absorption, using coherent light source in 100-300 gc frequency range 15 p2501 A66-29003

Microwave absorption by water vapor and mixtures with other gases between 100 and 300 gc/s, noting increase in absorption attributed to molecular collision-induced polarization 15 p2450 A66-29004

118-micron wavelength water vapor gas laser with 4-inch diameter two-meter focal length mirror resonator system 15 p2514 A66-29010

Radiation data measured by Tiros IV satellite for determination of global distribution of atmospheric water vapor 15 p2533 A66-30029

Homogeneous nucleation of water vapor determined by laser beam scattering from cloud 16 p2716 A66-30121

Balloon-carried automatic telescope-spectrometer observation of Venus upper atmosphere and determination of water vapor content 16 p2797 A66-30352

Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109

Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 16 p2830 A66-31680

Life support subsystem for recovering breathable oxygen by water vapor electrolysis 17 p2866 A66-32194

Relaxation and evaporation zones behind

normal shock in mixture of air, water vapor and water droplets 17 p2908 A66-32445

Water vapor effects on detonation reaction of H sub 2 - O sub 2 17 p3034 A66-32467

Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 18 p3262 A66-34378

Water vapor effects on burning rate of aluminum and magnesium wires at atmospheric pressure [WSCI 66-4] 18 p3264 A66-34421

Morning humidity variation relation to dew content and visibility of atmosphere, noting role of water vapor 19 p3393 A66-35395

Laser action in closed molecular system with mixture of carbon dioxide, nitrogen and water vapor, noting coupling-out plate reflectivity and population inversion 19 p3373 A66-35433

Homogeneous nucleation of liquid drops in supersaturated vapors, noting kinetic treatment for heating of growing clusters and irreversible thermodynamics of nonisothermal nucleation 19 p3477 A66-35566

Cross sections for vibrational excitation of water by collision with water and molecular hydrogen calculated, using radial scattering equations 19 p3403 A66-36330

Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties 20 p3544 A66-36924

Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal variation 20 p3511 A66-37133

Radio wave absorption factors in atmospheric water vapor and oxygen, deriving expressions for effective length, mean temperature and total vertical absorption 20 p3512 A66-37134

Water vapor effect on friction of molybdenum disulfide compact sliding against rubbed film of molybdenum disulfide on copper in nitrogen atmosphere 20 p3563 A66-37700

Water-vapor mixing ratios near cloudtops of Venus decreases with altitude at rates comparable to Earth atmosphere 20 p3655 A66-38020

Electron drift velocity, ionization and attachment coefficients in water vapor and dry air measured by recording short photoelectron pulses 20 p3605 A66-38095

Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164

Water vapor mass below upper limit of Earth cloud cover estimated through Earth brightness measurements 21 p3735 A66-39360

Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697

IR absorption coefficients of water vapor as function of temperature obtained from absorption and emission spectra 22 p3950 A66-40114

Search for 22.235 gc/s emission line from stratospheric water vapor, noting absence of noise temperature enhancement 22 p3916 A66-40810

Quantum mechanics calculation of transmission functions of rotational band of water vapor for eight spectral regions at 20 to 50 micron wavelengths 24 p4234 A66-42324

Heterogeneous formation of seed crystals on wettable and nonwettable condensation nucleus in supercooled water droplets 24 p4234 A66-42756

WATERPROOFING

Echo project objectives and results 01 p0145 A66-11127

Rain repellent polymers for aircraft windshields 13 p2116 A66-26544

SA ACOUSTIC ATTENUATION

SA MICROWAVE ATTENUATION

SA RADIO ATTENUATION

SA SHOCK WAVE ATTENUATION

Attenuation of surface waves in plasma columns in weak axial magnetic field 01 p0026 A66-10543

Experimental study of damping of planar wave motion in vicinity of resonance 01 p0059 A66-10644

LF monochromatic plasma wave attenuation from plasma-particle interaction 02 p0268 A66-11769

Wave attenuation with phase velocity greater than speed of light in infinite plasma layer between ideal metallic plates 02 p0268 A66-11785

Attenuation of electromagnetic waves propagated in bounded plasma layer across external magnetic field, noting particle-wave interaction 03 p0396 A66-12288

Velocity and attenuation of Alfvén waves in hydrogenous plasma at LF and HF by experiment 03 p0406 A66-13177

Propagation of optical waves through atmosphere, considering attenuation of optical waves and noise generation 04 p0545 A66-13756

Attenuation of transient electric and magnetic fields by imperfectly conducting spherical shells 06 p0843 A66-16029

Attenuation and velocity of shear acoustic waves propagating parallel to magnetic field for spin density wave metal 06 p0922 A66-16074

New low-pass filter with attenuation by dissipation, noting reflection and attenuation vs frequency 06 p0846 A66-16098

Resonant ohmic damping of linearized magnetoacoustic waves in incompressible infinite homogeneous resistive plasma in static equilibrium 09 p1408 A66-20423

Random irregularities caused by mechanical distortion in lenses, reflectors or diaphragms of optical beam waveguides and increases in diffraction attenuation 09 p1345 A66-20491

- Characteristics of quasi-optical conduction millimeter wave resonator with gas, showing resonance absorption 09 p1381 A66-20492
- Decomposition of expanding wave into amplifying and attenuating components 09 p1347 A66-20781
- Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure 13 p2159 A66-25071
- Anomalous damping of helicon waves propagating in cylinder of hot plasma 13 p2143 A66-25717
- Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763
- Decay of space-charge waves as due to ballistic or free-streaming process in electron beam with velocity spread 15 p2550 A66-28724
- Ultrasonic attenuation dependence on frequency in Pb crystals at low temperatures 16 p2770 A66-30179
- Quantum oscillations in damping of helicons propagating through degenerate semiconductor plasmas in presence of quantizing magnetic fields 16 p2770 A66-30185
- Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173
- Interstellar plasma wave damping by relativistic suprathermal particles, noting magnetosonic and Alfvén waves 17 p2996 A66-31915
- Near field beyond perfectly conducting plane screen with small circular aperture 18 p3066 A66-33542
- Cosmic radio wave absorption dependence on frequency and number of electron-ion collisions during atmospheric magnetic storms 19 p3344 A66-35267
- Generation of ion plasma waves in weakly ionized gases with measurement of phase velocity and damping 20 p3609 A66-37597
- Microwave antenna design elements, feed equipment and performance characteristics 20 p3530 A66-37716
- Kadomtsev current-convective instability and damping as affected by current density, wave frequency, resistivity gradient and azimuthal wave number 21 p3791 A66-39178
- Electron attenuation of ultrasonic waves of arbitrary polarization and propagation direction for superconductors computed on BCS model, noting role of Fermi surface 22 p3960 A66-39802
- Decomposition of expanding wave into amplifying and attenuating components 22 p3862 A66-39840
- Laser oscillation effect on characteristics of electron gas of helium-neon laser plasma studied in terms of wave attenuation in plasmaguide 24 p4225 A66-43006
- WAVE DETECTION**
- Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 04 p0483 A66-14008
- Power spectral density analysis, reviewing signal wave, time, rate and system parameters [ISA PREPRINT 1.5-3-65] 05 p0683 A66-15508
- Parallel-strip point-contact diode mount evaluated for video detection of millimeter waves 10 p1514 A66-21909
- Information recovery from noisy measurements, employing steady quantity measurements, known waveform detection and transfer function 11 p1656 A66-22825
- Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 12 p1813 A66-23870
- Detection scheme for millimeter and submillimeter waves, utilizing system of quantum energy levels to down-convert HF radiation to microwave frequency 15 p2462 A66-29019
- Random dispersive wave intensity detection and measurement in presence of noise 23 p4037 A66-41499
- WAVE DIFFRACTION**
- Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 01 p0077 A66-10419
- Linear approximation of plane problem of shock wave incident on rigid obstacle, taking into account wave effects and diffraction 01 p0058 A66-10461
- Dispersion curves and field component computations for longitudinally magnetized ferrite slab in rectangular waveguide 01 p0027 A66-10557
- Plane wave diffraction by sinusoidal network 01 p0031 A66-11074
- Diffraction of electromagnetic centimeter waves passing metal screen depends on curvature of screen edge 01 p0032 A66-11200
- Surface impedance of nonhomogeneous plasma with sharply varying parameters, noting skin effect and permittivity gradient 02 p0192 A66-11840
- Propagation and diffraction of electromagnetic waves in inhomogeneous magnetoionic medium, noting exospheric propagation and Hamiltonian optics 02 p0192 A66-12208
- Pulsed pressure wave diffraction by disk at arbitrary angle 03 p0314 A66-12527
- Ionspheric interference with cosmic radio waves, analyzing scintillation, noting diffraction of wavefront passing through ionspheric electron density layer 03 p0335 A66-12855
- Electromagnetic wave scattering discussing beam trajectories, flux density decrease and radar detection in ionized trail in form of paraboloid of revolution 03 p0337 A66-13314
- Discrete radio source scintillation, considering irregular diffraction pattern caused by ionspheric irregularities 04 p0575 A66-13380
- Measurement of elasto-optic performance of solids in Bragg diffraction devices 04 p0531 A66-13958
- Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 04 p0483 A66-14050
- Two-dimensional diffraction of plane waves by slits or strips whose width and number are arbitrary studied by exact solution of integral equations 04 p0484 A66-14095
- Plane and cylindrical wave diffraction at ideally reflecting wedge 06 p0823 A66-15881
- Wave diffraction in waveguide at various metallic ribbon-type capacitive inhomogeneities 06 p0838 A66-15885
- Expected diffraction effects on electromagnetic radiation from Mariner IV due to Martian atmosphere and occultation 06 p0827 A66-16039
- Surface wave diffraction by wedge as determined by Chu and Kouyoumjian compared with results using simpler Green function 06 p0827 A66-16043
- Wave polarization change passing through grating 06 p0829 A66-16144
- Two-dimensional problems of diffraction of weak shock or acoustic and elastic waves on obstacles of various shapes, equivalent to supersonic gas flow three-dimensional problems 06 p0909 A66-16706
- Monographs on electromagnetic diffraction and propagation problems, particularly radio propagation in troposphere 06 p0836 A66-17087
- Reduction of diffracted light for astrometry near Sun 07 p1035 A66-18036
- Short wave asymptotics of diffraction field at sphere for incident plane transverse waves 07 p1144 A66-18182
- Russian text on diffraction and radiation of waves 08 p1257 A66-19755
- Two-dimensional problem of wave diffraction at concave polygon 08 p1257 A66-19756
- Field in shadow region of cylindrical wave diffraction at finite concave cylinder 08 p1257 A66-19757
- Diffraction of plane electromagnetic wave by cylinder of inhomogeneous plasma calculated by method that considers plasma as electron dipoles 09 p1406 A66-19843
- Electromagnetic wave diffraction by arbitrary shaped dielectric bodies treated by perturbation method, based on Taylor series expansion 09 p1342 A66-20086
- Time dependent emission behavior of single axial mode of diffraction limited ruby laser at room temperature 09 p1386 A66-20420
- Microwave optics diffraction theory, reflectors, lenses, interferometers, spectrometers, beam waveguides and millimeters wave components 09 p1402 A66-20511
- Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 09 p1347 A66-20787
- Electromagnetic wave deflection where transmitted power is inherently guided by stored energy component, noting effect of Sun gravitational interaction 10 p1496 A66-21292
- Classical problem of diffraction of radio waves around spherical Earth 11 p1652 A66-22462
- Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 11 p1705 A66-22604
- Linear polarized plane electromagnetic wave diffraction by two pairs of parallel infinite coaxial cylinders 11 p1654 A66-22645
- Plane electromagnetic wave diffraction on slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 11 p1655 A66-22717
- Multiple diffraction of circular or linear front acoustic wave at polygon apices 12 p1914 A66-24350
- Elastic plane wave diffraction on solid strip soldered into infinite elastic medium 12 p1968 A66-24351
- Wave diffraction problems in wedge-shaped regions solved, using Wiener-Hopf and Helmholtz equations and superposition principle 12 p1915 A66-24819
- Vertical incidence fading amplitude experiment using array of receiving antennas, obtaining data on ground diffraction pattern of reflected radio waves, noting correlation function shapes 12 p1824 A66-24840
- Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 13 p2019 A66-25089
- Plane electromagnetic wave diffraction by narrow strip-grating, obtaining reflection coefficient via optical approximation method 13 p2021 A66-25395
- Plane wave diffraction by infinitely conducting network representing diffracted electric field by Rayleigh expansion 13 p2021 A66-25457
- Distorted wave one-meson-exchange /DWOME/ for high-energy elementary particle reaction analysis, leading to different expression for transition amplitude 13 p2131 A66-25482
- Diffraction of scalar surface waves impinging at arbitrary angle on fracture in impedance plane 13 p2024 A66-25947
- Energy propagation lines in diffraction of vertically polarized electromagnetic wave by conducting half-plane shield 14 p2241 A66-27939
- Plane electromagnetic diffraction by wide aperture in conducting screen immersed in anisotropic medium 14 p2241 A66-27981
- Electromagnetic wave scattering, discussing beam trajectories, flux density decrease and radar detection in ionized trail in form of paraboloid of revolution 14 p2242 A66-28287
- Numerical solution of integral equation for diffraction by soft strip applied in wave scattering by obstacles with dimensions comparable to wavelength 14 p2325 A66-28399
- Electromagnetic and acoustic wave coupling in homogeneous compressible isotropic plasma and diffraction by half-plane due to sharp structural discontinuities in antenna configurations 15 p2448 A66-28591
- Perspective rendering of field intensity diffracted at circular aperture with reference to laser-scanning technique 15 p2499 A66-28843
- Wave polarization change passing through grating 15 p2452 A66-29874
- Statistical properties of dispersive waves in upper atmosphere analyzed, using correlation technique 15 p2493 A66-30040

Diffraction of axisymmetric electromagnetic wave at surface discontinuity of impedance cylinder forming core of coaxial waveguide 16 p2661 A66-30864

Density and diameter of inhomogeneous plasma cylinder determined from numerical calculation of diffraction of electromagnetic wave 17 p2963 A66-31843

Plane electromagnetic wave diffraction at two parallel circular cylinders for TM and TE polarization 17 p2879 A66-31862

Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 17 p2873 A66-32216

Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390

Sonic diffraction mechanism used in tropospheric transhorizon propagation 17 p2876 A66-33361

Diffraction by conducting half-plane in plasma 17 p2876 A66-33427

General hybrid surface wave mode diffraction at surface reactance discontinuity 18 p3065 A66-33531

Equivalence between scalar three-dimensional diffraction problems in homogeneous medium and two-dimensional diffraction problems in inhomogeneous medium with inverse square permittivity profile 18 p3065 A66-33534

Diffraction of linearly polarized electromagnetic wave by coaxial cylinders, deriving approximate solution for wavelengths smaller than distance between cylinder centers 18 p3068 A66-33977

Wave diffraction in rectangular waveguides passing through double ribbon barriers 19 p3311 A66-35299

Fourier series solution to electromagnetic wave diffraction on metallic gratings with anisotropic dielectric 20 p3512 A66-37148

Antennas with leaky wave characteristics, noting similarities and differences with wave diffraction 20 p3529 A66-37707

Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709

Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3603 A66-37754

Reduction of problems of diffraction of scalar and vector waves at open curvilinear screen to integral equations of second kind 20 p3518 A66-37992

Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 21 p3702 A66-38514

Geometric diffraction theory for scalar wave incident on plane screen, emphasizing normally and nonnormally incident plane waves and spherical waves 21 p3769 A66-38601

Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 22 p3862 A66-39846

Radio wave diffraction in stratified troposphere solved for case of exponential refractivity profile 22 p3863 A66-39935

Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptic cylinder, noting integral equation 22 p3866 A66-40185

Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of waves from ionospheric nonuniformities 22 p3866 A66-40467

Propagation of weak shock waves with Mach number less than 1.25 around obstacles placed in indefinite medium, examining turbulent wake formation and wave diffraction [ICAS PAPER 66-21] 22 p3901 A66-40667

Diffraction of electromagnetic waves at dielectric wedge, considering skin depth and internal problem 23 p4036 A66-41134

Plane electromagnetic wave diffraction on

slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 23 p4037 A66-41455

Soret Zone Plate simulation by longitudinally distributed coaxial aperture system, noting system activation and operation 23 p4068 A66-41622

10.6 micron output of carbon dioxide-He laser modulated, using Bragg diffraction from longitudinal acoustic waves in Te 24 p4219 A66-42251

Self-trapping of laser beam due to diffraction from dielectric waveguide arising from permittivity increase of birefringent beam 24 p4222 A66-42554

Configurations for realization of multiple laser light scattering using microwave acoustic waves and two Porro prisms 24 p4224 A66-42636

Diffraction of waves by transparent screen studied to determine what information about diffracting screen can be obtained by observing diffraction pattern 24 p4173 A66-42712

Plane stationary elastic wave diffraction by stress-free circular cylinder, noting cylindrical cavity case 24 p4175 A66-42841

Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semiinfinite plasma 24 p4175 A66-42978

Divergent-beam diffraction geometry for interpretation of Kossel diffraction patterns in space group assignment lattice parameters and structure factor evaluation 24 p4239 A66-43169

Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide studied, using Wiener-Hopf-Fock factorization method 24 p4177 A66-43225

WAVE DRAG

Integration of propulsion systems with airframe, emphasizing aerodynamic lift and drag 05 p0605 A66-14934

Thin body of revolution with annular shield with zero wave resistance in supersonic axial linearized flow 16 p2629 A66-31036

Maximum wave drag in supersonic flow deflection 24 p4158 A66-42852

WAVE EQUATION

SA HELMHOLTZ EQUATION

SA LAME WAVE EQUATION

Radiation conditions in terms of motion equations of classical elasticity and field equations show uniqueness of solution to wave scattering problems 01 p0153 A66-10431

Ellipsoidal wave equation /differential equation with ellipsoidal coordinates/ solution expressed as Neumann series 02 p0249 A66-11579

Derivation of wave-type heat equation satisfying second law of thermodynamics and modified Onsager symmetry relations 06 p0971 A66-16503

Linearized wave equation of supersonic flow with single relaxation process, using model gas mixture 06 p0874 A66-17003

Point-matching method, approximate technique for wave equations of uniform waveguides with very general cross sections 07 p1007 A66-17510

Complex Wentzel-Kramers-Brillouin phase integral method and low density universal instability caused by finite Debye length 07 p1088 A66-17957

Slow decay of solution of initial boundary value problem for wave equation in unbounded region 07 p1059 A66-17970

Modification of Fourier law used to obtain hyperbolic wave equations of thermomagnetoelasticity for conductors and wave equations of thermopiezoelectricity 08 p1270 A66-19113

Series solution for average wave field in medium with random inhomogeneities by using Green function for wave equation 09 p1343 A66-20335

Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 09 p1357 A66-20778

Characteristic TWT equation solved for large space-charge parameter 09 p1357 A66-20779

Wave equations of thermoelasticity derived, based on wave equation of heat

conduction 10 p1555 A66-21312

Generalization of high accuracy alternating direction implicit /ADI/ method for solving wave equation in two space dimensions 10 p1550 A66-21845

Stress function solution in dynamic linear theory of homogeneous incompressible elastic bodies 12 p1962 A66-23998

Error bounds of phase-integral methods applied to wave-penetration problems 13 p2118 A66-25830

Light coupling with phonons, magnons and plasmons, deriving wave equations and coupling constants, observing Raman effect in spin systems and in plasmas, noting second harmonic generation 13 p2132 A66-26154

Coupled wave formalism, giving unified description of parametric down conversion of light, stimulated Brillouin and Raman effects, etc, stressing exponential character of gain 13 p2132 A66-26156

Maximum property of Cauchy problem for wave operator 14 p2320 A66-26941

Coupled wave equation for homogeneous gyrotropic compressible warm plasma derived, using partial differential equations 14 p2340 A66-27037

Wave equation for inhomogeneous isotropic hot plasma 14 p2340 A66-27044

Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity potential 14 p2218 A66-27387

Green-Hadamard functions of Tricomi singular problems for generalized wave equation, expressing equation integrals as hypergeometric Humbert and Horn series 15 p2530 A66-29855

Classification of modes in electromagnetic waveguides using model solutions of source-free homogeneous wave equation 16 p2663 A66-31204

Multipole analysis of acoustic radiation to explore dependence of mass density on functional character of source distribution 17 p2957 A66-31951

Mixed initial boundary value problem for wave equation in three space dimensions, proving existence of generalized solution 18 p3128 A66-34662

MHD wave equation for compressible infinitely conducting fluid formulated in Cartesian tensor form 18 p3103 A66-34935

Transverse propagation of electromagnetic waves in cylindrically stratified axially magnetized plasma, noting profiles of permittivity tensor 19 p3303 A66-35856

Numerical integration scheme for oscillatory equations with second-order accuracy and sharp cut-off for high frequencies 19 p3389 A66-36058

Governing equations for electromagnetic phenomena in lossy magnetoelectric media in terms of compressibility tensor, deriving wave equations which are decoupled, giving resulting uncoupled differential equations 19 p3305 A66-36412

Boundary value problem of wave equation with application to antenna theory of singular integral equations 20 p3531 A66-37730

Refractive index equation derived for oblique wave propagation in compressible general magnetoplasma with arbitrary directed magnetostatic field 21 p3793 A66-39350

Wave theory calculation of moments of velocity change of charged particle in magnetoplasma 21 p3794 A66-39573

Mathematical theory of gain mechanisms of acoustic amplification 22 p3862 A66-39745

Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 22 p3873 A66-39837

Characteristic TWT equation solved for large space-charge parameter 22 p3874 A66-39838

Numerical solution of full-wave equation with mode coupling governing electromagnetic wave propagation in horizontally stratified inhomogeneous anisotropic medium 22 p3863 A66-39938

Three-dimensional electric field wave equation for homogeneous gyrotropic compressible drifting plasma derived for case having magnetostatic field and drift

- velocities in arbitrary 22 p3865 A66-40099
- Criterion for spatial-amplification or nontransmittance using double Laplace transforms in light of complex values of wave vector 22 p3869 A66-40928
- Progressing wave formalism method of obtaining approximate solution of suitable problems of wave equation and other linear hyperbolic partial differential equations 23 p4036 A66-41055
- Singular solutions for Chaplygin equations using generalized wave functions, noting iteration method for finding wave equation corresponding to first terms of expansion series 23 p4085 A66-41561
- Spectral representation for potentially perturbed wave equation 23 p4041 A66-41876
- Approximate wave equation for axially symmetric periodic waveguide 24 p4179 A66-42103
- Exact solution for eigenfrequencies of cylindrical microwave cavity partially filled with magnetized plasma 24 p4240 A66-42303
- Coupled electromagnetic and electroacoustic wave equations for propagation in stratified compressible magnetoplasmas 24 p4171 A66-42379
- Adiabatic equation of state for homogeneous compressible anisotropic plasma wave equation invalid for inhomogeneous case 24 p4243 A66-42639
- ## WAVE EXCITATION
- Magnetosonic wave emission from AC ring current and acoustic monopole passage through magnetoactive plasma 02 p0268 A66-11770
- Laser excitation in quartz of elastic modes of thick plate, suggesting energy coupling mechanisms 03 p0376 A66-12423
- Helical wave excitation in weakly ionized cylindrical plasma discussing experimental techniques, apparatus and results 04 p0552 A66-13986
- Frequency oscillation role as drift waves excited during interaction of electron beams with plasma, made impossible by ion transverse motion 05 p0722 A66-14723
- Effective excitation of radial cylindrical surface waves using Green function for excitation of impedance cylinder resting on impedance plane 06 p0823 A66-15882
- Traveling wave excitation in circular waveguide by four radial resonant slots useful in plasma particle acceleration 06 p0838 A66-15897
- Growth and excitation of surface waves on capillary liquid jet stressed by electric field 07 p1087 A66-17946
- Strong collisionless shock wave excitation in deuterium plasma 08 p1266 A66-19479
- Magnetoacoustic wave excitation and detection in rotating plasma accelerator, noting resonance and wave transition [AIAA PAPER 66-172] 10 p1560 A66-21426
- LF plasma oscillations in constant external static electrical and magnetic fields 10 p1570 A66-22002
- Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 10 p1587 A66-22156
- LF waves induced by superimposed electric and magnetic fields in semiconductor plasma 12 p1927 A66-23781
- Excitation of LF ionic plasma oscillations by HF electronic Langmuir waves 12 p1921 A66-24205
- Charged particle excitation of weakly damped MHD waves in metal placed in magnetic field 12 p1825 A66-25021
- Detection and analysis of oscillations excited in electron beam and plasma as result of interaction, noting frequency spectrum, phase velocities, etc 13 p2146 A66-25745
- Excitation of azimuthal wave number equals 2 mode by helical instability for helium plasma 13 p2156 A66-26686
- Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 14 p2341 A66-27154
- Excitation of Alfvén waves in semimetal plasma at low temperature, noting wave propagation below plasma or cyclotron frequency in magnetic field 14 p2363 A66-27516
- Yagi-Uda antenna array discussing wave theory of semiinfinite and finite arrays, excitation by reflected wave proportional to incident wave and King-Sandler theory 14 p2255 A66-27907
- Electric field in hot plasma waveguide with infinite magnetostatic field due to harmonically varying slot and double-grid excitation 15 p2549 A66-28712
- Excitation of ion-acoustic waves in potassium-cesium plasma when passing current through it, finding natural frequencies of system when plasma is drifting along axis 15 p2550 A66-29214
- Optical pumping mechanism for anomalous excitation of OH microwave emissions from H II regions 16 p2807 A66-31756
- Excitation of electroacoustic lateral waves in compressible plasma in contact with conducting boundaries 17 p2962 A66-31817
- Electromagnetic wave interaction with uniform isotropic plasma in cylindrical interface considered for various types of excitations, using Green functions 17 p2962 A66-31821
- Longitudinal wave excitation in modulated electron beam interacting with plasma 17 p2963 A66-31830
- Excitation of dipole wave in circular small delay dielectric waveguide by sources with amplitudes and phases variously distributed over apertures 17 p2879 A66-31857
- Electromagnetic excitation by vertical magnetic dipole located above spiral anisotropic plane 17 p2897 A66-33518
- Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc 19 p3302 A66-35724
- Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 19 p3440 A66-35770
- LF plasma oscillations in constant external static electrical and magnetic fields 19 p3407 A66-36086
- Distorted wave calculation from rotational excitation of molecular hydrogen and molecular deuterium in thermal collisions with atomic hydrogen, presenting angular distributions, cross sections, etc 19 p3403 A66-36329
- Electromagnetic field analysis, determining dispersion relationship of array of identical fibers, assuming surface wave modes of each fiber are excited 19 p3305 A66-36418
- Excitation of magnetoelastic waves at 200 to 3000 mc at room temperature in yttrium garnet single crystals obtained by gradual crystallization from yttrium and ferric oxides 20 p3617 A66-37479
- Doppler effect on emission spectrum and energy of moving oscillator and intensity of surface wave excited by 20 p3519 A66-37995
- Electromagnetic wave emission excited by electron stream over diffraction grating lying on boundary of semiinfinite anisotropic dielectric 20 p3519 A66-37998
- Electromagnetic wave excitation in magnetoplasma by external currents using kinetic theory, obtaining expression for energy losses, analyzing electron and ion cyclotron resonance 21 p3782 A66-39016
- Electromagnetic wave propagation, excitation and dispersion in metals in magnetic field 21 p3792 A66-39300
- Excitation of LF ionic plasma oscillations by HF electronic Langmuir waves 22 p3956 A66-40569
- Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 24 p4245 A66-42974
- ## WAVE FRONT
- ### SA SHOCK FRONT
- Wavefront shearing prism interferometer applied to testing of chromatic aberration of simple and compound lenses and waveforms characterizing monochromatic aberrations 14 p2291 A66-27319
- Propagation of ionizing fronts across magnetic field, examining flow behind and ahead of front 14 p2347 A66-28305
- MHD first-order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium 16 p2764 A66-31363
- Shock wavefront structure in plasma, noting use of SHF diagnostics, electron concentration growth, etc 18 p3104 A66-35063
- Finite grain size of photographic film effect on holography for cylindrical wavefronts 21 p3740 A66-39393
- Deformation of surface of removable wave front discontinuity in acoustically anisotropic medium with variable sound velocity 23 p4090 A66-41415
- Electromagnetic structure of radioelectric whistlers, considering wavefront curvature in D layer, noting signal reception at two distant ground stations 24 p4176 A66-43001
- ## WAVE FRONT DEFORMATION
- Relationship between phase-structure function and statistics governing geometric shape of randomly distorted wave front 03 p0391 A66-12302
- Wave front shearing interferometer applied to chromatic and monochromatic aberration testing 06 p0878 A66-16117
- Magnetoacoustic wave in rarefied plasma, examining nonstationarity of motion, wave front behavior, wave energy absorption and magnetic field profile 06 p0921 A66-17056
- Average transfer function from statistics of wave-front distortions in light propagating through atmosphere 08 p1256 A66-19705
- Frequency of arising stationary finite-amplitude waves in ferrites depends on properties of medium, angle between magnetic field and propagation direction and wave amplitude 16 p2784 A66-31548
- Third-order spherical wavefront deformation due to refraction by spherical surface, optical path difference calculation and design of null tests 19 p3354 A66-35391
- ## WAVE FRONT RECONSTRUCTION
- Linear filtering concepts in imaging and optical data processing systems, including three-dimensional photography obtained by wave front reconstruction 02 p0240 A66-11453
- Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration, etc 02 p0240 A66-11454
- Mode-controlled giant pulse laser used to produce two-beam hologram in short exposure time of 30 nsec 02 p0233 A66-12215
- Gabor wavefront reconstruction process applied to three-dimensional facsimile system 03 p0367 A66-12309
- Progress in wavefront reconstruction imaging, using laser and X-ray 05 p0677 A66-14833
- Reconstruction of phase objects by holographic imaging as three-dimensional lensless photography 07 p1032 A66-17461
- Holographic study of time average of coherent wavefronts scattered from vibrating object 07 p1144 A66-18034
- Holograms and wavefront reconstruction techniques involving prismatic refraction of monochromatic and coherent laser light causing interference pattern on photographic emulsion 13 p2076 A66-25144
- Lens aberration correction using Gabor wavefront reconstruction method to produce hologram of spherically aberrated wavefront emerging from lens 13 p2080 A66-25990
- Surface-deformation measurement using wave front reconstruction with interferometry of diffusely reflecting bodies 13 p2080 A66-25991
- Hologram construction and sources of image degradation including random vibrations, film transfer characteristics, etc 16 p2707 A66-31243
- Color hologram for white light reconstruction constructed from three-dimensional diffusely reflecting objects 18 p3109 A66-33611
- Coherent optical reconstruction from microwave holograms in two-step Gabor image-formation technique 18 p3111 A66-33999
- Holography principles and development, considering wave front reconstruction, Lippmann photography, laser light, application to TV, etc 18 p3115 A66-35244
- Analytical and geometric relationships

between hologram scene and reconstructed images 20 p3556 A66-36934

Reconstruction of hologram in nonmonochromatic light as constituting incoherent addition of images reconstructed from hologram area elements 24 p4215 A66-43053

WAVE FUNCTION

SA BETHE-SALPETER EQUATION

Second order energy correction calculated by Hylleraas variation principle with approximate zero order function, shows no relationship to true value 01 p0108 A66-10310

Iterative procedure for constructing and evaluation functions consisting of integrals of products of radial atomic wave functions 01 p0108 A66-10385

Radiation characteristics of point charge moving along direction of external magnetostatic field in warm anisotropic plasma 01 p0111 A66-10509

Positron scattering by atomic hydrogen for various incident energies 02 p0262 A66-11476

Quantum-mechanical properties derived for isolated donor atom located on surface of dielectric crystal, noting hydrogenic wave function with planar nodes 02 p0271 A66-11484

Phonon-assisted tunneling current for model p-n junction obtaining wave function, interband operator and matrix element 02 p0272 A66-11485

Electronic structure of molecules based on wave function called self-consistent field biorbital wave function 03 p0394 A66-12334

Vibration modes of gaseous medium in parabolical cavity investigated for development of liquid rocket motor 03 p0356 A66-12823

Wave function, polarization and decay of negative ion atoms in electric field 03 p0395 A66-12833

Guillemin-Zener energy of ionized hydrogen molecule 04 p0546 A66-13455

Partial wave calculation of diatomic divalent molecular /HeH/ ion 04 p0547 A66-13643

Resonances below inelastic threshold of electron hydrogen scattering using Feshbach projection-operator technique, converting to eigenvalue problem for projected Hamiltonian 04 p0547 A66-13711

Extension of minimum variational principle applied to time-dependent perturbational problems instead of original stationarity principle 06 p0820 A66-16122

Approximation of exchange operator for system of electrons, examining Slater equation for calculating atomic wave functions 06 p0910 A66-16129

Alternant molecular orbital /AMO/ method compared to nonpaired spatial orbiting /NPSO/ method 06 p0910 A66-16164

Approximate natural orbitals for four electron wavefunctions for Be and LiH obtained by diagonalization of appropriate first order reduced density matrices 06 p0910 A66-16165

Corrections to effective mass theory of shallow impurity states in germanium, using perturbation theory and wave functions 08 p1269 A66-19007

Wave functions and Franck-Condon factors for transitions in molecular nitrogen obtained by Numerov integration of Schroedinger equation 09 p1404 A66-20411

Multiband quasi-classical wave functions of semiconductors in presence of constant external magnetic field 09 p1427 A66-20536

Boundary condition constraint method for generalizing R-matrix theory, permitting use of shell model as basis for nuclear-reaction calculations 09 p1405 A66-20822

Energy minimization for trial wave function constrained to give expectation value of operator 11 p1738 A66-22883

New force theorem for determining molecular energy derivatives with respect to internuclear distance derived from Hellmann-Feynman expression 11 p1741 A66-23217

First order wave function of helium due to one-and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23405

Low energy atomic collisions, considering Schroedinger equation for proton

interchange 13 p2130 A66-25380

Bandlimited and approximately bandlimited signals by Fourier transforms of sampling function and prolate spheroidal wave function representing solutions of second order self-adjoint differential equations 13 p2120 A66-26077

Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 13 p2026 A66-26249

Asymptotic form of wave function and threshold behavior of cross section for ionization of atomic hydrogen by electron impact 15 p2544 A66-29116

Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112

Angular dependence of spin-lattice relaxation times in ruby evaluated, using second order perturbation wave function and field coupling representation 16 p2781 A66-31220

Quantum mechanical distribution of modes of open resonator by wave functions of continuous spectrum 17 p2885 A66-32245

Molecular orbital method for boron hydrides from self-consistent field, analyzing dipole moments, ionization potentials, molecular charge distributions, wave functions, etc 17 p2870 A66-32851

Gravitational theory based on solar observations, noting connection between gravitational eigenvalues, planetary orbit spacing and connection with cylindrical wave functions 18 p3104 A66-33757

Perturbation-like theory for case when available starting wave function is not eigenfunction of unperturbed Hamiltonian 18 p3135 A66-34511

Wave function, polarization and decay of negative ion atoms in electric field 19 p3404 A66-36775

Generalization of Sternheimer potential to include wave functions involving spin in nonfactorable way, exhibiting approximate Hamiltonian 19 p3405 A66-36803

Electron excitation of high eigenstates of hydrogen atom and convergence of total wave function expansion 21 p3774 A66-38532

Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 22 p3947 A66-39708

Energy and wave functions of singly charged donor impurity centers in silicon and germanium 22 p3959 A66-39772

Conditions under which optimal wave functions satisfy various time-dependent Hellmann-Feynman theorems 22 p3947 A66-39923

Behavior of wave function for system of charged particles near coalescence of any two of them, noting electron-nucleus cusp conditions for diatomic molecules 22 p3861 A66-40904

Perturbation theory-variational calculus analysis of optical rotatory power of molecules based on wavefunction badness 22 p3951 A66-40907

Free-atomic pseudopotentials, sizes, s-p splittings and pseudowave functions 22 p3951 A66-40910

Three-dimensional Hueckel molecular orbital calculations performed on series of molecules made from atoms of H, C, N, O, F and Cl 23 p4031 A66-41223

Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Born approximation 23 p4098 A66-41360

Singular solutions for Chaplygin equations using generalized wave functions, noting iteration method for finding wave equation corresponding to first terms of expansion series 23 p4085 A66-41561

Feynman integral for classical waves evaluated, using Hamiltonian approach to summation 23 p4086 A66-41867

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si 24 p4255 A66-42496

Matrix elements of Coulomb potential between Schechter functions and overlap integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42497

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42498

WAVE GENERATION

SA SHOCK WAVE GENERATOR

Crystalline semiconducting materials for detection, modulation and generation of optical and submillimeter wave radiation 02 p0272 A66-11697

Plasma wave generation by transverse wave beam, noting wave interaction effects and instability 02 p0268 A66-11768

Spin wave generation in nonuniform magnetic fields with application to magnetic delay lines 03 p0332 A66-12417

Spherical and cylindrical implosive waves and system of generating detonation wave that converges to given focus 03 p0445 A66-13131

Microwave tube technology noting klystrons, crossed field devices, traveling wave tubes, etc 05 p0642 A66-14560

Parametric generation and amplification of magnetoelastic waves in single-crystal yttrium iron garnet cylinder at L-band at room temperature 06 p0851 A66-16457

Stabilizing effect of surface active agents on wave formation in contaminated falling liquid film 07 p1023 A66-18125

High cut-off frequency epitaxial gallium arsenide varactors generating continuous wave power when biased in avalanche region, showing dimensions, resistivities, etc 10 p1516 A66-22103

Internal wave ripples from fluid impacts on base of stably stratified fluid region, calculating particular case of single ripple in viscous fluid 11 p1693 A66-23009

Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 13 p2159 A66-25085

Nonlinear generation of combination frequencies due to strong uniform parallel electric fields in homogeneous plasma 18 p3142 A66-33918

Stability of Earth radiation belts, considering wave absorption in ionosphere, noting role of proton fluxes, Alfvén wave generation, etc 18 p3197 A66-34877

Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 21 p3795 A66-38510

Transient response characteristics of bonded strain gauges obtained by measuring elastic step wave produced in steel bar 22 p3919 A66-40436

Kinetics of nonuniform generation of longitudinal plasma waves by transverse wave beam with narrow spectrum, noting effect of magnetic field 22 p3958 A66-40931

Allowed bands for wave generation by nonlinear effects in plasma with varying electron density 24 p4245 A66-43005

WAVE INCIDENCE CONTROL

Linear approximation of plane problem of shock wave incident on rigid obstacle, taking into account wave effects and diffraction 01 p0058 A66-10461

Wave synchronization in gas laser with ring resonator cavity 21 p3748 A66-39301

WAVE INTERACTION

SA SHOCK WAVE INTERACTION

Nonlinear effect of modulation by propagating wave in arc discharge 01 p0110 A66-10349

Simple wave interaction in polytropic rarefied gases flowing from parallel wall channel 01 p0006 A66-10473

Nonlinear interaction between transverse gyro wave and longitudinal temperature dependent wave propagating in magnetized plasma 01 p0028 A66-10563

Cyclotron waves, space charge waves and LF plasma waves and interactions in plasma waveguide, using neon or argon 01 p0029 A66-10574

Coherent nonlinear interaction of two electromagnetic waves in plasma, noting F layer radio communication 01 p0029 A66-10594

Probability equations for scattering and decay of normal waves in nonlinear

interaction with plasma electrons and ions 01 p0114 A66-10720

Traveling wave interaction in dense plasma, discussing harmonic response, transients and wave growth, damping factors and Hall effect 05 p0720 A66-14708

Intrinsic and mutual radiation conductances from slots on wedge, using Markov form of Green function for calculation 06 p0823 A66-15896

Beat signal dependence on angular spread of oscillations in light waves heterodyning with incoherent light source 06 p0889 A66-15898

Lens primary aberration evaluation using Twyman interferometer, developing exact equations for high-order lens defects 06 p0879 A66-16118

Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 06 p0914 A66-16145

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 06 p0837 A66-17190

Lagrangian formulation of wave kinetics in weakly turbulent plasma, taking into account interaction of plasma oscillations 07 p1085 A66-17647

Hypersonic wave properties, examining nature of interaction with phonons, photons, electrons and spin waves 07 p1098 A66-17823

Flame generation of pressure waves and wave-combustion front interactions in detonation processes treated by nonsteady gas dynamics 07 p1155 A66-18118

Nonlinear interaction between ordinary and extraordinary wave modes for collisionless cold magnetoplasma 07 p1090 A66-18203

Optical nonlinearities of plasma, including second-harmonic generation and stimulated Raman effects 07 p1091 A66-18433

Elastic wave propagation in helical springs of small helix angle, including effect of coupling between extension and rotation for large helix angle 08 p1311 A66-19293

Variation with time of spectrum function of spatially homogeneous dispersive wave due to weak nonlinear interaction between waves 08 p1211 A66-19800

Wave interaction underlying diocotron effect and model of instability presentation, analyzing cylindrical wall-enclosed charge layers for application to plasmas and gas discharges 13 p2136 A66-25041

Traveling wave interaction in nonlinear medium Lorentz transformation 13 p2163 A66-25434

Nonlinear interaction of electromagnetic waves in plasma, noting propagation of total and diffused wave 13 p2141 A66-25458

Collisionless nonlinear coupling of electromagnetic waves near electron gyrofrequency by plasma electrons 13 p2145 A66-25734

Longitudinal wave histories in liquid rocket motor 14 p2374 A66-27450

Nonlinear interaction between two modulated electromagnetic waves propagating in homogeneous anisotropic Lorentz plasma 14 p2344 A66-27941

Head-on collision between two pressure jumps in two-layer atmospheric 14 p2289 A66-28335

Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field, determining Fermi levels 15 p2559 A66-28621

Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 15 p2556 A66-29875

Book on nonlinear electron-wave interaction phenomena and application to amplifiers, oscillators and other crossed electric and magnetic field devices 16 p2653 A66-30873

Initial value problem for small amplitude wave perturbations solved on zonal atmospheric flow with constant vertical shear and vanishing temperature lapse rate 16 p2699 A66-31638

Plasma turbulence in terms of nonlinear wave interactions, discussing heating, diffusion in magnetic field and drift instability 16 p2767 A66-31741

Transverse wave propagation through

bounded plasma in which strong plasma waves or ion acoustic waves are excited 17 p2965 A66-32323

Wave coupling and generation of gyromagnetic half-frequency harmonics in double electron-beam system 18 p3142 A66-33911

Traveling waves interaction in gas laser, explaining forcing-of-oscillations and traveling wave suppression effect 18 p3119 A66-34685

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 19 p3297 A66-35548

Weak turbulence model incorporating three types of interacting waves having dispersion laws to permit transition to diffusional approximation in K-space 19 p3340 A66-35735

Nonlinear plasma wave interaction, discussing Langmuir wave scattering on particles and energy transformation 19 p3418 A66-36532

Plasmon decay-type interactions in plasma with intensive transverse Langmuir waves, analyzing induced scattering 20 p3512 A66-37136

Interaction of decaying waves in magnetoelectric plasma when wave vectors are oriented along magnetic field 20 p3512 A66-37138

Wave energy and impulse dependence on interacting waves magnitude in finite plasma 20 p3609 A66-37569

Probability equations for scattering and decay of normal waves in nonlinear interaction with plasma electrons and ions 20 p3609 A66-37658

Magnetic field, microscopic particle distribution function, plasma instabilities and wave-particle interactions of solar wind 20 p3632 A66-38061

Magnetospheric plasma instabilities, discussing resistive, flute type, whistler and HF two-energy component electrostatic loss-cone instability 20 p3642 A66-38333

Instability of wave of given frequency in plasma creates waves of different frequency, velocity and oscillations and leads to energy transfer between waves 21 p3784 A66-39027

Birefringence of certain crystals sufficiently large to allow collinear backward wave interaction of three electromagnetic waves with signal frequency tunable over large portion of IR spectrum 21 p3771 A66-39113

Spectral analysis of interacting electromagnetic, plasma and spin waves in antiferromagnetic semiconductors and metals with easy-axis and plane type anisotropy 21 p3804 A66-39311

Monochromatic wave interaction with isotropic electron-plasma, determining field and surface wave generated on basis of Maxwell equations 22 p3870 A66-40948

EHD traveling potential wave interaction inducing electroconvection in slightly conducting current without electrical contact with flow 23 p4104 A66-41496

Linearly and circularly polarized fields in laser amplifier interaction with axial magnetic field, emphasizing combination tone production 23 p4079 A66-41624

Ionospheric cross modulation analysis by computer-oriented simulation process, noting D region electron density and collision frequency profiles 23 p4041 A66-41641

Scattering of circularly polarized electromagnetic wave in Coulomb field, noting coalescence of two-wave quanta into one quantum of double frequency 24 p4220 A66-42529

Radiation interaction between laser oscillators with different active materials and frequencies 24 p4221 A66-42549

WAVE MOTION

Waves on surface of moving viscous fluid of infinite depth 01 p0055 A66-10172

Nonisentropic simple waves in two-dimensional steady flow of ideal gas 08 p1210 A66-19585

Axiallysymmetric wave motion in thin walled elastic spherical shell under normal load uniformly distributed over small segment 08 p1315 A66-19763

Aerial observation of sea surface, measuring wind direction, speed, wave direction and period of Gulf Stream along

coast 10 p1532 A66-21524

Nonisothermal wave motion in nondegenerate semiconductors with charge carrier possessing scalar effective mass 10 p1586 A66-22091

Theoretical existence of optimum pitch giving maximum net gain for traveling wave masers, using slow wave structures 14 p2309 A66-27958

Concentration waves excited by internal modulation of charged particle concentrations in cross section of plasma flow analyzed for various velocities of flow 15 p2550 A66-29212

Long finite amplitude wave motions and interactions in inviscid fluid flows 15 p2478 A66-29242

Angular wind wave spectrum of deep ocean and variations in coastal zone, noting data on energy distribution of spectrum 21 p3760 A66-39362

Wave motions of liquid extended to case where derivative functions describing free surface are present in boundary conditions of problem 23 p4057 A66-41833

WAVE NUMBER

S WAVELENGTH

WAVE OSCILLATOR

Multicircular sector slow wave structure in millimeter wave range as modified structure of circular symmetrical circuit, noting dispersion characteristics 03 p0339 A66-12452

Oscillation spectral density of SHF oscillators measured, using frequency phase self-tuning system to eliminate LF component of phase fluctuations 09 p1352 A66-20355

Monograph on microwave frequency space-charge waves in electron beams including electron-wave oscillators, resonators and magnetrons 12 p1813 A66-23740

WAVE PROPAGATION

SA SHOCK WAVE PROPAGATION

Flexural waves propagating over plate with thin obstacles exerting both head-on and moment impedance 01 p0152 A66-10418

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 01 p0057 A66-10421

Dispersion characteristics of perpendicularly-propagating cyclotron harmonic wave modes in plasma 01 p0025 A66-10518

Tonks-Dattner resonances of plasma column irradiated by RF electric field due to plasma acoustic wave propagation 01 p0025 A66-10536

Slow wave propagation along plasma column imbedded in dielectric medium 01 p0026 A66-10542

Propagation of longitudinal oscillations in plasma with thermal velocity spread 01 p0029 A66-10576

Matrix calculus and wave propagation in mechanical system, noting concepts of parameters and impedances [SAE PAPER 650822] 01 p0107 A66-10823

Structure of shock wave propagating through plasma perpendicular to initial magnetic field 02 p0269 A66-11799

Eigenvalue problem definition of acceleration wave propagation in viscoelasticity theory 02 p0219 A66-12154

Optical scintillation frequency noting propagation of electromagnetic and acoustic waves in turbulent atmosphere 02 p0262 A66-12207

Shock waves in elasticity discussing upstream, downstream and Lagrange coordinate-related configurations, propagation conditions in isotropic medium and developing equations for arbitrary shock amplitudes 03 p0392 A66-12535

Velocity field and wave propagation in hydrogen convective zone of Sun 03 p0425 A66-12846

Wave propagation in photosphere, chromosphere and corona noting hydromagnetic waves and waves in convective zone 03 p0425 A66-12847

Coupled-mode equations for wave propagation through magnetized ferrite rod with variable cross section, noting Faraday rotation 03 p0410 A66-12935

Wave propagation in random plasma stressing energy transfer between wave modes 03 p0404 A66-12982

Plasma waves propagating transverse to

uniform external magnetic field discussing electron motion, wavelength magnitude, frequencies and application of results 03 p0406 A66-13358

Stress wave propagation theory for long bars and stepped shafts under impact loads 04 p0525 A66-13408

Bifurcation of nonevolutionary shock wave propagating parallel to magnetic field 04 p0509 A66-13571

Mode guiding and gain in junction laser due to dielectric sandwich confining wave propagation 04 p0530 A66-13952

Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045

Wave propagation in elastic-viscoplastic semispace generated by thermal shock 04 p0511 A66-14205

Plane plasma wave expansion in anisotropic and inhomogeneous medium composed of multiple plasma component 05 p0719 A66-14502

Wave propagation in groove waveguide analyzed by conformal mapping 05 p0641 A66-14557

Small amplitude wave propagation in hot ionized gases, noting magnetic field presence 05 p0721 A66-14716

Distortion of electromagnetic pulse after propagating through dispersive channel, using approximate procedures and obtaining transient response 05 p0631 A66-14834

Wave propagation for LF radio waves analogous to geometrical optics with path integral describing effects of Earth conductivity, curvature and reflection height 05 p0632 A66-14841

Wave propagation theory for nonlinear dispersive systems when proportional change in amplitude or wave number over distance of one wavelength is very small 05 p0716 A66-15054

Propagation mode of plane waves in isotropic plastic solids, deriving tensor equations with numerical solutions 05 p0774 A66-15055

Third harmonic component of current density in plasma in presence of electric and magnetic fields, analyzing generation and propagation of third harmonic of electromagnetic wave in magnetoplasma 05 p0724 A66-15188

Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating wave shape [ASME PAPER 65-WA/APM-10]

05 p0776 A66-15432
Wave propagation in elastic-plastic half-space subject to von Mises yield condition, due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11]

05 p0777 A66-15433
Waves in bars of mechanically unstable materials discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22]

05 p0778 A66-15444
In-flight measurement, describing human pulse wave velocity detection system principles, design and application [ISA PREPRINT 1.2-4-65] 05 p0638 A66-15509

Acoustic fluctuations from transmission through water whose refractive index varies randomly in space and time related to range from source to receiver, acoustic frequency and scattering medium parameters 05 p0717 A66-15737

Propagation conditions for nonsymmetric parasitic waves and filtering properties in helical waveguide with dielectric coating and metallic casing 06 p0838 A66-15887

Solution to two equations for wave propagation in periodic media expressed as solution to Hill equation 06 p0848 A66-16106

Space-charge wave propagation on nonuniform drifting electron beam explained, using coupled mode theory 06 p0855 A66-16767

Amplitude and phase fluctuations of plane monochromatic light wave propagating in turbulent medium 06 p0910 A66-16777

Hybrid wave propagation in circular waveguide partly filled with dielectric, noting case where phase velocity equals

light velocity 06 p0835 A66-16882
Asymptotic solutions of problems in wave propagation, examining electromagnetic field equations, hyperbolic equations, radiation from sources, etc 06 p0835 A66-16900

Propagation of combustion wave, consisting of flame front and shock wave passing down tube closed at one end, in presence of magnetic field in undisturbed gas at rest 06 p0874 A66-17002

Boundary conditions producing simple waves in Green-elastic and Cauchy-elastic materials that generate three-dimensional unsteady deformations 06 p0874 A66-17010

Cyclotron harmonic amplification of wave propagation in electron beams and plasmas with internal motions in presence of static magnetic field 06 p0920 A66-17013

Distributed-parameter systems in terms of matrices whose elements are functions of coupling parameters between modes and phase constants of modes 07 p1144 A66-18042

Three-dimensional Cauchy-Poisson problem for waves in viscous fluid 07 p1026 A66-18196

Chronological account of direct observation of Alfvén waves and helicons in solids, noting propagation through metals and cyclotron absorption 07 p1101 A66-18199

Wave propagation in Q band of n-type indium antimonide at low temperature as function of longitudinal magnetic field, noting helicon waves 07 p1101 A66-18200

Nonlinearities in helicon wave propagation through InSb cooled by liquid nitrogen 07 p1102 A66-18202

Helicon wave propagation in metals, discussing experimental techniques and results 07 p1102 A66-18208

Pressure wave propagation velocity in horizontal liquid-filled flexible tubes 07 p1146 A66-18277

Pulse propagation in anisotropic randomly inhomogeneous media 07 p1082 A66-18394

Text on wavefronts and wave propagation in classical electromagnetic theory, general relativity, MHD and nonlinear electrodynamics 08 p1180 A66-18680

Asymptotic solution of problem of thin spherical shell free vibration for axisymmetric and general cases 08 p1308 A66-18888

Propagation of spherical waves produced by thermal shock acting on boundary of spherical cavity in infinite elastoviscoplastic body 08 p1309 A66-19115

Exact frequency solution for steady state wave propagation for plane strain vibrations of composite hollow cylinders 08 p1310 A66-19162

Surface wave propagation in magnetoactive plasma along plasma-vacuum boundary, plasma layer and plasma cylinder 08 p1263 A66-19173

Light pulse absorption in gas and measurement of temperatures attained noting hydrodynamic, breakdown and radiative transfer mechanisms and wave velocities 08 p1319 A66-19276

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma 08 p1265 A66-19467

Wave propagation equations in inhomogeneous warm plasma, emphasizing separation into quasi-electromagnetic and dynamic components 08 p1266 A66-19736

Wave propagation in magnetoplasmas noting momentum transfer, dispersion relations, temperature relaxation effects and collisional energy exchange 09 p1408 A66-20372

Method of demodulating frequency-modulated wave train compared to method for time-modulated wave train 09 p1344 A66-20400

Stability of expanding corona against radial compressional waves 09 p1455 A66-20403

Magnetic permeability effect on magnetoelastic plane wave propagation 09 p1403 A66-20579

Weak latitudinal waves observed by Orlov method at three midlatitude stations from 1924 to 1930 10 p1530 A66-21260

Experiments on jets formed from imploding bubbles, indicating that Munro jets are formed when hemispherical cavities on liquid surface collapse by shock wave traveling from below 10 p1607 A66-21293

Boundary value problem for wave propagation on cylindrical anisotropic dielectric rod solved for hybrid modes 10 p1496 A66-21307

Alfvén wave generation and propagation in low pressure arc discharges of helium, argon, nitrogen and air [AIAA PAPER 66-171] 10 p1560 A66-21425

Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating wave shape [ASME PAPER 65-WA/APM-10] 10 p1615 A66-21476

Wave propagation in quartz to determine third order elastic coefficients 10 p1577 A66-21557

Axial magnetic field effect on resonance of surface waves propagating along cylindrical plasma column 10 p1497 A66-21559

Growth and propagation of infinitesimal space charge waves under differential negative resistance and inhibition of dipole waves and domains in gallium arsenide, estimating thermoelectric effects 10 p1584 A66-22069

Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Flexural waves propagating over plate with thin obstacles exerting both head-on and moment impedance 11 p1780 A66-22602

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 11 p1736 A66-22606

Single scattering model for diffusion and propagation of waves in random media 11 p1654 A66-22635

Initial one-dimensional density discontinuity propagation in terms of mean free time between collisions 11 p1689 A66-22905

VHF fading statistics of wave propagation over horizon for scatter radiation with or without reflection components 11 p1657 A66-23106

Formula for numerical values of propagation rates of flexural harmonic waves of various lengths 11 p1784 A66-23315

Directional fluctuations in light waves propagating from edge of solar disk caused by atmospheric turbulence 12 p1913 A66-23775

Light intensity fluctuations along inclined inhomogeneous path with variable turbulence characteristics in lower atmospheric layer 12 p1913 A66-23776

Propagation of narrow beam of light in turbid medium with strongly extended scattering 12 p1913 A66-23777

Wave propagation in elastic-plastic half-space subject to von Mises yield condition, due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11] 12 p1961 A66-23986

Very low phase velocity wave propagating in one direction in semiconductors in presence of crossed DC electric and magnetic fields 12 p1928 A66-24151

Longitudinal impact between cylindrical rods, considering local deformations and wave propagation in rods, showing solution through dimensionless equation of Sears theory 12 p1968 A66-24242

Extremely rapid propagation deformations in phase envelope of rectangular-type carrier pulse with extended spectrum 13 p2031 A66-25424

Wave propagation during gyroresonance interaction, noting nonlongitudinal characteristics of waves generated in magnetosphere between beams of charged particles 13 p2072 A66-25462

Two-fluid approach for solutions to hydromagnetic waves including pressure, viscosity, heat conduction, etc, using partial differential equations 13 p2146 A66-25741

Wave propagation along magnetic field in collisionless plasma taking charge separation effect into account 13 p2148 A66-26036

Clear air turbulence structure, noting measurement results obtained by Canberra aircraft and TOPCAT project, energy yield of gravitational shearing waves, etc 13 p2122 A66-26127

Intense light pulse propagation in optical

- media, noting polarized nature of transient oscillations, phase and amplitude distortion and two-level composition of medium 13 p2098 A66-26171
- Resistance strain gauge measuring propagating dynamic strains, noting independence of waveform, effect of gauge length, time and amplitude errors, etc 13 p2198 A66-26225
- Exothermal discontinuities propagation in conducting media without restricting magnetic field orientation, noting velocity and energy released, showing that existence of propagation velocities leads to two detonation modes 13 p2149 A66-26260
- Amplification of helicon waves in single-component solid state plasma 13 p2169 A66-26277
- Axisymmetric wave propagation in elastic body-conducting fluid system, noting parameters of motion expressed in PDE 13 p2150 A66-26427
- Stress-strain state and temperature field near circular hole in thermoelastic plate, assuming stresses and strains propagate as waves 13 p2205 A66-26439
- Text on dynamics of vibrations covering oscillations with variable and constant amplitude, damping, differential equations of motion, nonlinear oscillations, wave propagation in elastic solids, etc 13 p2207 A66-26573
- Alfven wave propagation in inhomogeneous magnetic fields satisfying magnetohydrostatic equation and allowing for electric currents: solved, using differential equation 13 p2156 A66-26710
- Cylindrical wave propagation across strong magnetic field in cold rarefied plasma analyzed, using Maxwell equations, for experiments on plasma pinch 14 p2339 A66-26781
- Electro-magnetoplasma-gas-dynamics /EMPGD/ equations for warm compressible electron gas drifting at constant velocity, finding equation for refractive index of plasma waves 14 p2339 A66-26862
- Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 14 p2217 A66-27001
- Electrodynamic boundary conditions at moving boundary, determining fields in interior of semiinfinite fixed channel 14 p2235 A66-27041
- MHD wave propagation along uniform magnetic field in cold plasma solved in terms of Jacobean elliptic functions 14 p2340 A66-27134
- Correctors for variations in group propagation time of AM wave transmitted by radio carrier wave, noting circuit analysis for matched and unmatched all-pass IF filters 14 p2252 A66-27353
- Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-27386
- Orthotropic-elasticity solutions applied to wave propagation in infinite cylindrical shell, obtaining asymptotic solutions for HF range 14 p2400 A66-27662
- Mechanical and optical measurements on plasticized polyvinyl chloride, using photoviscoelastic stress analysis and wave propagation effects 14 p2318 A66-27767
- Sound wave propagation in relativistic MHD 14 p2345 A66-28046
- Elasticity of structural nonhomogeneous centro-symmetric isotropic bodies, deriving constitutive equations and differential equations of equilibrium 14 p2409 A66-28457
- Fokker-Planck equation of wave propagation in medium with regular and random inhomogeneities, determining spatial angular distribution function of ray 14 p2245 A66-28474
- Plane wave propagation statistics in turbulent atmosphere 15 p2448 A66-28582
- Wave propagation in elastic solids with linear stress-strain curve 15 p2607 A66-28651
- Dispersion relations for waves propagating along warm homogeneous isotropic plasma columns immersed in dielectric medium 15 p2549 A66-28713
- Fast auroral waves differ from flaming aurora in which waves of luminosity appear to converge toward magnetic zenith 15 p2484 A66-28820
- Simple wave propagation in MHD system subject to magnetic field 15 p2551 A66-29252
- Extension of work on ground wave propagation along two-section mixed paths to three-section paths, using microwave frequency, water and aluminum plates 15 p2452 A66-29858
- Propagation theory of chaotic movements in connection with propagation of heat 16 p2693 A66-30581
- Mathematical model for analysis of wave propagation in linearized vertically nonuniform partially ionized gas, proceeding from Maxwell and Boltzmann equations 16 p2761 A66-31005
- Single trapping center effect on growth of small amplitude space charge waves and propagation velocity, deriving dispersion relations 16 p2781 A66-31216
- Wentzel-Kramers-Brillouin method for Alfven wave propagation in medium slowly varying with time 16 p2804 A66-31262
- MHD wave propagation emphasizing viscosity, heat and electrical conductivity, Hall current, no nonequilibrium phenomena and effect of medium inhomogeneity 16 p2766 A66-31583
- Vertical propagation of long period small amplitude temperature perturbation in medium with photochemical processes and radiative heat transfer 16 p2742 A66-31642
- Propagation along rays or bicharacteristics for two equations with partial linear derivatives having two unknowns and coefficients which are indefinitely differentiable 17 p2945 A66-32280
- Surface wave propagation along plasma column noting discharge tube properties, density distribution variation with magnetic field, attenuation due to collisional losses, etc 17 p2970 A66-32651
- Propagation of cylindrical shear waves in nonhomogeneous elastic bodies treated by method of characteristics [AIAA PAPER 66-444] 17 p3027 A66-32757
- Wave propagation in rarified plasma under action of Coriolis force, Hall current and self-gravitation, noting LF coupling rotation effects, etc 17 p2973 A66-33000
- Plane and spherical wave propagation in locking-type of materials with viscous-type of stress-strain relationship 17 p3031 A66-33077
- Radar return from perfectly reflecting target in presence of second medium, obtaining first approximation for return and accounting for multiple reflections and dispersion 17 p2876 A66-33104
- Quasi-linear hyperbolic equations governing one-dimensional longitudinal wave propagation in viscoelastic material 17 p3032 A66-33502
- Waves in bars of mechanically unstable materials, discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 18 p3247 A66-33571
- Coupled electromagnetic and electroacoustic wave propagation in inhomogeneous compressible plasma 18 p3069 A66-34089
- Longitudinal wave propagation in plasma waveguide, observing lower and higher modes 18 p3072 A66-34567
- Amplitude and phase fluctuations of plane monochromatic light wave propagating in turbulent medium 19 p3399 A66-35374
- H-type surface wave propagation in rectangular waveguide having wall consisting of transversely magnetized ferrite plate 19 p3313 A66-35456
- Small-amplitude wave propagation in incompletely ionized plasma, based on continuum theory 19 p3406 A66-35465
- Gyroelectric and gyromagnetic rectangular waveguides compared for cases of electrostatic and magnetostatic fields transverse to EM wave propagation direction 19 p3317 A66-35719
- Asymptotic solutions for large time obtained for predominantly mechanical mode of one-dimensional solution of coupled thermoelastic equations 19 p3400 A66-35853
- Growth and propagation of electrostatic waves in medium with arbitrary mobility law, solving motion equations, emphasizing case pertinent to Gunn effect 19 p3447 A66-36399
- Matrix technique used for derivation of reflection and transmission coefficients of bounded plasma slab, noting wave propagation 19 p3305 A66-36419
- Short distance expansion method used to calculate ground radio wave propagation over mixed path on spherical Earth 19 p3305 A66-36421
- Interaction of dense plasma with HF field of magnetic wave traveling along toroidal discharge chamber, noting connection to nonlinear effects 19 p3416 A66-36525
- Plasma electrons heating by UHF fields analyzed in DC magnetic field, varied for HF electromagnetic or plasma wave propagation 19 p3431 A66-36591
- Propagation of spherically symmetric, cylindrically symmetric and plane waves examined via analytic perturbation method in solving gas dynamics equation for nonstationary compressible flow 19 p3343 A66-36638
- Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 19 p3278 A66-36757
- Alfven wave propagation equations used to study electronic properties of semimetals 20 p3615 A66-37282
- Single-wave approximation of fields of cylindrical delay system with basic E-type wave propagating at variable phase velocity 20 p3515 A66-37381
- Electrodynamical properties of homogeneous magnetoactive plasmas including wave propagation, excitation, scattering, etc 20 p3608 A66-37488
- Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555
- Fluid circuit theory, discussing transmission lines, matching, pulse forming and definitions of current and voltage analogies 20 p3500 A66-37643
- Constant impedance antennas, noting applicability for high gain broadband performance 20 p3530 A66-37711
- Large aperture antennas, noting limitations of apertures due to wave propagation characteristics, mechanical problems and optimum gain 20 p3530 A66-37714
- Anomalous wave transformation in plasma, analyzing existence of reflected and forward waves 20 p3611 A66-38106
- Internal atmospheric gravity waves in isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflected energy, etc 20 p3554 A66-38202
- Third moment equation derived from Boltzmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363
- Electromagnetic scattering by obliquely oriented cylinders, noting extinction efficiency, propagation in cylindrical waveguides and polarization reversal 20 p3603 A66-38403
- Riemann representation method in viscoelasticity extended to functional partial differential equations of hyperbolic type 21 p3829 A66-38941
- Nonlinear theory of parametric excitation applied to modulated wide beams of uniform cross section, analyzing propagation in such beams of charge density oscillations 21 p3781 A66-39013
- Externally imposed oscillating electric field excites transverse electromagnetic waves propagating perpendicular to it in cold plasma 21 p3791 A66-39176
- Equivalent width of waveguides by considering wave propagation in direction perpendicular to waveguide axis 21 p3712 A66-39225
- Stepped structure of sunrise fall observed

at various frequency bands of atmospheric activity suggest it is due to wave propagation between Earth and E and D layers 21 p3706 A66-39374

Two-dimensional time-space analysis of Doppler-effect-like phenomena in refraction and reflection of waves propagating through moving boundary between two media 21 p3706 A66-39574

LF wave propagation in inhomogeneous plasma column, deriving normal mode of expansion and perturbed dispersion curves 22 p3955 A66-40047

Longitudinal wave in cylinder of viscoelastic material for case of small frequencies, obtaining propagation equations by using stress-strain relations, compatibility conditions and motion equations 22 p3996 A66-40703

Variation of phase constant and damping constant of SHF wave propagating in waveguide incorporating coaxial plasma-filled dielectric tube 22 p3870 A66-40935

Dispersion characteristics of helicon wave in extrinsic solid state plasmas 23 p4034 A66-41018

Atmospheric turbulence effect on laser beam intensity distribution 23 p4035 A66-41030

Functioning of progressive wave plasma accelerators, discussing role of electromagnetic forces 23 p4100 A66-41177

Random dispersive wave intensity detection and measurement in presence of noise 23 p4037 A66-41499

Electrostatic plasma wave propagation in hot inhomogeneous media, obtaining WKB solution for Vlasov equation 23 p4104 A66-41506

Radiation in relativistically moving anisotropic plasma medium, noting Lorentz type transformation of plasma electron volume density 23 p4105 A66-41638

Nonlinear interaction of electromagnetic waves in magnetoplasma for field-parallel wave propagation 23 p4041 A66-41642

Wave packet propagation at whistler and hydromagnetic frequencies in magnetotonic medium, noting group refractive index 23 p4041 A66-41643

Coupled ODE sets describing continuum wave propagation in discrete structures with and without dispersion or linearity 23 p4096 A66-41939

Short-range weather forecasting based on principles of fluid dynamics 23 p4087 A66-42017

Wave propagation, dispersion and energy transfer in arterial blood flow considered as fluid dynamics, noting finite amplitude effects in circulatory system and flow control mechanism 23 p4062 A66-42058

Rational one-dimensional theory of wave propagation and vibrations in elastic bars with rectangular cross section 24 p4284 A66-42137

Compressive strain rate testing of Al, Ti, pyrolytic graphite, lucite and micarta, noting techniques and results 24 p4227 A66-42138

Wave propagation in thermoplastic media, discussing dynamic behavior, formation of wave fronts, velocity, etc 24 p4284 A66-42139

Parabolic equations applied to nonlinear thermoconductivity and filtration, describing propagation of plane wave 24 p4230 A66-42219

Longitudinal and torsional plastic wave propagation in thin walled tube, governed by four quasi-linear symmetric hyperbolic PDEs of first order with two distinct wave speeds 24 p4288 A66-42277

Radar scattering equations for transmitting and receiving circularly polarized waves in terms of characteristics for linear polarization 24 p4171 A66-42374

Hydromagnetic wave propagation in magnetosphere, using Explorer satellite observations 24 p4198 A66-42434

Optical communication systems, discussing available equipment, transmission characteristic, lack of long distance operation reliability, etc 24 p4174 A66-42805

Electro-magnetoplasma gas dynamics /EMPGD/ equations based on single fluid continuum-theory macroscopic plasma-dynamics theory 24 p4244 A66-42834

Helicon wave propagation in nonuniform cylindrical plasma, explaining discrepancies

between experimental results and theory 24 p4245 A66-43017

Nonlinear wave propagation in MHD, noting resulting shock waves conversion rate of magnetic energy into plasma energy and production of high temperature plasma samples 24 p4246 A66-43114

WAVE RADIATION

SA SHORT WAVE RADIATION

Russian text on diffraction and radiation of waves 08 p1257 A66-19755

Local energy of weak gravitational wave 15 p2537 A66-28676

WAVE REFLECTION

Homogeneous isotropic plasma diagnosis using beam displacement in reflection of electromagnetic wave 02 p0264 A66-11240

Reflectivity of n-type lead sulfide measured as function of wavelength, temperature and carrier density 03 p0412 A66-13147

Free-carrier magneto-Kerr effect analysis considering amplitude ratio of two polarized components of reflected wave and phase difference between these two components 03 p0412 A66-13151

Step wave and pulse wave transmission and reflection at area changes and junctions in pipes 04 p0508 A66-13410

Reflection and transmission of electromagnetic waves by dielectric medium moving parallel to and perpendicular to interface, determining coefficients 04 p0481 A66-13739

Electromagnetic wave reflection from rough surface 04 p0481 A66-13748

Alfvén waves in conducting nondissipative fluid permeated by external localized inhomogeneous magnetic field while in equilibrium 07 p1086 A66-17655

Wave reflection and refraction across density discontinuity in two-fluid fully ionized plasma studied by coupled linearized hydrodynamic equations and Maxwell equations 07 p1088 A66-17948

Reflection of radio waves incident on boundary surfaces, noting application to Kraus effect theory 08 p1182 A66-18753

Rectilinear and smooth multiwave transition 08 p1191 A66-18922

Beam trajectories of electromagnetic waves in ionized toroid and effective reflecting toroidal surface 08 p1214 A66-19046

Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave 08 p1210 A66-19586

Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 09 p1469 A66-20140

Geometrical approximation of amplitude and surface-curvature parameters of wavefront reflected or refracted from curvilinear boundary interface 09 p1343 A66-20336

Blue haze on electropolished silicon surfaces 09 p1432 A66-20977

Wave reflection in density-inhomogeneous atmosphere from plane solid obstacle larger than wavelength 11 p1735 A66-22603

Effect of surface roughness on two-dimensional Mach reflection of moving plane shock waves in air 12 p1863 A66-24096

Inequality of cross-polarized components of electromagnetic wave reflected from plane surface for arbitrary angle and arbitrary reflector properties 12 p1816 A66-24149

Measurement accuracy of antenna test range evaluated for gain, ellipticity, polarization angle, boresight axis and ground reflected energy 12 p1836 A66-24155

Photographic results compared with calculations for shock wave reflection velocity and wake processes in electromagnetic shock tube 12 p1921 A66-24214

Reflection of resonance frequency monochromatic wave from half-space filled with nonlinear medium 12 p1816 A66-24226

Electroexplosive device testing via pulse reflection techniques 12 p1934 A66-24674

Computer method for determination of distribution of low lying ionization, using ordinary and extraordinary wave traces in ionograms 12 p1873 A66-24838

Ground reflection shock, compression and expansion waves caused by supersonic aircraft examined, noting correlation

between wave intensity, incidence and pressure jump 13 p2062 A66-25403

Measuring apparatus to determining amplitude and phase of components of electromagnetic wave transmitted and reflected by given propagation medium 13 p2022 A66-25465

Results of daily recordings of characteristics of some sporadic E layers, noting occurrence of layers as discontinuous succession of two types of structures 13 p2072 A66-25466

Elastic wave diffraction on rigid edge analyzed by employing acoustic analogy 13 p1991 A66-25637

Electromagnetic wave scattering and depolarization from rough surface, noting existence of surface current vector component pointing in direction of incident wave 14 p2235 A66-27038

Stability of two-dimensional panels in supersonic flow when shock wave is reflecting regularly from surface, using static aerodynamic approximation 14 p2398 A66-27417

Reflection, transmission and absorption coefficients of circularly polarized electromagnetic wave incident on plasma layer situated in stationary magnetic field 14 p2348 A66-28471

Multiple reflections in microwave interferometers as cause of higher number density of plasma 15 p2503 A66-29406

Reflection of aperiodically damped H-01 and E-01 waves of tapered waveguide used in Vernier autotracking 15 p2467 A66-29764

Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30333

Reflection and refraction of light waves at boundary of nonlinear dielectric 16 p2655 A66-31556

Integrating sphere for IR noting efficiency parameters construction, application, etc 17 p2958 A66-32626

Maximum beam displacement parallel to plane of incidence in plasma reflection of linear or elliptically polarized waves 17 p2974 A66-33286

Reflection of time-harmonic plane dilatational or shear waves from rigid or stress-free boundary of arbitrary linearly viscoelastic half-space 18 p3136 A66-35025

Wavefronts and construction tolerances for cat-eye retroreflector 19 p3354 A66-35382

Laser application for vibration measurement utilizing Doppler shift produced on wave reflected from surface vibrating normal to beam path 19 p3356 A66-35673

Spatial density distribution in cold electron plasma determined by measuring phase difference between incident and reflected electromagnetic waves 19 p3408 A66-36276

Reflection and transmission of EM waves by dispersive dielectric cold plasma 20 p3611 A66-38394

Ionization and secondary effects during reflection of shock waves in argon 21 p3726 A66-39086

Peculiarities in Mach reflection of shock waves traveling in carbon dioxide gas and nitrogen at velocities of order of 2000 m/sec 21 p3726 A66-39094

Thermal loss measurement at tube end during reflection of shock waves, using platinum thermometers and high speed photography 21 p3727 A66-39096

False reflection of computational mode waves at boundary due to use of finite differences 21 p3759 A66-39207

Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 21 p3836 A66-39412

Electromagnetic wave reflection from moving plasma characterized by conductivity for slow waves, calculating reflection and absorption factors 22 p3952 A66-39649

Bending effect of spectral lines in plasma created by rotating HF dipole in quasi-steady magnetic field 22 p3953 A66-39761

Electron-ion motion effect on electromagnetic wave reflection from plasma 22 p3955 A66-39997

Reflection of waves at discontinuity in refractive index gradient 22 p3866 A66-40453

Photographic results compared with calculations for shock wave reflection velocity and wake processes in electromagnetic shock tube 22 p3957 A66-40578

Reflection of resonance frequency monochromatic wave from half-space filled with nonlinear medium 22 p3867 A66-40588

Particle-in-cell /PIC/ method for approximate solution of propagation and reflection of plane shock waves in dusty gases 23 p4054 A66-41158

Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700

Detonation initiation behind reflected shock waves in hydrogen-oxygen-argon mixtures, noting reaction wave propagation 23 p4057 A66-41889

Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925

Nonlinear reflection of weak shock waves, deriving equations for propagation velocity and velocity vector 23 p4061 A66-42039

Wave front scattering and refraction by laser spark studied by holograms of air plasma formed by giant ruby laser pulse 24 p4219 A66-42131

Electromagnetic wave transmission through and reflection from homogeneous nonlinear anisotropic slab between two linear isotropic media 24 p4173 A66-42706

WAVE RESISTANCE

Hovercraft wavemaking resistance, discussing theory and experimental model 12 p1802 A66-24974

Hovercraft difficulty in accelerating through hump, noting wave resistance increase for pressure differential between two compartments of cushion with transverse stability skirt 22 p3901 A66-40678

Body shapes providing minimum wave resistance to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves 23 p4009 A66-41717

WAVE SCATTERING

SA ATMOSPHERIC SCATTERING

Radiation conditions in terms of motion equations of classical elasticity and field equations show uniqueness of solution to wave scattering problems 01 p0153 A66-10431

Oblique incidence sounding of ionosphere based on short wave scattering by Earth surface at Murmansk 01 p0065 A66-11168

Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 03 p0396 A66-12283

HF approximations for arbitrary body scattering specialized to ellipsoids and applied for source and observation points at distances large compared to scatterer size 03 p0334 A66-12817

Ultrashort wave attenuation and damping on long open tracks, discussing wave scattering and reflection in inhomogeneous atmosphere 04 p0482 A66-14006

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 04 p0483 A66-14048

Radar localization deviations, examining infinitely-long conducting cylindrical obstacles 04 p0488 A66-14413

Scattering of test particle by enhanced electric field fluctuations in plasma containing nonthermal electrons 05 p0721 A66-14713

Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 05 p0727 A66-15455

Scattering resonances on fast-wave structure 06 p0843 A66-16028

Scattering of TM surface wave by metallic strip above dielectric-clad ground plane, developing expression for Green function and formula for reflection coefficient 06 p0845 A66-16091

Thermal conductivity of neutron-irradiated silicon crystal, based on Callaway model 06 p0933 A66-17118

Scattering by small discontinuities in single or multimode waveguides by lowest order approximation 08 p1189 A66-18666

Transformation of transverse oscillations of

electron flux by short magnetic lenses studied by eigenvector concept 08 p1199 A66-18907

Dispersion equations of ring delay circuit formed by bending diaphragmed rectangular waveguide in H plane 08 p1190 A66-18910

High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface 09 p1343 A66-20340

Random deviation statistical analysis of acoustic and electromagnetic waves by comparatively large slope irregularities 09 p1343 A66-20341

Early studies of plane wave scattering by sphere 10 p1497 A66-21587

Digital computer solutions to rigorous linear equations system for current density by enforcing boundary conditions at discrete points in scattering body 10 p1497 A66-21589

Electromagnetic field waveforms produced by transient plane waves scattering from finite objects related to those produced by impulsive plane waves 10 p1498 A66-21599

Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Eigenfunction expansions and scattering theory for free-space wave equation in exterior region 12 p1912 A66-23563

Ultrashort wave attenuation and damping on long open tracks, discussing wave scattering and reflection in inhomogeneous atmosphere 12 p1813 A66-23868

Interferometry methods using scatter plate and plane mirror to test long focus optical systems 13 p2080 A66-25992

Dispersion and absorption of hypersonic waves analyzed by examining Brillouin scattering as function of scattering angle 13 p2133 A66-26167

Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold true 14 p2236 A66-27144

Multiple scattering of energy from inhomogeneous media, comparing discrete point scatterer behavior with bulk scatterer 14 p2240 A66-27915

Theoretical determination of distribution of duty cycle and comparison with experimental observations of signal scattering on meteor trails 14 p2388 A66-28340

Wave scattering from rough surface having elements comparable in height with length of incident wave 14 p2245 A66-28477

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 17 p2873 A66-32214

Solar supercorona wave scattering effect on position and shape of discrete radio source 17 p2999 A66-32235

Improved correlation function in Kirchhoff-Huygen method of solution of scattering of waves from statistically rough surfaces 18 p3068 A66-34015

TE wave scattering by dielectric cylinder of arbitrary cross section shape, including effects of surface wave excitation and mutual interaction 19 p3304 A66-36408

Functional equation applied to wave scattering by infinite grating of elliptic cylinders 19 p3304 A66-36409

Plasmon decay-type interactions in plasma with intensive transverse Langmuir waves, analyzing induced scattering 20 p3512 A66-37136

One-dimensional inverse problem of scattering theory, noting differential equation reduction, determining traveling wave coefficient 20 p3519 A66-37993

Thin dielectric film wave scattering, EM interaction responses and conductivity tensor 20 p3622 A66-38385

Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 21 p3805 A66-39547

Backscattering characteristics of overdense essentially collisionless spherical plasma

explained by surface wave interference 22 p3955 A66-40108

Wave front scattering and refraction by laser spark studied by holograms of air plasma formed by giant ruby laser pulse 24 p4219 A66-42131

WAVE SUPERHEATER

SA ENERGY TRANSFER

SA SHOCK HEATING

MHD power generation by pulsating preheated gas with shock waves, noting thermodynamic cycle composition, efficiency and parameters 13 p2001 A66-26258

WAVEFORM

Effect of nonsinusoidal pump voltage waveform on performance of tunnel diode mixer 06 p0854 A66-16677

Rectilinear and smooth multiwave transition 08 p1191 A66-18922

Optimum filtering of signal of given shape from background of nonstationary random noise 08 p1201 A66-19674

Graphical analysis of recurring and periodic waveforms to determine fundamental frequency and major harmonic components 10 p1549 A66-21232

Electromagnetic field waveforms produced by transient plane waves scattering from finite objects related to those produced by impulsive plane waves 10 p1498 A66-21599

Single shot transient analyzer /waveform synthesizer/ generating sinusoids with real and imaginary parts 12 p1838 A66-24598

Sonic boom shape distortion due to reflection and scattering by ground surface with finite acoustic impedance 17 p2905 A66-31947

Solid state high speed pulse generators utilizing avalanche transistor 17 p2893 A66-32927

Low residue ambiguity function, using incoherently processed pulse train waveforms for application in clutter environment 18 p3070 A66-34260

Device having symmetrical voltage-current characteristics acting as rectifier of pulse or even harmonic distorted waveforms, using Zener diodes 19 p3315 A66-35561

Optimum filtering of signal of given shape from background of nonstationary random noise 20 p3538 A66-37266

Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions evaluation using vectorometer 21 p3739 A66-39275

Radar partial coherence theory for clutter construction relationship to radar cross section, waveform coding, output signal, mutual coherence function and random noise 23 p4037 A66-41312

WAVEGUIDE

SA BEAM WAVEGUIDE

SA MICROWAVE FILTER

SA RECTANGULAR GUIDE

Three-port waveguide circulator design analyzed with X-band, using magnesium manganese ferrite 01 p0038 A66-10524

Eigenvalues, considering losses, of modes propagating by successive reflections in infinite slab of magnetized ferrite 01 p0121 A66-10530

Conventional periodically loaded waveguides with ferrimagnetic materials used in devices involving travelling wave interaction with electron beam 01 p0025 A66-10533

Phase shift in electromagnetic waves between unmagnetized and magnetized ferrite partially filling waveguide 01 p0039 A66-10538

Differential phase shifts in circularly cylindrical waveguides partially filled with circumferentially magnetized ferrite compared with theoretic computation 01 p0027 A66-10553

Uniform ferrite slow wave structure analysis of parameters, discussing three applications 01 p0040 A66-10554

Coherent solutions of propagation equation in circular cylindrical coordinates for various phase velocities 01 p0027 A66-10555

Dispersion curves and field component computations for longitudinally magnetized ferrite slab in rectangular waveguide 01 p0027 A66-10557

EH-type solutions of Maxwell equation for

cylindrical waveguide inhomogeneously loaded with gyroelectric and gyromagnetic substances 01 p0028 A66-10559

Configuration of broadband waveguide Y circulator 01 p0041 A66-10578

Figure of merit characterizing performance of ferrite slabs in two high power microwave waveguide 01 p0042 A66-10586

Four passive power limiters based on waveguide devices employing effect of reradiation by ferrites 01 p0042 A66-10587

Remanent ferrite phase shifter as beam steering elements in phased array radars 01 p0042 A66-10592

Intermediate text on fields and waves in communication electronics covering basic equations, oscillating systems, transmission lines, waveguides, microwave circuits, etc 01 p0031 A66-10977

Dielectric prism in bend of plane wide waveguide, considering geometrical optics and calculation electro-dynamically with power series solution 02 p0196 A66-11411

Relations for interaction between waveguide field and ferrite obtained from reflection and transmission coefficients, using perturbation method 02 p0196 A66-11416

Elliptical waveguide for H-11 modes transmittance, expressed as power transmission along waveguide and square of electric field maximum value 02 p0196 A66-11417

Modes existing in infinite parallel-plate waveguide with centrally placed unidirectional conducting screen 02 p0198 A66-11578

HF discharge in rectangular high vacuum waveguide in crossed magnetic and electric fields, calculating electron energy 02 p0268 A66-11773

Extension of Vladimirskii method for wave propagation in circular iris waveguide to include iris waveguides of rectangular cross section 02 p0199 A66-11787

Microwave propagation through metallic waveguides filled with dielectrics, using field theory, network theory, Rayleigh-Ritz procedure, reaction concept, etc 02 p0206 A66-12009

Sinusoidal step response of L-band waveguide to step-modulated RF excitation 03 p0332 A66-12432

Field analysis of plasma filled disk-loaded waveguide, obtaining TWT interaction impedance 03 p0339 A66-12436

Waveguide X-band tunnel diode mount design 03 p0339 A66-12446

Multicircular sector slow wave structure in millimeter wave range as modified structure of circular symmetrical circuit, noting dispersion characteristics 03 p0339 A66-12452

Coupled-mode equations for wave propagation through magnetized ferrite rod with variable cross section, noting Faraday rotation 03 p0410 A66-12935

Electromagnetic propagation in parallel strips of waveguide filled with two dielectric plates 03 p0343 A66-12936

Conformal mapping analysis of reflections and mode conversions in tilted millimeter circular cylindrical waveguide 03 p0344 A66-13102

Circular waveguides for antenna lead-ins and suitability as line sections and components of communication systems 03 p0345 A66-13237

Transmission modes in grooved guides, calculating cut-off frequency and attenuation 03 p0346 A66-13326

Invalidity of Walkinshaw method for calculating periodically loaded waveguides under certain conditions 04 p0496 A66-13911

Modified split-folded waveguide slow-wave structure for crossed field tubes that permits use of fundamental backward or first forward-wave harmonics over wide bandwidths 04 p0498 A66-14038

Split-folded waveguide slow-wave structure for high power M-type tubes 04 p0498 A66-14039

Propagation characteristics of microwaves through dielectric loaded waveguides and imperfect waveguides filled with imperfect dielectrics 04 p0498 A66-14042

Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 04 p0499 A66-14051

Wave propagation in groove waveguide analyzed by conformal mapping 05 p0641 A66-14557

Waveguide coupling between adjacent parallel fibers as means of transferring radiation from one element to another 05 p0693 A66-14827

Distortion of electromagnetic pulse after propagating through dispersive channel, using approximate procedures and obtaining transient response 05 p0631 A66-14834

Comments on Volland paper about analytical model of Earth-ionosphere waveguide supposedly agreeing with Austin radio transmission formula 05 p0632 A66-14840

Radiation characteristics of isolated circular optical waveguides supporting low-order dielectric waveguide modes for combinations of modes, wavelength, diameter and aperture 05 p0648 A66-14910

Dielectric and metallic rod equivalent circuit, examining resonant frequency change upon placement in waveguide, using perturbation techniques 05 p0649 A66-15120

Oscillation growth of ray about wavy axis of lens light guide noting spectrum of waves, mechanical stiffness of guide and ray amplitude 05 p0634 A66-15181

Decelerating system for high power traveling wave tubes consisting of waveguide of cruciform cross section with inductance diaphragms evenly spaced 06 p0838 A66-15883

Transmission band and critical frequencies calculation for straight waveguides of stepped cross section 06 p0838 A66-15884

Power and energy relations for open and closed uniform and periodic waveguides supporting complex propagation wave 06 p0843 A66-16021

Propagation of electromagnetic pulses in terrestrial waveguides under transient conditions 06 p0826 A66-16023

Minimization of grating lobes in slotted waveguides as array elements by using linearly nonuniform array with equal power division between elements 06 p0827 A66-16034

Organic superconductor and dielectric IR waveguide, resonator and antenna models of insects sensory hairs, spines and pit pegs 06 p0847 A66-16103

Propagation in rectangular and circular cylindrical waveguide containing inhomogeneous dielectric varying linearly and quadratically 06 p0848 A66-16108

Parametric amplifier with coupled coaxial and waveguide resonators as idler circuit 06 p0850 A66-16438

Traveling wave characteristics of Cerenkov interaction studied by circular waveguide with electron beam flow 06 p0850 A66-16441

Photon trapped wave effect for developing optical waveguides in which optical beam creates waveguide as it propagates 06 p0892 A66-16662

Hybrid wave propagation in circular waveguide partly filled with dielectric, noting case where phase velocity equals light velocity 06 p0835 A66-16882

Shielding effect on modulating microwave ferrite switch in applied magnetic field and relation between inside and outside fields for thin waveguide 06 p0857 A66-16952

Azimuthal propagation in nonuniform concentric cylindrical waveguide with application to Earth-ionosphere waveguide 06 p0835 A66-16978

Cylindrical beam plasma system immersed in finite longitudinal magnetic field, deriving dispersion equation for approximate boundary conditions 06 p0921 A66-17161

Angular-frequency sensitivity of antenna arrays and relation to feeder waveguide 06 p0859 A66-17183

Microwave theory and techniques - IEEE G-MTT Symposium, Clearwater, Florida, May 1965 07 p1006 A66-17501

Microwave all-pass circuits consisting of reactive networks used in conjunction with wideband circulators or couplers, noting resultant phase distortion 07 p1006 A66-17502

Wideband polarizer in circular waveguide loaded with dielectric disks 07 p1006 A66-17503

Point-matching method, approximate technique for wave equations of uniform

waveguides with very general cross sections 07 p1007 A66-17510

Difference frequency between harmonics of millimeter wave oscillators at submillimeter wavelength, using crossed waveguide harmonic generator as harmonic mixer 07 p1008 A66-17514

Cut-off frequencies of waveguides with arbitrary cross sections measured and expressed as guide wavelengths at resonant frequencies in cavity 07 p1008 A66-17515

Electromagnetic theory of waveguides including circular and rectangular waveguides, mode theory, etc 08 p1189 A66-18665

Scattering by small discontinuities in single or multimode waveguides by lowest order approximation 08 p1189 A66-18666

Electromagnetic momentum in relation to waveguide modes, discussing relationship between momentum transfer and mechanical forces 08 p1189 A66-18667

Reversible lossless octopoles with various symmetries, describing method for determining eigenvalues of electrical circuit 08 p1192 A66-19104

Waveguide resonators equivalent to series circuit, obtaining expressions for various parameters 08 p1192 A66-19105

Dielectric loaded waveguides, defining surface, transverse and longitudinal impedances in analogy with circuit theory definition 08 p1200 A66-19121

Power flux distribution of symmetrical wave outside and inside antenna septum with anisotropic medium 08 p1193 A66-19189

Coaxial, rectangular and bandpass waveguides containing ferrite and dielectric plates in E plane, obtaining transcendental equations, determining electromagnetic wave propagation 08 p1194 A66-19312

Propagation in anisotropic radially stratified circular waveguides 08 p1198 A66-19749

Thin conducting susceptances in circular TE-11 and TM-01 waveguides measured by cavity-resonance method 08 p1198 A66-19750

Cerenkov radiation in circularly symmetrical waveguide filled with uniform dielectric in presence of flowing modulated electron stream 09 p1351 A66-20258

Design, construction and electrical performance of 20-kw 8.5 to 9.5 gc nonreciprocal latching X-band ferrite phase shifter 09 p1352 A66-20259

Eigenvalues and dispersion equations for magnetic and electric symmetric waves in circular multislot waveguides 09 p1358 A66-20809

Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 10 p1570 A66-21992

Coupling impedance of thin hollow electron beam injected into magnetic field and rippling at cyclotron frequency in cylindrical waveguide carrying E₀₁ mode 11 p1661 A66-22395

Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 11 p1655 A66-22723

Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 11 p1656 A66-22738

Irregular bends and lens displacements effect on wavelength and modes in laser waveguide 11 p1713 A66-23103

Mode nomenclature in general lossy inhomogeneous waveguide made unique by branch points in complex propagation constant 11 p1669 A66-23111

Propagation of MHD emissions in Alfvén mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode transformation 11 p1701 A66-23151

Book on microwave measuring techniques including coaxial lines, waveguides and microwave tubes 11 p1670 A66-23203

Amplitude and phase velocity of electromagnetic waves in 1-30 kc range near Earth surface for plane and spherical Earth-ionosphere waveguide 12 p1817 A66-24278

Design of nonreciprocal latching ferrite devices including single toroid digital

- waveguide phase shifter, cut-off switch, miniaturized slow wave phase shifter, etc 12 p1839 A66-24618
- Terminal properties of Alfvén waveguides, deriving electrical input impedance of set of coaxial excitor electrodes 13 p2137 A66-25046
- Expansion of E type symmetrical oscillations in axisymmetrical delay systems used in calculation of cylindrical resonators 13 p2031 A66-25227
- Plasma acceleration in circular waveguides in presence of high-power electromagnetic wave 13 p2147 A66-25746
- Quantum communication channel entropy and information analysis using noncommutative output and input variables, including waveguide carrying capacity thermal noise calculations 13 p2025 A66-26046
- Complex dielectric constants of lossy liquids measured by transmission measurements in X-band waveguide 13 p2082 A66-26342
- Damping constant of electromagnetic wave in plane parallel waveguide with ferrite resonant isolator, using perturbation theory, considering dielectric and magnetic losses 14 p2250 A66-27143
- Reflection coefficient for arbitrary lossy waveguide with large number of identical periodically positioned inhomogeneities determined by iteration process 14 p2250 A66-27145
- Characteristic admittances of comb-type and undulating waveguide filters, considering diaphragm thickness and TE propagation mode 14 p2250 A66-27147
- Behavior of asymmetric waves in free channel in plasma waveguide models 14 p2341 A66-27152
- Transmission power of dielectric waveguide 14 p2251 A66-27168
- Electromagnetic wave propagation in two waveguides with different cross section connected by long continuous slot 14 p2251 A66-27169
- Waveguide surface and volume inhomogeneities calculated, using Lorentz lemma and energy balance equation 14 p2251 A66-27234
- Transcendental equation derived for approximate calculation of waveguide resonators containing dielectric 14 p2251 A66-27240
- Scattering matrix of slot waveguide calculated, using mirror image method 14 p2252 A66-27250
- Plasma-coated structures for utilization as HF waveguides 14 p2238 A66-27512
- TE surface wave determined by propagation and external magnetic field directions used in microwave circuits 14 p2363 A66-27518
- Voltage-controlled switch using p-i-n diodes loop-coupled to section of WR975 waveguide for use in satellite tracking radar system 14 p2258 A66-27953
- Equivalent circuit for centipede coupled-cavity waveguide represents both passbands and is accurate within few percent 14 p2258 A66-27954
- Thin-iris loaded planar waveguide, considering phase shift and series representation 14 p2241 A66-27962
- Transverse resonance solution of uniform trapezoidal waveguide 14 p2258 A66-27964
- Critical conditions of waveguide with dielectric bushing for case of nonsymmetrical waves 14 p2259 A66-28161
- Plasma diagnostics in terms of response times, noting conversion of phase frequency deviations of probing signal, data recording for plasma in motion and expression for waveguide frequency 14 p2298 A66-28472
- Waveguide system using Chebyshev filters for channel separation in wide frequency ranges, applied for sounding plasmas with various electron concentrations 14 p2298 A66-28473
- H-plane bifurcation of parallel plate waveguide filled with anisotropic plasma 15 p2457 A66-28597
- Ferromagnetic microwave resonance isolators for use in waveguides 15 p2459 A66-28936
- Microphotolithography permits definition of single-mode rectangular dielectric image-line waveguide and depletion layer waveguide structures useful in IR and millimeter region 15 p2462 A66-29023
- Multipactor effect in X-band waveguide slots, determining multipactoring occurrence and parallel plate role 15 p2464 A66-29043
- Ferrite-air interface in waveguide with conducting thin film coated core solved by use of boundary condition or impedance condition 15 p2565 A66-29053
- Change in ferrite transverse dimensions, examining effect on variable-field isolator performance in X-band 15 p2565 A66-29059
- Reflection of aperiodically damped H-01 and E-01 waves of tapered waveguide used in Vernier autotracking 15 p2467 A66-29764
- Propagation behavior of circular waveguide enclosing column of isotropic plasma, considering effect of glass walls for microwave device application 15 p2467 A66-29859
- Laser communication by optical beam waveguide 16 p2717 A66-30594
- Diffraction of axisymmetric electromagnetic wave at surface discontinuity of impedance cylinder forming core of coaxial waveguide 16 p2661 A66-30864
- Classification of modes in electromagnetic waveguides using model solutions of source-free homogeneous wave equation 16 p2663 A66-31204
- Linear operators describing passage of wave beam through system of amplitude-phase converters forming quasi-optical waveguide or resonator 16 p2686 A66-31546
- Resonator and waveguide designs using multilayer dielectric 16 p2666 A66-31557
- Excitation of dipole wave in circular small delay dielectric waveguide by sources with amplitudes and phases variously distributed over apertures 17 p2879 A66-31857
- Slot filters for H waves in circular waveguide 17 p2879 A66-31863
- Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 17 p2884 A66-32217
- Emission of electromagnetic waves by electron flux moving inside ring waveguide 17 p2874 A66-32248
- Magnetic instabilities in form of reversed field flux annihilation pulses in grossly inhomogeneous superconductor 17 p2980 A66-32642
- Dominant mode perturbation theory applied to treatment of influence of imperfect waveguide contact on measured complex permittivity of semiconductors 17 p2887 A66-32643
- Modes in waveguides filled with gyration media 17 p2897 A66-33421
- Coupled waveguide circulator in which secondary waveguide is loaded with distributed nonreciprocal attenuation along coupling length 18 p3075 A66-33566
- Propagation of optical-waveguide modes in dielectric slab bisected by metal sheath 18 p3118 A66-34002
- Perturbation theorems for waveguide junctions expressing changes in impedance or admittance matrix elements 18 p3077 A66-34057
- Numerical solution of problems on discontinuity at junction between homogeneous and inhomogeneous waveguides 18 p3078 A66-34094
- Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34565
- Dispersion characteristics of duct propagation of whistler radio waves along depressed magnetoplasma slab 18 p3072 A66-34568
- Angular propagation constants for electromagnetic modes which may exist in continuously curved waveguide bends of rectangular cross section for microwave application 18 p3072 A66-34569
- Time harmonic wave propagation in perfectly conducting large waveguides containing random media, emphasizing computation and physical interpretation of wave motions 18 p3072 A66-34570
- Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 18 p3088 A66-34969
- Total energy loss in weakly irregular multiwave waveguide accounted for by energy losses in weakly damped waves 19 p3311 A66-35308
- H-type surface wave propagation in rectangular waveguide having wall consisting of transversely magnetized ferrite plate 19 p3313 A66-35456
- Angular-frequency sensitivity of antenna arrays and relation to feeder waveguide 19 p3314 A66-35541
- Gyroelectric and gyromagnetic rectangular waveguides compared for cases of electrostatic and magnetostatic fields transverse to EM wave propagation direction 19 p3317 A66-35719
- Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc 19 p3302 A66-35724
- Dielectric fiber cylindrical surface waveguide with refractive index higher than surrounding region for energy transmission at optical frequencies 19 p3302 A66-35725
- Coupled waveguides structure proposed as leaky-wave antenna, extending previous coupled-mode theory 19 p3320 A66-36401
- Radio wave guiding in horizontally stratified magnetoplasma medium in which electron density varies monotonically with height 19 p3305 A66-36629
- Amplitude and phase of individual modes propagating in overmoded waveguide measured by technique using phase-sensitive detector 20 p3524 A66-37114
- Single-wave approximation of fields of cylindrical delay system with basic E-type wave propagating at variable phase velocity 20 p3515 A66-37381
- Invalidity of Walkinshaw method for calculating periodically loaded waveguides under certain conditions 20 p3532 A66-37869
- Trajectories of light rays through medium subjected to acoustic waves examined knowing that acoustic waves in laser medium function as optical waveguide 20 p3580 A66-38238
- Horn transitions from empty waveguides to dielectric surface waveguides using telegraphers equations, determining launching horn shape with minimum reflection coefficient 21 p3711 A66-38836
- Book on plasma diagnostics covering measuring devices and techniques, SHF antenna and waveguide system, emission measurements, etc 21 p3737 A66-38949
- Equivalent width of waveguides by considering wave propagation in direction perpendicular to waveguide axis 21 p3712 A66-39225
- Vector potential function solution to Maxwell-Minkowski equations describing cut-off phenomena for EM wave propagation in wave guide filled with homogeneous isotropic lossless moving medium 22 p3862 A66-39783
- Microwave-frequency waveguide losses minimized by controlling effects of geometry, propagation mode, construction materials, surface finish and surface contamination 22 p3874 A66-39992
- Book on foundations for microwave engineering 22 p3875 A66-39993
- Tolerances required on straightness of cylindrical waveguide to prevent excessive power transmission into unwanted high loss modes 22 p3876 A66-40169
- Polarized EM wave propagation and microwave Faraday rotation in solid state plasma in circular waveguide under strong magnetic field 22 p3964 A66-40170
- Quasi-optical measurement of Faraday rotation in oversize waveguide at 2-and 1-mm wavelengths 22 p3876 A66-40172
- Low loss waveguide cavities measurement, using simple equipment suitable for high values of Q-factor 22 p3878 A66-40517
- Guiding of whistlers due to exospheric anisotropy, electron density and geomagnetic field effects 22 p3915 A66-40803
- Tapered waveguide delay equalizer for correcting phase distortion caused by cut-off characteristics of waveguide 22 p3882 A66-40868
- Gas ionization by fast electron beam directed along waveguide leading to longitudinal distribution of secondary electron concentration 22 p3958 A66-40938
- S-band waveguide for pulse compression

- applications, providing cheap means of compressing wideband swept frequency pulses 23 p4035 A66-41024
- Inhomogeneously filled waveguides containing dielectric used as microwave delay line for pulse compression radar 23 p4035 A66-41025
- Resonators use for higher sound attenuation in waveguide with sound absorbing cladding 23 p4090 A66-41416
- Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 23 p4037 A66-41461
- Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 23 p4045 A66-41476
- Semiflexible elliptical waveguide for microwave relay systems, noting design and performance characteristics 23 p4046 A66-41547
- Parabolic cylindrical waveguide formed by intersection of two confocal parabolic metal surfaces, determining eigenvalues of wave functions subject to boundary conditions yielding TE and TM modes 23 p4047 A66-41587
- Reflection and propagation of electromagnetic pulses through dispersive media, degradation of step carrier in magnetoplasma analyzed by Laplace inversion technique 23 p4039 A66-41589
- Approximate wave equation for axially symmetric periodic waveguide 24 p4179 A66-42103
- Fiber optics application to wave guidance of X-rays 24 p4236 A66-42252
- Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291
- Self-trapping of laser beam due to diffraction from dielectric waveguide arising from permittivity increase of birefringent beam 24 p4222 A66-42554
- Tunnel diodes operating above resistive cut-off frequency and mounted in tapered waveguide, noting oscillating frequency 24 p4182 A66-42619
- Bifurcated parallel plate waveguide solution extended to solution of open ended parallel plate waveguide radiating into space 24 p4184 A66-42703
- Electromagnetic propagation in slowly rotating anisotropic dielectric single band waveguide modulator 24 p4175 A66-42967
- Behavior of asymmetric waves in free channel in plasma waveguide models 24 p4244 A66-42972
- Harmonic generation and detection in submillimeter wavelength region, emphasizing crystal point contact diode 24 p4176 A66-43191
- Textbook relssue on diffraction of electromagnetic and acoustic waves at open end of waveguide studied, using Wiener-Hopf-Fock factorization method 24 p4177 A66-43225
- WAVEGUIDE ANTENNA**
- Field structure of electromagnetic surface waves at Yagi array acting as waveguide 01 p0036 A66-10367
- Admittance of rectangular waveguide radiating into compressible plasma 01 p0038 A66-10517
- Small lightweight 10-gc horizontally polarized omnidirectional rectangular waveguide slot antenna 02 p0196 A66-11369
- Cross-polarized radiation beams of rectangular waveguide antennas with slot arrays, determining radiation pattern for center-fed case 02 p0198 A66-11523
- Circularly polarized monopulse feed system for use with parabolic reflectors generates response independent of return-signal polarization 06 p0851 A66-16448
- High-gain narrow-pulse radar antenna with rectangular beam shape in vertical plane, noting design requirements and experimental results 08 p1196 A66-19511
- Conformal mapping analysis of waveguide, limited by two parallel metallic plates with two symmetric opposite grooves of properly chosen shape 08 p1198 A66-19742
- Coefficient of reflection of H-11 mode shock wave emitted from aperture of circular waveguide with infinite flange 09 p1344 A66-20347
- Computer program for numerical solution of uniform hollow waveguides with boundaries of arbitrary shape 09 p1346 A66-20607
- Gc/s nitrogen-cooled nondegenerate parametric amplifier, noting design, application and operation characteristics 10 p1513 A66-21857
- Tube shaped and solid cylinder antennas compared, calculating surface current distribution and radiation patterns 11 p1662 A66-22543
- Quasi-optical design of lens-feed millimeter-wavelength antenna combination whose radiation is of azimuthally symmetric split-beam type 11 p1663 A66-22559
- Ferrite component for radio relay equipment such as antenna insulator, waveguide and coaxial equipment insulator and circulator 11 p1664 A66-22658
- Angular sectors of transparency of scanning antennas with periodic waveguide 11 p1666 A66-22718
- Precision DC potentiometer microwave test set for coaxial or waveguide insertion loss measurement 12 p1843 A66-24673
- Slot admittance for two-layer compressible plasma sheath-ion sheath in plasma half-space 14 p2235 A66-27128
- Internal regime of waveguide-slot antennas with identical resonance radiator via difference equations 14 p2254 A66-27743
- Numerical analysis of infinite phased array of open rectangular waveguides, noting use of Fredholm integral equation, effects of wall thickness and reflection coefficient 14 p2255 A66-27909
- Radiation impedance of phased array of rectangular waveguides, noting coupling coefficient amplitude, phase difference, etc 14 p2256 A66-27910
- Asymptotic behavior of coupling coefficients of infinite array of thin walled rectangular waveguide 14 p2257 A66-27927
- Coupled waveguide antenna analyzed based on coupled-mode theory 15 p2455 A66-28569
- Dielectric guide structures / Dieguides/ used for increased gain/noise ratio in low noise antennas 15 p2456 A66-28588
- Monopulse channel phase measurement by composite radiation pattern of feed 15 p2456 A66-28589
- Waveguide-slot antenna design, considering interaction of radiators on principal wave 17 p2879 A66-31855
- Slot couplings of rectangular single-mode waveguides analyzed by equivalent circuit and concentrated parameter methods 17 p2879 A66-31856
- Coupling coefficient between TE 11 and TM 11 mode in tapered circular waveguides, noting behavior near cut-off frequency 17 p2895 A66-33275
- Point matching method calculation of cut-off frequencies and field configurations of waveguides with general cross section 17 p2896 A66-33278
- Normal modes and mode coefficients of lossless circular multimode waveguide determined from boundary conditions, noting frequency dependence of mode conversion 19 p3317 A66-35718
- Radiation from open-ended circular waveguide, comparing solution for electromagnetic wave propagation with method based on Huygens principle 20 p3529 A66-37705
- Antenna radiation pattern synthesis for various array distributions, noting methods applied 20 p3529 A66-37706
- Complex modes of open waveguides, noting influence of proper and improper propagation modes on leaky waves 20 p3529 A66-37708
- Frequency scanned antenna with dielectric loaded waveguide, discussing experimental results 20 p3531 A66-37729
- Hybrid junction diplexer connecting transmitter and receiver to common antenna 22 p3873 A66-39784
- Waveguide directional couplers using inclined slots, considering broad-to-narrow cross and broadwall parallel guide configuration 22 p3878 A66-40546
- Angular sectors of transparency of scanning antennas with periodic waveguide 23 p4045 A66-41456
- Correct conductance and susceptance of infinite cylindrical antenna determined via asymptotic evaluation of parametric integrals 23 p4047 A66-41636
- Pickup antennas effects on waveguide motor speed-input power relationship 24 p4179 A66-42105
- Precision DC potentiometer test for measuring microwave coaxial or waveguide insertion loss 24 p4182 A66-42577
- DC motor without commutator, run by rectified RF energy from antenna pickup probe inside waveguide 24 p4162 A66-42947
- Wide frequency bandwidth properties of arrays of shunt slots in ridged waveguide 24 p4187 A66-43194
- WAVEGUIDE FILTER**
- Resonance in plasma column applied to waveguide filter 01 p0041 A66-10572
- Semiconductor application to coherent optical transducers and spatial filters 05 p0647 A66-14822
- Propagation conditions for nonsymmetric parasitic waves and filtering properties in helical waveguide with dielectric coating and metallic casing 06 p0838 A66-15887
- Filter techniques for high-speed diode switches designed to suppress troublesome switching transients 06 p0842 A66-15974
- Band stop filters, determining advantages in high power transmission and rejection, power capacity, Q-factor, etc 06 p0844 A66-16081
- Rectangular waveguide filter with trapped mode resonators, describing operation, energy handling characteristics and application 06 p0845 A66-16086
- Circular TE sub 011 mode, trapped mode band pass filters, discussing energy radiation mechanism, design, operation and test results 06 p0845 A66-16087
- Quarter-wavelength inhomogeneous impedance transformers, discussing design parameter calculation for nearly equal-ripple performance 06 p0845 A66-16090
- Lumped-circuit LF general three-resonator filter in rectangular waveguide using inductive susceptances as coupling elements 10 p1514 A66-21911
- Equivalent circuit representation of lossless 2N-port symmetrical lattice in multimode waveguide 12 p1832 A66-23907
- Wideband solid state intermediate frequency repeater for communications satellites, using waveguide-cavity diode down converter transistor amplifier and varactor up converter [AIAA PAPER 66-300] 12 p1823 A66-24767
- Backward diode application to microwave circuit design, discussing characteristics of stripline mount with probe detector 15 p2457 A66-28886
- Quasi-optical iterated-dielectric-slab rectangular waveguide filters for millimeter and submillimeter wavelengths 15 p2462 A66-29022
- Dual mode frequency discriminator for microwave source frequency stability, discussing application of beam waveguide resonator 17 p2895 A66-33274
- Geometry and magnetic parameters effect on magnetically tunable filters consisting of rectangular waveguide and containing thin magnetized ferrite slab against one wall 24 p4186 A66-43173
- WAVEGUIDE TUNER**
- Groove guide, discussing development and performance of H sub 11/low loss/ transducer 07 p1008 A66-17516
- Two-frequency volume resonator with independent tuning within wide frequency band 08 p1191 A66-18918
- Tunable coupling of open waveguide type for semiconfocal Fabry-Perot cavity gives high transmission and high Q 24 p4216 A66-43221
- WAVEGUIDE WINDOW**
- Permanent magnetized ferrite antenna waveguide windows for improving EM wave transmission through plasma and reducing transmission losses during reentry 14 p2241 A66-27930
- WAVELENGTH**
- Orr-Sommerfeld equation of shear layer between parallel uniform streams in Hermite function series, noting wave

- number 02 p0219 A66-12074
Statistical behavior of reacting mixture in incompressible isotropic turbulence when reaction rate is quadratic function of local concentration of reactant, using Kraichnan direct interaction hypothesis [AIAA PAPER 65-812] 03 p0358 A66-13180
Fabry-Perot interferometer using wire grids instead of glass plates, covering operation, advantages and bandwidth characteristics 05 p0682 A66-15355
Radiometric and photometric measures including radiant and luminous flux, radiant and luminous emittance, radiance, luminance, wavelength region, etc 06 p0882 A66-16897
Changes in ordinary refractive index and birefringence of gallium sulfide and gallium selenide as function of wavelength for visible and near IR at low temperatures 06 p0929 A66-16940
Interferometer for measurement of ratio of small changes in wavelength of spectral line to linewidth, as basis for measuring plasma electron temperature 06 p0883 A66-16943
Light polarization of twilight and daytime sky at various wavelengths, using telescope-polarimeter system with various color filters 08 p1217 A66-19335
Wavelength change of spontaneous and stimulated emission with uniaxial pressure under CW operation of GaAs diode laser at 4 degrees K 09 p1385 A66-19922
Wavelength measurement of helium-neon laser emission by double-channel recording interferometer, using krypton-86 primary standard 11 p1712 A66-22874
Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 12 p1929 A66-24452
Spatial selective fading as random process, discussing spatial coherence, wave number dispersion profile, time delay profile, etc, in ionospheric propagation 14 p2234 A66-26859
Flame wavelength during vibrational combustion of gas mixtures in tubes 14 p2415 A66-28327
Objections to Gehrels model explaining observations on wavelength dependence of optical properties of lunar surface 15 p2597 A66-29260
Vibration mode of conical shells measured, showing that it varies with conical angle and circumferential wave number 16 p2821 A66-31381
Gas lasers for interferometric measurements of lengths, noting methods that stabilize wavelengths of lasers 16 p2720 A66-31697
Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation between energy and wave number, etc 16 p2788 A66-31777
Radar echoes of clear-air dot angle type observed in Texas 17 p2874 A66-32383
Solar radiation and lunar observations at submillimeter wavelengths using Fabry-Perot interferometer 17 p3005 A66-33007
X-ray absorption edge observation by transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-37275
Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 20 p3619 A66-37684
Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 20 p3624 A66-38426
Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 21 p3800 A66-38959
Dynamic laser wavelength selection by insertion of dispersive tunable electro-optic Q-spoiler within laser cavity 22 p3933 A66-40866

High speed computer technique for simulating test design parameters for evaluation of ballistic-weapon system accuracy [AIAA PAPER 65-222] 16 p2809 A66-30888
Dispersionless ballistics patterns of weapons analyzed as check on reported computer program 16 p2831 A66-31147
USAF Aero Propulsion Laboratory research in weapon systems and turbine engines, ramjets, etc 18 p3269 A66-34956
Mission system effectiveness of avionics weapon system predicted by general-purpose computerized technique 19 p3480 A66-35528
Cost-effectiveness guidelines for designing tactical system in absence of firm specifications, noting avionics system 19 p3480 A66-35529
Industry approach to determining weapon system concepts in terms of desired system functions and attainable subsystem performance capabilities 19 p3480 A66-35530
Integrated maintenance management specification WR-30 applied to limited development program for attitude reference system 20 p3682 A66-37187
Real-time data gathering and flight-test technique for aircraft-carried weapons system development 20 p3495 A66-37207
Ground support equipment for Pershing weapon system 20 p3542 A66-37239
Unattended weapons systems operation from rural power systems, emphasizing sensing to determine transfer from primary commercial to alternate source and fault patterns 20 p3542 A66-37242
Mathematical model used by Army Missile Command for establishing priorities for reliability and logistics improvement 20 p3684 A66-37886
Maintenance Dependency Chart for design checking and troubleshooting in missile and weapon systems 20 p3566 A66-37889
Microelectronics application to military maintenance and support of guidance and control systems of missile and weapon systems 20 p3567 A66-37890
Naval weapons A-7A maintainability requirement effect on management and design and analysis of early flight test data 20 p3496 A66-37920
Industry government reliability program for high density wooden round missile which is noncheckable and associated checkable and repairable launcher-guidance set 20 p3570 A66-37933
Weapon system reliability prediction and relations of spare consumption and of maintenance 20 p3571 A66-37937
Contractor performance evaluation program and relation to weapon system effectiveness 20 p3571 A66-37940
Instructional System model for meeting USAF maintenance technical training requirements for complying with weapon
- system requirements 23 p4030 A66-41578
Lithium chloride power plant theory and technology, noting application to critical weapons systems 23 p4021 A66-41758
- WEAPON SYSTEM MANAGEMENT**
Contribution of reliability to logistics planning operation of Minuteman missile weapon system 01 p0052 A66-10054
Standard Navy Maintenance and Material Management System /3M System/ detailing aviation portion of maintenance data collection program 01 p0033 A66-10118
Contractor-customer responsibilities for Model A-7 aircraft design in firm fixed price environment [AIAA PAPER 65-758] 03 p0320 A66-12589
Worldwide F-104 program, discussing licensing agreements and weapons system management [AIAA PAPER 65-776] 03 p0447 A66-13065
System effectiveness, reviewing principal factors, management technology, planning, etc, as presented by Weapon System Effectiveness Industry Advisory Committee 11 p1789 A66-23438
Contribution of reliability to logistics planning operation of Minuteman missile weapon system 16 p2681 A66-30661
Optimal support costs of weapon systems requires contractor selection based on high order of management capability 20 p3682 A66-37238
- WEAPON SYSTEM 133A**
Electromagnetic compatibility tests on Minuteman weapon systems 133A and 133B 13 p2044 A66-26749
- WEAPON SYSTEM 133B**
Electromagnetic compatibility tests on Minuteman weapon systems 133A and 133B 13 p2044 A66-26749
- WEAPONS INDUSTRY**
Effect of conventional ammunition on aluminum honeycomb paneling, noting reduction of load-bearing and peel-strength properties 13 p2196 A66-25599
- WEAPONS READINESS ACHIEVEMENT PROGRAM /WRAP/ P**
Weapon system design, noting variables for manning and skill requirements, parameters of operational readiness, etc 15 p2618 A66-28813
- WEAR**
SA ABRASION
SA EROSION
SA FRETTING CORROSION
SA FRICTION
Book on friction and wear covering nature of interaction between solid surfaces, general concepts and engineering and design calculations 04 p0526 A66-13834
Effect of crystalline state and structural orientation of polymer on endurance of couplings with polytetrafluoroethylene components, analyzing dry friction and wear on interfaces 13 p2113 A66-25912
Seizing effect at interfaces SAP-SAP and Sap-Al, noting optimum thermomechanical conditions 14 p2303 A66-28196
Individual structural elements connected into nondetachable structures, using seizing phenomena, experimenting with sintered aluminum powder 14 p2303 A66-28197
Sliding wear evolution and radioactive tracer measurement 14 p2305 A66-28466
Wear life and corrosion protection of solid film lubricants improved through substituting other lubricative pigments for graphite [ASLE PAPER 66AM 1C3] 16 p2711 A66-30405
Wear and grease lubrication effects in matched aircraft spline specimens subjected to oscillatory motion 16 p2713 A66-30572
Spectrometric oil analysis for assessing failure probability of turbojet-engine oil-wetted parts 19 p3355 A66-35524
Anisotropy in mechanical properties of lamellar solids due to abrasiveness, examining wear and surface damage produced by laminar solid on metal during slipping and hardness 24 p4229 A66-42701
- WEAR TESTING MACHINE**
Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 01 p0046 A66-11040
Testing and application of hard facing methods used on turbine engine components

to provide wear resistance at high temperature 03 p0373 A66-13085
Carbon seals for gas turbine evaluated in statistically designed test method 08 p1232 A66-19381
Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 11 p1671 A66-23286
Four-ball wear tester to evaluate solid lubricant dispersions including molybdenum disulfide 14 p2302 A66-27774

WEATHER

S COLD WEATHER

WEATHER CHART

Positions of monthly mean troughs and ridges in Northern Hemisphere from 1949 to 1963 05 p0711 A66-14939
Stability of expanded circumpolar vortex, using available record of 700-mb subtropical westerly index values for five-day means from 1943 through 1965 07 p1062 A66-17372
Origin of cloud streaks extending over Pacific Ocean near Japan during winter monsoon 11 p1729 A66-22325

WEATHER CONDITION

Electric conductivity, electric field and space charge of atmosphere under fair weather or thunderstorms 09 p1371 A66-20275
Low altitude turbulence model for aircraft gust load estimation related to meteorological parameters, terrain conditions and height [AIAA PAPER 65-14] 09 p1400 A66-20741
Weather support problems in Gemini and Apollo programs [AIAA PAPER 66-334] 12 p1953 A66-24475
Photometric studies of lightning with correlated photographs of discharge channels to determine photoelectric pulse profile characteristics 18 p3129 A66-34018

WEATHER CONTROL

Dispersal of supercooled fogs over airports by seeding with dry ice [ICAS PAPER 66-7] 23 p4086 A66-41255

WEATHER DATA RECORDER

High precision digital atmospheric-pressure recorder that does not require mercury barometer readings for barogram processing 02 p0232 A66-12148
Worldwide meteorological satellite system, operation, structure and functions 06 p0957 A66-15911
Simultaneous occurrence and statistical distribution of clouds over separated cities in U.S. [AIAA PAPER 66-361] 12 p1907 A66-24493
Meteorological data from weather satellites equipped with TV and IR sensors, noting Automatic Picture Taking /APT/ recorder 14 p2289 A66-26806
High precision digital atmospheric-pressure recorder that does not require mercury barometer readings nor barogram processing 14 p2297 A66-28103

WEATHER FORECASTING

SA ATMOSPHERIC CONDITION EFFECT
Planetary wave analysis using zonal harmonics in connection with atmospheric circulation and weather forecasting 01 p0064 A66-11106
Kennington method tested for forecasting time of clearance of radiation fog 03 p0389 A66-12890
Upper atmospheric observation using normal-pulse ruby laser techniques, presenting height distribution curves of scattered light 04 p0528 A66-13376
Classifying capacity of learning matrix used in cybernetics, discussing principle and application to weather forecasting and speech recognition 04 p0489 A66-13509
Cyclogenesis prediction by two-level primitive equation model with constant static stability for two cases characterized by typical baroclinic development 05 p0711 A66-14936
Short-term weather forecasting equation solved exactly 06 p0904 A66-16233
Short-range forecasting of baric and kinematic atmospheric fields from complete system of thermohydrodynamic equations 07 p1062 A66-17918
Error effects in forecasting wind speed and direction on equivalent headwinds and flight times 07 p1063 A66-18338
Zonal wind profiles in 850-mb surface at different latitudes as aid in medium range

weather forecasting 08 p1246 A66-18802
Nonlinear weather prediction by optimal method of control theory for combining past forecasts with current observations 08 p1248 A66-19385
Tiros satellite data indicates upper-level structure of formative cyclone of moderate intensity is grossly similar to storm at maturity 09 p1399 A66-20727
Detection range of 500-kc/sec spheres determined by examination of data taken during severe weather events and during zero background condition 09 p1399 A66-20729
Nonlinear stability elimination in long term numerical integration of motion equations required for medium-range weather forecasting 09 p1399 A66-20730
Numerical experiments with large-scale seasonal forcing, treating six different heating fields in general circulation model for periods of five and 100 years 10 p1530 A66-21273
Difference scheme of integrated conservative type and equivalent semi-Lagrangian type for weather forecasting equation 11 p1725 A66-22195
Phase difference between atmospheric large-scale disturbances and heating due to sea-surface evaporation and turbulent exchange 11 p1694 A66-22199
Meteorological interpretation of satellite pictures of weather systems, discussing APT and AVCS 11 p1726 A66-22307
Weather forecasting from atmospheric electric conductivity measurements, noting polarization by neutrinos 11 p1729 A66-22865
Suggested procedures for operationally integrating meteorological satellite /neph mosaic/ and conventional data for extratropical regions 11 p1731 A66-23383
Model simulation study of economic value of improved methods of translating weather information into operational terms 11 p1731 A66-23488
Atmospheric parameter determination by aircraft measurements, noting applicability to supersonic air transports 12 p1879 A66-23752
Short-range forecasting of baric and kinematic atmospheric fields from complete system of thermohydrodynamic equations 12 p1905 A66-23879
Predictability of winds and virtual temperature profiles for flight and static test operations, establishing forecast verification criteria [AIAA PAPER 66-378] 12 p1908 A66-24503
Finite-difference scheme for short-term operational weather forecasts from two-level model atmosphere 12 p1909 A66-24870
Equations describing motion of barotropic fluid with free surface solved, using finite difference methods based on two-step Lax-Wendroff scheme 13 p2121 A66-25814
Clear air turbulence research methods, noting structural analysis, computer application, satellite photography, etc 15 p2532 A66-28921
Clear air turbulence forecasting for aircraft, noting methods employed by airlines 15 p2533 A66-28932
Visibility forecasting for London /Heathrow/ Airport by diagrams based on Freeman objective method 16 p2740 A66-30227
Short-range forecasting of stratified cloudiness, noting linear dependence between variations in dew point and air temperature near Earth surface for aperiodic processes 16 p2742 A66-30791
Book on meteorological satellite history and design, noting Tiros and Nimbus 16 p2809 A66-30875
Interrelation between lunar phase and occurrence of precipitation larger than 10.0 mm per day in northern Germany 16 p2742 A66-31113
Difference system and boundary conditions for primitive-equation barotropic forecast 17 p2948 A66-31942
Barotropic atmospheric model for forecasting in tropics, discussing wind analysis area covered, accuracy, etc 17 p2948 A66-31943
Regression equation technique for objective wind forecasts at 300

mb 17 p2949 A66-32793
Spectral method more efficient than grid-point method for integrating typical barotropic filtered-equation numerical weather prediction models 17 p2949 A66-33337
Numerical integration of primitive equations by simulated backward difference method, using two-step iteration for divergent barotropic model of atmosphere 19 p3393 A66-36057
Altitude of lower cloud boundary functional correlation with atmospheric parameters obtained from numerical weather forecast 20 p3593 A66-38366
Long-wave radiative heat transfer between clouds and free atmosphere as basic factor in weather forecasting 20 p3594 A66-38371
Physical, mathematical, statistical, synoptic and applicative aspects of medium and long-range weather prediction 22 p3942 A66-39729
Vertical motion of moisture fields and saturation deficit determination from nephelanalysis of Tiros cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054
Finite-difference scheme for short-term operational weather forecasts from two-level model atmosphere 22 p3943 A66-40331
Short-range weather forecasting based on principles of fluid dynamics 23 p4087 A66-42017
Frontogenetic potentialities of wind deformation fields determined, using mathematical model of atmosphere 24 p4234 A66-42979

WEATHER FRONT
Synoptic analysis on structure of cold vortex with steady eastward movement by time-space transformation 09 p1400 A66-20858
Tiros satellite photograph study of cloud structure related to two major classes of frontal bands 11 p1727 A66-22315
Meteorological interpretation of Tiros satellite photographs of Australian area 11 p1728 A66-22319

WEATHER RADAR
Effectiveness and reliability of radar observation of clouds in absence of precipitation 02 p0252 A66-11264
Comparison of simultaneous radar and aircraft observation of upper boundary of clouds 02 p0252 A66-11265
Evaluation of radar observations for identification of thunderstorm clouds on continuous background of cumulus and nimbus clouds 02 p0252 A66-11266
Variation of radio echo in different types of clouds allows identification from vertical variations in radar reflectivity 02 p0252 A66-11267
Statistical relations between weather conditions and geometry of radio echoes produced by cloud and precipitation fields 02 p0252 A66-11268
Radar network observation for obtaining accurate meteorological data for synoptic analysis 02 p0252 A66-11269
Radar reflectivity of developing convective clouds statistically related to state of turbulence and thunderstorm hazard 02 p0252 A66-11270
Range, sensitivity and accuracy of meteorological radar improved by use of storage device 02 p0252 A66-11271
Effectiveness of meteorological radar in determination of range of meteorological visibility in fog 02 p0252 A66-11272
Simultaneous lower atmosphere observations with radar and aerological measurements by airborne meteorograph and electrometeorograph 02 p0253 A66-11273
Mesoscale wind structure revealed by Doppler wind soundings taken in lower 4.5 km of atmosphere at 12-minute intervals in snowstorm 04 p0541 A66-13668
Wind velocity measurement by dual beam pattern modification to conventional /non-Doppler/ radars 04 p0541 A66-13669
Maser preamplifier designed into X-band weather radar set increased radar sensitivity by 12.5 decibels to overall 118.5 decibels 04 p0480 A66-13688
Atmospheric wind velocity measurements by probing artificially ionized columns of air with two independent X-band radar

systems 05 p0711 A66-14633
Three storm cells evolving from ordinary mature stage into tornadic SR mature stage [AFCLRL-SR-32-65] 07 p1061 A66-17387
Weather surveillance radar for SST must have range of 250 nautical miles for 0.2 g passenger acceleration 07 p1001 A66-17700
C-band weather radar AVQ-10 incorporating tunnel diode amplifier and p-i-n solid state protector switch 07 p1008 A66-17711
Measured reflectivity and resolution of radar antenna for distributed atmospheric targets 08 p1248 A66-19387
Detection range of 500-kc/sec series determined by examination of data taken during severe weather events and during zero background 09 p1399 A66-20729
condition 09 p1399 A66-20729
Radar hook observed with 21-decibel gain reduction in Kansas-Oklahoma thunderstorm 09 p1400 A66-20732
Laser radar as instrument to obtain operational meteorological information 10 p1540 A66-21067
Observations of vertical motion and particle size of growing thunderstorm moving overhead, using pulsed Doppler radar 10 p1552 A66-21277
Preferred thunderstorm development near surface boundary between maritime tropical air masses and dry air masses, defining radar echo areas 11 p1731 A66-23382
Wind velocity measurement using radar detection of artificially ionized air column by radioactive source 12 p1908 A66-24516
[AIAA PAPER 66-404]
Atmospheric wind velocity measurements by probing artificially ionized columns of air with two independent X-band radar systems 14 p2326 A66-27702
Radar refractivity fluctuations and wavelength dependence of reflectivity in clear air turbulence 15 p2532 A66-28924
regions 15 p2532 A66-28925
CAT detection by radar backscatter measurement of radio refractive index eddies 15 p2532 A66-28925
Optical radar scanning system, using ruby laser source for meteorological studies 15 p2450 A66-28929
Airborne weather radar to detect dangerous turbulent condition and other phenomena 15 p2452 A66-29626
Radar resolution capability for cloud detection 16 p2740 A66-30226
Radar observation of cloud with sharply defined base and slow descent 16 p2740 A66-30226
Radar image edges sharpness relationship to relative humidity near ground 17 p2948 A66-32270
Gallium arsenide diode laser as pulsed IR source for experiment and design considerations for radar indication of cloud height and visibility 18 p3066 A66-33616
Doppler radar applied to atmospheric precipitation processes, noting drop size distribution in widespread rain, height-time sections of vertical air motion and maximum particle velocity, etc 22 p3942 A66-39737
Millimeter waves applications in atmospheric research, discussing radar meteorology, forward scatter or troposcatter and passive or radiometric techniques 22 p3869 A66-40731
Computer program for calculating average lengths of weather radar echoes and pattern bandedness from exponential function approximations to pattern autocorrelation coefficients 24 p4234 A66-42988
Air motion probe via Doppler radar, noting calculation of speed, direction and application to wind variance 24 p4234 A66-42989
X-band low power pulse Doppler radar and S-band weather radar for meteorological applications 24 p4176 A66-43045
WEATHER STATION
S METEOROLOGICAL STATION
WED
Arbitrary quadrilateral spar webs for matrix displacement 12 p1971 A66-24976
WEDGE
Wide wedge penetration into thick aluminum target, noting adiabatic heating and softening 02 p0300 A66-11854
Plane and cylindrical wave diffraction at

ideally reflecting wedge 06 p0823 A66-15881
Intrinsic and mutual radiation conductances from slots on wedge, using Markov form of Green function for calculation 06 p0823 A66-15896
Frequencies of free lateral resonant vibration of conical beams and truncated wedges for all combinations of simply supported, clamped and free end conditions 10 p1616 A66-21491
Stress distribution in anisotropic plate with form of infinite wedge loaded at vertex by concentrated force 17 p3018 A66-31834
Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390
Temperature at wedge under action of heat source of variable dimensions and intensity 18 p3266 A66-35052
Gas laser used to determine residual wedge angle in optical flats and direct display of relief maps 19 p3373 A66-35390
Estimation of shock induced pressure rise on wedge or conical body for various Mach numbers, noting variation of blast-induced pressure ratio with incidence angle 19 p3275 A66-35634
Mathematical analysis of radiation from slotted magnetic line source on conducting cylindrically capped wedge covered by dielectric layer or plasma sheath 21 p3705 A66-39349
Stress-distribution in wedge-shaped plate with stiffener on one of edges loaded by axial force, reduced to difference equation solution for shear-stress transform along stiffened edge 21 p3832 A66-39460
Elastic deformations in finite plane strain for which stresses are functions of polar angle as in wedge subjected to constant normal and tangential tractions on faces 22 p3996 A66-40702
WEDGE FLOW
Flow resistance of partially permeable wedge to incompressible fluid incident on base or vertex 03 p0359 A66-13185
Solid surface interaction of atoms and molecules of wedge cavity in rarefied free molecular gas stream 04 p0456 A66-14143
Viscous flow eddy behavior near sharp corner, considering outer boundary conditions and stream function 07 p1023 A66-18115
Aerodynamic and heat transfer characteristics of cross-stream wedge in low density aerodynamics, investigating transition from continuum to free molecular flow 07 p0982 A66-18126
Two-dimensional viscous incompressible wedge flow treated by Navier-Stokes equation with Prandtl boundary layer approximation 07 p0982 A66-18138
Surface pressure distribution on high-velocity body with large injection rate or ablation rate 07 p0984 A66-18455
[AIAA PAPER 66-89]
Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges 07 p0984 A66-18462
[AIAA PAPER 66-128]
Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 08 p1165 A66-19484
Downstream-facing attached shock waves in MGD flow past wedge are stable if upstream flow is supersonic 10 p1481 A66-21846
Heat transfer and pressure data extended from classical thin boundary layer regime to near-free-molecule flow in study of low density effects in hypersonic wedge flows 11 p1633 A66-22928
Cavitation effects on periodic wakes behind symmetric wedges, noting Strouhal number variation 13 p1991 A66-25637
[ASME PAPER 65-FE-15] 12 p1864 A66-24549
Elastic wave diffraction on rigid edge analyzed by employing acoustic analogy 13 p1991 A66-25637
Inviscid hypersonic flow of nonuniform incident stream over wedge, noting vorticity effects, perturbation equations and boundary conditions 13 p1992 A66-26665
Flow pattern and heat transfer distribution in regions of adverse pressure gradient and separated flow over two-dimensional models in Mach 10 airflow 15 p2424 A66-29271

High-velocity subsonic flow past wedge in wind tunnel with perforated walls, applying solution to optimum parameter determination of suction sytem 16 p2630 A66-31291
Orifice increases resistance coefficient when edge of wedge is facing incident flow and decreases it when wedge is turned around 16 p2689 A66-31518
Effect of oscillatory relaxation of air boundary layer on flow characteristics around wedge 16 p2632 A66-31629
Fully ionized gas flow over wedge of finite angle for applied magnetic field aligned with incident stream 16 p2767 A66-31660
Static and dynamic stability derivatives of sharp wedges in viscous laminar hypersonic flow determined, using approximate pressure relations 17 p2839 A66-32444
Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations 18 p3100 A66-34599
Binary flutter of wedges in hypersonic flow according to piston theory and McIntosh derivatives 19 p3473 A66-35625
Hall effect influence on steady hypersonic flow of inviscid compressible gas past wedge 19 p3275 A66-35736
Entry problem of thin symmetric wedge impinging normally on free surface of compressible inviscid liquid, neglecting gravitational effects 20 p3547 A66-37981
Weak oblique blast impingement on slender hypersonic wedge 21 p3724 A66-38726
Surface pressure distribution on high velocity body with large injection rate or ablation rate 22 p3844 A66-40348
[AIAA PAPER 66-89]
Flow pattern of three-dimensional interaction of oblique shock with boundary layer obtained when shock generated by wedge spanning supersonic wind tunnel interacts with side wall 22 p3901 A66-40491
Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882
Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925
WEIBULL DISTRIBUTION
Linear estimation for log Weibull distribution from random sample of ordered failure time 01 p0091 A66-10120
Minimum-variance unbiased one-order-statistic estimator of parameter of one-parameter exponential Weibull population 03 p0388 A66-12901
Comparative evaluation of gamma, lognormal and Weibull probability distributions for reliability engineering application 06 p0902 A66-16333
Service life of antifriction bearings represented by Weibull distribution law, with computer method for parameters and density function 06 p0886 A66-16486
Accelerated life tests of germanium transistors, with failure percentage plotted against time 12 p1834 A66-24086
Mean time to failure within given time boundaries and for continuous failure density evaluated via Weibull density function 15 p2526 A66-28806
Life expectancy of form C dry reed switch as function of operating environment 15 p2460 A66-28992
Monte Carlo simulation studies for fatigue data analysis of rolling-contact bearings, using Weibull equation [ASLE PAPER 66AM 1B2] 16 p2710 A66-30401
Reliability analysis problem involving set of 30 identical parts which had intervals to failure recorded in order to make inferences about population from which parts are random sample, noting Weibull population 20 p3592 A66-37965
Methods for finding lower confidence bounds on reliability of item, noting reliabilities for items whose lifetimes follow Weibull distribution 20 p3574 A66-37966
Data analysis on probability papers for gamma, normal and Weibull /including exponential/ distributions 24 p4230 A66-42088
WEIERSTRASS FUNCTION
S ELLIPTIC FUNCTION

WEIERSTRASS PROBLEM

- Complex variable functions, discussing boundary properties for holomorphic continuous unit disk with constant absolute value on boundary 06 p0901 A66-16007
- Multistage rocket trajectory optimization, extending maximum principle to include Weierstrass and Jacobi conditions 11 p1733 A66-23337
- Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853
- Weierstrass characteristic and covariant constant vector fields, noting two metric tensors with same Christoffel symbols, two connections with same curvature tensor and Ch-equivalence class of metric tensors 22 p3941 A66-40567

WEIGHT

- S BODY WEIGHT
- S MOLECULAR WEIGHT
- S STRUCTURAL WEIGHT
- S THRUST-WEIGHT RATIO

WEIGHT ANALYSIS

- Optimal design for lightweight structures, considering material properties, shape and interaction forces 06 p0963 A66-16474
- Balancing rotating parts in machines and measuring unbalance 09 p1384 A66-20489
- Combined loads minimum weight analysis of stiffened truss-core sandwich flat plate and cylinder 10 p1618 A66-21940
- Weight empty estimation methods evaluated for transports and bombers ranging in weight from 78 to 488 klb 11 p1783 A66-23002
- Aircraft structure weight reduction, using redux bending and spot welding instead of bolts and rivets 12 p1963 A66-24036
- Minimum-weight analysis of hydrostatically compressed ring-stiffened cone, showing that previous data derived for cylinders in same condition might be useful 12 p1970 A66-24702
- Uniqueness of mean square approximate systems proved by expressing weighted mean square error in quadratic form in normal coordinates 13 p2116 A66-25139
- Decision theory and dynamic programming applied to problems concerning cost and weight minimization in structural engineering 13 p2207 A66-26699
- Influence of plasticity correction factor in minimum weight analysis, using Ramberg-Osgood relations to define stress-strain curve 14 p2398 A66-27424
- Weight savings derived from use of contrasting ring, stringer and wall materials in J-stiffened axially compressed cylinders [AIAA PAPER 66-508] 16 p2821 A66-31480
- Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122
- Method of weight analysis for constant frequency aircraft electrical generating system equipment 20 p3498 A66-37171
- Optimization of two-way space frame with single column supports for minimum weight of steel by digital language programming techniques 21 p3833 A66-39539
- Load prediction method necessitated by minimum weight and volume requirements for spacecraft recovery system, considering nonuniform opening of parachutes in cluster 22 p3849 A66-40596
- Text on weight reduction techniques for use in monitoring phase of engineering design, using model applications 22 p3851 A66-40801
- Digital computer program for analysis and weight optimization of thermoelectric generators for space applications 24 p4161 A66-42119
- WEIGHT FACTOR**
- Structural system design technique for reliability and weight tradeoffs using designer equations and characteristics of materials, geometry and operational loads 01 p0145 A66-10085
- Optimum stage weight distribution in multistage rocket obtained by discrete maximum principle [ASME PAPER 64-WA/AV-5] 04 p0586 A66-14027
- Optimum design employing merit function

- of cost and weight for structural/material components and subsystems applied to space vehicles
- [SAE PAPER 650785] 05 p0773 A66-15010
- Meteoroid protection weight requirements effects on space exploration costs, examining environment and hypervelocity impact penetration 05 p0774 A66-15011
- Book on minimum structure weight and effect on design, with application to planar and three-dimensional structures 05 p0774 A66-15064
- Nozzle weight determination for preliminary design of solid propellant rocket motors 10 p1595 A66-21950
- Problems of manned spacecraft design such as weight restriction, structural problems, heat protection, thermal control, vibration, etc 11 p1778 A66-23073
- Takeoff load distribution predetermination for commercial transport craft based on appropriate weight ratios 12 p1800 A66-23784
- Design of composite structures of minimum weight, using flat-bottomed cylindrical tank, noting continuity condition of radial bending moment of plate and shell 14 p2395 A66-27174
- Structural and heat shield designs for lifting entry vehicles for orbital missions analyzed for effects of wall thickness and weight on vehicle size and total weight 14 p2393 A66-28025
- Optimum design in fabricating rocket launcher rail, considering use of beryllium and boron carbide materials for weight reduction 17 p3030 A66-32883
- Weight and size optimization of flight type cryogenic storage supply system of oxygen and hydrogen for fuel cell operation and life support in manned spacecraft 19 p3292 A66-36233
- Pneumatic vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature 20 p3627 A66-36916
- Thermal analysis and weight optimization of low-heat-leak storage tanks, particularly aspects important to designers of propellant tanks for long-term lunar storage 20 p3676 A66-37078
- Strength of ceramic specimens with parallel cylindrical holes, noting strength/weight characteristics during compression loading 21 p3753 A66-38677
- Nozzle for special small rocket motor, noting weight, construction material and performance 23 p4121 A66-41422
- Weight-saving structural improvement possibilities in Japanese SSR /special small rocket/ 23 p4133 A66-41427
- Manned mission design analysis, examining spacecraft electrical power requirements, weight correlation and cost estimation 23 p4021 A66-41753
- Electric contact design factors for shock vibration environments 24 p4186 A66-43058
- WEIGHTING /MATH/**
- Weighting function and frequency response determination of linear system with N degrees of freedom, using convergent series solution 09 p1396 A66-20636
- Summation of Fourier series associated with integrable function $f(x)$, using weighted averages of partial sums 15 p2529 A66-29848
- Effect of modifying digital filter weights derived on least squares error basis through multiplication by certain weighting functions 16 p2659 A66-30535
- Silicon, quartz and germanium single crystal density determined via hydrostatic weighing method 16 p2777 A66-30933
- Velocity dependence of meteor luminous efficiency evaluated, using statistical analysis [AIAA PAPER 66-515] 16 p2805 A66-31482
- Analytic design of optimal digital controller, resolving problem of choice of weighting coefficients of functional representing generalized rms estimate of transient 24 p4188 A66-42481
- Solar abundances of seven rare earths deduced for center of solar disk with weighting function 24 p4279 A66-42711
- Method of weighted residuals /MWR/, Galerkin method and variational method compared for approximate solution of

- differential equations 24 p4232 A66-42836
- WEIGHTLESS FLUID**
- Flow graph in model of jet curtain in ideal incompressible weightless fluid with isolated vortex 12 p1798 A66-24433
- Self-similar motion of weightless fluid under action of surface tension 14 p2277 A66-28053
- WEIGHTLESSNESS**
- SA FREE FALL**
- Discrete gas-into-liquid flow process, compensating absence of mass forces and unfavorable load directions with motion of liquid 02 p0218 A66-11657
- Nuclear fast red technique of calcium in serum, parotid fluid and urine in weightless state 03 p0329 A66-13347
- Biological characteristics and physical conditions of space flights, such as low pressure, ionizing radiation, noise, acceleration, weightlessness, artificial atmosphere, feeding problems, etc 04 p0464 A66-14066
- Physiological problems of weightlessness discussing motion sickness, fluid volume control and chronic effects on circulatory system 04 p0465 A66-14071
- Physical atrophy prevention in protracted weightlessness, discussing physical fitness maintenance during space flight 04 p0465 A66-14072
- Vestibular sickness susceptibility under conditions of weightlessness 04 p0467 A66-14082
- Heart and breathing rate and electroencephalo-graphic responses of rats during weightlessness 04 p0467 A66-14083
- Effect of weightlessness on cardiovascular, neuromuscular and autonomic nervous systems 06 p0810 A66-15904
- Gravitational influence on living organisms studied by klinostate principle 06 p0811 A66-16061
- Zero gravity effect on design of food handling systems for extended duration space flight programs 06 p0817 A66-16236
- Artificial gravity through slow rotation to solve weightlessness problem in long manned space flights, considering cardiovascular deconditioning and biological problems of rotating environments 06 p0817 A66-16237
- Behavior of fluids under weightlessness and in weak gravitational fields, formulating small linear oscillations of ideal fluid under surface tension 06 p0873 A66-16708
- Zero-gravity effect on opossum fetus observed by TV system in proposed satellite 08 p1176 A66-18726
- Self-contained environmental control system for biosatellite study of prolonged effects of weightlessness and radiation [AICE PREPRINT 19D] 10 p1491 A66-21186
- Basic physical/biological phenomena studied under zero-g conditions in Earth orbital spacecraft 10 p1491 A66-21529
- Weightlessness, radiation and chemical and biological contamination problems of future manned orbital space flight 10 p1486 A66-21530
- Subgravity tower and axis results obtained on man and animals, discussing transition from acceleration to weightlessness and vice versa 11 p1641 A66-22480
- Vestibular function in conditions of subgravity 11 p1641 A66-22481
- Human and animal study of physiological and neurophysiological responses at different intensity levels and short periods of gravitational field 11 p1641 A66-22482
- Physiological and psychological effects on man during U.S. suborbital and orbital flights from Project Mercury 11 p1642 A66-22483
- Physiological reactions to long periods of weightlessness beyond operational possibilities 11 p1642 A66-22484
- Zero-g vapor feed system with no moving parts, noting ion engine testing, propellant use efficiency and surface tension storage [AIAA PAPER 66-249] 11 p1761 A66-23083
- Aerosol deposition in lungs of spacemen under weightless conditions 12 p1806 A66-23920
- Method for measuring amount of liquid remaining in tank under near-zero-g conditions based on relation between gas ullage, volume and

pressure 13 p2000 A66-25693
 Environmental parameters affecting
 spacecrew comfort during weightlessness
 and optimization of comfort
 system 14 p2231 A66-28412
 Otolith organ activity within Earth
 standard, one-half standard and zero gravity
 environments and effect of extralabyrinthine
 factors effect upon 15 p2431 A66-28664
 counterrolling 15 p2431 A66-28664
 Human otolith and cupula system behavior
 under anomalous gravity 15 p2434 A66-29446
 conditions 15 p2434 A66-29446
 Biological experiments under flight
 conditions in Vostok spacecraft, noting
 reproduction of *Drosophila melanogaster* and
 effect of weightlessness and cosmic
 radiation on hereditary 15 p2436 A66-29465
 structures 15 p2436 A66-29465
 Lowering of psychic tone,
 absentmindedness and vigilance decline
 during astronaut weightlessness on long
 space flights 15 p2442 A66-30003
 Weightlessness effect on flame ignition,
 burning rate, self-extinguishment,
 etc 16 p2825 A66-30487
 Pressure and temperature measurements
 obtained from closed loop, forced convection
 boiling and condensing processes under zero
 gravity 16 p2826 A66-30490
 Barany hypothesis tested to clarify
 mechanism of caloric nystagmus by use of
 zero gravity environment 17 p2857 A66-32168
 Mass measurement of man in zero gravity
 environment, discussing laboratory device
 using linear harmonic motion 17 p2924 A66-32171
 Lower body negative pressure effect on
 blood volume and orthostatic tolerance
 during prolonged bed rest 17 p2858 A66-32178
 Cardiovascular deconditioning from
 weightlessness treated by 9-alpha-
 fluorohydrocortisone 17 p2858 A66-32180
 Triaxial ballistocardiogram in weightless
 environment 18 p3056 A66-33715
 Space cardiology, discussing methods of
 biological telemetry such as ECG,
 seismocardiography, kinetocardiograph,
 arterial oscillography, etc 18 p3059 A66-34364
 Medical problems of
 weightlessness 18 p3059 A66-34365
 Weightlessness effects on man with data
 from Voskhod flights 19 p3284 A66-35568
 Fluid content measurement in storage
 tanks under zero-g conditions discussing gas
 law system, trace material, capacitive panel
 and RF methods 19 p3340 A66-35611
 [AIAA PAPER 65-365]
 Extravehicular maneuvering techniques
 research, discussing manual locomotion
 methods, powered units, computer
 simulation, zero-g flight and space
 tests 19 p3291 A66-35960
 Vestibular tolerance differences among
 members of crew of Voskhod to 24-hour
 stay in zero-weight environment 19 p3286 A66-36377
 Manually imposed angular accelerations
 during weightlessness period of parabolic
 flight, obtaining electrooculographic
 recordings for analyzing nystagmic
 response 19 p3286 A66-36382
 Static and dynamic behavior of liquid-vapor
 interface during weightlessness
 [AICE PREPRINT 17A] 22 p3897 A66-39886
 Coupling between spin-stabilized rocket
 motion and propellant sloshing tested in
 zero gravity environment
 [AICE PREPRINT 17C] 22 p3897 A66-39887
 Liquid oxygen converter designed to
 provide oxygen for space flight, using
 combined forces of surface tension and
 paramagnetism 22 p3886 A66-39898
 [AICE PREPRINT 24C]
 Physiopathological phenomena of space
 flight stresses, especially
 weightlessness 22 p3856 A66-40506
 Book on space biology and medicine
 covering interplanetary trajectories,
 biological effects of prolonged and impact
 accelerations, weightlessness and cosmic
 radiation 24 p4165 A66-43130
 Sensory, motor and vegetative reactions of
 human organisms under conditions of
 weightlessness in orbiting spacecraft or
 aircraft 24 p4166 A66-43138

WEIGHTLESSNESS SIMULATION

Human motor performance activities in
 simulated weightless environment 02 p0185 A66-11626
 Physiological testing under simulated
 reduced gravity conditions with subject
 suspended and performing exercises on
 inclined treadmill 02 p0186 A66-11644
 Observations on heart rates and
 cardiodynamics during prolonged
 weightlessness, discussing immersion
 experiment on animals 04 p0465 A66-14073
 Psychophysical orientation mechanisms of
 man under weightlessness simulation,
 gravity conditions encountered on Earth, in
 orbital flight and during free floating in
 space 06 p0814 A66-17177
 Visual acuity decrement during aircraft-
 simulated weightlessness 09 p1334 A66-19977
 Bone calcium loss during two weeks of
 simulated weightlessness, using X-ray wedge
 technique 11 p1643 A66-22577
 Preflight medical tests of responses of
 Soviet cosmonauts Bellaev and Leonov to
 simulated weightlessness and performance
 during simulated space walk 13 p2009 A66-25889
 ONERA laboratory weightlessness
 simulation tests on liquids, accelerometers,
 aerodynamic braking, etc 13 p2058 A66-26371
 Liquid behavior under simulated
 weightlessness 13 p2065 A66-26372
 ONERA weightlessness simulation
 laboratory investigations of highly sensitive
 accelerometers 13 p2082 A66-26373
 Physiological reactions of Russian
 astronauts under prolonged weightlessness,
 noting motor activity, heart and pulse beat,
 breathing rates, arterial pressure,
 etc 15 p2436 A66-29467
 Gravitational force perception thresholds
 of plants in weightless conditions measured
 in terms of growth and development 19 p3284 A66-35569

WELD STRENGTH

Causes and development of delayed
 cracking in material/weld interfaces of high
 strength steels 03 p0375 A66-13124
 Postweld heat treatment on nickel alloy
 weld deposit noting metallography,
 microhardness and room temperature
 tests 05 p0698 A66-14515
 Fracture toughness of X7000-series
 aluminum alloy plate weldments 05 p0686 A66-14695
 Impact strength of austenitic stainless
 steel welds discussing effects of heat
 treatment, carbon and ferrite content
 [ASME PAPER 65-WA/MET-1] 05 p0704 A66-15692
 Plastic strain fatigue in air and vacuum,
 discussing strain-life relation for ductile
 materials and cold reweldment of fractures
 in vacuum 06 p0895 A66-16203
 Radiographic acceptance standards for
 setting limits on size and distribution of
 porosity in steel weldments
 [ASME PAPER 64-WA/MET-3] 06 p0884 A66-16207
 Hot cracking in Hastelloy X fusion weld as
 affected by microsegregation produced
 during solidification 10 p1547 A66-21768
 Welding characteristics of Ti-7Al-2Cb-1Ta
 plate including strength, toughness and
 cracking resistance 11 p1717 A66-22863
 Welding technique advances and testing of
 bond integrity for microcircuit
 fabrication 14 p2298 A66-26944
 Mathematical analysis of relationships
 between weld strength, maximum
 temperature and time at temperature of
 type 2219 aluminum 14 p2302 A66-27347
 Effect of annealing and aging on structure,
 hardness, strength and plasticity of VT15
 alloy welds 15 p2523 A66-29192
 Low temperature bend ductility and
 microstructure of welded columbium base
 alloys 16 p2725 A66-31438
 Aluminum welding, examining internal
 defects such as porosity and metallurgical
 changes in heat effected zone
 [SAE PAPER 660292] 18 p3117 A66-34944
 High strength weldable Al alloys with good
 cryogenic toughness, stress-corrosion
 cracking resistance and tensile
 strength 20 p3582 A66-37091

100-200 ksi yield-strength notched steels
 for high-toughness weldments, discussing
 quenched and tempered steels, maraging
 steels, heat treatment effects,
 etc 21 p3751 A66-39193
 Welding capacity of high-strength alloys of
 Al-Zn-Mg-Cu system, noting welding
 techniques, composition effect on
 mechanical properties and remedies for
 cracking in welds 22 p3928 A66-40882
 Mechanical properties of semifinished
 products, welds and machined sections of
 high strength V92Ts aluminum
 alloy 22 p3936 A66-40883

WELDED JOINT

Temperature cycling effect on welds of
 known strength which are encapsulated with
 several types of resins to determine internal
 stress in electronic modules 02 p0234 A66-11326
 Interface discontinuities from improper
 heat balance and effects on fatigue life of
 spot welded joint in austenitic stainless
 steel 02 p0235 A66-11469
 Butt-weld joint control discussing
 ultrasonic testing method, conditions for
 applicability, quality criteria, equipment
 calibration, defect detection and Q factor
 standardization 03 p0375 A66-13160
 Laser beam welding electronic-component
 leads 05 p0685 A66-14517
 Welded joints in sheets of two-phase
 titanium alloys in study of heat treatment
 effects on structure and mechanical
 properties 15 p2523 A66-29195
 Electron beam welding of maraging steel,
 noting tensile test results on efficiency,
 defect formation, region of fracture
 nucleation, etc 19 p3371 A66-36632
 Lead loss in thermocouple imbedded in
 burning propellant, noting possibility of loss
 reduction by using flattened junction
 parallel to burning surface 20 p3681 A66-38177
 Alloys and processes for Titan booster
 system fabrication, noting mechanical
 properties and behavior of welded
 joints 22 p3924 A66-40260
 Electron beam welding and application to
 aerospace industry, noting basic weld joint
 configurations 22 p3925 A66-40268
 Microbonding - Colloquium, Sunbury-on-
 Thames, Middlesex, England, January
 1966 23 p4043 A66-41188
 Parallel-gap joining techniques, examining
 electrode using copper insert and brazing
 application to thin films 23 p4072 A66-41191
 Microcircuit joints evaluated, using
 metallurgical process 23 p4072 A66-41192
 Miniature welding of joints, discussing
 wire-to-wire welding and advantages over
 soldered connections in light of
 environmental parameters 23 p4043 A66-41195
 Weld quality control in cross wire welding
 of assemblies in circuit small quantity
 manufacture 23 p4044 A66-41196
 Thermocompression bonding, discussing
 aluminum wire connection to substrate
 material via eyelet bond 23 p4044 A66-41197

WELDED STRUCTURE

Transverse weld shrinkage and distortion
 in aluminum butt welds due to lack of
 stress equilibrium about neutral planes of
 plate thickness 05 p0686 A66-14696
 Effect of residual stresses/tensional or
 pressure/ on fatigue limit of welded parts
 and structures 08 p1310 A66-19170
 Effect of plastic coatings on fatigue
 strength of steel and welded steel samples
 subjected to concentrated stress 08 p1231 A66-19171
 Welded beryllium-copper structures,
 techniques and properties 13 p2086 A66-26015
 Effect of variations of seven elements on
 resistance of Invar production heats to weld
 metal cracking, using circular patch
 test 14 p2314 A66-27344
 High strength VT14 and VT15 titanium
 alloys in welded sheets studied for structure
 and mechanical properties under hot
 deformation 15 p2523 A66-29193
 Aluminum welding, examining internal
 defects such as porosity and metallurgical
 changes in heat effected zone
 [SAE PAPER 660292] 18 p3117 A66-34944
 Book on manufacturing of welded and
 soldered structures of aircraft including
 material selection, plasma and ultrasound

techniques, economics, etc 21 p3744 A66-38951

Liquid rocket propulsion system weldment design and quality requirements, noting efficiency parameters 22 p3924 A66-40257

Design and fabrication of welded titanium spacecraft structures noting material control, quality, weight factor, etc 22 p3924 A66-40259

Residual stress control in welded structure noting stress reduction by preheat, prestressing by fusion welding and spotweld impact treatment 22 p3924 A66-40262

Joining processes effect on mechanical properties and metallurgical structure of beryllium 22 p3925 A66-40264

WELDING

SA ACETYLENE

SA ARC WELDING

SA BRAZING

SA DIFFUSION WELDING

SA ELECTRIC WELDING

SA ELECTRON BEAM WELDING

SA FUSION WELDING

SA GAS WELDING

SA PRESSURE WELDING

SA SPOT WELDING

SA ULTRASONIC WELDING

Manufacturing reliability control through practical management considering indoctrination, problem solving and measurement, noting welding performance 01 p0076 A66-10098

Energy and thermal considerations during resistance weld between round wire and ribbon 02 p0233 A66-11321

Automated flat pack welding design, discussing operational functions and major components 02 p0234 A66-11323

Reliability control in parallel gap welding used to join integrated circuit flat packs to printed circuit assemblies 02 p0234 A66-11324

Varestraint test used to evaluate base metal weldability and influence of particular welding process and welding variables on hot cracking 02 p0236 A66-12227

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 1 03 p0374 A66-13116

Friction welding technique using heat produced by friction between two surfaces 03 p0374 A66-13117

Electrical characteristics of plasma torch types with plasma jets used in buildup welding 03 p0374 A66-13120

Welding units using ultrasonic vibrations to improve crystalline structure of welds produced by automatic submerged-arc welding process 03 p0375 A66-13122

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 2 03 p0383 A66-13156

Production laser welding of intricate and critical subassemblies incorporated into space vehicles and components 05 p0691 A66-14514

Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 05 p0688 A66-15347

Explosive welding of dissimilar alloy sheets 06 p0886 A66-16366

Nature and properties of white band in welded steels, occurring also as result of heating, noting role of critical temperature range and gradient 07 p1037 A66-17443

Estimation of energy parameters of laser light beam used to weld metals 07 p1037 A66-17626

Welding properties of high strength steels, noting electrodes and carbon diffusion 08 p1231 A66-19169

Mechanical properties of butt welded joints in high-strength aluminum alloy sheet, noting tensile strength, welding techniques and test results 12 p1893 A66-23708

Laser welding for production microwelding, noting design, construction and application [ASTME PREPRINT MM66-707] 12 p1886 A66-24415

Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam welding 12 p1846 A66-24916

Thermocompression welding for electronic devices and interconnects 13 p2086 A66-25773

Production techniques for fissures in weld-

deposited and wrought Ni-Cr-Fe alloy fatigue specimens and fissure effect on fatigue strength 13 p2110 A66-26017

Welding technique advances and testing of bond integrity for microcircuit fabrication 14 p2298 A66-26944

Explosive cladding for strong metal-metal bonds [ASTME PAPER AD66-112] 14 p2299 A66-26951

Parameters in friction welding of dissimilar metals including armco iron, nickel, titanium and aluminum [ASME PAPER 66-MET-8] 14 p2312 A66-26976

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2292 A66-27325

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2301 A66-27345

Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 15 p2511 A66-29989

Atomic site changes in cold pressure welding of metal 16 p2710 A66-30309

18 percent nickel maraging steel properties suitable for welding 16 p2723 A66-30321

Laser welding for advanced electronic packaging 16 p2715 A66-31593

Microcircuit joining techniques advantages and disadvantages from viewpoints of producibility, inspectability and repairability 17 p2882 A66-32115

Program-controlled module design using strips of nickel foil for welding of flatpack assemblies 17 p2930 A66-33121

Refractory metal forming processes including brake, roll, open and closed die forming, warm and hot forging, swaging, deep drawing, ironing, blanking and shearing 19 p3366 A66-36110

Welding and postheat treatment effects on bend ductility transition temperature and strength of second-generation niobium-base alloys 19 p3368 A66-36124

Weldability of nearly 100 tantalum binary or ternary solid solution alloys and dispersion-strengthened alloys, using room temperature bend ductility as criterion 19 p3368 A66-36125

Welding and annealing procedures for fabrication of Nb alloy liquid metal loop and operation in boiling alkali metals 19 p3370 A66-36139

Open air welding of titanium, noting nozzle design for optimum shielding, argon gas flow rate and magnitude of electrode extension 19 p3371 A66-36633

Temperature distribution in two-layer plate during welding by laser light flux 22 p3923 A66-40194

Gas tungsten arc and electron beam welding for iron-base, nickel-base and cobalt-base alloys, noting use of weld filler metal to avoid cracking 22 p3924 A66-40263

Strength of joints made in refractory metals using brazing, welding or diffusion bonding, noting role of coating 22 p3925 A66-40265

Microbonding difficulties in joining flat pack circuits to printed circuit boards, examining parallel gap welding connections with board material and use of dissimilar metals 23 p4043 A66-41189

Welding and adhesion techniques in aircraft and space vehicle construction - Conference, Hanover, West Germany, May 1966 23 p4073 A66-41530

Welding technology in aircraft construction including military aircraft, VTOL, helicopter, TIG method, etc 23 p4073 A66-41531

Welding and gluing of third stage of ELDO-A rocket 23 p4073 A66-41533

WELDING MACHINE

Electron beam welding as production process using Steigerwald or telefocus system, Rogowski system or special Rogowski system 02 p0236 A66-11700

Inherent self-control of arc made possible by elimination of drift in current source output and electrode feed rate 02 p0236 A66-12226

HF multiple-seam arc welding unit that produces six welds simultaneously 03 p0374 A66-13118

Alternating current rectified by tungsten

electrodes of argon shield welding unit and DC component generated affects arc welding performance 03 p0375 A66-13121

Aircraft and commercial application of three-phase direct current resistance welding, using silicon 05 p0685 A66-14518

Pulsed laser welding, wire-to-wire, sheet-to-sheet, circuit board, vacuum tube, etc 07 p1038 A66-18153

Space structure welding-automation system consisting of Sciaky-welding system, automation control and seam-tracking system [ASTME PREPRINT MS66-708] 12 p1886 A66-24409

Gas shielded metal arc welding, discussing power sources, wire feed mechanism, torch and carbon dioxide cylinders 13 p2088 A66-26764

Welding of aluminum alloy for S-IC stage of Saturn-Apollo space vehicle 16 p2713 A66-30592

Vacuum and nonvacuum electron beam welding 16 p2713 A66-30593

Quantitative analysis of drops of material transferred during arc welding 21 p3743 A66-38938

Electron beam welding of aircraft turbine gears 21 p3744 A66-39233

Electron beam welding outside of vacuum, discussing performance and tolerance parameters 22 p3924 A66-40261

Nonvacuum electron beam welding compared with vacuum process, noting effect of voltage, distance, speed, etc, in aerospace applications 22 p3925 A66-40271

Parallel-gap joining techniques, examining electrode using copper insert and brazing application to thin films 23 p4072 A66-41191

WEST FORD PROJECT

Nonorthogonal coding in communicating through dispersive or multipath fading channels for increased data rate without increased bandwidth 06 p0835 A66-16866

WEST GERMANY

Air traffic control methods using radar for long-term planning and solution of West German air traffic control problems 02 p0256 A66-11858

Advisability of West German electronics industry stepping into aviation electronics industry to greater extent 02 p0199 A66-11859

General report of West German Research Institute for Aeronautics and Astronautics for 1964 02 p0216 A66-12073

West German federal air transport authority, scope, organization and objectives 05 p0794 A66-15807

Precision Doppler VOR installation in West Germany 07 p1075 A66-17781

Design and capabilities of supersonic wind tunnel of DVL at Porz-Wahn, West Germany 08 p1203 A66-19826

Space research in West Germany including upper atmosphere time-dependent structure, geomagnetism, space radiation, artificial ion cloud, etc 09 p1458 A66-20713

Air traffic control in West Germany, considering higher air traffic density and operating speeds 15 p2534 A66-29366

Civilian aircraft accident investigation in West Germany 19 p3294 A66-36442

WESTLAND SR-N5 GROUND EFFECT MACHINE

SR-N5 hovercraft accidents analyzed for prevention of future overturnings or plough-ins 05 p0609 A66-14866

WETTING

S SOAP

WHEATSTONE BRIDGE

Piezoresistive effect and application to semiconductor silicon pressure transducers, noting diffused silicon beam and diaphragm and Wheatstone bridge 02 p0228 A66-11515

Hot wire Wheatstone bridge used in automatic control and method to obtain linear response in large speed fields 02 p0229 A66-11760

Thermal bridge similar to Wheatstone bridge for measuring thermoconductivity of solid semiconductors 04 p0519 A66-13661

WHEEL

S REACTION WHEEL

S TURBINE WHEEL

WHEEL BRAKE

Landing gears and operation illustrated in modern aircraft 16 p2635 A66-31881

WHIRL INSTABILITY

Vibrational and stability behavior of unbalanced shaft running in cylindrical journal bearing, noting oil film elastic effects 01 p0151 A66-10285
Self-excited rotor whirl resulting from static pressure and rotor eccentricity, noting remedies [ASME PAPER 64-WA/GTP-4]

Nonmathematical notes on propeller whirl flutter 02 p0279 A66-11762
Stability of symmetrical elastic rotor in journal bearings with flexible damped supports 02 p0300 A66-11993
[ASME PAPER 65-APMW-8]

Whirl instability and pneumatic hammer for rigid rotor in pressurized gas journal bearings [ASME PAPER 65-LUB-12]

Stability of symmetrical elastic rotor in journal bearings with flexible damped supports 04 p0527 A66-14245
[ASME PAPER 65-APMW-8]

Externally pressurized gas journal bearings, evaluating various design parameters for operating at high temperatures and high speeds [ASME PAPER 66AM 4B2]

Internal nonlinear material damping effects on whirling motion of elastic shaft, noting response curves for Mentel-Fu stress-strain law 16 p2711 A66-30410
21 p3745 A66-39434

WHISKER

Strength of whiskers in fiber composite materials 05 p0705 A66-14809
Ceramic and graphite fibers and whiskers, Air Force sponsored 09 p1392 A66-20475
Economic process for vapor phase formation of refractory fibers and whiskers using hydrogen, carbon dioxide, carbon monoxide and chlorine source gases [AICE PREPRINT 18A] 10 p1548 A66-21183
Reinforcement of plastics and metals by silicon nitride whiskers limited to temperatures below 900 degrees C [AICE PREPRINT 18D] 10 p1548 A66-21184
Gallium arsenide whiskers on germanium structure, using electron diffraction photography and electron microscopy 11 p1757 A66-23280

Unidirectional solidification in production of whisker strengthened metals 12 p1896 A66-24466

Reinforcement with whiskers of high temperature metals such as nickel, cobalt and nickel-chrome alloys 12 p1896 A66-24467
Vapor phase process to form aluminum oxide whiskers on nuclei suspended in reacting gas stream 12 p1896 A66-24468
Role of discontinuous fibers /whiskers/ in forming composites and how reinforcing parameters and processing vary from those used in continuous fibers systems, noting differences between boron and fiberglass whisker characteristics 13 p2113 A66-25310

Morphology and structure of gallium arsenide crystals containing germanium core grown by iodine transport process in closed tube 13 p2170 A66-26587

Composite materials, noting fibrous composites using whiskers, fabrication including spray-up, filament winding, etc, mechanical properties, application for rocket nozzles, heat shields, etc 14 p2318 A66-27228
Chromium doped ruby whiskers grown by vapor phase reaction, determining chromium concentrations, noting whisker growth morphologies 15 p2561 A66-28706

Germanium single crystal whisker formation by iodide method of selective epitaxial growth 16 p2781 A66-31405

Whisker composite materials, discussing potential of whiskers, utilization of whisker strength, whisker growth, handling whiskers and composite properties 20 p3588 A66-38183
Factors affecting strength of whisker reinforced metals, noting characteristics [ASME PAPER 66-MD-81]

Metallic and nonmetallic whiskers for reinforcing metal composites 21 p3750 A66-38504
21 p3752 A66-39241

Whisker reinforcement of metals and effects on linear elastic stress-strain relations 21 p3752 A66-39367

WHISTLER

Whistler mode propagation in plasma in decreasing static magnetic field 01 p0026 A66-10544
Frequency spectrum of large positive and negative Doppler shifts in VLF signals in whistler mode of propagation 04 p0517 A66-14182

Electron density distribution in magnetosphere inferred from dispersion characteristics of hydromagnetic wave propagating between hemispheres along geomagnetic field as in atmospheric whistlers 05 p0747 A66-14787
Whistler in Alouette I satellite VLF recordings, variation of time delay with frequency given by Eckersley law time delay and additive correction term 05 p0668 A66-14797

Anisotropic electron velocity distribution for magnetosphere assumed and complex refractive indices evaluated, using cyclotron absorption explanation of whistler cut-off 05 p0631 A66-14835
Fractional deviation of nose whistler group delay from zero-temperature model, assuming Maxwellian magnetosphere and gyrofrequency electron density distribution 05 p0631 A66-14836

Atmospheric whistler activity, discussing anomaly of low geographic latitude detection and various propagation modes at Rabat, Morocco from 1956 to 1958 05 p0673 A66-15048

Proton whistler observations from Injun III VLF data, including spectrograms, time-latitude-altitude graphs and theory 08 p1217 A66-19392

Fractional concentration of hydrogen ions in ionosphere from VLF proton whistler measurement 08 p1218 A66-19393

High time-resolution measurement of knee position in magnetospheric ion density using whistlers 10 p1527 A66-21137

Electron density and total electron content in force tubes near knee in magnetospheric ionization studied, using whistlers 10 p1527 A66-21138

Hydrogen ion concentration, electron density and proton gyrofrequency determined from proton whistler dispersion 10 p1528 A66-21140

Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Cyclotron instabilities in hydromagnetic waves in magnetosphere as possible origin of geomagnetic micropulsations, stressing ion resonance mode of waves relevant to hm whistlers 12 p1874 A66-24842

Smith subprotonospheric whistlers and digital computation of ion effects on whistler-mode ray tracing 14 p2282 A66-26858

Electronic whistlers for calculation of proton density at satellite heights, based on symmetry existing in expressions containing two time and frequency variables 14 p2376 A66-27623

Helium whistler detection by VLF receiver aboard Canadian satellite Alouette II, noting application to composition and electron density measurement of ionosphere 14 p2285 A66-27847

Ion composition and natural electromagnetic emissions of VLF phenomena observed by Alouette I and II 15 p2496 A66-30074

Transmission loss in whistler mode of propagation of VLF radio waves for path portion underneath ionosphere, using geometrical optics 16 p2652 A66-30709

Propagation characteristics of whistler mode radio signal over one-hop path from transmitter magnetic conjugate point to far-away receiver, noting transmission loss 16 p2652 A66-30710

Frequency-time spectrograms supporting discovery of two whistlers in VLF radio noise data from Injun III 17 p2919 A66-32930

Radio noise bursts from Jupiter at decimeter wavelengths noting Cerenkov emission, Doppler-shifter cyclotron emission

and escaped-whistler models 18 p3225 A66-33550

Dispersion characteristics of duct propagation of whistler radio waves along depressed magnetoplasma slab 18 p3072 A66-34568

Exact solution of nonlinear relativistic equations of motion for electron in right circularly polarized wave propagating in whistler mode parallel to external magnetic field 19 p3303 A66-35998

Propagation paths between hemispheres followed by usual and unusual whistlers, giving rise to series of echoes 20 p3553 A66-38077

Ionospheric ion temperature from cyclotron damping of proton whistler 20 p3554 A66-38195

Magnetospheric plasma instabilities, discussing resistive, flute type, whistler and HF two-energy component electrostatic loss-cone instability 20 p3642 A66-38333

Cerenkov absorption of whistlers in nonhomogeneous plasma cylinder, noting electron heating 21 p3780 A66-39005

Whistler mode excitation in ionosphere by leakage from VLF guide-wave modes, noting nonreciprocal attenuation over north-south propagation path 22 p3863 A66-39932

Upper ionospheric electron density, electron gyrofrequency, ion density and ion gyrofrequency deduced from whistler-mode waves group index, energy distribution and dispersion curves 22 p3911 A66-39989

Plasma concentration diagnostics in exosphere from delay time of forward frequency as function of parameter of whistler trajectory 22 p3915 A66-40774

Guiding of whistlers due to exospheric anisotropy, electron density and geomagnetic field effects 22 p3915 A66-40803

Wave packet propagation at whistler and hydromagnetic frequencies in magnetolonic medium, noting group refractive index 23 p4041 A66-41643

Measurement technique for variations in optical path of gyroelectric echoes generated by long wave transmitter and propagating in whistler mode 24 p4176 A66-42995

Electromagnetic structure of radioelectric whistlers, considering wavefront curvature in D layer, noting signal reception at two distant ground stations 24 p4176 A66-43001

WHISTLER RECORDER

Broadband VLF emissions observed to determine whether whistler mode signals appearing below ionosphere travel toward polar regions and at low latitude from auroral zone 01 p0012 A66-10893

Whistler and VLF emissions recorded in northern Italy, noting daily occurrence and positive correlation with geomagnetic activity 05 p0671 A66-14983

WHITE DWARF STAR

Text on sources of stellar energy, internal structure of stars and evolution of stars 09 p1447 A66-20090

Ideal relativistic degenerate gas in white dwarf star interiors, discussing state equations, thermodynamic relations, electron-ion gas mixtures, etc 21 p3775 A66-38823

Suggestion that quasar red shifts result from inflow of matter at relativistic velocity in gravitational field of highly condensed white dwarf 24 p4274 A66-42419

WHITE NOISE

Optimum detection of diffusion process in white Gaussian noise, using continuous observation 02 p0190 A66-11405

White noise loading of multichannel communication systems 03 p0333 A66-12492
Nonsteady optimum-filtering problems where useful and noise signals are related to white noise by different equations 04 p0505 A66-13979

Mercury and zinc ions in germanium, discussing hole capture cross section in comparison to standard white noise source 05 p0731 A66-14660

Finite wide-sense stationary sequence followed by another sequence corresponding to linear filtering without delay, minimizing mean square error 06 p0828 A66-16116

Optimum linear separation of random message from additive white noise of given spectral height realized as unity feedback

system 06 p0832 A66-16449
 Optimum rate allocation for encoding sets of analog messages when allocation total is fixed by channel capacity 06 p0833 A66-16667
 Linear vibratory system response to random impulses, describing nonstationary white noise and mean square resonance 07 p1143 A66-17731
 Wiener filters in phase locked loop design, noting tracking function for orbital trajectory, derivation of optimum filter and noise bandwidth 09 p1350 A66-19921
 Spectral density of white noise generated in uniformly multiplying p-n junction calculated for any distribution of injected carriers 10 p1515 A66-22087
 Discrete white noise used to generate discrete colored noise by means of difference equation 12 p1850 A66-24266
 Optimal control and stability for stochastic systems, viewing linear diffusion models based upon Gaussian-Markov process as finite dimensional linear system driven by white noise 12 p1854 A66-24637
 Polarized varactor diodes used in avalanche zone as intense white noise source 13 p2031 A66-25408
 Optimum linear filtering of integrated signal in white noise, deriving expression for minimum mean square error 13 p2023 A66-25664
 Mercury and zinc ions in germanium, discussing hole capture cross section in comparison to standard white noise source 13 p2167 A66-25935
 Stability of phase-locked loops using Fokker-Planck equation and under additive stationary white Gaussian noise linearized about some equilibrium point 13 p2025 A66-26075
 Frequency domain design of time-limited binary signals imbedded in colored Gaussian noise 13 p2052 A66-26078
 Smoothing of stationary random noise by discrete smoothing network, analyzing conditions for discrete white noise, harmonic noise, etc 14 p2264 A66-27359
 Optimum signal reception against non-Gaussian noise background in presence of white Gaussian noise 14 p2241 A66-28148
 Analog communication over randomly time varying channels 16 p2654 A66-31331
 Stochastic analysis of systems described by linear differential equations subject to random disturbances, noting application to variational behavior of optimal control systems 17 p2900 A66-32076
 Redundancy removal processes, classification and nomenclature compared by plotting compression ratio vs rms error and stressing ZVA process 18 p3070 A66-34261
 Detection and measurement of parameters of signals in white noise 18 p3091 A66-34985
 Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879
 Stability limits of coupled and specially damped system subjected to parametric random excitation by white noise 19 p3401 A66-36301
 Mean-square comparison of zero-order hold, exponential hold and polygonal hold vs linear nonrealizable interpolation procedure for various sampling schemes 19 p3336 A66-36702
 Sequential estimation on states of linear systems disturbed by white noise, determining relations between covariance matrices 19 p3338 A66-36736
 Linear system providing maximum signal to noise ratio for given parameters of correlation function of incoming quasi-harmonic signal mixed with white noise 20 p3515 A66-37379
 Dynamic instability of longitudinal and transverse oscillations of rod, emphasizing fluctuation having property of white noise with unit spectral density 20 p3670 A66-37680
 Systematic method of obtaining complex formulations of problems involving white noise, considering deterministic narrow-band signal detection of random phase 21 p3721 A66-39642
 Colored noise under conditions where noise sources produce white Gaussian noise

and physical system is modelled by linear finite-dimensional dynamical systems 22 p3884 A66-40397
 Mean-square error of step-wise interpolation for various sampling schemes on Markov process or band-limited white noise 22 p3941 A66-40695
 Response spectrum of random vibration of nonlinear oscillator predicted by applying classical perturbation method to statistical moments of random response of nonlinear systems 23 p4097 A66-41954
 First passage problems for lightly damped linear oscillator excited by white noise, discussing time probability distribution, densities, application of computers to obtain numerical solutions, etc 24 p4284 A66-42140

WHITHAM RULE

Wave propagation theory for nonlinear dispersive systems when proportional change in amplitude or wave number over distance of one wavelength is very small 05 p0716 A66-15054
 Relation between shock expansion method and Whitham rule to examine shock wave motion in nonuniform region 16 p2691 A66-31661

WHITTAKER FUNCTION

Asymptotic solutions of second-order ordinary differential equations in region containing irregular singularity of rank one, with application to Whittaker functions 05 p0710 A66-15475

WIDE ANGLE LENS

IR planet horizon sensor design, noting filter for uniform radiance, wide angle lens and special detector 11 p1706 A66-22891

WIDEBAND COMMUNICATION

Impedance behavior and frequency dependence of radiation pattern of wideband sheet antenna 01 p0036 A66-10366
 Wideband junction circulator design with maximum product of isolation and frequency bandwidth but maintaining minimum temperature and DC magnetic field variation 01 p0040 A66-10548
 Wideband FM transmitters and RF-to-RF repeaters for space application in S- and X-band frequency ranges 01 p0032 A66-11129
 Thin film integrated wideband amplifier with details on circuit, construction, performance and outline of design process 02 p0202 A66-11918
 High power wideband RF voltage and power amplifiers covering design, operating characteristics, differences, etc 04 p0494 A66-13683
 Envelope polarity coincidence crosscorrelator for detection and identification problems involving weak wideband microwave signals 05 p0646 A66-14613
 Nanosecond pulse, FM/CW and frequency stepping methods for measuring radar cross section and effects of using wide bandwidth transmission 10 p1499 A66-21606
 Cost and performance comparison of satellites, relay links, waveguides and lasers, showing line-of-sight microwave relay is best wideband data transmission medium 14 p2238 A66-27667
 Coherent transmission of optical radar from laser source and use of RF subcarriers placed on optical beams for wideband communications purposes 14 p2244 A66-28404
 FM 10 watt S-band transmitter for space telemetry and data application 16 p2651 A66-30560
 Telemetry transmitters using solid state wideband microwave voltage-controlled oscillators operating in S, C and X bands 19 p3316 A66-35683

WIDMANSTATTEN PATTERN

Widmanstatten structure in titanium diboride single crystals, noting effects of annealing at high temperatures and determining plane orientation on any surface 12 p1897 A66-24918
 Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967
 Plessite composition and texture, discussing possible origin in terms of meteorite thermal history 19 p3460 A66-35732
 Widmanstatten patterns for electrolytic dissolution of iron meteorites and separation of nonmetallic portions, particularly kamacite 21 p3816 A66-39493
 Butler iron meteorite composition, noting

very high concentration of germanium, gallium and nickel exhibiting Widmanstatten pattern 22 p3978 A66-40014

WIDTH

S BANDWIDTH
 S SPECTRAL LINE WIDTH

WIENER FILTER

Probability models for Earth crustal structure applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 01 p0061 A66-10479
 Decomposition theory of continuous submartingales 01 p0094 A66-10728
 Wiener theory for analysis and synthesis of nonlinear physical systems applied to non-Gaussian and Gaussian inputs 05 p0656 A66-14629
 Filtering techniques for estimating nonlinear discrete-time processes, including Bayesian estimation and weighted least squares approach 05 p0656 A66-14631
 Wiener problem applied to synthesis of automatic control system incorporating minimum phase, nonminimum phase or unstable element 08 p1201 A66-19686
 Wiener filters in phase locked loop design, noting tracking function for orbital trajectory, derivation of optimum filter and noise bandwidth 09 p1350 A66-19921
 Probability models for Earth crustal structure, applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 12 p1868 A66-23877
 Wiener problem applied to synthesis of automatic control system incorporating minimum phase, nonminimum phase or unstable element 18 p3091 A66-34672
 Sensitivity of performance of optimal control systems to plant parameter variations 19 p3329 A66-36027
 Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859
 Continuous time multivariate optimal filter for feedback realization applied to augmentation and rapid alignment of inertial systems 20 p3596 A66-37231
 Filter theory method applied in solving analytical construction problems for optimal controllers, noting existence of Fourier transform and Pally-Wiener condition 21 p3719 A66-39282
 Fixed filter structures optimized according to criterion of minimizing average mean square error for nonstationary and statistical description of signals in noise 23 p4039 A66-41591

WIENER-HERMITE EXPANSION

Quasi-linear approximation for turbulent plasma obtained via Wiener-Hermite functional expansion for electric field and distribution function 23 p4104 A66-41504

WIENER-HOPF EQUATION

Frequency domain approach to minimizing quadratic performance index for system with only one available control 01 p0050 A66-10017
 Generalization of Wiener-Hopf integral equation in class of mixed boundary value problems 01 p0094 A66-10506
 Group classification of solutions to Hopf equation according to type of viscosity coefficient 08 p1209 A66-19476
 Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 11 p1666 A66-22720
 Wave diffraction problems in wedge-shaped regions solved, using Wiener-Hopf and Helmholtz equations and superposition principle 12 p1915 A66-24819
 Torsion of elastic cone as mixed boundary value problem, using Mellin transforms and Wiener-Hopf technique 14 p2408 A66-28395
 Density of Gaussian distributions and Wiener-Hopf integral equation 15 p2526 A66-28606
 Two Fredholm integral equations encountered in elasticity theory solved by Wiener-Hopf method 17 p2947 A66-32783
 Admittance problem of cylindrical antenna in homogeneous anisotropic medium formulated and analyzed, using Fourier

transforms and Wiener-Hopf technique 17 p2897 A66-33428

Stress calculation for infinite strip containing straight semiinfinite crack when clamped boundaries are displaced normal to crack 18 p3248 A66-33583

Electric field in MHD generator channel under mixed boundary conditions solved by Wiener-Hopf technique, evaluating ohmic losses 20 p3500 A66-37491

Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139

Wiener-Hopf technique for exact solution of plane Green flow past half-plane and horizontal for singularity 22 p3901 A66-40452

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 23 p4045 A66-41458

Electric field normally incident onto warm semiinfinite plasma obtained by Wiener-Hopf technique and Vlasov equation 23 p4103 A66-41492

Wiener-Hopf solution of thermococonductivity boundary value problems 23 p4149 A66-41558

WIND

SA ATMOSPHERIC CIRCULATION

SA CIRCUMPOLAR VORTEX WIND

SA GEOSTROPHIC WIND

SA GUST

SA SOLAR WIND

Low cloud characteristics over Sea of Japan during winter monsoon 11 p1729 A66-22324

Origin of cloud streaks extending over Pacific Ocean near Japan during winter monsoon 11 p1729 A66-22325

Winds in upper atmosphere as revealed by sodium vapor trails explained on basis of prevailing and tidal components critically analyzed 11 p1701 A66-23147

WIND CIRCULATION

Air motions and physical factors affecting general circulation in mesosphere and lower thermosphere 05 p0711 A66-15027

Stability of expanded circumpolar vortex, using available record of 700-mb subtropical westerly index values for five-day means from 1943 through 1965 07 p1062 A66-17372

Analytical particular solution of vorticity equation, using kinematic boundary condition and wind field approximations 08 p1246 A66-18801

Zonal wind profiles in 850-mb surface at different latitudes as aid in medium range weather forecasting 08 p1246 A66-18802

Approximate formula for probability density of time lapse between wind gusts 08 p1247 A66-18803

Wind and turbulence distribution caused by barriers and complex surfaces adjacent to missile launching sites [AIAA PAPER 66-335] 12 p1906 A66-24483

Distribution and variation of atmospheric density over thermosphere, including auroral region, noting wind motion and high altitude circulation 14 p2382 A66-27618

Regression equation technique for objective wind forecasts at 300 mb 17 p2949 A66-32793

Objective analysis of wind and temperature distribution in vertical cross section through atmosphere derived from radiosonde and rawinsonde data 17 p2949 A66-33336

Low level wind jets at White Sands Missile Range 17 p2949 A66-33339

Upper wind data as observed compared with data derived from serially completed upper wind records 17 p2922 A66-33341

Coupling mechanism correlated between quasi-biennial oscillations in polar and tropical latitudes of stratosphere 18 p3104 A66-33926

Empirical formula for calculating surface wind conditions from barometric field 19 p3394 A66-36453

Internal atmospheric gravity waves in isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflected energy, etc 20 p3554 A66-38202

Wind distribution in atmospheric boundary layer under conditions of advection from

pilot balloon observations 20 p3594 A66-38376

Diurnal heating of ozonosphere near stratopause level results in diurnal temperature variation of 15 degrees C and development of tidal circulation in stratospheric wind field 22 p3916 A66-40874

WIND DIRECTION

Annual variation of wind direction and jet stream across Greenwich meridian 07 p1063 A66-18337

Error effects in forecasting wind speed and direction on equivalent headwinds and flight times 07 p1063 A66-18338

Aerial observation of sea surface, measuring wind direction, speed, wave direction and period of Gulf Stream along coast 10 p1532 A66-21524

Lower atmospheric diurnal variations in air temperature, directional wind velocity and gradients during clear anticyclonic weather 16 p2742 A66-30774

WIND EFFECT

Shortest time air routes determined by method based on law of refraction, assuming quasi-continuous wind field 02 p0260 A66-12055

Tiros photographs of tropical cumulus and cirrus clouds along vertical wind shear vector 11 p1726 A66-22310

Inhomogeneities shape effect on drift rate in ionosphere under wind and electric field effect 11 p1696 A66-22413

Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319

Weather support problems in Gemini and Apollo programs [AIAA PAPER 66-334] 12 p1953 A66-24475

Ballistic wind and density predictions, measuring wind and D-value at 500 mb, calculating missile response to atmospheric effects [AIAA PAPER 66-359] 12 p1906 A66-24478

Real time system for measuring and analyzing meteorological data for computing launch angles for unguided rocket flights [AIAA PAPER 66-336] 12 p1953 A66-24481

Geological data on Mars, noting effect of wind 13 p2189 A66-26580

Flight Load Survey program, written in Fortran IV, for accurate and rapid sounding of wind-induced loads on aerospace launch vehicle [AIAA PAPER 66-470] 16 p2811 A66-31473

Structural vibration of large microwave steerable radio telescopes and large paraboloidal reflectors due to wind loading 18 p3255 A66-34268

Wind effects on antenna structures studied to determine feasibility of operation without radome in various weather conditions 18 p3083 A66-34291

Winds caused by synoptic situations and strong local turbulence effect on evaporation measurements at Adriatic seaboard of Central Italy 18 p3130 A66-34720

Pilot dynamic response in bank angle control maneuver simulation of sidewind landing of aircraft [ICAS PAPER 66-14] 22 p3945 A66-40672

Bidirectional ascent trajectories of low altitude meteorological rocket, examining effect of wind on peak altitude attainability 23 p4086 A66-41215

Cross wind effect on special small rocket during powered flight, calculating flight path angle at burnout for launching angle determination 23 p4133 A66-41442

Atmospheric turbulence statistical characteristics dependence on stratification and elevation from heat flux and wind friction stress 23 p4087 A66-41800

Refraction due to acoustic focusing of sound waves in lower troposphere, noting effect of wind profile 24 p4203 A66-43108

WIND MEASUREMENT

SA ANEMOMETER

Stratospheric monthly temperature variation at latitude 15 degrees N between 25 to 55 km in phase angles and amplitude 02 p0223 A66-11959

Harmonic analysis of solar diurnal and semidiurnal variations of wind, pressure and temperature in stratosphere, comparing observed and wind-derived heights and temperature 04 p0515 A66-13672

Pressure, density, temperature and wind measurements in mesosphere resulted from rocket soundings to determine structure 07 p1027 A66-17361

Skua Meteorological Rocket and use for temperature and wind data 07 p1141 A66-18335

Thermal and wind structures related to major cloud bands of Tiros-photographed extratropical vortices 08 p1248 A66-19384

Accurate calibration of Doppler winds for use in computation of mesoscale wind fields 09 p1399 A66-20728

Upper atmospheric diurnal tide determined via sodium vapor trail measurements 11 p1701 A66-23146

Tower and triple theodolite pilot balloon measurements of time and space variability 11 p1730 A66-23380

Universal turbulence measuring system giving quantitative measure of turbulent intensity independent of type or speed of aircraft, using all-weather sensor [AIAA PAPER 66-364] 12 p1906 A66-24476

Multivariate statistical analysis of wind sounding data, applying high degree of correlation between two wind parameters and empirical density function [AIAA PAPER 66-353] 12 p1907 A66-24489

Predictability of winds and virtual temperature profiles for flight and static test operations, establishing forecast verification criteria [AIAA PAPER 66-378] 12 p1908 A66-24503

Loki Dart meteorological rocket system for temperature and wind measurement in 75,000 to 200,000 ft altitude region [AIAA PAPER 66-383] 12 p1908 A66-24507

Upper atmospheric wind measurement with gun launched projectiles, computing wind component contour parameters [AIAA PAPER 66-403] 12 p1908 A66-24515

Continuous measurement of ionospheric winds based on observation of meteor trails 13 p2072 A66-25449

Northward momentum transfer across asymmetric jet in three-dimensional atmosphere analyzed, using initial value problem, noting energy transfer and transformation 13 p2064 A66-26128

Density, temperature and wind data of strato-and mesosphere, together with water vapor measurements in central tropical Pacific, using rocket and balloon soundings 15 p2485 A66-28937

Measuring techniques of winds and temperatures in upper atmosphere with Judi-Dart and other small meteorological rockets 15 p2485 A66-29066

Dutch space research program noting solar and stellar research, cosmic radiation, wind measurement, rocket sounding, etc 15 p2600 A66-29910

Meteorological rocket measurement of wind patterns noting velocities, turbulences, stratospheric diffusion coefficients, etc 15 p2492 A66-30028

Rocket smoke-trail wind measurement technique 15 p2534 A66-30072

Atmospheric wind measurement technique utilizing acoustic noise of rocket exhaust [AIAA PAPER 66-440] 16 p2741 A66-30601

Wind direction component measurement on high meteorological tower 16 p2705 A66-30777

Diurnal oscillation in zonal and meridional winds determined, using harmonic analysis on data obtained from meteorological rocket soundings 16 p2699 A66-31641

Stability of baroclinic axially symmetric vortex on F plane to axially symmetric disturbances 16 p2700 A66-31643

Barotropic atmospheric model for forecasting in tropics, discussing wind analysis area covered, accuracy, etc 17 p2948 A66-31943

Upper wind theodolite measurement error caused by ambiguous utilization of rate of climb of balloon 18 p3128 A66-33962

Energy and momentum budget of atmosphere above tropopause determined by computing momentum and heat transports from wind and temperature observations up to 30 km 19 p3347 A66-35643

Instrumentation of bending moments on large space boosters, discussing ground wind restrictions, telemetry system used, data transmission link, etc 19 p3356 A66-35678

CIRA 1965, COSPAR International

- Reference Atmosphere covering mean atmospheric structure variations from 30 to 100 km and from 120 to 800 km 19 p3352 A66-36796
- Upper wind evaluation by pilot and radiosonde balloon radar tracking for flat Earth and effects of Earth curvature 22 p3943 A66-40428
- Ionospheric winds measurement by luminous trimethyl aluminum trails produced by gun-launched projectiles 24 p4200 A66-42592
- Low level atmospheric flow structure resolution, noting equipment and results on wind speed variations 24 p4235 A66-43077
- WIND PRESSURE**
- Wind forces and moments on parabolic antennas supported above ground 04 p0495 A66-13803
- Frontogenetic potentialities of wind deformation fields determined, using mathematical model of atmosphere 24 p4234 A66-42979
- WIND PROFILE**
- Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 01 p0096 A66-10754
- Generalized dimensional analysis applied to wind distribution in planetary boundary layer, using motion equations 02 p0223 A66-11981
- Mesoscale wind structure revealed by Doppler wind soundings taken in lower 4.5 km of atmosphere at 12-minute intervals in snowstorm 04 p0541 A66-13668
- Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 06 p0906 A66-16555
- Plane nonlinear stationary problem of hill slope winds reduced to set of finite difference equations and solved by simple and matrix factorization combined with iteration by computer 09 p1398 A66-19885
- Four wind profiles analyzed for vertical scale structure and wind shear in mesosphere due to falling sphere 11 p1729 A66-22564
- Temporal spectra of atmospheric angular momentum transfer from wind data at various tropospheric and lower stratospheric levels 11 p1697 A66-22566
- Design of control deflections and structural loads of space vehicle for flight stability through atmospheric disturbances [AIAA PAPER 66-350] 12 p1954 A66-24487
- Factors connected with atmospheric dynamic processes, applying hydrodynamic equations to wind field and pressure field variations 12 p1909 A66-24786
- Ionospheric wind patterns studied by distortion of chemiluminous vapor trails from rockets 14 p2280 A66-26838
- Conventional rawin, pibal and surface wind data compared with photoreconnaissance data, showing cumulus population and patterns over Florida 14 p2325 A66-26927
- Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 14 p2326 A66-27853
- Survival probability of launch vehicle rising through random wind field determined from component responses 14 p2391 A66-27870
- Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 14 p2328 A66-28227
- Thermal stratification and thermostability effects on turbulent diffusion approximated by Swinbank exponential wind profile 15 p2530 A66-28603
- Expressions for wind profile under nonneutral conditions, analyzing various hypotheses 15 p2533 A66-28939
- Vertical atmospheric temperature and wind distribution in optimal parametric representations 15 p2489 A66-29775
- Rocket observation of upper atmospheric winds, noting wind shear, velocity, pressure, wind vector rotation, etc 15 p2492 A66-30027
- Rocket smoke-trail wind measurement technique 15 p2534 A66-30072
- Numerical analysis of wind velocity profile measurements and theoretical calculation of profile by numerical methods, based on geostrophic friction coefficient 16 p2741 A66-30771
- Air-temperature and wind profiles in atmospheric boundary layer and dependence upon stability criteria of ground layer 16 p2741 A66-30772
- Optimal gain settings for atmospheric turbulence in 407 Jimsphere wind profiles [AIAA PAPER 66-484] 17 p2902 A66-32770
- Turbulence coefficient and mean altitude of atmospheric boundary layer determined from diurnal temperature variations and wind profile 19 p3348 A66-35939
- Wind profiles obtained from meteorological tower plotting wind velocity, normalized by value of friction velocity, as function of measurement heights 21 p3759 A66-39356
- Wind and temperature profiles for constant flux atmospheric boundary layer in lapse stratification implying relation between eddy transfer coefficient ratio and stability parameter 24 p4202 A66-42982
- WIND SHEAR**
- Contribution of divergent wind components to energy exchange between baroclinic and barotropic components 09 p1399 A66-20726
- Role of coupling phenomena in recombination processes of complex ionosphere composed of two types of positive ions examined via wind-shear theory 10 p1526 A66-21123
- Equilibrium theory of ionization transport in ionosphere predicts tendency for thin layers of overdense ionization to form in E region 10 p1531 A66-21279
- Four wind profiles analyzed for vertical scale structure and wind shear in mesosphere due to falling sphere 11 p1729 A66-22564
- Mean wind vector shear and shear interval and standard deviation, examining correlation 11 p1730 A66-23097
- Changes in current kinetic theory of NO-O reaction, based on observation of release of nitric oxide in E region 11 p1703 A66-23494
- Relationship of layer thickness and/or wind speed to wind shear [AIAA PAPER 66-352] 12 p1907 A66-24488
- Prevailing and tidal wind shears in sporadic E region determined from 29 sodium vapor trails 14 p2280 A66-26840
- Wind-shear theory of sporadic E layer at temperate zone with single ion and many ions, noting electron density 14 p2281 A66-26844
- Mixtures of ions in wind-shear theory of sporadic E layer, noting ion recombination 14 p2281 A66-26845
- Sporadic E and ionospheric current correlation in summary of E layer, wind-shear theory and wind system 14 p2281 A66-26846
- Midlatitude sporadic E layer formation from vertical gradients of charge density, electric and geomagnetic fields 14 p2281 A66-26847
- Sporadic E layer formation by wind motion in conjunction with geomagnetic and electric fields 14 p2281 A66-26848
- Ionospheric winds from midlatitude winds delineated by luminous trails in five reports at Estes Park seminar 14 p2282 A66-26852
- Sporadic E layer theory and problems 14 p2282 A66-26853
- Wind shear, gravity waves and Richardson number in relation to clear air turbulence /CAT/ 15 p2425 A66-28912
- Atmospheric model describing generation of clear air turbulence /CAT/, noting horizontal shear effect 15 p2532 A66-28915
- Aircraft safety, noting minimization of clear air turbulence, mountain wave and wind shear effects 15 p2533 A66-28933
- Wind shear theory of formation of temperate zone blanketing sporadic E layers, noting motion equation for ions in ionospheric E region 15 p2490 A66-29948
- High incidence and erraticism of sporadic E occurrence in temperate zones where horizontal component of geomagnetic field is greatest, attributed to horizontal wind shear 15 p2490 A66-29949
- Vertical wind shear effect on development and structure of convection, noting perturbation growth rate and unstable stratification 16 p2742 A66-31110
- Annual variations in atmospheric lunar tides attributed primarily to vertical shear of zonal wind systems 16 p2698 A66-31112
- Wind shear problems in terminal operations, considering effects on aircraft as longitudinal and lateral components 17 p2843 A66-32202
- Triangulation technique for correlating trail points on films of chemical cloud releases in space from two different sites to determine winds and wind shear 18 p3110 A66-33743
- High altitude research project using 16-inch gun for measurement of upper atmospheric wind shear patterns 19 p3340 A66-36644
- Sporadic E layers formation by wind shears, noting role of neutral wind temporal variations and rapid transition from day to night in layers with vertical gradients 22 p3907 A66-39961
- Coupling phenomena in recombination processes of complex ionosphere composed of positive ions under vertical field of ionization drift applied to wind shear theory of sporadic E layers 22 p3907 A66-39962
- Role of positive ion composition in wind shear theory of sporadic E layers, examining cases for meteoritic, No and oxygen ions 23 p4063 A66-41644

Swedish and European wind tunnel characteristics and parameters of performance in terms of Reynolds, Mach and Knudsen numbers 14 p2270 A66-27563

Blockage corrections for streamline blunt-based bodies of revolution in closed wind tunnel 14 p2271 A66-28186

Bibliographical review of German, French and English texts relative to aeronautical engineering, theoretical and applied 15 p2425 A66-29363

Shock wave thicknesses and density ratios measured in helium, argon and nitrogen, using electron beam fluorescence method at various Mach numbers in wind tunnel 15 p2480 A66-29736

Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737

Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375

Reduction of thick boundary layers in low density wind tunnel by applying suction to nozzle, using high-speed cryopump 16 p2673 A66-30381

Reevaluation of data and equations used in calculation of air viscosity coefficient and application to wind tunnel experiments 16 p2685 A66-30911

High-velocity subsonic flow past wedge in wind tunnel with perforated walls, applying solution to optimum parameter determination of suction sytem 16 p2630 A66-31291

Homogeneous turbulent shear flow generation in open-return wind tunnel test-section by plane parallel-rod grid 16 p2691 A66-31658

Velocity profiles in outer region of turbulent boundary layer in porous part of floor of wind tunnel for various mass transfer rates 17 p2905 A66-31841

Film cooling in supersonic free stream flowing along flat plate in Mach 3 wind tunnel, using air as secondary fluid 17 p2839 A66-32441

Wind tunnel analysis of separated flow in region of several two-dimensional flow perturbations, presenting fluctuating pressure levels as function of Mach number for undisturbed flow [AIAA PAPER 66-456] 17 p2910 A66-32762

Boundary layer control using smoke tunnel, discussing sources and scale of tunnel turbulence 17 p2912 A66-32965

Short duration simulation of rocket exhaust products, flow duration through nozzle and effect on recirculation flow fields 17 p2904 A66-33475

Mach 16 hot shot wind tunnel testing of film cooling techniques 17 p3039 A66-33482

Wind tunnel experiments on thin two-dimensional airfoil with sharp leading edge and with jet blowing through mid-chord slot on upper surface in order to control boundary layer and circulation around it 18 p3048 A66-33950

Aerodynamic noise in wind tunnel heat exchanger 18 p3094 A66-34020

Structure of flow past bodies with radial cross section in wind tunnel at various Mach

numbers and angles of attack, noting position of shock waves 19 p3276 A66-36473

Methane flames formed in long, horizontal column of methane-air mixture caused by interdiffusion, using wind tunnel 20 p3681 A66-38246

Book on aerodynamic experiment in machine building, noting self-simulation problems of machines using gas dynamics, analyzing wind tunnels 21 p3694 A66-38743

Downwash corrections for wings with arbitrary sweepback in open and closed circular wind tunnels with base plate 21 p3694 A66-38936

Turbulent wakes formed by elliptic disks in low speed wind tunnel, presenting similarity velocity defect profiles, drag coefficients and turbulence 22 p3844 A66-40347

Wind tunnel flight data correlation program, considering tunnel wall effects, measurement and control of thrust and propeller blade angle [AIAA PAPER 66-737] 22 p3893 A66-40627

Arc heated impulse wind tunnel facility including Mach 16 contoured nozzle [AIAA PAPER 66-759] 22 p3894 A66-40642

Wind tunnel tests of sonic boom phenomena, noting weak pressure field measurement, construction of extremely small models, boundary layer effects, etc [AIAA PAPER 66-765] 22 p3894 A66-40646

Supersonic airflow effect on rain droplets measured in wind tunnel, shock tube and sled tests [AIAA PAPER 66-766] 22 p3894 A66-40647

Span loading on wing of complete aircraft configuration determined, using segmented wing in wind tunnel test technique and least squares method [AIAA PAPER 66-768] 22 p3895 A66-40649

Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-770] 22 p3895 A66-40651

Total aerodynamic forces and moments of free flying body in wind tunnel determined from accelerations measured and telemetered by onboard instruments [AIAA PAPER 66-775] 22 p3896 A66-40655

Reentry aerodynamics research in Japan including sounding rocket program, optimum reentry trajectory, nonequilibrium flow in nose region of blunt body, wind tunnels, etc [ICAS PAPER 66-36] 22 p3847 A66-40659

Statistically designed experiments in wind tunnel test programs dealing with exhaust nozzles, discussing data analysis techniques [AIAA PAPER 66-742] 23 p4052 A66-41326

Pressure distribution of steady flow through cascade of closely spaced circular cylinders 23 p4010 A66-41778

Wind tunnel tests determining plume induced flow separation pattern on missile configurations as ratio of nozzle to ambient pressure 23 p4012 A66-41914

High density highly ionized nitrogen flow in plasma wind tunnel 24 p4191 A66-42192

Compliant surface effects on skin friction reduction in turbulent flow in open-circuit wind tunnel 24 p4195 A66-42796

WIND TUNNEL APPARATUS

SA SUPERSONIC WIND TUNNEL APPARATUS

Losses in steam turbines investigated in wind tunnels, using four-channel flow cycle and wooden model 01 p0053 A66-10215

Wind tunnel equipment for automatic temperature digital recording, discussing measurement of arrowhead wing model 02 p0210 A66-11208

Measured aerodynamic characteristics of cone-cylinder-cone model using magnetic balance system, discussing techniques, errors and data 03 p0315 A66-12773

Design and fabrication of air receiver of hypersonic wind tunnel at University of Tokyo 03 p0438 A66-13084

Laboratory simulation, in continuum and rarefied flow regimes, of perturbations of ionosphere by satellite and rocket exhaust 06 p0869 A66-16908

Low density plasma jet wind tunnel for investigation of low density high-enthalpy high-speed flow 09 p1364 A66-20253

Hot-wire turbulence spectral analyzer for measuring power spectrum of wind tunnel fluctuation flow 11 p1703 A66-22197

Refinements of hypersonic testing techniques in 100-inch tunnel F of von Karman gas dynamics facility 11 p1686 A66-22842

Performance of simple diffusers of fixed geometry in flow regimes with viscous and compressibility influence involving free-jet test sections, conical and contoured nozzles and gas flows at high Mach numbers 11 p1686 A66-22844

Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439

Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc 12 p1799 A66-24553

Wind tunnel apparatus for flow visualizations at Mach 14 by glow discharge method 13 p2059 A66-26376

Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697

Wind tunnel free-flight testing of reentry vehicle dynamics, noting capability for simultaneous two-dimensional viewing of model trajectories [AIAA PAPER 66-774] 22 p3895 A66-40654

Wind tunnel simulation of transient state of takeoff and landing of V/STOL aircraft, noting application of electric circuit analogy to measure flow dynamic response to control valve movement 23 p4053 A66-41388

Semiconductor surface thermocouples, determining heat-transfer rates associated with wind tunnel testing 24 p4208 A66-42178

WIND TUNNEL BALANCE

Balance bridging techniques using air supply lines for powered lift-fan model testing [AIAA PAPER 66-751] 22 p3893 A66-40637

Yaw force /Magnus/ of spinning projectile at angle of attack measured, using balance device in wind tunnel [AIAA PAPER 66-753] 22 p3893 A66-40638

Six-component balance equipped with semiconductor strain gauges and inertia compensated for hotshot wind tunnels 24 p4206 A66-42167

WIND TUNNEL CALIBRATION

Rain effect on visibility through windshield tested in large wind tunnel including construction, calibration and removal devices 02 p0176 A66-11204

Variable-volume arc chamber in Ling-Temco-Vought hypervelocity wind tunnel, examining design, performance and calibration technique 11 p1686 A66-22843

Wind tunnel facilities of British Meteorological Office for checking performance and calibration of anemometers 17 p2903 A66-32794

Local density and temperature measurement in wind tunnels determined by 50-keV electron scattering, using air as test gas 24 p4192 A66-42199

WIND TUNNEL MODEL

Gas Dynamics Laboratory program for study of V/STOL propulsion, using NRC VTOL propulsion tunnel 01 p0008 A66-10964

Full-scale half model of GAMM Mirage III V airplane in S-1 wind tunnel of ONERA Test Center of Modane 02 p0210 A66-11202

Pressure distribution measurement system for flow field of main turbojet intake of one-eighth scale model of Mirage III V aircraft 02 p0210 A66-11206

Free oscillation device for studying dynamic stability of models in hypersonic range of intermittent wind tunnels 02 p0210 A66-11210

Wind tunnel contraction study of inviscid incompressible flow using rheoelectrical analogy, discussing experimental techniques, contour velocity distribution, optimum smoke injector and adverse pressure gradient estimation 03 p0352 A66-12719

Lift coefficient in two-dimensional smoke wind tunnel noting symmetrical, cambered and leading double-edge slot wing section 03 p0317 A66-13216

Hypersonic wind tunnel measurements to

Mach 17 of aerodynamic characteristics of family of hypersonic gliders
[ONERA TP 331] 11 p1635 A66-28199

Wind tunnels to predict flight characteristics based on models and test probes 14 p2270 A66-27564

Transonic wind tunnel studies of ground-wind loads on aeroelastic models of Saturn launch vehicle, investigating structural damping, wind velocity and azimuth angle 14 p2270 A66-28021

Measuring aerodynamic heating of wind-tunnel models by temperature sensitive paint, noting ambient pressure effect 16 p2682 A66-30916

Simulation of upper atmosphere NO release in low density wind tunnel indicating light output of NO-O chemiluminescent reaction depends on O concentration 19 p3405 A66-36804

Ogive shape produced by ablation experiments with duralumin spheres in wind tunnel and reentry 20 p3491 A66-37406

Launch and recovery system for large instrumented free flight models in high speed wind tunnel, using miniaturized telemetry and recording equipment [AIAA PAPER 66-776] 22 p3896 A66-40656

Launching device for free flying models in conventional wind tunnels consisting of split hollow shell enclosing model [AIAA PAPER 66-773] 23 p4052 A66-41332

WIND TUNNEL NOZZLE

Air condensation in hypersonic wind tunnel strongly related to flow expansion rate 01 p0059 A66-10808

Inviscid supersonic nozzle flow of ideal dissociating gas, sudden freezing, equilibrium-recombination mechanism and velocity distribution [AIAA PAPER 66-1] 08 p1163 A66-18983

Rotationally-symmetric intake nozzles manufactured by low cost technique for wind tunnels from glass fibers and plastics, using wooden pattern 13 p2085 A66-25080

WIND TUNNEL STABILITY TEST

Measurement instrumentation of compressor blade vibrations of Rolls-Royce lifting turbojets during testing 02 p0226 A66-11203

Transonic test section of S-2 wind tunnel and qualification test to prove good quality of flow 02 p0210 A66-11205

Wind tunnel research of deep stall aerodynamic characteristics of T tall analyzed as preliminary design guide [AIAA PAPER 65-737] 03 p0317 A66-12547

Flight experience with Ogee wing at low speed [AIAA PAPER 65-782] 03 p0318 A66-12556

Wind tunnel technique for measuring frequency response of flexible airplane to vertical sinusoidal gusts [AIAA PAPER 65-787] 03 p0438 A66-13071

Dynamic excitation by ground winds of large Saturn type launch vehicle structures 05 p0770 A66-15270

F5D-1 aircraft delta wing modification, describing wind tunnel and flight test results with ogee wing 06 p0802 A66-16805

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 06 p0803 A66-17091

Aerodynamically induced vibration in coolers, describing inclined splitter plates for noise and structural vibration elimination 07 p0991 A66-17492

Laminar profile characteristics affected by wind tunnel flow 07 p1018 A66-17857

Free flight dynamic stability measurements indicate that boundary layer transition has no perceptible effect [AIAA PAPER 64-427] 08 p1161 A66-18810

Magnetic suspension for aerodynamic wind tunnel models in Mach 8 airstream controlled in five degrees of freedom 09 p1364 A66-20664

Wind tunnels to predict flight characteristics based on models and test probes 14 p2270 A66-27564

Aerodynamic characteristics of NAL-16 research rocket of Japan, noting results from transonic and supersonic wind tunnel tests 14 p2220 A66-27670

Acoustical control of atmospheric boundary

layer investigated in wind tunnel for flow velocity range from 5 to 40 m/sec 14 p2277 A66-27862

Wind tunnel test on VTO aircraft models 18 p3093 A66-33970

Wind tunnel research of deep stall aerodynamic characteristics of T tall analyzed as preliminary design guide [AIAA PAPER 65-737] 19 p3280 A66-36491

Aeroelastic instability of flat rectangular panels leading, trailing and free lateral edges, noting gap between theoretical and wind tunnel stability test 20 p3491 A66-36952

Low speed wind tunnel design and testing including V/STOL aircraft, helicopters, reentry vehicles, etc 20 p3540 A66-37009

Rotor downwash angle and tunnel geometry effect on maximum size rotor that can be tested in closed throat wind tunnel [AIAA PAPER 66-736] 22 p3893 A66-40626

Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separated flow around nozzle and base recirculation [AIAA PAPER 66-787] 22 p3895 A66-40648

Free flight multibody test techniques, discussing drogue body testing, mechanized free flight models and salvo launches [AIAA PAPER 66-772] 22 p3895 A66-40653

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 23 p4051 A66-40977

Wind tunnel testing of delta-like lifting bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and off-design performance of caret wave-rider wings [ICAS PAPER 66-24] 23 p4007 A66-41011

Dynamic wind tunnel testing techniques and program of advanced analysis of full-scale free-flight missile performance data [AIAA PAPER 66-752] 23 p4052 A66-41328

Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5 [AIAA PAPER 66-774] 23 p4008 A66-41329

Time lag effect on dynamic stability determined, using wind tunnel tests with 10 degree cone as test body simulating ablation process by gas injection into boundary layer [AIAA PAPER 66-757] 23 p4008 A66-41330

Simultaneous FM telemetry measurement of four aerodynamic forces acting on free flying models in wind tunnel 24 p4209 A66-42190

Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408

WIND TUNNEL WALL

Working section size and shape for V/STOL wind tunnels, emphasizing wall effect magnitude limitation, aircraft aerodynamic and propulsion system characteristics 12 p1857 A66-23657

WIND VANE

Drag force anemometer utilizing semiconductor strain gauges for measuring horizontal wind speed and direction [AIAA PAPER 66-337] 12 p1882 A66-24482

WIND VARIATION

Height, wind speed and direction errors arising from radar tracking with level balloons 04 p0541 A66-13667

Empirical wind structure models, considering mean wind as height function, wind shear, tropospheric wind profiles for vehicle design, etc 09 p1398 A66-20271

Low altitude turbulence model for aircraft gust load estimation related to meteorological parameters, terrain conditions and height [AIAA PAPER 65-14] 09 p1400 A66-20741

SST air traffic control and fuel consumption dependence on wind drift and atmospheric temperature 14 p2328 A66-28231

Half-hourly variability and short-term evolution of strato- and mesospheric winds in autumn and summer 15 p2530 A66-28618

Atmospheric motions from sodium cloud firings in 80 to 200 km height region, noting internal gravity waves, atmospheric tides and drift 15 p2489 A66-29661

Small-scale wind variations in stratosphere and mesosphere studied by high resolution Robin falling-sphere soundings 16 p2740 A66-30510

Hydrodynamic and thermodynamic equations for biennial variations of zonal atmospheric circulation in equatorial area 19 p3346 A66-35640

Angular wind wave spectrum of deep ocean and variations in coastal zone, noting data on energy distribution of spectrum 21 p3780 A66-39362

Fluctuations of mesospheric winds over equatorial region, noting quasi-periodic oscillations 22 p3903 A66-39800

Zonal wind distribution and variation in equatorial stratosphere and lower mesosphere 23 p4065 A66-41841

Vertical wind gradient variation and energy variation at height ranging from 80 to 140 km and relation to gravity waves and upper atmosphere turbulence 23 p4066 A66-41849

Air motion probe via Doppler radar, noting calculation of speed, direction and application to wind variance analysis 24 p4234 A66-42989

WIND VELOCITY

Temperature and wind velocity fields of stationary atmospheric boundary layer derived from semiempirical turbulence theory 01 p0062 A66-10859

Optical scintillation frequency noting propagation of electromagnetic and acoustic waves in turbulent atmosphere 02 p0262 A66-12207

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 04 p0542 A66-14301

Energy distribution near jet stream and associated wave amplitude relations 05 p0711 A66-14544

Error effects in forecasting wind speed and direction on equivalent headwinds and flight times 07 p1063 A66-18338

Dependence of horizontal extent of shower cells on vertical wind distribution 08 p1247 A66-18804

Time-space spectral analysis of meteorological fields based on time-dependent spectra of wind velocity, temperature, pressure and turbulent pulse and heat fluxes 09 p1397 A66-19883

Spectral density of vertical wind gusts in clouds calculated, including turbulent energy dissipation rates in cloud strata 09 p1398 A66-19884

Spectra of vertical turbulent thermal fluxes and momenta in lower atmospheric layer, including review of relevant literature sources 09 p1398 A66-19893

Thermospheric wind velocities computed from satellite orbital data 09 p1376 A66-20992

Diffusion of toxic fumes driven by winds of variable velocity from given site over irregular terrain 10 p1553 A66-21580

Maximum wind velocity in tropical storms and hurricanes estimated from cloud patterns in satellite pictures 11 p1727 A66-22313

Mesoscale perturbations in vertical wind velocity profiles obtained from superpressure balloons tracked by FPS-16 radars 11 p1731 A66-23361

Estimated 10-mb geostrophic winds compared with winds measured by rocketsondes 11 p1731 A66-23365

Linear interpolation method for analyzing wind conditions at Wallops Island for launch operational problem [AIAA PAPER 66-340] 12 p1906 A66-24486

Multivariate statistical analysis of wind sounding data, applying high degree of correlation between two wind parameters and empirical density function [AIAA PAPER 66-353] 12 p1907 A66-24489

Wind velocity measurement using radar detection of artificially ionized air column by radioactive source [AIAA PAPER 66-404] 12 p1908 A66-24516

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 14 p2327 A66-28215

Behavior of superpressure balloons in vertical air currents, noting various combinations of wind speed and wave amplitude 15 p2426 A66-28941

Wind velocity spectra and correlation functions statistically analyzed in ULF range

SUBJECT INDEX

WING FLOW METHOD TEST

for lowest levels of atmosphere 16 p2742 A66-30773
 Lower atmospheric diurnal variations in air temperature, directional wind velocity and gradients during clear anticyclonic weather 16 p2742 A66-30774
 Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008
 Pulsation spectrum of vertical wind-velocity component at 70 m 16 p2742 A66-31343
 Semiempirical law for spectrum of wind velocity fluctuations and energy in lower layer of atmosphere 19 p3393 A66-35332
 Wind velocity profile for nonstationary atmospheric boundary layer, noting effect of time-dependent variations on turbulence and pressure gradient coefficient 20 p3594 A66-38368
 Horizontal temperature gradient produced by water body effect on distribution of wind velocity and direction in atmospheric boundary layer 20 p3594 A66-38375
 Frequency distribution of wind speed and direction derived by applying random walk to turbulent flow 21 p3759 A66-39204
 Pulsation spectrum of vertical wind-velocity component at 70 m 24 p4234 A66-42651
 Velocity characteristics of clear-air dot angle echoes determined via Doppler radar measurements 24 p4234 A66-42990

WIND VELOCITY MEASUREMENT
 Polish solid propellant meteorological rocket, considering methods for measuring atmospheric parameters and design 01 p0144 A66-11063
 Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 02 p0224 A66-12134
 Vertical velocity fluctuations in nocturnal low level jet examined by sonic anemometers 04 p0541 A66-13666
 Height, wind speed and direction errors arising from radar tracking with level balloons 04 p0541 A66-13667
 Wind velocity measurement by dual beam pattern modification to conventional /non-Doppler/ radars 04 p0541 A66-13669
 Wind velocity, vertical wind profile and temperature fluctuations in near-water air layer measured, noting differences from pulsation measurements 04 p0542 A66-14300
 Atmospheric wind velocity measurements by probing artificially ionized columns of air with two independent X-band radar systems 05 p0711 A66-14633
 Correction to paper on rocket studies of sporadic-E ionization and ionospheric winds 05 p0671 A66-14957
 Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 06 p0906 A66-16552
 Spectral measurements of fourth and sixth correlative moments of wind-velocity vertical component 07 p1062 A66-17920
 Zonal wind profiles in 850-mb surface at different latitudes as aid in medium range weather forecasting 08 p1246 A66-18802
 Accurate calibration of Doppler winds for use in computation of mesoscale wind fields 09 p1399 A66-20728
 Thermistor hot-wire anemometer with feedback bridge circuit for measuring air flow rates to 20 m/sec from zero to 50 degrees C 11 p1709 A66-23320
 Time and height variations of temperature, wind speed and moisture content during dissipation of low level jet on May 14, 1962 before sunrise near Dallas 11 p1730 A66-23379
 Spectral measurements of fourth and sixth correlative moments of wind-velocity vertical component 12 p1905 A66-23881
 Motion equations for stable rising balloon systems which consider effects of apparent mass and wind accelerations, using radar tracking [AIAA PAPER 66-398] 12 p1802 A66-24513
 Vertical profile of wind velocity determined, using lifting sensors for prelaunch rocket operations [AIAA PAPER 65-15] 12 p1883 A66-24698
 Atmospheric wind velocity measurements

by probing artificially ionized columns of air with two independent X-band radar systems 14 p2326 A66-27702
 Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 14 p2287 A66-28091
 Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 14 p2327 A66-28224
 Errors in wind speed measurements under conditions of turbulence, noting quantitative aspects of lateral, vertical and data processing errors 15 p2533 A66-28940
 Numerical analysis of wind velocity profile measurements and theoretical calculation of profile by numerical methods, based on geostrophic friction coefficient 16 p2741 A66-30771
 Optimum averaging periods in measurements of wind velocity profile, temperature gradient, vertical thermal turbulent flow and atmospheric drag 18 p3130 A66-34609
 Jet flow turbulence characteristics, calculating vertical wind velocity pulsation component, determining thermodynamic characteristics of atmosphere 20 p3595 A66-38381
 Wind profiles obtained from meteorological tower plotting wind velocity, normalized by value of friction velocity, as function of measurement heights 21 p3759 A66-39356
 Doppler radar measurements of wind velocity horizontal components variation in rain and snow, calculating time correlation and structural functions for neutral and unstable stratifications 21 p3760 A66-39358
 Radar measurements of wind regime of meteor zone made by means of pulse-coherent method 22 p3914 A66-40763

WINDING
S FILAMENT WINDING
S HELICAL WINDING

WINDOW
SA LAUNCH WINDOW
SA WAVEGUIDE WINDOW
 Thin metallic end windows for pressure vessels produced by hydrostatic forming 07 p1040 A66-18493

WINDSHIELD
 North American Sabreliner laminate windshield for bird-proofing pilot compartment [SAE PAPER 66-0214] 13 p1995 A66-26389
 Rain repellent polymers for aircraft windshields 13 p2116 A66-26544
 Windshield scratches and effect on depth perception, visual acuity and fatigue 17 p2862 A66-31833

WING
SA AIRFOIL
SA CAMBERED WING
SA CANTILEVER WING
SA CARET WING
SA DELTA WING
SA FLEXIBLE WING
SA HELICOPTER WING
SA LOW ASPECT RATIO WING
SA OGEE WING
SA OSCILLATING WING
SA PIVOTED WING
SA RECTANGULAR WING
SA RIGID WING
SA RING WING
SA ROTARY WING
SA ROTOR
SA SLENDER WING
SA SWEPT WING
SA TAPERED WING
SA THIN WING
SA TILT-WING AIRCRAFT
SA TRAPEZOIDAL WING
 Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift [AIAA PAPER 65-750] 03 p0319 A66-12586
 Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream [AIAA PAPER 66-130] 08 p1162 A66-18953
 Ground proximity effect on maximum lift-drag ratio for wing with uniform spanwise circulation, considering vortex

model 11 p1636 A66-23253
 Optimization of minimum weight multirib or multiweb wing box structure subjected to vertical shear and unidirectional bending moment 13 p2195 A66-25593
 Text on high velocity hydrodynamics including wing flow, compressible fluids, motion of slender profile, etc 13 p2066 A66-26529
 Acceleration potential method for solving linear problems of wing hydrodynamics above interface between fluids differing in density, for arbitrary Froude number 13 p2067 A66-26530
 Turbulence and separation in boundary layer and relation to wing design 14 p2217 A66-26925
 Design, fabrication and test of sandwich construction box beam made of D-43 columbium and Haynes 25 superalloy for use as hot redundant structure for hypersonic vehicles 16 p2816 A66-30894
 Theory of wings with curved leading edges in supersonic flow, including delta wings with straight leading edges in case where motion is conical 23 p4008 A66-41379

WING BODY
 Quasi-conical flow to calculate pressure on wings having curved leading edges 07 p0983 A66-18229
 Acceleration potentials applied to motion, at arbitrary Froude numbers, of high-aspect-ratio wing immersed in incompressible ideal fluid 08 p1205 A66-18601
 Longitudinal pressure gradient effect on evolution of finite three-dimensional perturbation in transition boundary layer of upper surface of wing section near critical Reynolds number 15 p2423 A66-28521
 Variable geometry structural design problem for aircraft wings and tail surfaces 17 p2846 A66-32888
 Optimal redistribution of lifting surface between wing and stabilizer-elevator unit ensuring minimum reduction of lift-drag ratio 23 p4011 A66-41796

WING FLAP
 Flight controls of tilt wing XC-142A aircraft, noting mechanization and operation of wing and flap control system 06 p0809 A66-16815
 Gap size effect on pressure and aerodynamic heating over flap of blunt delta wing in hypersonic flow [AIAA PAPER 66-408] 17 p2840 A66-32747

WING FLAP EFFECT
 Change rate of pitching moment coefficient upon aerofoil correlated to deflection of flap control for application to wing reversal analysis 06 p0801 A66-16001
 Ground effect on pressure distribution and lift coefficient of jet-flap wing tested in wind tunnel 07 p0981 A66-18095
 Aerodynamic forces acting on wings with braking flaps 19 p3275 A66-35365
 Comparison of lifting characteristics of profile with air ejection onto slotted and unslotted flaps, examining dependence on jet impulse coefficient 23 p4010 A66-41795

WING FLOW METHOD TEST
 Subsonic flow near trailing edge of low aspect ratio delta wing 04 p0454 A66-13518
 F5D-1 aircraft delta wing modification, describing wind tunnel and flight test results with ogee wing 06 p0802 A66-16805
 Vortex characteristics of thin very elongated wings in low velocity flow 08 p1161 A66-18719
 Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341
 Numerical method of calculating unsteady flow past arbitrary thin wing moving in ideal incompressible fluid 12 p1797 A66-24430
 Hypersonic or supersonic flow of gas past yawing delta wing with stall fence 12 p1799 A66-24443
 Electrical analogy for wing in unsteady supersonic flow, determining distribution of lifting power for various aspect ratios 13 p1990 A66-25405
 Prediction of drag due to lift of plane wings at subsonic speeds, based on correlation of wind tunnel measurements in terms of viscosity effect on lift curve slope 16 p2632 A66-31664

Nonlinear theory for flow past slender wings with leading edge vortices in sudden plunging motion 17 p2837 A66-32082

Extremization of products of powers of functionals as applied to flat top wings for maximizing lift drag ratio in hypersonic flow 17 p2842 A66-33242

Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259

Linearized calculation of subsonic wings with rounded leading edge 20 p3491 A66-36949

Lateral fluid jet visualization for spanwise launching on wing model with low aspect ratio in subsonic flow 21 p3731 A66-39593

WING-FUSELAGE COMBINATION

Wing-fuselage interaction effects on static and dynamic stability at low and moderate hypersonic Mach numbers by small-disturbance approximation to shock-expansion method [AIAA PAPER 65-719] 04 p0454 A66-13552

Integration of propulsion systems with airframe, emphasizing aerodynamic lift and drag 05 p0605 A66-14934

Ring wings to develop beneficial aerodynamic interference effects at supersonic speeds 13 p1995 A66-25590

Aerodynamic interference between helicopter rotor blade and fuselage and wing in hovering and forward flight, describing method of converting two-dimensional analysis to three-dimensional case 18 p3047 A66-33681

Supersonic aerodynamic problem of wing-body interaction and solution within lifting-surface theory, using analog method [ICAS PAPER 66-22] 23 p4008 A66-41254

WING LOADING

Aerodynamics of heavily loaded wing, discussing relation of longitudinal shear before and after deformation of vortex street 11 p1635 A66-23170

Takeoff dynamics of VTOL aircraft, noting thrust-weight ratio, wing load, initial thrust angle, engine tilt, etc 11 p1733 A66-23339

Spiral instability in STOL aircraft prevented by larger wing dihedral setting, noting permissible dihedral levels and tests 16 p2634 A66-31395

Wing lift in slipstream with boundary represented by vortex sheath in computer determination of span loading [AIAA PAPER 66-466] 16 p2631 A66-31472

Optimum high payload laminar flow control aircraft offer 20 to 25 percent range improvement, indicated by design studies of large logistics aircraft 18 p3053 A66-34952

Theoretical nonlinear method for calculating aerodynamic forces on low-aspect-ratio wings at high angles of attack and wide range of Mach numbers 20 p3491 A66-36907

Nonstationary forces and bending and torsional moments along wing computed, using punch card system 20 p3674 A66-38442

Welded titanium wing leading edge design and manufacture for increased range and load carrying capacity 22 p3924 A66-40256

Span loading on wing of complete aircraft configuration determined, using segmented wing in wind tunnel test technique and least squares method [AIAA PAPER 66-768] 22 p3895 A66-40649

WING PANEL

XB-70A in-flight wing accident, noting damage 07 p0987 A66-17277

Residual stress, crack propagation and fatigue fracture mechanisms in Al alloy sheets with fatigue cracks, for use in wing panels [ICAS PAPER 66-34] 23 p4137 A66-41007

WING PLANFORM

Flight experience with Ogee wing at low speed [AIAA PAPER 65-782] 03 p0318 A66-12556

Variable sweep wing effect on supersonic transport stability and control characteristics [AIAA PAPER 64-603] 05 p0610 A66-15068

Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow [AIAA PAPER 64-591] 05 p0610 A66-15069

Drag reduction for gliders, noting role of

planform and warping of wing 05 p0607 A66-15198

Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124

Minimization of total drag /pressure and friction/ of two-dimensional wing with unspecified chord, finding extremal solutions which include one, two or three subarcs 11 p1630 A66-22504

Minimizing pressure drag of three-dimensional wing in linearized supersonic flow with Euler equations being partial differential equations 11 p1630 A66-22506

Wing penetration into zone of sharply localized gust, deriving equations for forces and moments acting on wing 16 p2630 A66-31292

Flow of compressible conducting gas around symmetrical wing in longitudinal magnetic field 16 p2766 A66-31628

WING PROFILE

Hypersonic airflow at alpha angle of attack about flat wing with shock wave on upstream side attached 04 p0454 A66-13572

Drag decrease in glider aircraft noting wing profile, flow laminarization /boundary layer control/, landing flaps, tail, etc 05 p0607 A66-15200

Flow through straight slot cascade, investigating application to axial compressors for optimum slot parameters 06 p0803 A66-16968

Measurements of three coefficients for rectangular, trapezoidal, sweptback, triangular and parabolic wings in subsonic and supersonic flow 07 p0979 A66-17480

Rolling moments of five symmetrical untwisted airfoils of various planform tested in high-speed wind tunnel as functions of angle of attack and angle of yaw 07 p0980 A66-17481

Complex perturbing potentials of constant circulation around single wing profile treated by method based on Dirichlet problem 07 p0983 A66-18341

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006 08 p1165 A66-19480

Book on thin wing and aerodynamic characteristics in subsonic gas flow 09 p1327 A66-19975

Aircraft with wings of low aspect ratio 09 p1329 A66-20556

Longitudinal stability and controllability characteristics of glider, considering effect of elastic warp of wing 09 p1331 A66-20757

Aerodynamic forces of oscillating lifting surfaces of large aspect ratio in subsonic range investigated by approximation method 10 p1479 A66-21378

Optimal contours minimizing pressure drag of symmetric wings, assuming zero angle of attack and sharp edges, using Ackert linear flow theory 11 p1630 A66-22503

Optimum two-dimensional wings for minimum drag subjected to pressure coefficients defined by Busemann second-order theory 11 p1630 A66-22507

Aerodynamic resistance of transonic wing profile analyzed, using asymptotic flow at long distance downstream of shocks 13 p1990 A66-25456

Maximum lift/drag ratio wing for supersonic environment 13 p1991 A66-25634

Flow past wing of arbitrary profile below free surface at high speeds treated by conformal mapping 13 p2067 A66-26535

Subsonic wing design, classical linearization technique used to describe leading edge boundary 15 p2425 A66-29638

Transonic flow around airfoils and wing profiles in uniform asymptotic transonic stream studied, using hodograph plane and method for smoothing results 16 p2629 A66-31040

Supersonic flutter from vibration characteristics of trapezoidal wing with low aspect ratio 17 p3031 A66-33073

Lifting wings in supersonic regime, analyzing flow separation at leading edges [ICAS PAPER 66-20] 22 p3847 A66-40670

WING SPAN

Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity

potential 14 p2218 A66-27387

Shape of head wave in linearized supersonic flow past finite span wing, considering waves with convex and concave leading edge 16 p2632 A66-31792

Lateral fluid jet visualization for spanwise launching on wing model with low aspect ratio in subsonic flow 21 p3731 A66-39593

WING STALL

Stall prevention device for Beechcraft T-34B aircraft equipped with stall warning wing device 17 p2843 A66-32190

Irreversible trimmed stalls at high angles of attack for aircraft with aft-mounted engine nacelles and high-or T-tails 20 p3496 A66-38255

WING TANK

Biochemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546

WING TIP

Advances attributable to XB-70 program including aerodynamic concepts, structural material, design, systems and equipment development [SAE PAPER 650798] 01 p0012 A66-10844

Idealized ground effect wing, with tips close to ground, assumed to be semicircular lifting line in transverse plane, considering minimum induced drag 12 p1800 A66-25006

Effect of gap between wing tip and end plates for wing with minimum induced resistance and unrestrained end plates, showing aerodynamic characteristics differences between these wings and wings without gaps 13 p1989 A66-25075

WING TIP CONTROL

Light aircraft lateral stability augmentation system for wing leveling, noting operation and pilot performance [SAE PAPER 660220] 13 p1996 A66-26397

WINGED VEHICLE

Controlled ballistic, steady lift and variable lift reentry of winged spacecraft 04 p0584 A66-13526

Turborocket application to air breathing satellite launcher program describing engine design, performance and weight characteristics 04 p0572 A66-13539

Aerothermoelasticity effect on longitudinal stability and control of winged aerospace vehicles [AIAA PAPER 64-489] 05 p0775 A66-15075

Nonlinear control laws for takeoff and landing of circular-orbit winged glide space vehicle 18 p3132 A66-33880

Use of wing to unload helicopter rotor for cases with and without auxiliary propulsion, noting wing effect on performance, stability, maneuvers, etc 19 p3279 A66-36486

Book on rocket construction 1963-65 and winged space vehicles including manned orbital space station, design, structural schemes, reentry, etc 23 p4128 A66-41277

Propulsion system development for very high speed winged vehicles application [ICAS PAPER 66-29] 23 p4122 A66-41933

WIRE

SA HOT WIRE

Simulated nuclear power plant gamma radiation effects on magnetic film-insulated magnetic wire 02 p0248 A66-11293

Turbulent velocity profile produced by controlling boundary layer thickness, using wires placed parallel to plate and normal to flow direction [ASME PAPER 65-WA-FE-29] 05 p0664 A66-15711

High-temperature strain in fine wires measured by photographic technique 19 p3387 A66-36658

Spectral distribution of light emission of exploding wire systems measured by high-speed drum camera and rotating shutter 20 p3603 A66-37742

Laser technique acquisition of data on exploding-wire phenomena in explosion model, supersonic model and ablation model 23 p4091 A66-41701

WIRE BRIDGE CIRCUIT

SA WHEATSTONE BRIDGE

Exploding bridgewire systems, discussing theory of wire explosion and various applications 18 p3135 A66-34191

WIRE MESH

Interaction of moving shock wave with wire-mesh screen or gauze, noting two moving shock waves produced by

interaction 20 p3547 A66-37977
 Read-only digital computer memory
 utilizing loom to braid information into wire
 harness 24 p4177 A66-43183

WIRING SYSTEM
 Ground and airborne digital equipment for
 missile and space systems built with mass
 produced standardized modules
 interconnected by wrapped joint
 wiring 18 p3077 A66-34050

WOOD
 Secular variations of cosmic ray produced
 carbon 14 in 150 wood samples up to 2000
 years old 05 p0747 A66-14795
 Requirements, materials, fabrication and
 testing of exit nose fairing for A3 Polaris
 missile, noting use of laminated wood as
 optimum material 06 p0885 A66-16300
 Balsa-wood impact limiter for hard landing
 on Mars surface, noting testing,
 performance, parameters and
 manufacture 13 p2191 A66-25264
 Sheet cork as thermal protection during
 vehicle launch and ascent flight
 [AIAA PAPER 65-356] 22 p3999 A66-40358

WORK
S PHYSICAL WORK
S VIRTUAL WORK
WORK CAPACITY
 Simulation and environment effect on
 astronaut performance in space to
 understand work-task
 effort 06 p0817 A66-16239
 Human efficiency measured in producing
 power by tramping, hand cranking and
 lateral pumping modes 11 p1648 A66-23082
 Physiological stress and fatigue in aerial
 missions for forest fire control, noting in-
 flight and postflight exercise heart
 rate 12 p1810 A66-25009
 Chest-to-back accelerations effect on
 human electroencephalograms and work
 capacity 15 p2437 A66-29475
 Work output characteristics and
 capabilities of undersea work crews during
 extended missions 16 p2642 A66-30507
 Standard prolonged work test using
 treadmill for evaluation of fatigue and
 stress in man 17 p2863 A66-32150

WORK DECREMENT
 Fatigue relaxation model for describing
 optimum performance of
 system 04 p0504 A66-13967
 Total simulation system mass effect on
 certain human force outputs in tractionless
 environments 19 p3293 A66-36243
 Noise effect on human
 performance 20 p3504 A66-36932

WORK FUNCTION
 Decrease in work function of W-Hf system
 caused by formation of alloy with better
 emission properties than those of
 hafnium 02 p0270 A66-11425
 Emission current density and effective
 work function of samarium, europium and
 gadolinium hexaborides 02 p0270 A66-11426
 Alkali-ion desorption energies measured on
 polycrystalline refractory metals at low
 surface coverage by electron work
 function 02 p0263 A66-11483
 Cesium fluoride additive effect on emitter
 work function and power output of cesium
 diodes with various emitter
 materials 05 p0618 A66-15558
 Electron work function analysis using
 cesium compounds vapor combinations in
 thermionic energy converter, noting role of
 vapor pressure 05 p0619 A66-15562
 Low work function collector with Ba-
 covered thin aluminum trioxide film
 electrodes for high efficiency thermionic
 converters 05 p0621 A66-15575
 Work function distribution of different
 refractory metals by Shelton method, noting
 dependence of electron emission of
 thermionic converter 05 p0621 A66-15577
 Metal surface structure, semiconductors
 and dielectric films analyzed, using image
 orthicon technique for data on work
 function, electron reflection coefficient and
 electric resistance 05 p0621 A66-15578
 Scanning electron beam probe for
 investigating nonuniformity in work function
 of surfaces known as patch
 effect 05 p0684 A66-15580
 Schottky barrier from silicon surfaces with
 controlled exposure to oxygen and water
 vapor, noting work function, semiconductor

surface state and thickness of interface
 layer 07 p1107 A66-18406
 Work function of A and B faces of /111/
 surface of gallium arsenide in dry and
 humid media 08 p1274 A66-19317
 Work function of metals and
 semiconductors measured, using retarding
 potential analyzer to determine field
 emission electron energy
 distribution 08 p1228 A66-19825
 Residual gas effect on work function vs
 critical temperature for surface ionization of
 cesium on porous tungsten
 [AIAA PAPER 64-693] 10 p1594 A66-21778
 Contact potential difference measurements
 between aged polycrystalline tungsten foil
 and polished single crystal disk and work
 function calculation for /110/ oriented
 surface 10 p1582 A66-21888
 Work function for thermionic emission of
 TaC and ZrC refractory metal carbides in
 vacuum and in cesium
 vapor 12 p1922 A66-24220
 Electron optical method for study of
 metallic and semiconducting surfaces, based
 on low energy electron beam
 scanning 12 p1884 A66-24939
 Refractory metals and metal alloys
 analyzed regarding electron work function
 and threshold temperature for surface
 ionization in all-metal guard ring diode with
 directly heated wire
 [AIAA PAPER 66-223] 13 p2129 A66-25171
 Nitrogen adsorption effect on thermionic
 emission from polycrystalline tungsten
 ribbon at high and low applied fields,
 explaining work function
 changes 13 p2162 A66-25381
 Depressing effect of hafnium and
 zirconium on work function of tungsten,
 tantalum, niobium and
 rhenium 14 p2314 A66-27369
 Photoelectric yield and energy distribution
 for clean-cleaved cesium-covered /111/
 surfaces of silicon and
 germanium 14 p2365 A66-27755
 Nonequilibrium ionization of suspension of
 solid particles expanding supersonically in
 nozzle, particularly lowering of ionization
 due to injection in flow of high work
 function 15 p2615 A66-28762
 Conduction mechanism in discontinuous
 metal films involving image forces, potential
 barrier, activation energies, saturation effect
 in conductivity, etc 16 p2783 A66-31427
 Work function of solid solutions of
 tungsten with molybdenum and tantalum
 explained by surface adsorption
 effects 16 p2728 A66-31772
 Vacuum thermionic work functions of
 polycrystalline Be, Ti, Cr, Fe, Ni, Cu, Pt
 and type 304 stainless steel 17 p2979 A66-32633
 Schottky theory for metal semiconductors,
 noting correlation between work function
 and barrier height, electron affinity,
 etc 17 p2980 A66-32650
 Work function of polycrystalline rhenium
 surface in cesium
 atmosphere 17 p2983 A66-33103
 Low pressure combination of barium and
 cesium vapors for reduction of transport-
 affected losses in thermionic energy
 converters, noting work function and V-I
 characteristics 18 p3055 A66-34584
 Air ionization effect on vigilance task
 performance, noting smaller decrement for
 environment containing negative
 ions 20 p3504 A66-36933
 Work function of semiconducting barium
 titanate as function of temperature for
 testing Heywang theory of polycrystalline
 material anomalous resistance
 behavior 20 p3616 A66-37404
 X-ray and metallographic examination of
 tungsten alloys, noting decrease of work
 function during thermal emission upon
 addition of lanthanum
 hexaboride 20 p3584 A66-37414
 Adsorption of lithium on /110/, /111/ and
 /112/ planes of single-crystal tungsten in
 field-emission projector, measuring work
 function dependence on
 concentration 20 p3618 A66-37558
 GaAs field emission cathode microscopy
 patterns prepared by chemical etching and
 low temperature field
 desorption 20 p3623 A66-38393
 Vacuum thermionic work function for well-

outgassed polycrystalline surfaces, noting
 techniques for accurate measurement of
 current, area and temperature
 values 20 p3587 A66-38401
 Surface patch electrostatic field effects on
 field emission single crystal plane work
 function determinations 21 p3770 A66-38656
 MOS work function difference effect on
 surface charge density and orientation
 calculations for Si-silicon dioxide
 interfaces 22 p3962 A66-40050
 Noise measurement in field emission
 vacuum diodes, interpreting excess and shot
 noise spectrum in terms of work
 function 22 p3878 A66-40696
 Saha-Langmuir formula applied to
 description of temperature dependence of
 positive ion current in surface ionization of
 silicon atoms, comparing work functions by
 methods using contact potential, thermionic
 emission and Richardson
 graphs 22 p3968 A66-40942

WORK HARDENING
 Three-stage hardening in tantalum single
 crystals deformed in tension over limited
 range of orientations, temperatures and
 strain rates 02 p0246 A66-12194
 Phase work hardening of austenitic Fe-Ni
 alloys in phase transformation
 process 06 p0896 A66-16607
 Tempering temperature effect of annealed
 and workhardened steel on structural
 stability 09 p1391 A66-20863
 Stress and strain distributions around
 cracks in sheet materials having various
 work-hardening
 characteristics 10 p1614 A66-21340
 Displacement bound theorems for work
 hardening continua subjected to impulsive
 loading in inelastic
 continua 11 p1781 A66-22610
 Effect of random distribution of point-like
 obstacles on dislocation movement analyzed,
 proving existence of critical applied stress,
 deriving structure of work-hardened
 crystal 12 p1971 A66-24924
 Critical analysis of Hirsch linear strain
 hardening theory, discussing decrease of
 dislocation cluster radius 12 p1898 A66-24926
 Mechanical strength and plasticity of work
 hardened KhN77TiUr
 alloy 14 p2304 A66-28208
 Multiplication of moving dislocation in
 work-hardening of crystal 15 p2559 A66-28631
 Notched and unnotched bending fatigue
 strength of machined work hardened AISI
 type 305 stainless steel affected by cold
 worked surface layer with high compressive
 residual stresses 15 p2521 A66-29073
 VT25 titanium alloy strength, plasticity and
 microhardness with combined thermal and
 mechanical treatment 15 p2522 A66-29187
 Linear and nonlinear nonassociated flow
 laws analyzed for elastoplastic work-
 hardenable solids 18 p3255 A66-34392
 Surface layer of heat-treated steel alloy
 after work hardening 23 p4081 A66-41405
 Work hardening and laws of plastic flow
 applicable to element of
 polycrystal 23 p4145 A66-41986

WORKING FLUID
 Process fluid lubrication of system
 bearings 01 p0079 A66-10867
 Heat pipe performance, emphasizing heat
 carrying and waste heat dissipation
 functions, construction and materials
 testing 05 p0616 A66-15543
 Iodine evaluated as working fluid in
 supersonic wind tunnel through study of
 iodine dissociation
 process 11 p1683 A66-22594
 Liquid metals as coolants or working fluids
 in nuclear auxiliary power systems for
 extended space missions 11 p1735 A66-23267
 MHD nuclear electric space power systems
 using noble gases seeded with alkali metal
 vapors as working fluid 13 p1998 A66-25526
 Space power systems using liquid metal
 /LM/ working fluids in boiling-condensing
 cycle, specifically condensing-ejector
 LMMHD power system 13 p1998 A66-25528
 Optimal working fluid for Rankine cycle
 engine
 [ASME PAPER 66-GT-84] 14 p2411 A66-26990
 Liquid phase compression in closed cycle
 gas turbine by using particular working
 fluids for application to nuclear power
 stations

- [ASME PAPER 66-GT-111] 14 p2411 A66-27005
Thermodynamic cycles with compression in liquid phase using nitrogen tetroxide, calculating I-S diagram 14 p2413 A66-27826
Conductivity of working fluid of MHD generator, using thermionic emission from suspended lanthanum hexaboride powder 15 p2552 A66-29408
Jet compression requirements for circulating working medium in closed cycle magnetoplasmadynamics /MPD/ electrical power generator 15 p3280 A66-35621
[AIAA PAPER 65-466] 19 p3280 A66-35621
Thermodynamics of MHD converter cycles with previously mixed liquid metal used as working body, discussing thermal, electrical and energetic efficiency 20 p3496 A66-36986

WORLD DATA CENTER

- Periodical and quasi-periodical cosmic ray variation according to data of worldwide network of stations, using crossed telescope 07 p1127 A66-18013
International Geophysical Calendar for 1966 prepared by International Ursigram and World Days Service with advice of IQSY reporters 08 p1219 A66-19410

WRAP

S WEAPONS READINESS

ACHIEVEMENT PROGRAM /WRAP/

WRINKLE

- Structural analysis and experimental verification of sandwich panels with thin plastic-film facings and foam-plastic cores under compression and bending loads 03 p0437 A66-12769

WROUGHT ALLOY

- High temperature alloys for gas turbine, examining advances in creep strength, low cycle fatigue and wrought and cast turbine blading alloys 06 p0898 A66-17079
Stress rupture of double extruded wrought alloy of cast nickel-base superalloys 12 p1895 A66-24373
Densities of wrought aluminum alloys computed from rule of mixtures and metallurgical phenomena and compared with observed densities 15 p2522 A66-29075
Aging behavior and mechanical properties of three wrought high-strength magnesium-yttrium alloys 18 p3122 A66-33751

X

X-15 AIRCRAFT

- Boundary layer noise and effects of acoustic energy on panel response, panel fatigue and internal sound levels tested with X-15 aircraft 01 p0010 A66-10126
Flight program and performance of X-15 research aircraft noting aerodynamic heating, cockpit, controls and handling qualities 01 p0011 A66-10340
X-15 research vehicle auxiliary power system discussing operation, hardware and major components 01 p0016 A66-10829
[SAE PAPER 650829] 01 p0016 A66-10829
X-15 aircraft and future research noting previous flight data on hypersonic aerodynamics, structural and aerodynamic heating, etc 02 p0179 A66-12238
[SAE PAPER 650657] 02 p0179 A66-12238
Present and future X-15 aircraft research, evaluating flight characteristics, propulsion and structural materials 05 p0610 A66-15072
[AIAA PAPER 64-781] 05 p0610 A66-15072
Solar spectrum measurement, discussing equipment design, testing and application [ISA PREPRINT 1.11-2-65] 05 p0684 A66-15511
X-15 flight problems not encountered during simulation, particularly differences in aerodynamics, control systems, cockpit equipment, etc 07 p1017 A66-17274
System engineering model formulation and evaluation, citing as examples X-15 aircraft and Manhattan automobile traffic control systems problems 15 p2619 A66-29381
X-15 as tool for progress in hypersonic flight, examining problems of transmitting and reducing wealth of telemetry data 16 p2634 A66-31285
Atmospheric density measurements for altitudes up to 74 km from X-15 flights using stagnation pressure method 18 p3104 A66-33646

- [AIAA PAPER 66-441] 18 p3104 A66-33646

X-19 AIRCRAFT

- Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems 14 p2300 A66-26996

[ASME PAPER 66-GT-92] 14 p2300 A66-26996

X-20 AIRCRAFT

- X-20 program for maneuverable hypersonic reentry vehicle, noting boost-glide dynamic soaring 08 p1300 A66-18555

- Model 876-C accessory power unit /APU/ for advanced continuous duty power supply for X-20 Dyna Soar space vehicle [AIAA PAPER 64-753] 13 p2008 A66-26654

X-21 AIRCRAFT

- Flight testing of laminar flow control on X-21 aircraft, noting degradation of laminar performance in proximity of clouds or atmospheric turbulence, feasibility, handling, etc 18 p3050 A66-34949

X-22 AIRCRAFT

- Variable stability system /VSS/ incorporated into X-22A aircraft to obtain flight data on VTOL aircraft [AIAA PAPER 65-706] 01 p0013 A66-10944

- X-22A variable stability and control VTOL aircraft 06 p0809 A66-16816

- Transmission systems selection for high-speed lightweight applications, including air-cushion vehicles and Bell X-22A V/STOL aircraft [ASME PAPER 66-MD-71] 21 p3743 A66-38499

X-BAND

- Three-port waveguide circulator design analyzed with X-band, using magnesium manganese ferrite 01 p0038 A66-10524
4-port E-plane cross junction ferrite circulator analyzed in X-band 01 p0039 A66-10532

- Reggia-Spencer phase shift for X-band scanning antenna 01 p0042 A66-10581

- Microwave oscillations from reverse-biased planar silicon diode chip operating at X-band frequencies 03 p0338 A66-12431

- Waveguide X-band tunnel diode mount design 03 p0339 A66-12446

- Maser preamplifier designed into X-band weather radar set increased radar sensitivity by 12.5 decibels to overall 118.5 decibels 04 p0480 A66-13688

- Magnetoelastic interaction in thin permalloy films at X-band noting phonon excitation by spin waves, spin wave excitation by phonons and re-excitation of spin waves by phonons 04 p0561 A66-13726

- Atmospheric wind velocity measurements by probing artificially ionized columns of air with two independent X-band radar systems 05 p0711 A66-14633

- Properties of helical delay line used to feed frequency scanned X-band array, noting role of ball bearing inserted in helix 06 p0854 A66-16886

- Reduction of signal power in X-band CW aircraft radar echo 08 p1181 A66-18718

- Comparison of detection and resolution performance of multiplicative and additive aerial array in presence of noise 08 p1193 A66-19119

- Nonlinear phenomena and relaxation oscillations associated with magnetoelastic propagation in yttrium iron garnet 08 p1198 A66-19751

- High resolution X-band FM/CW radar for radar cross section measurements 10 p1500 A66-21620

- Frequency-stepping system for obtaining frequency-averaged radar cross section data and high range resolution data implemented in X-band 10 p1501 A66-21622

- Current-voltage characteristics of CW X-band GaAs microwave Gunn generator 11 p1713 A66-23029

- Atmospheric wind velocity measurements by probing artificially ionized columns of air with two independent X-band radar systems 14 p2326 A66-27702

- X-band electron-cyclotron resonance plasma accelerator 14 p2344 A66-27967

- Multipactor effect in X-band waveguide slots, determining multipacting occurrence and parallel plate role 15 p2464 A66-29043

- Change in ferrite transverse dimensions, examining effect on variable-field isolator performance in X-band 15 p2565 A66-29059

- Noise performance of X-band microwave sources, using transistorized crystal oscillators and amplifiers and varactor frequency multipliers for application to communication systems 15 p2465 A66-29672
X-band strip transmission line tunnel diode amplifier 16 p2667 A66-31648

- Noise behavior of X-band microwave mixer over range of intermediate frequencies and local oscillator powers, noting variation of mixer conversion gain, etc 17 p2892 A66-32920

- X-band solid state source using chain of frequency multiplier stages and driven by transistor crystal controlled driver 17 p2893 A66-32923

- X-band low power pulse Doppler radar and S-band weather radar for meteorological applications 24 p1476 A66-43045

X-RAY

SA BREMSSTRAHLUNG

SA PHOTON

- Auroral zone X-ray bursts and polar magnetic substorms 03 p0422 A66-12873
Hard X-ray emission during few half-cycles of theta pinch discharge before breakdown explained by bremsstrahlung of free accelerated electrons colliding with tube wall 04 p0555 A66-14326

- Neutrino producing cooling reaction rates indicate that discrete X-ray sources located in direction of galactic center are not neutron stars 05 p0760 A66-14895

- Photoconductivity and p-n photoeffect in SiC single crystals excited by X-rays 09 p1425 A66-20188

- Galactic and metagalactic cosmic gamma- and X-ray intensities 09 p1437 A66-20203

- Mechanism of electron leakage from outer radiation belt and X-ray bursts in stratosphere 09 p1446 A66-21037

- Mechanism for production of X-rays and gamma rays in galaxies, noting photon and electron spectrum 10 p1598 A66-21100

- Galactic X-rays, discussing soft X-rays, UV radiation, isotropic X-rays, electromagnetic radiation from X-ray sources, etc 10 p1600 A66-21854

- Continuous electromagnetic radiation from solar flares, examining X-ray bursts from synchrotron, Compton and bremsstrahlung mechanisms 11 p1762 A66-22406

- High sensitivity detectors for low-key cosmic X-ray sources, noting aperture construction from ganging of gas counter outputs 12 p1879 A66-23697

- X radiation in discharge of TA 2000 torus 13 p2138 A66-25123

- Hard X-rays from exploding wires, noting high penetrating power after current dip 13 p2127 A66-25573

- Simultaneous IR emission and auroral X-ray observations from high altitude balloon flights 14 p2376 A66-27399

- Flux and energy spectra of primary cosmic X and gamma rays between 20 kev and 1 mev from balloon-rocket measurements 15 p2591 A66-30020

- Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914

- Electrode geometry, optimum configuration of hot-filament vacuum ionization gauges, and ion-collector burying technique 17 p2923 A66-31981

- Microwave and X radiation from plasma produced by electrodeless discharge in hydrogen, showing presence of accelerated electrons leading to plasma oscillations 21 p3783 A66-39023

- Temperature measurements of laser sparks from relative intensity of X-ray flux transmitted through beryllium foils of different thickness 22 p3933 A66-40421

- Sporadic E layer formation at night, noting ionization sources and intensity 23 p4064 A66-41645

- Fiber optics application to wave guidance of X-rays 24 p4236 A66-42252

- RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941

- X-RAY ABSORPTION
Electrical conductivity variation of low and high resistance germanium due to X-ray radiation absorption 07 p1100 A66-17932

Plasma electron temperature measured from soft X-ray bremsstrahlung absorption by beryllium foil 16 p2756 A66-30096

X-ray absorption edge observation by transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-37275

Interstellar X-ray absorption edges due to K-shell photoionization of oxygen and neon, using element abundances and atomic photoelectric cross section 21 p3809 A66-38658

X-ray K-absorption spectra of titanium, vanadium and germanium in germanides 23 p4082 A66-41826

-RAY ANALYSIS

X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing atomic displacements 01 p0124 A66-10772

Crystal structure of hexamethylenetetramine hexahydrate determined using X-ray analysis, noting hydrogen bonding in crystalline state 03 p0330 A66-12338

Balloon measurements of solar protons and auroral X-rays discussing radiation detectors, flight techniques, instrumentation and results 03 p0417 A66-12654

Molecular configuration of bis /ortho-dodecacarborane/ determined by three-dimensional X-ray crystallography 06 p0822 A66-16631

Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 07 p1092 A66-17220

Evaluation of sounding rockets for meteorology for 30 to 200-km altitude range, noting role in X and gamma ray detection, sporadic E layer, etc 07 p1140 A66-17610

Phase diagram of ternary system niobium-aluminum-nickel with results of thermal, microstructural and X-ray phase analyses and hardness measurements 07 p1050 A66-18063

Energy spectrum of auroral zone X-rays, noting electron precipitation and diurnal pattern for occurrence of bremsstrahlung 10 p1599 A66-21145

Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 10 p1548 A66-21240

Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 10 p1546 A66-21509

X-ray analysis of zinc diffusion induced defects in gallium arsenide 10 p1576 A66-21547

X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing atomic displacements 11 p1749 A66-22283

Orthogonal x radiographs determination of hypervelocity fragment characteristics from shaped charge for potential terminal ballistics application 11 p1685 A66-22839

Holography, X-ray crystallography and correspondence between optical image synthesis and heavy atom technique 11 p1707 A66-23194

Phase equilibrium diagram of Ti-Co-Al system at 800 degree C, based on X-ray and Microstructural analyses 12 p1893 A66-23762

Recrystallization diagram of high purity rhenium after cold-rolling of single crystal specimens 12 p1897 A66-24901

Kinetics of two-phase decomposition of solid solution of magnesium-aluminum alloy, using X-ray analysis, noting grain orientation and size 12 p1898 A66-25027

Aging effect on structure of cobalt alloys annealed at 1200 degrees C suggests formation of laminar regions 12 p1898 A66-25030

Photoelectric properties and relaxation time of polycrystalline layers of cadmium sulfide are highly dependent on substrate temperature 13 p2160 A66-25097

X-ray analysis of molybdenum-nickel-silicon ternary crystal structure 13 p2108 A66-25683

X-ray method determining diameter of Guinier-Preston I zones and fraction of copper atoms contained in such zones in Al-Cu alloys 13 p2111 A66-26583

Vacancies and agglomeration effect on integral characteristics of anomalous X-ray transmission 14 p2357 A66-27077

Chemical and physical properties of

samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465

Aging of aluminum alloy after quenching and strain hardening, noting Vickers hardness tests, tensile tests, precipitation phases, shearing effect, etc 14 p2315 A66-27468

[PST PAPER 423]

X-ray study of component atomic scattering and structural defects for titanium and carbide atoms in titanium carbide 15 p2520 A66-28754

Tellurium concentration in doped GaAs correlated by electron probe microanalysis with variations in cathodoluminescence efficiency 15 p2564 A66-28878

X-ray investigation of niobium-cobalt system 16 p2725 A66-31457

Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 17 p2976 A66-31991

Use of balanced filter pairs for nondispersive analysis of aluminum and silicon in aluminum-silicon mixtures 18 p3063 A66-33693

Structural chemistry of boron and compounds analyzed by X-rays, examining effects of increasing boron-to-metal ratio on boron-containing crystal structure 18 p3064 A66-34388

Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 19 p3388 A66-35863

X-ray and metallographic examination of tungsten alloys, noting decrease of work function during thermal emission upon addition of lanthanum 20 p3584 A66-37414

State diagram structure of Ti-Cu system examined, using metallographic, thermographic, X-ray and microhardness analyses 20 p3584 A66-37419

X-ray analysis of crystal structure relationships among transition elements in binary and ternary aluminide alloys 20 p3586 A66-38092

Mossbauer, X-ray and magnetic measurements of wustite structural and magnetic decomposition properties 20 p3623 A66-38391

Cosmic X-ray source near direction of north galactic pole, noting empirical results from balloon observations 21 p3810 A66-39267

X-ray analysis of lattice structure of terbium crystals at 120 to 300 degrees K 21 p3803 A66-39304

Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 23 p4081 A66-41529

Kinetics of heating and evaporation of exploding copper and brass wires in air and polyethylene tubes studied by X-ray techniques 24 p4238 A66-42976

X-RAY ASTRONOMY

X-ray source identified from Aerobee rocketborne Geiger counters, noting lunar occultation of Crab Nebula 02 p0282 A66-11360

Galactic X-ray astronomy discussing neutron stars, thermal bremsstrahlung and synchrotron radiation 02 p0290 A66-11864

Cosmic X-ray and gamma ray astronomy in studying stellar evolution, cosmic ray origin and structure of universe 06 p0944 A66-16314

Eight discrete cosmic X-ray sources observed by rocket techniques 09 p1442 A66-20409

Galactical distribution of X-ray sources, noting concentration toward galactic plane 09 p1442 A66-20414

Probable relation between OB associations, runaway stars, supernovas and X-ray sources 09 p1443 A66-20469

X-ray source identified from Aerobee rocketborne Geiger counters, noting lunar occultation of Crab Nebula 10 p1598 A66-21101

Astronomical instruments and observation procedures for soft X-rays and extreme UV radiation 12 p1880 A66-23944

Positional coincidence of X-ray source Sco X-3 with extended H II emission region which may be remnant of supernova explosion 15 p2591 A66-29681

Crab Nebula X-ray spectrum from 16-120

kev by balloon 16 p2792 A66-30143

Discrete source of cosmic gamma rays above 1 gev in balloon-borne detection 16 p2792 A66-30171

Free-free galactic X-ray emission from hot fully-ionized hydrogenic plasma 17 p2992 A66-31916

Optical observations of brightest X-ray source in Scorpius 17 p2992 A66-31917

Crystal spectra and broadband measurements of solar and galactic UV, X-rays, gamma rays, etc, outside Earth atmosphere 17 p2998 A66-32030

X-ray emission from Sco X-1 and Crab Nebula sources observed with Aerobee 150 18 p3166 A66-34157

X-ray emission from Scorpio X-1, discussing origin of extar and possible role in stellar evolution 18 p3166 A66-34158

High energy X-ray spectrum from Crab Nebula at photon energies up to 90 kev 18 p3170 A66-34529

X-ray and gamma ray astronomy, discussing observational methods, physical processes of generation, radiation intensity, etc 18 p3176 A66-34749

Galactic X-ray energy spectrum noting equipment used, shape of spectra in terms of thermal radiation intensity, etc 18 p3177 A66-34757

Balloon flight experiment to search for celestial sources of X-rays in energy range 20 to 58 kev 18 p3193 A66-34852

Spectral composition including X-ray and gamma ray astronomy, electrons in primary cosmic radiation, protons and helium nuclei, isotopic composition and heavy nuclei 18 p3194 A66-34855

Rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237

Celestial X-ray sources at low galactic longitude located by rocket observation 23 p4123 A66-41148

Exponential spectrum of Scorpius XR-1 to 50 kev observed by balloon 23 p4124 A66-41819

X-RAY DENSITY MEASUREMENT

Primary omnidirectional X-ray flux magnitude evaluated by directional detectors at balloon altitudes 01 p0132 A66-10333

Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux intensity 09 p1459 A66-20885

Lunar magnetosphere, Moon-solar wind interaction, X-ray flux measurement and possible hazards to astronauts 18 p3231 A66-34357

X-rays and Auger electron emission by krypton 81 measured, using proportional counter 24 p4262 A66-42430

Solar flare and sunspot X-ray and radio burst correlation, noting sudden ionospheric disturbances 24 p4262 A66-42460

X-RAY DIFFRACTION

Digital computer automated X-ray diffraction method to determine residual stress to improve processing reliability 01 p0033 A66-10102

Lunar rock petrography by X-ray diffraction system in soft-landed unmanned spacecraft 01 p0067 A66-10312

X-ray diffraction from cerium deformed at room temperature to form extrinsic stacking fault 02 p0272 A66-11710

Beta phase in alloys determined based on titanium with aid of X-ray diffraction 02 p0246 A66-11997

X-ray measurements of thermal expansion of arc-cast carbides of titanium, zirconium and hafnium 03 p0381 A66-12636

Aging characteristics of Al-Zn-Mg alloys 03 p0381 A66-12722

X-ray single crystal diffraction technique determination of structure of pyridinium dicyanomethylide 04 p0472 A66-13364

Crystal structure of porphine determined by X-ray diffraction analysis 04 p0473 A66-13642

Hall effect of bismuth evaporated films, discussing structural dependence of sign and magnitude, effects of pathlength, impurities, gas adsorption and experimental techniques 05 p0729 A66-14510

Crystalites of CdS in obliquely evaporated film on relative intensity of X-ray

diffraction peaks 05 p0736 A66-14975
 Temperature effect on diffraction curve profile for Bragg case using triple crystal spectrometer, observing intrinsic temperature effect due to thermal motion 06 p0923 A66-16186
 Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 06 p0896 A66-16539
 Hologram imaging process in which Fresnel diffraction pattern of object is recorded by scanning at X-band 06 p0881 A66-16638
 X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047
 Effectiveness of measurements of X-ray diffraction intensities as probe of lattice defects introduced in perfect germanium crystals by energetic particle irradiation 06 p0933 A66-17121
 Oxidation products of thin foils of titanium carbide, noting epitaxial growth relationship between titanium carbide, transient oxides and titanium oxide 07 p1052 A66-18512
 Tungsten diboride preparation and structure 08 p1235 A66-18636
 Light and electron microscopic metallography and X-ray diffraction microanalysis of phase reaction during heat treatment of Ni-base superalloy 08 p1236 A66-18757
 Martensitic transformation kinetics and maraging mechanism in Fe-Mn-Ni-Ti alloy observed by electron and X-ray diffraction 08 p1236 A66-18762
 Low angle X-ray procedure for investigation of molecular dimensions in bulk polymers 08 p1258 A66-18942
 Dielectric properties and lattice parameter dependence on temperature from X-ray studies of rubidium-potassium nitrate mixed crystals 08 p1269 A66-19008
 Electrical properties of alpha ferric oxide containing magnesium, noting temperature effect, carrier concentration, conductivity variations, etc 08 p1271 A66-19221
 Fatigue damage of metals under mean stress investigated by X-ray diffraction 08 p1314 A66-19551
 Structure defects in silicon crystals which cause X-ray double images studied, using X-ray diffraction topography and etching technique 10 p1574 A66-21347
 Lattice constants of ultrapure phenanthrene to determine resistivity anomaly association with polymorphic transformation 10 p1576 A66-21553
 Argon-oxygen phase diagram determined by X-ray diffraction 11 p1650 A66-23208
 Plastic flow peculiarities analysis based on X-ray diffraction effects obtained by deforming single crystal molybdenum of various orientations 12 p1898 A66-25026
 Crystallites in evaporated film of CdS on Au and Al films studied by X-ray diffraction 13 p2161 A66-25196
 Lattice parameters and constant measured in gadolinium-yttrium alloy dihydrides, using X-ray diffraction techniques 13 p2162 A66-25382
 Cadmium sulfide single crystal preparation by zone sublimation method, analyzing structure via X-ray diffraction and obtaining photosensitivity curves 13 p2165 A66-25680
 Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 14 p2357 A66-27071
 Effect of impurity atoms or neutron irradiation on X-ray diffraction intensities of silicon and germanium crystals 15 p2559 A66-28625
 Cleavage behavior of solid solution alloy Ta-Mo, noting electric resistivity, tensile properties, lattice parameters, diffraction coefficients, etc 15 p2520 A66-28650
 Precipitation effects in phosphorus-diffused silicon after gold diffusion, using transmission X-ray diffraction microscopy 15 p2561 A66-28700
 Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 15 p2524 A66-29986
 Two oxycarbide phases in zirconium-carbon-oxygen compositions found in

zirconia-carbon mixtures at high temperatures, giving X-ray diffraction patterns indexed as fcc at various lattice parameters 16 p2729 A66-30246
 X-ray diffraction patterns of fatigue damage of metals under alternating mean and torsional stress 16 p2816 A66-30810
 X-ray diffraction study of minerals from shocked iron meteorites 16 p2803 A66-31014
 X-ray diffraction analysis of single crystal silicon film grown on several natural faces of BeO by thermal decomposition of silane and hydrogen reduction of silicon tetrachloride 16 p2782 A66-31420
 Three-dimensional X-ray diffraction data to determine structure of crystal of potassium barium hexanitrocobaltate, discussing Jahn-Teller effect 17 p2871 A66-33489
 Phase equilibrium of Nb-Al binary system determined via metallographic, X-ray diffraction hardness and thermal analysis techniques, noting solubility, structure, nucleation growth, etc 18 p3120 A66-33723
 Berg-Barrett skew reflections applied to observation of boron diffusion-induced imperfections in silicon wafers 18 p3076 A66-33935
 Abnormal X-ray interference pattern change during aging of nickel-beryllium alloys 18 p3124 A66-34405
 Planar and needle-like defects in natural quartz examined via X-ray diffraction, noting composition and diffraction contrast when observed from different Bragg planes 19 p3434 A66-35403
 Chemical sectioning of p-type surface layers on silicon, presenting electrical and X-ray measurements of boron-induced defect distribution 19 p3436 A66-35424
 Stress corrosion in titanium alloys noting measurement techniques, crack forming effect of chlorine and surface treatment via metal coating 19 p3378 A66-35651
 Continuous silicon carbide filaments prepared using chemical vapor-deposition techniques, analyzing cross sections, x-ray diffraction and tensile strength 20 p3588 A66-37772
 Solubility and phase transformation in titanium-zirconium system, using X-ray diffraction techniques 20 p3585 A66-37786
 Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 22 p3966 A66-40829
 Laue reflection method of X-ray diffraction, determining single crystal orientation 24 p4255 A66-42506

X-RAY EQUIPMENT

Vacuum and low temperature X-ray camera for structural analysis of oxidized materials 04 p0518 A66-13490
 Simultaneous measurement of voltage, current, current derivative and X-ray output as function of time in low inductance flash X-ray discharge tube 18 p2706 A66-30935
 Photodiode operation mode and steady-state response of diffused p-n junction type Si radiation detectors to X-rays 17 p2975 A66-31883
 Rocketborne instruments for observing galactic X-rays including scintillation and proportional and GM counters 23 p4067 A66-41287

X-RAY INSPECTION

SA FLAW DETECTION
 Ruby laser crystals grown by flame-fusion, flux and Czochralski method examined for perfection by X-ray topography and double-crystal rocking curves 04 p0529 A66-13744

X-RAY IRRADIATION

Terrestrial albedo of 40 to 190 kev X-rays measured, using directional detectors at balloon altitude 03 p0419 A66-12683
 Partial canine body exposure to ionization radiation noting anorexia, weight loss, vomiting and hypersialosis due to 1000 kvp X-ray exposure 03 p0326 A66-13352
 X-ray characteristic temperature of germanium-silicon solid solution of equiatomic composition 07 p1106 A66-18379
 Alpha particle and X-radiation ionizing effects on cerebral astroglial cells and blood vessels of young rats 10 p1487 A66-22020
 X-ray produced auroral light emission in air and excitation of second positive and first negative bands in nitrogen 11 p1765 A66-23152

Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824
 X-ray radiation effect on electrical conductivity of liquid organic semiconductors obtained on diethyl ether base with halogen derivatives of benzene, methane, etc 13 p2160 A66-25096
 X-ray irradiated MOS structure behavior, noting ionic charge motion in oxidized silicon that depends on electric field 18 p3155 A66-34083
 Galactic and atmospheric X-ray characteristics determined by two scintillation counters borne on sounding rocket booster 19 p3452 A66-35354
 X-radiation alignment of quartz crystals for generation and detection of reverberating acoustic echoes at liquid-helium temperatures 20 p3624 A66-38409
 Scintillation analysis of hard X-radiation from high power pulse discharges 22 p3952 A66-39753
 Ionization and constitution of neutral atmosphere, including solar EUV, X-ray and corpuscular sources 22 p3905 A66-39944
 X-ray irradiation effect on venous blood flow in rabbit brain vessels 23 p4027 A66-41344

X-RAY PHOTOGRAPHY

X-ray photograph confirmation in 1964 of solar brightness distribution derived from ionospheric observations during solar minimum in 1954 04 p0579 A66-14179
 Contrast of dislocation near Si surface in anomalous transmission X-ray topographs 06 p0927 A66-16760
 Four-lobed rosette stress patterns in X-ray topography of silicon bombarded by electron beam 06 p0928 A66-16761
 X-ray photographs of Sun using Fresnel zone plate camera mounted on Skylark rocket, noting Lyman C-VI emission line in solar spectrum 10 p1607 A66-21291
 Behavior of high speed panchromatic emulsions and films sensitive to X-ray and far UV radiation exposed in spectral region 8-10 angstroms 15 p2499 A66-28885
 X-ray motion picture recording of change in A-P chest diameter and heart position of five human subjects during transverse centrifuge accelerations of 5G and 10G 16 p2639 A66-31119
 Holography, discussing potential uses, frozen wave fields, holograms at X-ray wavelength and stress analysis 21 p3739 A66-39199
 Mass of shaped charge accelerator generated fragments determined via high speed flash X-ray photography of projectiles in flight 24 p4209 A66-42186

X-RAY SCATTERING

Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 01 p0124 A66-10768
 Diffuse X-ray scattering in crystal structure of Ni-Be and Cu-Be alloys during first stage of aging due to anisotropic monoclinic lattice distortions 08 p1235 A66-18589
 Calculation of approximate expression for van der Waals energy with aid of variationally determined polarizabilities 08 p1178 A66-18937
 Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 11 p1748 A66-22279
 Verification of Kiessig equation for interference fringes formed by X-rays scattered from thin films 12 p1926 A66-23712
 Von Laue and Cowley diffraction theories of coherent diffuse X-ray scattering from random alloys, predicting diffuse intensity singularities at reciprocal lattice points 22 p3948 A66-40084

X-RAY SPECTROGRAPHY

Rocket and satellite study of solar X-ray emission by quiet Sun and solar corona 07 p1132 A66-18262
 X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311
 X-ray spectrum produced by thermal bremsstrahlung of gas, taking Gaunt factor into account 18 p3200 A66-35049

X-RAY SPECTROMETRY

Isotopic volume shift in X-ray molybdenum K alpha 1 line 01 p0084 A66-10255

Solar X-ray photographs, describing Aerobee rocket mounted telescope using grazing incidence optics 05 p0763 A66-15289

Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17573

Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574

USAF whole body gamma spectrometry in support of Air Force aerospace mission 07 p0999 A66-17664

Pendellosung fringes in elastically deformed silicon, observing X-ray wavefield beam interference upon superimposition on crystal exit surface 07 p1098 A66-17815

Spatial and temporal character of fast variations in auroral zone X-rays, describing balloon experiment and results 08 p1284 A66-19397

Spectrometer monitoring soft solar X-ray radiation in 1 to 400 angstrom wavelength range 08 p1225 A66-19516

Solar X-ray spectrum studies, mainly oxygen and iron lines, using Aerobee rocket 10 p1598 A66-21082

Energy spectrum for auroral zone X-rays, measuring simultaneously bremsstrahlung X-rays and ionospheric absorption 10 p1599 A66-21146

Nuclear instrumentation for lunar surface and subsurface measurements in Apollo Extensions System 12 p1878 A66-23695

Aerobee rocket measurements of cosmic X-ray sources emanating from Cygnus A, M-87 and galactic supernova remnant Cassiopeia A 13 p2174 A66-25836

Isotopic volume shift in X-ray molybdenum K alpha 1 line 13 p2110 A66-25972

Soft X-ray spectrum of Sun analyzed, using isothermal model of quiet corona providing representation of line intensities of C and Mg ions 17 p2994 A66-32657

Energy spectrum of primary galactic X-rays between 20 and 50 keV observed during flight with NaI crystal 50-channel spectrometer 18 p3193 A66-34851

Time structure of auroral X-rays at Swedish and Finnish locations, using simultaneous balloon flights 19 p3452 A66-35562

X-RAY SPECTROSCOPY

X-ray L band absorption spectra of rare earth atoms in hexaborides, collecting evidence on valence state 01 p0126 A66-10980

X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 03 p0397 A66-12392

X-ray spectroscopy in high energy plasma, noting similarity to standard techniques 04 p0522 A66-14195

K-shell photon absorption spectrum of neon gas 06 p0890 A66-16386

Manganese X-ray emission lines in compound-oxide semiconductor 07 p1105 A66-18369

Electronic structure of refractory compounds based on X-ray study of chromium spectra 09 p1391 A66-20871

Thermal origin of X-ray radiation of quiet Sun possible, suggesting quasi-stable component produced in undisturbed corona and slowly varying component in active corona 10 p1598 A66-21087

Night sky sources for soft X-rays, examining data obtained by Aerobee 4.70 detectors 10 p1598 A66-21102

Neutron star atmosphere models for determining, surface temperature, cooling time and X-ray emission 10 p1599 A66-21103

K absorption spectra of germanium and selenium in germanium selenide based on band theory of solids by assuming electrons transfer, using X-ray spectroscopy 11 p1758 A66-23368

Nondispersive X-ray spectrometer for remote geochemical analysis of lunar or planetary surfaces 12 p1878 A66-23694

X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 13 p2139 A66-25398

Diurnal variation of average energy spectrum of auroral X-rays observed from balloon flights, assessing effect of atmospheric absorption 14 p2376 A66-27614

Cosmic X-ray sources observed through rocket-mounted detectors, noting differences in spectra 17 p2994 A66-32970

Nickel aluminide structure, examining arrangement of Ti, Cr and W in lattice via X-ray spectroscopy 19 p3381 A66-35928

Solrad VIII observation of May 20, 1966 solar eclipse penumbral zone in X-ray and UV bands 21 p3810 A66-38468

X-RAY STRESS MEASUREMENT

Moire patterns of two superposed cadmium sulfide crystals observed by Lang method of X-ray observation 01 p0126 A66-10968

Nondestructive X-ray diffraction technique for measuring flexure in single-crystal silicon wafers at different stages of integrated circuit fabrication 02 p0275 A66-11978

X-ray stress analysis of externally-loaded polycrystal lattice strains and residual lattice strains due to internal macro- and microstresses 12 p1957 A66-23629

Dislocation motion in silicon crystals measured by Lang X-ray technique, noting dislocation nucleation and growth with increasing stress below macroscopic yield stress 19 p3447 A66-36725

X-RAY TELESCOPE

Sky observations with balloon-borne X-ray telescope having sodium iodine scintillator 09 p1442 A66-20466

X-RAY TESTING

Ionizing radiation effect on transistor gain, examining X-ray test data 05 p0740 A66-15492

Film thickness measurements on printed circuit-board material plated with gold over copper, using X-ray emission and absorption methods 06 p0886 A66-16429

Radiography and principal factors variation at energies below 400 kVp 15 p2509 A66-29318

XB-70 AIRCRAFT

XB-70 vehicle control system sensing, local force application, coupling and adaptability for increasing structural mode damping ratio, thus avoiding disturbing pilot accelerations and structural loads 01 p0103 A66-10672

XB-70A components and subsystem operation and design noting engine, electrical and cooling control systems [SAE PAPER 650841] 01 p0130 A66-10833

Advances attributable to XB-70 program including aerodynamic concepts, structural material, design, systems and equipment development [SAE PAPER 650798] 01 p0012 A66-10844

Leakage detection system for monitoring component test stand hydraulic circuit 06 p0869 A66-16792

XB-70A, high Mach number handling qualities and suggested improvements through addition of better instrument presentation, automatic flight control, etc 07 p0986 A66-17275

Inlet of XB-70 consisting of two separate parts located under wing, each part supplying air to three of six J-93 engines 07 p0987 A66-17278

Orbit arc automatic tungsten inert gas fusion welding and application to joining tubular systems in aerospace industry [ASTME PREPRINT AD66-719] 12 p1886 A66-24410

Computer graphics in communication 13 p2085 A66-25364

XB-70A propulsion system development and testing emphasizing fuel system, inlet-engine compatibility and engine installation [AIAA PAPER 65-571] 13 p2173 A66-25595

Handling and operation of XB-70 aircraft, noting flight testing, folding wing tips, weight, speed, etc [SAE PAPER 660273] 14 p2222 A66-27284

Aerodynamic concepts and configuration of Mach 3 XB-70A aircraft [SAE PAPER 660274] 14 p2222 A66-27285

Aircraft maintenance, ground servicing, and safety precautions for XB-70 aircraft [SAE PAPER 660275] 14 p2269 A66-27286

XB-70A research aircraft and flight tests to aid SST 18 p3051 A66-33957

XB-70A flight testing, examining effect of

aerodynamic lift, gross weight, altitude, temperature and similar parameters on sonic boom signatures 18 p3052 A66-33959

XB-70 aircraft safety program developed during flight tests applied to future SST civil aircraft 20 p3494 A66-37006

XB-70A reliability program applied to initial system design stage from inception to present flight test program 20 p3568 A66-37917

Bourdon-helix pressure-sensitive switch for air vehicle hydraulic system of XB-70A aircraft and other instruments operating in severe environment 24 p4213 A66-42824

XC-142 AIRCRAFT

XC-142A Flight Test Program, program statistics, aircraft instrumentation and flying qualities in hover and transition flight regimes 06 p0807 A66-16820

XC-142A V/STOL four-engine aircraft in first twelve months of flight, discussing effect of stabilization failure in hover, conversion and STOL areas of operation 07 p0986 A66-17269

XC-142A V/STOL transport aircraft with four-ton payload and 200 nautical mile range radius [AIAA PAPER 64-775] 09 p1330 A66-20735

Engine air induction system, engine and integral gear case oil cooling air induction system and nacelle cooling and ventilating air induction systems of XC-142A [AIAA PAPER 66-632] 18 p3048 A66-34435

XENON

Heat transfer from Ar and Xe to end wall of shock tube measured, using thin film gauge monitored by IR photocell 05 p0782 A66-14705

Xenon, radiogenic Xe 129R and krypton contents and xenon and krypton isotopic composition of Bruderheim meteorite 08 p1297 A66-19409

Heat transfer measurement to side wall of shock tube behind incident shock wave in argon and xenon [AIAA PAPER 66-160] 10 p1560 A66-21428

High density plasma with high optical emissions produced by wall stabilized pulsed arc discharge in xenon, noting absorptivity and electric conductivity [AIAA PAPER 66-184] 10 p1561 A66-21433

Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 10 p1543 A66-21966

Microwave cavity measurement of recombination coefficient of decaying plasma obtained by gamma ray induced ionization of xenon 16 p2756 A66-30098

Mass spectrum and abundances of trapped and spallation fission xenon in Pasamonte meteorite 18 p3225 A66-33624

Xenon sensitized radiolysis of propane, examining heterogeneous neutralization of isopropyl radical 18 p3162 A66-34502

Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 21 p3749 A66-39545

Brightness temperature of shock waves dependence on wave amplitude in xenon and air at high temperature 22 p3898 A66-40190

Four-foot diameter solar radiation simulator system using single xenon arc source and closed-loop heat exchange system for electrode cooling 22 p3887 A66-40206

Isotopic composition of xenon extracted from Ca-poor achondrites, noting relation between enstatite achondrites and enstatite chondrites 22 p3983 A66-40558

Shock tube monitoring of electron-generation rate in argon-xenon ionization cross section implies that atom-atom processes in noble gases ionization cross section is independent of electronic structure 23 p4099 A66-42080

Isotopic composition of Xe indicates that two Ca-rich achondrites comprise group of diopside-olivine achondritic meteorites containing fission-produced Xe 24 p4264 A66-42606

XENON LIGHT

Artificial matching of shape of extraterrestrial solar curve and full intensity under its envelope in space environmental test systems 02 p0212 A66-11221

Compact arc lamps, arcs in enclosed quartz

glass filled with gas or vapor, most powerful and concentrated sources of Uv, near IR and visible radiation 02 p0213 A66-11231
Xenon short arc lamps as radiation sources for solar simulation discussing physical and electrical characteristics, radiant properties, operation and performance 02 p0213 A66-11233

Demountable high-power xenon arc lamp with replaceable silica discharge tube 08 p1168 A66-19296

Optical conversion efficiencies computed from spectral distribution measurements of pulsed and continuous xenon arc discharges 08 p1259 A66-19703

Xenon flashtube design and operating capabilities 10 p1537 A66-21870

Continuous source for atomic fluorescence flame spectrometry using 150-watt xenon arc, total consumption atomizer-burner and low resolution monochromator 17 p2870 A66-32551

XENON 129

Origin of anomalous xenon 129 in meteorite from decay within meteorite itself 04 p0580 A66-14485

XV-5 AIRCRAFT

XV-5A V/STOL aircraft flight testing, noting handling qualities and sequential diversion capability 17 p2844 A66-32731

Lift fan propulsion system using 62.5-inch lift fans flight tested in XV-5A aircraft from hover to subsonic flight regions [AIAA PAPER 66-739] 22 p3972 A66-40628

XV-6A AIRCRAFT

S HAWKER P 1127 AIRCRAFT

Y

YAG

S YTTRIUM-ALUMINUM GARNET /YAG/ CRYSTAL

YAGI ANTENNA

Field structure of electromagnetic surface waves at Yagi array acting as waveguide 01 p0036 A66-10367

Correlation between solar bursts observed in Colorado and riometer records in Brazil, using Yagi antenna 05 p0747 A66-14799

Yagi-Uda antenna array discussing wave theory of semiminfinite and finite arrays, excitation by reflected wave proportional to incident wave and King-Sandler theory 14 p2255 A66-27907

Log periodic Yagi-Uda dipole antenna array and extension of frequency bandwidth 14 p2256 A66-27920

Current magnitude and phase associated with individual elements of slot Yagi-type antenna array on planar and curved surfaces 19 p3321 A66-36406

Formula derivation for directivity of short endfire antenna array, obtaining current amplitude and phases for maximum gain 20 p3531 A66-37725

YAW

Damping effects on initial angular motion of spinning shell with overturning and yawing moment 09 p1466 A66-20260

Yaw effect on vortex shedding from circular cylinder at low Reynolds number 14 p2219 A66-27440

Local heat transfer rates and pressure distributions over windward half of yawed circular cylinder at Mach 8 16 p2830 A66-31254

Tangent cone method extended to determine pressure coefficients of yawed circular cones and ogives at angle of attack 18 p3048 A66-33820

YAW ATTITUDE

Fail-operative stability augmentation system for C-141 jet transport aircraft yaw control axis, using triple redundant sensors and signaling 01 p0011 A66-10662

YEAST

Effects of alpha glycerophosphate and of palmitoyl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616

Postirradiation restitutive capacity of yeast cell suspensions in wort-agar and water after exposure to 1300 rad/min ionizing radiation 15 p2438 A66-29485

Radiosensitivity differences in yeast cells in terms of differences in chromosome-replication and genetic-structure-restitution intensities 15 p2438 A66-29486

Fatty acid synthesis by Saccharomyces cerevisiae crude particles 23 p4029 A66-41377

YIELD POINT

Minimum weight circular plate under two independent systems of loading, noting Tresca yield condition 04 p0587 A66-13487

Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 05 p0779 A66-15451

Crack opening displacement approach to fracture mechanics in yielding materials 11 p1782 A66-22693

Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 12 p1961 A66-23978

Ultrasonic attenuation changes due to dislocation formation during yielding of magnesium, molybdenum and LiF 16 p2726 A66-31458

Theoretical attempt to bridge gap between micro and macro crack formation, estimating plane strain transition and nominal stress for fracture 17 p2939 A66-32303

Redundant structure of material with statistical yield point, determining probability that structure can sustain applied load even after some members have yielded 20 p3571 A66-37943

Constitutive equations of plastic and elastoviscoplastic flow theory for nonstationary yield conditions and strain hardening 23 p4146 A66-41991

Nonlinear programming problem of yield point load of perfectly plastic structure, using limit analysis theorems, with application to curved beam 23 p4146 A66-41992

Plasticity of bodies with abrupt surface discontinuities analyzed, based on mathematical theory of rigid-plastic nonhardenable bodies 24 p4291 A66-42736

YIELD STRENGTH

SA STRESS

Approximate yield conditions for perfectly plastic annular plate under combined tension and bending, noting shallow shell problem 03 p0437 A66-12932

Macroscopic plastic strain rate relation with configuration and velocity distribution of dislocations in monocrystals with single active glide system, noting yield stress 04 p0535 A66-13731

Yield stress master curve for polymers below glass transition temperature 05 p0706 A66-15368

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 05 p0703 A66-15688

Yield criterion of prestrained materials, covering effects of characteristic index and stress direction on yield stress [ASME PAPER 65-WA/MET-4] 05 p0780 A66-15691

Thermal fatigue of constrained bars made of linearly hardened material evaluated, using mathematical analysis 06 p0967 A66-16969

Full plastic moments in struts, analyzing problem of member subjected to combined axial stress and unequal major-axis bending moments at ends 07 p1142 A66-17257

Elastically nonhomogeneous sphere under uniform pressure, determining parameters of plastic deformation 07 p1142 A66-17262

Linear isotropic strain-hardening applied to load-deformation characteristics of cylindrical shells under internal pressure, obtaining Tresca yield criterion and stress profiles 07 p1147 A66-18349

Yield strength of tungsten at various test temperatures by assessing contribution of certain treatment effects separately from carbon effects 08 p1237 A66-18763

Elongation and yield strength of wrought aluminum alloys as affected by gauge length and offset in tension and compression tests 08 p1242 A66-19717

Yield stress dependence on strain rates in annealed steel and aluminum subjected to ball-indentation tests 08 p1315 A66-19803

Heat treatable alpha-beta titanium alloy, Ti-679, with excellent creep and yield strength in 600 to 900 degrees F range 10 p1545 A66-21221

Yield strength dependence on normal to cryogenic temperatures of high strength alloys [ASME PAPER 65-PROD-14] 11 p1715 A66-22475

Initial yielding characteristics of vacuum-melted iron as function of thermal history after slow cooling or quenching, noting interstitial segregation into grain boundaries 11 p1719 A66-23398

Depth of penetration of projectiles impacting at hypervelocities predicted, using dynamic yield strength of material with phenomenological model 12 p1957 A66-23592

Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 12 p1896 A66-24536

Yield criterion of prestrained materials, covering effects of characteristic index and stress direction on yield stress [ASME PAPER 65-WA/MET-4] 12 p1970 A66-24537

Melting practice, sheet thickness and thermal and mechanical treatments effect on critical stress intensity parameter and ductility of 18-nickel maraging steel 13 p2108 A66-25772

Fatigue crack propagation in low-alloy heat-treated notched steels with high yield strength [ASME PAPER 66-MET-2] 14 p2311 A66-26970

Biaxial behavior of titanium sheet, obtaining stress states, yield strength, burst strength, etc [ASME PAPER 66-MET-6] 14 p2312 A66-26974

Chemical composition effect on fracture properties of Al-Zn-Mg-Cu alloys 14 p2317 A66-28009

Microstructure and cooling rate effect on tensile and impact properties of titanium alloy Ti-6Al-6V-2Sn 15 p2521 A66-29072

Yield and flow stress reduction in high strength metals during ultrasonic vibration 16 p2821 A66-31462

Load carrying capacity of circular plates under antisymmetric load 17 p3029 A66-32806

Linearity of mechanical behavior and applicability of yield stress master curve analyzed for various crystalline-type polymers 17 p2943 A66-33004

Temperature and strain rate effects on yield and flow stresses of alpha titanium determined, using continuous and differential testing 18 p3122 A66-33748

Temperature, time and loading conditions for adhesion or cohesion of structural metals in vacuum 18 p3117 A66-34651

Cracking and stress corrosion of titanium alloys noting test environment, temperature and measurement techniques 19 p3378 A66-35652

Stress corrosion mechanism of titanium noting experimental conditions, results of chemical analyses, time factor, material resistance to crack formation, etc 19 p3378 A66-35654

Serrated yielding by metals during tension tests at temperatures near absolute zero 19 p3380 A66-35846

Effects of aging temperature and duration on strength, elongation, yield stress, plasticity and electrical conductivity of Al-Zn-Mg and Al-Zn-Mg-Cu alloys 20 p3585 A66-37698

Yield strength anisotropy due to preferred orientation estimated by Taylor model, considering cold rolled aluminum 20 p3585 A66-37784

Yield locus of titanium and titanium-alloy sheet under combined-stress loading 20 p3585 A66-37787

Papers of F. Nakanishi covering yield point of mild steel, brittle materials, propulsion, plasticity, etc 20 p3683 A66-37826

Two-dimensional elastoplastic problem of stress distribution in plane with hole under compressive forces at infinity, assuming exponential yield condition controls plastic

- state of material 21 p3830 A66-38981
100-200 ksi yield-strength notched steels for high-toughness weldments, discussing quenched and tempered steels, maraging steels, heat treatment effects, etc 21 p3751 A66-39193
Load carrying capacities of rotationally symmetric plates and shells for limited anisotropic behavior and different yield stresses in tension and compression 21 p3831 A66-39375
Tensile stress effect on strain aging of iron, niobium and tantalum 23 p4081 A66-41713
- YIG**
YS YTTRIUM-IRON GARNET /YIG/ CRYSTAL
YOUNGS MODULUS
Precipitation in 17-7 PH stainless steels analyzed, measuring saturation magnetization, Youngs modulus and hardness as functions of aging time for material in condition T 01 p0086 A66-10412
Waves in bars of mechanically unstable materials discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 05 p0778 A66-15444
Elastically nonhomogeneous sphere under uniform pressure, determining parameters of plastic deformation 07 p1142 A66-17262
Martensitic transformation in titanium alloys containing eutectoid-forming elements, noting elastic properties, shear modulus, etc 08 p1239 A66-18906
Isothermal annealing effect on internal friction and Young modulus of cold-rolled aluminum with different purities 08 p1240 A66-19088
Influence of crystal-lattice defects on Youngs modulus and damping constant of aluminum 09 p1388 A66-19980
Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Youngs modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183
Dislocation problems of circular ring with simple type nonhomogeneity and of isotropic circular ring with thickness varying inversely with square of radial distance 14 p2397 A66-27392
Preparation and mechanical properties of spinel, discussing microstructure, transverse and compressive strength and Youngs modulus 16 p2730 A66-30251
Basic theory derived for nonsymmetric elastic three-layer sandwich shells of variable rigidity 17 p3026 A66-32600
Waves in bars of mechanically unstable materials, discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 18 p3247 A66-33571
Theoretical determination of elastic constants, Youngs moduli and Poisson ratios of filament-wound cylinders, using strain measurements in longitudinal uniaxial loading and internal pressure loading 19 p3472 A66-35355
Dislocation-induced relaxation in silicon single crystals by measuring internal friction and Youngs modulus at temperatures from 77 to 300 degrees K 20 p3618 A66-37561
Transient stress measurements in high modulus photoelastic materials with ultrahigh speed photography, noting usefulness of oblique incidence method, values of stress optic coefficient, Youngs modulus, etc 22 p3991 A66-40196
- YS-11 AIRCRAFT**
YS NIHON YS-11 AIRCRAFT
YTTERBIUM
Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet 01 p0079 A66-10241
Anisotropy of ytterbium iron garnet and ytterbium-doped yttrium iron garnet crystals measured by torque method in applied magnetic fields 04 p0563 A66-13812
Isotopic shift in components of five even ytterbium isotopes measured on ten spectral lines of neutral and ionized atom 15 p2557 A66-28527
- ytterbium isotopes measured on ten spectral lines of neutral and ionized atom 15 p2557 A66-28527
- YTTRIUM**
Spin-phonon interaction induced by ultrasonic wave in yttrium ferrite single crystals 08 p1278 A66-19629
Corrosion resistance of yttrium is higher at higher pH because of slower anodic process 10 p1546 A66-21747
Fraunhofer spectrum of singly ionized yttrium extended in IR solar spectrum 18 p3236 A66-34892
- YTTRIUM ALLOY**
Yttrium effect on recrystallization and grain growth of tantalum 07 p1052 A66-18350
High temperature oxidation of liquid yttrium and liquid lanthanides and their alloys with gold, obtaining parabolic diffusion-controlled rate constants 08 p1235 A66-18622
Low temperature resistivity of yttrium-based alloys containing small amounts of rare earth metals, deriving exchange integrals from resistivity data 09 p1430 A66-20846
Yttrium-containing columbium alloy strength, ductility and weldability 11 p1719 A66-23397
Lattice parameters and constant measured in gadolinium-yttrium alloy dihydrides, using X-ray diffraction techniques 13 p2162 A66-25382
Molybdenum recrystallization as affected by La and Y additions under various types of heat treatment 15 p2520 A66-28670
Aging behavior and mechanical properties of three wrought high-strength magnesium-yttrium alloys 18 p3122 A66-33751
- YTTRIUM-ALUMINUM GARNET /YAG/ CRYSTAL**
Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet 01 p0079 A66-10241
Neodymium doped YAG crystal and lithium meta niobate as CW laser materials and potassium tantalum niobate as optical modulator material 13 p2164 A66-25518
Neodymium-doped yttrium-aluminum garnet crystal laser oscillator as regenerative amplifier of noise 13 p2103 A66-26212
Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG 15 p2512 A66-28690
Ultrashort optical pulses generated by mode locking continuous neodymium doped yttrium-aluminum garnet laser 15 p2517 A66-29391
Sun pumped continuous wave one-watt YAG crystal laser, noting equipment setup and output duration 17 p2934 A66-32620
Stark components of excited states of trivalent neodymium ion in yttrium aluminum garnet and yttrium gallium garnet host lattices 18 p3157 A66-34513
Stimulated emission, absorption spectra and luminescence of neodymium-activated YAG crystals in pulsed laser 21 p3748 A66-39306
- YTTRIUM COMPOUND**
Yttrium vanadate crystals grown and processed for optical purposes 19 p3373 A66-35434
- YTTRIUM-IRON GARNET /YIG/ CRYSTAL**
Delay characteristics of round and square magnetized rods of yttrium-iron garnet /YIG/ crystals compared 01 p0120 A66-10522
Line widths of some gallium-substituted polycrystalline garnets prepared at liquid-helium temperature 01 p0121 A66-10561
Resonance linewidth deduced from unloaded Q measure of YIG single-crystal ball in waveguide 01 p0122 A66-10580
Spin wave excitation of magnetoacoustic oscillation modes and beating of these modes in yttrium-iron garnet /YIG/ 01 p0126 A66-10965
Compression of linear FM S-band pulses in axially magnetized yttrium-iron-garnet delay line 02 p0192 A66-11883
Transmission and attenuation of elastic and magnetoelastic waves in yttrium iron garnet 03 p0408 A66-12416
Second harmonic power up to 8 gc from YIG-tuned transistor 03 p0339 A66-12440
- Audiofrequency hysteresis loops and initial permeabilities of single-crystal yttrium iron garnet cores with annealing and silicon substitution 04 p0562 A66-13750
Anisotropy of ytterbium iron garnet and ytterbium-doped yttrium iron garnet crystals measured by torque method in applied magnetic fields 04 p0563 A66-13812
Reflection and transmission coefficients of magnetically biased YIG ferrimagnetic resonator loaded in aperture of iris in coaxial transmission line 05 p0641 A66-14555
Yttrium iron garnet /YIG/ delay line application to radar range and amplitude calibrator, altitude simulator, microwave memory and electronically steerable antenna array 06 p0842 A66-15983
Yttrium iron garnet filters, noting envelope limiting characteristics for submegacycle range modulating frequencies and response parameters 06 p0845 A66-16089
Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104
Parametric generation and amplification of magnetoelastic waves in single-crystal yttrium iron garnet cylinder at L-band at room temperature 06 p0851 A66-16457
Gallium arsenide tunnel diode oscillator tuned with 5-10 GHz YIG 06 p0853 A66-16648
YIG resonator tuning for low noise parametric amplifier 07 p1006 A66-17504
Nonlinear phenomena and relaxation oscillations associated with magnetoelastic propagation in yttrium iron garnet 08 p1198 A66-19751
Oscillating and amplifying characteristics of degenerate microwave amplifier using ferromagnetic yttrium iron garnet 12 p1845 A66-24851
IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881
Capacitance type ferrite transducers consisting of polycrystalline yttrium garnet of high resistivity 14 p2252 A66-27248
YIG magnetostatic mode serrodyne capable of milliwatt modulation power levels through 30 mc/s 15 p2463 A66-29029
Insertion loss of room temperature magnetoelastic waves in yttrium iron garnet from 1.6 to 8.5 gc 16 p2715 A66-30892
Magnetostatic spin wave propagation at microwave frequencies in magnetized rod 17 p2980 A66-32648
Properties and performance capabilities of solid state delay lines composed of materials such as quartz, sapphire and YIG having low loss acoustic propagation 19 p3319 A66-36032
Excitation of magnetoelastic waves at 200 to 3000 mc at room temperature in yttrium garnet single crystals obtained by gradual crystallization from yttrium and ferric oxides 20 p3617 A66-37479
Amplification by parallel pumping of traveling magnetostatic waves in normally magnetized single-crystal disk of YIG 20 p3624 A66-38410
YIG resonators, oscillators and filters in microwave design 22 p3880 A66-40737
Insertion loss and delay characteristics vs frequency of one-port ferrimagnetic yttrium iron garnet delay line for pulse compression at microwave frequencies 23 p4035 A66-41028
Magnetostriction constants measured at room temperature for YIG single crystals after replacing fraction of iron ions by silicon 23 p4114 A66-41626
Magnetostriction of yttrium terbium ferrite garnets, noting absence of correlation between temperature dependences of magnetostriction and magnetization for high Tb content 24 p4256 A66-42518
Resonance curve analysis from microwave absorption measurements on polycrystalline ferrimagnetic doped and undoped garnets at room and low temperatures, with application to low noise receivers 24 p4260 A66-43172
- YTTRIUM OXIDE**
Energy level and crystal-field splitting of neodymium ion in yttrium oxide 18 p3157 A66-34514
- YUKAWA POTENTIAL**
Dynamics of baryon-meson systems in 27-fold representation, obtaining self-consistent bound state and low lying resonant solutions with Balazs method 15 p2544 A66-28945
N/D and determinantal methods of partial wave dispersion relations applied to Yukawa

potential scattering 18 p3138 A66-34453

Z

Z TRANSFORM

Sampled data control systems using z-transform method when sampling device is followed by data hold 06 p0886 A66-16749

ZEEMAN EFFECT

Linewidth parameters for self-broadening and foreign gas broadening of water line measured, noting temperature dependent result and Zeeman components 03 p0443 A66-12342

Zeeman effects in fluorescent edge emission and absorption spectra of zinc oxide platelets, noting magnetic splitting 04 p0561 A66-13724

Shifts in output frequency of cesium vapor magnetometer due to temperature, light intensity and orientation, noting Zeeman component and geomagnetic field 05 p0678 A66-14968

Constants A and B of cesium superline structure calculated from magnetic sublevel intersections 05 p0741 A66-15859

Nonlinear Zeeman effect for gas laser 08 p1234 A66-19638

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 09 p1357 A66-20792

Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition which is also producing laser oscillation 10 p1541 A66-21177

Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 12 p1890 A66-24224

Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 12 p1891 A66-24885

Multiple quantum equations for mode amplitude and frequency determination for magnetic field-tuned gas optical maser 13 p2101 A66-26200

Dependence of Zeeman beat frequency on interferometer tuning in single-mode He-Ne laser with various gas pressures and magnetic field strengths 13 p2101 A66-26201

Atomic Zeeman patterns using strong pulsed magnetic fields for electronic transitions for Si, Cu, C, O, Ca, Mg and B 18 p3137 A66-33990

Nonlinear Zeeman effect for gas laser 18 p3119 A66-34181

Tunable birefringent Fabry-Perot interferometer used in study of solar magnetic fields, using Zeeman effect 20 p3558 A66-37289

Ground-state spin memory in excited state of ruby under broadband optical pumping, observing change in relative populations of Zeeman components 20 p3578 A66-37596

Quenching and hysteresis effects between Zeeman oscillations on single axial mode observed in near-zero magnetic fields for short planar laser 21 p3747 A66-39116

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 22 p3931 A66-39851

Electron paramagnetic resonance and optical spectra of trivalent erbium in type II crystals of calcium fluoride disclose existence of cubic, tetragonal and trigonal sites 22 p3961 A66-39916

Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 22 p3933 A66-40586

Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 23 p4076 A66-41092

ZENER DIODE

Silicon monolithic integrated circuit or solid circuit design, noting electrical and economical features 02 p0209 A66-11923

Optimum performance voltage sources with silicon reference elements 04 p0491 A66-13382

Ionization threshold observation in Si Zener diodes and multiplication factor 10 p1509 A66-21586

Polarized varactor diodes used in avalanche zone as intense white noise source 13 p2031 A66-25408

Zener diode voltage stabilizer design 14 p2254 A66-27715

Device having symmetrical voltage-current characteristics acting as rectifier of pulse or even harmonic distorted waveforms, using Zener diodes 19 p3315 A66-35561

Application of regulation factor in designing temperature-compensated Zener diode references 20 p3534 A66-38300

Performance characteristics of avalanche-breakdown transit-time GaAs varactor diodes for miniaturized microwave circuits 22 p3874 A66-39991

Voltage control by means of Zener diode, transistor and variable-gain amplifier circuit 23 p4044 A66-41214

Curves computed for avalanche multiplication and Zener tunneling for gallium arsenide specimens of various thicknesses 24 p4258 A66-42958

ZERO ANGLE OF ATTACK

Optimal contours minimizing pressure drag of symmetric wings, assuming zero angle of attack and sharp edges, using Ackert linear flow theory 11 p1630 A66-22503

Tension shell theory applied to Voyager mission, noting equations for lateral loading for entry at zero angle of attack, shear and bending of wall role, etc 14 p2407 A66-28027

ZERO CROSSING

Zero-crossing data and decision-making procedures used by computer in recognition of vowels 03 p0338 A66-13020

Zero crossing principle for detecting weak narrow band signals immersed in Gaussian noise, discussing application to incoherent detection of stationary radar target 18 p3067 A66-33836

ZERO FORCE CURVE

Shell with positive curvature and zero moment state examined, determining sufficient condition for secondary potential load 13 p2203 A66-26420

Neutral /zero/ points and geometry of solar magnetic fields 19 p3455 A66-35254

ZERO GRAVITY

S WEIGHTLESSNESS

ZETA MACHINE

Zeta/solar lines between 170 and 220 angstroms, examining similarity of iron spectra 10 p1602 A66-21089

Plasma stability increase in Zeta discharge as affected by such initial conditions as pressure and theta pinch parameter 19 p3429 A66-36583

Microwave transmission through turbulent plasma of Zeta machine, examining transport theory by use of Boltzmann equation 19 p3429 A66-36584

ZINC

Zinc effect on mechanical properties and microstructure of Al-Si-Cr-Mg alloy 03 p0382 A66-12724

Copper and zinc abundances in carbonaceous, enstatite and ordinary chondrite determined by neutron activation techniques 08 p1291 A66-19093

Orientation effect on zinc diffusion rate in p-n junctions, using gallium arsenide single crystals as initial material 09 p1412 A66-19996

Twelve distinct mass series identified and mass values determined as function of orientation of magnetic field in Fermi surface of zinc at cyclotron resonance 10 p1581 A66-21735

Chemical composition effect on fracture properties of Al-Zn-Mg-Cu alloys 14 p2317 A66-28009

Anomalous diffusion of zinc in indium antimonide, noting two diffusion currents 14 p2367 A66-28240

Effective capture cross section for holes by singly negatively charged zinc atoms in p-silicon determined by double injection method 14 p2369 A66-28261

Type II collision roles in population buildup in zinc vapor and in zinc mercury vapor mixture 17 p2960 A66-33511

Separation centers and dislocations during diffusion of Zn into GaAs at high temperatures, analyzing photographs of p-n junctions 19 p3445 A66-36339

Zn diffusion effect on uniformly Mn-doped GaAs wafer showing via radiotracer technique changes in impurity concentration profile 24 p4250 A66-42255

ZINC ALLOY

SA BRASS

Aging characteristics of Al-Zn-Mg alloys 03 p0381 A66-12722

Cr and Mn effects on aging mechanism and anticorrosion properties of Al-Zn-Mg alloys 03 p0381 A66-12723

Relaxation constant in p-type silicon crystals alloyed with zinc, examining carrier recombination 10 p1588 A66-22163

X-ray study of 16 monolith and powdered brass samples with 30.07 to 40.1 percent copper, indicating two phase fields for gamma region of Cu-Zn system 12 p1896 A66-24866

Corrosion mechanism for eutectic or near-eutectic Mg-Zn alloys in halide solution 13 p2110 A66-26026

Nickel, nickel-zinc and magnesium-zinc ferrite thin films, using chemical deposition on alumina substrates for millimeter wave application 18 p3153 A66-33732

Relaxation constant in p-type silicon crystals alloyed with zinc, examining carrier recombination 19 p3441 A66-35777

Magnetic properties of ferromagnetic zinc-zirconium alloy between 120 degrees and 0.1 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-39000

Compensation of positive and negative anisotropies in ZnNi and ZnLi ferrites, noting effects of magnetization, wall motion and temperature on rotational permeability 21 p3803 A66-39203

Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885

ZINC ANTIMONIDE

Single crystal p-type zinc antimonide in thermoelectric, thermoconductivity and electronic transport measurements 08 p1275 A66-19365

Zinc-antimonide with high and constant thermoelectric figure of merit obtained by solid phase diffusion 13 p2163 A66-25453

ZINC COMPOUND

Energy band structure via reflection spectra of crystals of ternary zinc compound containing elements of Periodic Groups II, IV and V 11 p1750 A66-22342

Time decrease of initial permeability in manganese zinc ferrite, noting increase in magnetic loss due to increasing disaccommodation 13 p2166 A66-25881

High energy density Zn/O battery system, noting good low oxygen pressure and low temperature performance characteristics 23 p4022 A66-41759

ZINC OXIDE

Acoustic propagation at microwave frequencies discussing generation, propagation, detection and reflection experiments with quartz crystals and ZnO transducers 04 p0480 A66-13680

Zeeman effects in fluorescent edge emission and absorption spectra of zinc oxide platelets, noting magnetic splitting 04 p0561 A66-13724

UV irradiation effect on electrical conductivity of zinc oxide single crystals 07 p1097 A66-17469

Oxygen interacting with zinc oxide and UV-irradiated magnesium oxide studied, using electron paramagnetic resonance techniques 12 p1916 A66-23618

Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675

Feasibility of doping techniques for eliminating extraterrestrial solar degradation of ZnO used as pigment for spacecraft thermal control surfaces 17 p2938 A66-31961

Pulsed operation of electron-beam pumped zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-37768

Electrical properties and fabrication of zinc oxide-bismuth oxide low Q capacitor with high apparent dielectric constant over wide frequency range 24 p4180 A66-42311

ZINC SELENIDE

Zinc selenide as highly refractory substance in dielectric mirror layers for laser resonators and interference filters 02 p0238 A66-11252

Electron spin resonance center in ZnSe after electron bombardment measured with low temperature microwave

cavity 06 p0934 A66-17124
 Lattice vacancies and interstitials in II-VI compounds of cadmium sulfide and zinc selenide caused by electron bombardment often determine advantages or limits of material 06 p0935 A66-17130
 Isolated vacancy interstitial pairs produced in ZnSe lattice by electron bombardment at low temperature 06 p0939 A66-17153
 Efficiency of DC electroluminescence produced when minority carriers are injected into n-type ZnSe crystals depends on injection efficiency at 07 p1097 A66-17342
 P-n homojunctions in zinc selenide, preparation and properties 15 p2567 A66-29411
 Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154

ZINC-SILVER BATTERY
S SILVER-ZINC BATTERY
ZINC-SILVER OXIDE BATTERY
 Zinc-silver oxide battery for extreme temperatures, noting electrode utilization efficiencies as function of current density 08 p1173 A66-19662

ZINC SULFIDE
 Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 01 p0125 A66-10781
 Light reflection by planes perpendicular to c axis in zinc sulfide crystals containing stacking faults 04 p0567 A66-14337
 Photocapacitive effect for determining degree of anisotropy of zinc sulfide with stacking faults 04 p0571 A66-14498
 Fine structure exhibited by near IR absorption and emission spectra of copper ions in ZnS and CdS crystals recorded at low temperatures 05 p0742 A66-15874
 Stimulated state, stable, lasting and reproducible, in electroluminescent cells of sublimated zinc sulfide film obtained upon passage of increasing DC voltage through them at 77 degrees K 07 p1099 A66-17914
 Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 11 p1749 A66-22294
 Applied voltage, frequency and temperature gradient effects on ZnS /Cu/ electroluminescent cells 11 p1640 A66-22665
 Transmission spectra, electroluminescence-brightness variations with applied frequency and voltage and physical properties of ZnS thin films 14 p2361 A66-27315
 Transient acoustoelectric interaction in CdS and ZnS crystals during single transit, measuring electron drift 15 p2563 A66-28758
 Valence-band bending to Fermi level and radiative recombination in zinc sulfide with liquid electrodes 16 p2771 A66-30201
 Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971
 Crystallographic polarity dependent rectification in ZnS single crystals 18 p3153 A66-33610
 Stimulated state, stable, lasting and reproducible, in electroluminescent cells of sublimated zinc sulfide film obtained upon passage of increasing DC voltage through them at 77 degrees K 18 p3155 A66-34174
 Enhancement of optical second-harmonic generation by reflection phase matching in ZnS and GaAs 19 p3375 A66-36074
 Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS 21 p3747 A66-39114

ZINC TELLURIDE
 Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 01 p0125 A66-10780
 Conductivity and Hall coefficient for zinc-mercury-telluride solid solution 07 p1105 A66-18366
 Specific conductivity, Hall, Nernst-Ettingshausen and other transfer effects in InAs-CdTe and InAs-ZnTe 09 p1428 A66-20539
 Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular

compositions 11 p1749 A66-22293
 Dependence of electric properties of sublimated zinc telluride films on specimen thickness, substrate preheating temperature and sign of current 13 p2160 A66-25098
 Electroluminescence and emission spectra of indium-alloyed diodes made from phosphorus doped p-type ZnTe biased in either forward or reverse direction at liquid nitrogen temperatures 13 p2029 A66-25184
 In, Ga and Cu impurity effects on absorption spectrum of zinc telluride 15 p2565 A66-29199
 Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971
 In, Ga and Cu impurity effects on absorption spectrum of zinc telluride 17 p2982 A66-33048
 Optical transition in zinc telluride attributed to oxygen substituting isoelectronically for tellurium, classifying isoelectronic traps into donors and acceptors 20 p3622 A66-38250

ZINC TUNGSTATE
 Splitting of electron paramagnetic resonance lines of zinc-tungstate crystals, discussing parameters and experimental technique 05 p0738 A66-15356
 Splitting of EPR lines of trivalent Cr ion in zinc tungstate by external electric field, noting angular dependence and corresponding spin Hamiltonians 20 p3615 A66-37370

ZIRCONIUM
 Titanium and zirconium technology, comparing physical and mechanical properties with structural metals, noting niobium in nuclear application 02 p0244 A66-11744
 Quantitative determination of Nb in large amounts of Zr and Ti in large amounts of Nb and Zr at high temperature, using oscillographic polarography 06 p0823 A66-16840
 Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 07 p1049 A66-17906
 Nitriding of zirconium at 1400 to 1700 degrees C in nitrogen atmosphere 09 p1390 A66-20861
 Extension of electron gas model to transition metals /titanium, zirconium, hafnium/, considering atom interaction up to fourth neighbor 10 p1546 A66-21664
 Depressing effect of hafnium and zirconium on work function of tungsten, tantalum, niobium and rhenium 14 p2314 A66-27369
 Vibrational nucleation of zirconium droplets burning in free fall, noting supercooling participation in formation of spearpoints 14 p2414 A66-28175
 Refractory ceramics for air breathing engine for Mach 7 aircraft, noting zirconia properties 16 p2790 A66-30257
 Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355
 Zr-coated tungsten cathode in reducing divergence of electron beam emission 18 p3088 A66-35077
 Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 21 p3752 A66-39406
 Effect of manganese and zirconium additions on recrystallization temperature and grain size of aluminum alloys 23 p4081 A66-41404
 Nb-Zr strip superconductor for stabilization of critical current anisotropy and coil degradation in magnets 24 p4186 A66-43176

ZIRCONIUM ALLOY
 High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 04 p0535 A66-13435
 Electrical resistivity of Nb-Zr alloys of four compositions determined as functions of temperature from 4.2 to 273.2 degrees K with nearly linear dependence 04 p0562 A66-13740
 Zirconium-niobium alloy analyzed by oxide replica technique, noting superconductivity and tunnel effect, determining relation between superconductivity current critical

density and sample structural characteristics 14 p2314 A66-27368
 Oxygen addition to niobium-zirconium alloys at high temperatures, noting oxygen solubility and oxide precipitation 14 p2315 A66-27492
 Mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in heat treatment 15 p2523 A66-29194
 Critical current dependence on external perpendicular magnetic field of Nb-Zr wires with deformation and heat treatment 15 p2569 A66-29786
 Thermal shock resistance of zirconia with 15 mole percent titanium determined by radially quenching disks with thermally insulated faces 19 p3381 A66-35978
 Improved thermal shock resistance of zirconia upon addition of 15 mole percent titanium attributed to metal in grain boundary 19 p3381 A66-35979
 Vanadium addition effect on critical current and transition temperature of niobium-zirconium alloy 19 p3386 A66-36449
 Solubility and phase transformation in titanium-zirconium system, using X-ray diffraction techniques 20 p3585 A66-37786
 High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 20 p3586 A66-38137
 Magnetic properties of ferromagnetic zinc-zirconium alloy between 120 degrees and 0.1 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-39000
 Self-diffusion parameters of Nb in solid solutions with beta-Ti and beta-Zr at high temperatures 22 p3937 A66-40925

ZIRCONIUM CARBIDE
 X-ray measurements of thermal expansion of arc-cast carbides of titanium, zirconium and hafnium 03 p0381 A66-12636
 Performance of thermionic converters using clad and unclad UC-ZrC emitters operated at high temperatures, noting cesium pressure effect 05 p0619 A66-15566
 Fabrication methods for production of uranium-zirconium monocarbide spherical particles for thermionic emitters 05 p0714 A66-15587
 Work function for thermionic emission of TaC and ZrC refractory metal carbides in vacuum and in cesium vapor 12 p1922 A66-24220
 Two oxycarbide phases in zirconium-carbon-oxygen compositions found in zirconia-carbon mixtures at high temperatures, giving X-ray diffraction patterns indexed as fcc at various lattice parameters 16 p2729 A66-30246

ZIRCONIUM COMPOUND
 Shrinkage process in zirconium diboride during sintering, noting variation with length of isothermal processing 14 p2310 A66-26789

ZIRCONIUM HYDRIDE
 Slow-bend impact testing of embrittlement of zirconium by hydrogen 06 p0895 A66-16356

ZIRCONIUM NITRIDE
 Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 05 p0704 A66-15817
 Thermionic and adsorptive properties of zirconium nitride in cesium vapor, determining current-voltage characteristics and temperature dependence 16 p2755 A66-31732
 Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 23 p4083 A66-41383

ZIRCONIUM OXIDE
 Solid oxide electrolyte with hydrogen fuel, discussing cell thermodynamics, application limitations, etc 07 p0996 A66-18474
 Measured thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powders 10 p1546 A66-21538
 Theoretical expression for thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powder 10 p1546 A66-21539
 Refractory oxides from alkoxides for group IVB transition and rare-earth metals applied to powders and coating of zirconia materials by thermal decomposition 16 p2730 A66-30249
 Rolling friction studies of intermetallic and zirconium oxide for control surface bearings

for space reentry vehicle
[ASLE PAPER 66AM 5D4] 16 p2712 A66-30413

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range 16 p2777 A66-30872

Hardness and microstructure of sintered alloys of molybdenum with oxides of aluminum and zirconium obtained by powder metallurgy methods 17 p2939 A66-32394

Oxygen regeneration in solid electrolyte cell, constructed from zirconia based ceramic material for space flights [AICE PREPRINT 20E] 17 p2848 A66-32872

ZIRCONIUM TITANATE

Temperature and bias characteristics of ceramics of Pb/Zr-Ti/O-3 and its families, using schematic model on reorientations of 180 and 90 degree domains 08 p1243 A66-19061

ZODIACAL DUST CLOUD

Comparison of circumterrestrial and heliocentric dust cloud contributions to integral brightness of zodiacal light 05 p0668 A66-14881

Interplanetary dust dynamics, discussing comet tails, electric charge carrying properties, etc 08 p1287 A66-18635

ZODIACAL LIGHT

Zodiacal light position considering ecliptic, based on photoelectric observation 01 p0061 A66-10275

Data on origin and effects of dust particles in interplanetary space obtained from solar corona, zodiacal light and meteor observation 03 p0425 A66-12850

Interplanetary medium observation from zodiacal light and radio wave scattering during radio source occultation and influence on galactic and solar cosmic rays 03 p0425 A66-12852

Comparison of circumterrestrial and heliocentric dust cloud contributions to integral brightness of zodiacal light 05 p0668 A66-14881

Diurnal variation of zodiacal light at north celestial pole measured at 5300 angstroms 09 p1374 A66-20891

Zodiacal light and atmospheric continuum examined via new photoelectric 30-cm telescope 10 p1526 A66-21125

Zodiacal light brightness measured by Fabry-type electrophotometer 11 p1697 A66-22430

Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 12 p1945 A66-23510

Variations of zodiacal light and airglow, suggesting correlation with solar and lunar cycle 14 p2283 A66-27096

Gegenschein brightness near 5300 angstroms deduced from photoelectric measurements finding no long period variations, no correlation with airglow, solar flares, etc 16 p2800 A66-30655

Night sky and zodiacal light polarization near 5000 angstroms over celestial sphere, noting dependence of zodiacal light distribution on angular distance from sun 16 p2698 A66-31259

Anomalous brightness of post-twilight evening sky in near IR, considering zodiacal light 17 p2920 A66-32998

Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 20 p3646 A66-37023

Zodiacal-light photometric measurements, analyzing effect of twilight radiation on observable brightness 20 p3549 A66-37036

Comet disintegration as basic source of interplanetary dust based on zodiacal isophots 20 p3549 A66-37037

Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42663

ZONAL HARMONICS

Planetary wave analysis using zonal harmonics in connection with atmospheric circulation and weather forecasting 01 p0064 A66-11106

Odd zonal harmonics in Earth gravitational

potential determined by analyzing changes in eccentricities of satellites, with orbital inclinations spaced uniformly 09 p1374 A66-20883

Even zonal harmonics in terrestrial gravitational potential, noting agreement between coefficients obtained from satellite measurements 11 p1702 A66-23493

Inclusion of third zonal harmonic in accurate reference orbit of artificial satellite 14 p2378 A66-27112

Small-scale wind variations in stratosphere and mesosphere studied by high resolution Robin falling-sphere soundings 16 p2740 A66-30510

Annual variations in atmospheric lunar tides attributed primarily to vertical shear of zonal wind systems 16 p2698 A66-31112

Zonal harmonics in external potential of Earth determined from secular motion of satellite orbits 17 p2921 A66-33227

Quasi-geostrophic instability of disturbance of small amplitude in baroclinic zonal flows caused by barotropic, baroclinic or critical layer instabilities 20 p3550 A66-37467

Baroclinic instability of quasi-geostrophic perturbation to zonal wind in two-layer inviscid model, examining short wavelength cut-off in terms of potential vorticity 20 p3550 A66-37468

Analytic formulae application for determining perturbations of orbital elements produced by zonal harmonics in case of great eccentricities 20 p3654 A66-37852

Finite amplitude disturbances in baroclinic atmosphere, considering interaction with zonal current and effect of upward eddy transport upon time change of mean static stability 21 p3759 A66-39205

Dynamic stability of waves in stratosphere, examining vertical transfer of energy from troposphere to stratosphere weakened at tropopause 21 p3734 A66-39219

Thermospheric energetics characterized as series of superposed and interconnected atmospheric heat engines and refrigerators 22 p3913 A66-40537

Zonal wind distribution and variation in equatorial stratosphere and lower mesosphere 23 p4065 A66-41841

ZOND I SPACE PROBE

Scattered Lyman alpha radiation measurements near Earth and in interplanetary space by Zond I, using NO-filled photon counters with LIF windows 10 p1596 A66-21049

ZOND II SPACE PROBE

Cosmic radio emission at frequencies of 210 and 2200 kc at distances up to 8 earth radii measured by Zond-2 automatic interplanetary station 02 p0283 A66-11661

ZOND III SPACE PROBE

Zond III photographs of lunar far side taken July 20, 1965 noting Oceanus Procellarum, Mare Orientale and thalassoids 04 p0578 A66-14023

Zond III photographic survey of far side of Moon 09 p1463 A66-19904

ZONE

S AURORAL ZONE

S BRILLOUIN ZONE

S RECOVERY ZONE

ZONE MELTING

Relationships between purity, structure and mechanical properties of 18/8 stainless steels prepared in laboratory by fusion and casting under vacuum 07 p1048 A66-17454

Zone melting effect on mechanical properties of niobium on isochronal annealing after cold swagging 07 p1052 A66-18351

Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc, noting hole concentration plotting 08 p1278 A66-19625

Electron Hall mobility from 4 to 300 degrees K with undoped single crystals of GaAs grown in quartz boats by Bridgman method and zone-melting technique 09 p1430 A66-20848

Single crystal germanium films grown on molybdenum or tungsten substrates, using electron beam zone melting process 15 p2563 A66-28726

Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc, noting hole

concentration plotting 17 p2984 A66-33139

ZONE REFINING

Quenched-in vacancy data estimated by analysis of quenched-in resistivity in zone-refined aluminum 08 p1240 A66-19062

Cadmium sulfide single crystal preparation by zone sublimation method, analyzing structure via X-ray diffraction and obtaining photosensitivity curves 13 p2165 A66-25680

ZONING TECHNIQUE

Method of zones for calculation of temperature distribution in components of complicated artificial satellites [ASME PAPER 65-WA/HT-47] 05 p0792 A66-15662

Porosity zoning and matrix material effect on performance of self-cooled nozzle throat inserts 19 p3450 A66-35629
